

2014 eCQM Flow
Measure Identifier: CMS62v4

HIV/AIDS: Medical Visit

*Please refer to the specific section of the eCQM to identify the QDM data elements and associated value sets for use in reporting this eCQM.

SAMPLE CALCULATION:

Performance Rate =

$$\frac{\text{Numerator (a=8 patients)}}{\text{Denominator (b=10 patients) - Denominator Exclusions (N/A) - Denominator Exceptions (N/A)}} = 80.00\%$$

2014 eCQM Flows
Measure Identifier: CMS62v4
NQF 0403: HIV/AIDS: Medical Visit

Please refer to the specific section of the eCQM to identify the Population Criteria and associated value sets for use in reporting this eCQM.

1. Start Initial Population
2. Check \$HIVVisit:
 - a. If \$HIVVisit Encounter Performed, QDM data element, HIV VISIT, during measurement period equals Yes, proceed to check Diagnosis Active.
 - b. If \$HIVVisit Encounter Performed, QDM data element, HIV VISIT, during measurement period equals No, do not include in Initial Population. Stop Processing.
3. Check Diagnosis Active:
 - a. If the Diagnosis Active QDM data element, HIV, starts before end of measurement period equals Yes, include in the Initial Population and continue on to the Denominator.
 - b. If the Diagnosis Active QDM data element, HIV, starts before end of measurement period equals No, do not include in Initial Population. Stop Processing.
4. Start Denominator
 - a. Denominator equals the Initial Population. Denominator is represented by Letter b in the sample calculation listed at the end of this document. Letter b equals 10 patients in the sample calculation.
5. Start Numerator
6. Check Encounter Performed:
 - a. If the Encounter Performed QDM data element, HIV VISIT, during measurement period equals Yes, proceed to check next Encounter Performed.
 - b. If the Encounter Performed QDM data element, HIV VISIT, during measurement period equals No, include in the No/Missing Data Submitted count. Stop Processing.
7. Check Encounter Performed
 - a. If the Encounter Performed QDM data element, HIV VISIT, greater than or equal to 90 days starts after end of \$HIVVist, (Encounter Performed, QDM data element, HIV VISIT, during measurement period) equals Yes, include in Numerator Count. Numerator is represented by Letter a in the sample calculation listed at the end of this document. Letter a equals 2 patients in the sample calculation.

- b. If the Encounter Performed QDM data element, HIV VISIT, greater than or equal to 90 days starts after end of \$HIVVist, (Encounter Performed, QDM data element, HIV VISIT, during measurement period) equals No, include in the No/Missing Data Submitted count. Stop Processing.

SAMPLE CALCULATION:

Performance Rate =

$$\frac{\text{Numerator (a=8 patients)}}{\text{Denominator (b=10 patients) - Denominator Exclusions (N/A) - Denominator Exceptions (N/A)}} = 80.00\%$$
