

Eligible Professional Meaningful Use Menu Set Measures Measure 10 of 10

Stage 1 (2013 Definition)

Last updated: April 2013

Syndromic Surveillance Data Submission	
Objective	Capability to submit electronic syndromic surveillance data to public health agencies and actual submission according to applicable law and practice.
Measure	Performed at least one test of certified EHR technology's capacity to provide electronic syndromic surveillance data to public health agencies and follow-up submission if the test is successful, (unless none of the public health agencies to which an EP submits such information has the capacity to receive the information electronically) except where prohibited.
Exclusion	An EP who does not collect any reportable syndromic information on their patients during the EHR reporting period, does not submit such information to any public health agency that has the capacity to receive the information electronically, or if it is prohibited.

Definition of Terms

Public Health Agency -- An entity under the jurisdiction of the U.S. Department of Health and Human Services, tribal organization, State level and/or city/county level administration that serves a public health function.

Attestation Requirements

YES / NO / EXCLUSION

- Eligible professionals (EPs) must attest YES to having performed at least one test of certified EHR technology's capacity to submit electronic syndromic surveillance data to public health agencies and follow up submission if the test was successful (unless none of the public health agencies to

which the EP submits such information has the capacity to receive the information electronically), except where prohibited, to meet this measure.

- **EXCLUSION:** If an EP does not collect any reportable syndromic information on their patients during the EHR reporting period, if no public health agency that has the capacity to receive the information electronically, or if it is prohibited, then the EP is excluded from this requirement. EPs must select NO next to the appropriate exclusion, then click the APPLY button in order to attest to the exclusion.

Additional Information

- The test to meet the measure of this objective must involve the actual submission of electronic syndromic surveillance data to public health agencies, if one exists that will accept the information. Simulated transfers of information are not acceptable to satisfy this objective.
- The transmission of electronic syndromic surveillance data is not required for the purposes of a test. The use of test information about a fictional patient that would be identical in form to what would be sent about an actual patient would satisfy this objective.
- An unsuccessful test to submit electronic syndromic surveillance data to public health agencies will be considered valid and would satisfy this objective.
- If the test is successful, then the EP should institute regular reporting with the entity with whom the successful test was conducted, in accordance with applicable law and practice. There is not a measurement associated with this reporting.
- EPs must test their ability to submit electronic syndromic surveillance data to public health agencies at least once prior to the end of the EHR reporting period. Testing may also occur prior to the beginning of the EHR reporting period. Each payment year requires its own unique test.
- If multiple EPs are using the same certified EHR technology in a shared physical setting, testing would only have to occur once for a given certified EHR technology.
- The transmission of syndromic surveillance information must use the standards at 45 CFR 170.302(l).
- This specification sheet has been updated to reflect the applicable Stage 1 provisions in the [Stage 2 Meaningful Use Final Rule](#), published on September 4, 2012.

Related Meaningful Use FAQs

To see the FAQs, click the New ID # hyperlinks below, or visit the CMS FAQ web page at <https://questions.cms.gov/> and enter the New ID # into the Search Box, clicking the “FAQ #” option to view the answer to the FAQ. (Or you can enter the OLD # into the Search Box and click the “Text” option.)

- To meet the public health meaningful use objectives (submitting information to an immunization registry, reporting lab results to a public health agency, or reporting syndromic surveillance information), does a provider have to send information directly from their certified EHR technology to the appropriate receiving entity or can they use an intermediary such as a HIE or another third-party software vendor? [New ID #3461](#), [Old ID #10764](#)
- If my certified EHR technology only includes the capability to submit information to an immunization registry using the HL7 2.3.1 standard but the immunization registry only accepts information formatted in the HL7 2.5.1 or some other standard, will I qualify for an exclusion

because the immunization registry does not have the capacity to receive the information electronically? What if the immunization registry has a waiting list or is unable to test for other reasons but can accept information formatted in HL7 2.3.1, is that still a valid exclusion?

- Will the requirement that EPs and eligible hospitals choose at least one public health objective among the meaningful use measures still apply to those States that ask CMS for approval to change the definition of meaningful use? [New ID #3119](#), [Old ID #10532](#)
- If an EP is unable to meet the measure of a meaningful use objective because it is outside of the scope of his or her practice, will the EP be excluded from meeting the measure of that objective? [New ID #2883](#), [Old ID #10151](#)
- How should EPs select menu objectives? [New ID #2903](#), [Old ID # 10162](#)
- Where can I find a list of public health agencies and immunization registries to submit my data as required by the public health objectives? [New ID #3605](#), [Old ID #10841](#)
- What is the definition of "syndromic surveillance"? [New ID #3615](#), [Old ID #10846](#)

Certification and Standards Criteria

Below is the corresponding certification and standards criteria for electronic health record technology that supports achieving the meaningful use of this objective.

Certification Criteria	
§170.302(l) Public health surveillance	Electronically record, modify, retrieve, and submit syndrome-based public health surveillance information in accordance with the standard specified in §170.205(d)(1) or §170.205(d)(2).

Standards Criteria	
Electronic submission to public health agencies for surveillance or reporting.	<ul style="list-style-type: none"> • §170.205(d)(1) - HL7 2.3.1. • §170.205(d)(2) - HL7 2.5.1.

- In the Initial Set of Standards, Implementation Specifications, and Certification Criteria for Electronic Health Record Technology Final Rule published on July 28, 2010, the Secretary adopted the following implementation specifications at 45 CFR 170.205(d)(2) for the HL7 2.5.1 standard: Public Health Information Network HL7 Version 2.5 Message Structure Specification for National Condition Reporting Final Version 1.0 and Errata and Clarifications National

Notification Message Structural Specification. Their adoption does not appear to either provide the appropriate or requisite implementation guidance for the adopted standard, HL7 2.5.1, or more importantly, to enable the user to “electronically record, modify, retrieve, and submit syndrome-based public health surveillance information...,” as required by the adopted certification criterion, 45 CFR 170.302(l). Please clarify whether these implementation specifications are appropriate for the intended capability specified by the public health surveillance certification criterion at 45 CFR 170.302(l).
