**III. FUNDING:**

**For Fiscal Intermediaries (FIs), Regional Home Health Intermediaries (RHHIs) and/or Carriers:**

No additional funding will be provided by CMS; Contractors activities are to be carried out with their operating budgets

**For Medicare Administrative Contractors (MACs):**

The Medicare Administrative contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC statement of Work. The contractor is not obliged to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

**SUBJECT: Healthcare Provider Taxonomy Codes (HPTC) Update, October 2012**

**EFFECTIVE DATE: October 1, 2012**

**IMPLEMENTATION DATE: January 7, 2013**

## I. GENERAL INFORMATION

**A. Background:** The HPTC set is maintained by the National Uniform Claim Committee (NUCC) for standardized classification of health care providers. The NUCC updates the code set twice a year with changes effective April 1 and October 1. The HPTC set is available for view or for download from the Washington Publishing Company (WPC) Web site at [www.wpc-edi.com/codes](http://www.wpc-edi.com/codes).

This CR implements the NUCC HPTC code set that is effective on October 1, 2012. The changes for October consist of the addition of two new HPTCs, both under the Individual Section, for Dental Provider types:

125J00000X Dental Therapist Classification

125K00000X Advanced Practice Dental Therapist Classification

There are no other changes to the October 2012 code set.

When reviewing the HPTC set online, revisions made since the last release can be identified by the color code: new items are green; modified items are orange; and inactive items are red.

Contractors with the capability to do so are to implement the updated code set effective with claims received on and after October 1, 2012. Contractors without this capability are to implement the updated code set as early as they can in accordance with the October 1, 2012, effective date, but not beyond January 1, 2013.

**B. Policy:** The Health Insurance Portability and Accountability Act of 1996 (HIPAA) requires that covered entities use the standards adopted under this law for electronically transmitting certain health care transactions, among them health care claims. The standards include implementation guides which dictate when and how data must be sent, including specifying the code sets which must be used. The Transactions and Code Sets Final Rule, published on August 17, 2000, establishes that the maintainer of the code set determines its effective date. This rule also mandates that covered entities must use the nonmedical data code set specified in the standard implementation guide that is valid at the time the transaction is initiated. For implementation purposes, Medicare generally uses the date the transaction is received for validating a particular nonmedical data code set required in a standard transaction.

Health care claims are among the health care transactions for which standards were adopted under HIPAA. Among the current versions of the standard implementation guides for health care claim transactions are the 5010 versions of the ASC X12 837 Institutional Technical Report 3 (TR3) for institutional claims and the ASC X12 837 professional TR3 for professional (and some supplier) claims. (There are other standards for other types of claims).

Both the current ASC X12 837 institutional and professional TR3s require that the NUCC HPTC set be used to identify provider specialty information on a health care claim. However, they do not mandate the reporting of provider specialty information: they do not mandate that a HPTC be on every claim, nor for every provider to

be identified by specialty there. They state that this information is

"Required when the payer's adjudication is known to be impacted by the provider taxonomy code."

(AND)

"If not required by this implementation guide, do not send."

Medicare does not use HPTCs to adjudicate its claims. It would not expect to see these codes on a Medicare claim. However, currently, it validates any HPTC that a provider happens to supply against the NUCC HPTC code set.
