Objectives and Measures for 2018

Objective 4 of 8

Updated: July 2018

Computerized Provider Order Entry (CPOE)	
Objective	Use CPOE for medication, laboratory, and diagnostic imaging orders directly entered by any licensed healthcare professional, credentialed medical assistant, or a medical staff member credentialed to and performing the equivalent duties of a credentialed medical assistant, who can enter orders into the medical record per state, local, and professional guidelines.
Measure	<p>An eligible professional (EP), through a combination of meeting the thresholds and exclusions (or both), must satisfy all three measures for this objective:</p> <p>Measure 1 – More than 60 percent of medication orders created by the EP during the Promoting Interoperability (PI) reporting period are recorded using computerized provider order entry.</p> <p>Measure 2 – More than 60 percent of laboratory orders created by the EP during the PI reporting period are recorded using computerized provider order entry.</p> <p>Measure 3 – More than 60 percent of diagnostic imaging orders created by the EP during the PI reporting period are recorded using computerized provider order entry.</p>
Exclusion	<p>Measure 1 – Any EP who writes fewer than 100 medication orders during the PI reporting period.</p> <p>Measure 2 – Any EP who writes fewer than 100 laboratory orders during the PI reporting period.</p> <p>Measure 3 – Any EP who writes fewer than 100 diagnostic imaging orders during the PI reporting period.</p>

Objectives and Measures for 2018

Objective 4 of 8

Updated: July 2018

Definition of Terms

CPOE – A provider's use of computer assistance to directly enter medical orders (for example, medications, consultations with other providers, laboratory services, imaging studies, and other auxiliary services) from a computer or mobile device.

Diagnostic Imaging – Includes other imaging tests such as ultrasound, magnetic resonance and computed tomography in addition to traditional radiology.

Laboratory Order – An order for any service provided by a laboratory that could not be provided by a non-laboratory.

Laboratory – A facility for the biological, microbiological, serological, chemical, immunohematological, hematological, biophysical, cytological, pathological, or other examination of from the human body for the purpose of providing information for the diagnosis, prevention, or treatment of any disease or impairment of, or the assessment of the health of, human beings. These examinations also include procedures to determine, measure, or otherwise describe the presence or absence of various substances or organisms in the body. Facilities only collecting or preparing specimens (or both) or only serving as a mailing service and not performing testing are not considered laboratories.

Radiology Order – An order for any imaging service that uses electronic product radiation. The EP can include orders for other types of imaging services that do not rely on electronic product radiation in this definition as long as the policy is consistent across all patients and for the entire PI reporting period.

Attestation Requirements

DENOMINATOR/NUMERATOR/THRESHOLD/EXCLUSION

MEASURE 1:

- **DENOMINATOR:** Number of medication orders created by the EP during the PI reporting period.
- **NUMERATOR:** The number of orders in the denominator recorded using CPOE.
- **THRESHOLD:** The resulting percentage must be more than 60 percent in order for an EP to meet this measure.
- **EXCLUSION:** Any EP who writes fewer than 100 medication orders during the PI reporting period.

MEASURE 2:

- **DENOMINATOR:** Number of laboratory orders created by the EP during the PI reporting period.
- **NUMERATOR:** The number of orders in the denominator recorded using CPOE.
- **THRESHOLD:** The resulting percentage must be more than 60 percent in order for an EP to meet this measure.

Objective 4 of 8

Updated: July 2018

- **EXCLUSION:** Any EP who writes fewer than 100 laboratory orders during the PI reporting period.

MEASURE 3:

- **DENOMINATOR:** Number of diagnostic imaging orders created by the EP during the PI reporting period.
- **NUMERATOR:** The number of orders in the denominator recorded using CPOE.
- **THRESHOLD:** The resulting percentage must be more than 60 percent in order for an EP to meet this measure.
- **EXCLUSION:** Any EP who writes fewer than 100 diagnostic imaging orders during the PI reporting period.

Additional Information

- To meet Stage 3 requirements for a PI reporting period in 2018, all providers must use technology certified to the [2015 Edition](#). A provider who has technology certified to a combination of the 2015 Edition and 2014 Edition may potentially attest to the Stage 3 requirements, if the mix of certified technologies would not prohibit them from meeting the Stage 3 measures. A provider who has technology certified to the 2014 Edition **may not** attest to Stage 3.
- The provider is permitted, but not required, to limit the measure of this objective to those patients whose records are maintained using certified EHR technology (CEHRT).
- The CPOE function must be used to create the first record of the order that becomes part of the patient's medical record and before any action can be taken on the order to count in the numerator.
- In some situations, it may be impossible or inadvisable to wait to initiate an intervention until a record of the order has been created. For example, situations where an intervention is identified and immediately initiated by the provider, or initiated immediately after a verbal order by the ordering provider to a licensed healthcare professional under his/her direct supervision. Therefore, in these situations, so long as the order is entered using CPOE by a licensed healthcare professional, certified medical assistant or other appropriately credentialed staff member to create the first record of that order as it becomes part of the patient's medical record, these orders would count in the numerator of the CPOE measure.
- Any licensed health care professionals and clinical staff credentialed to and with the duties equivalent of a medical assistant or is appropriately credentialed and performs assistive services similar to a medical assistant, but carries a more specific title due to either specialization of their duties or to the specialty of the medical professional they assist, can enter orders into the medical record for purposes of including the order in the numerator for the objective of CPOE if they can originate the order per state, local and professional guidelines. It is up to the provider to determine the proper credentialing, training, and duties of the medical staff entering the orders as long as they fit within the guidelines prescribed. Credentialing for a medical assistant must come from an organization other than the organization employing the medical assistant.
- An EP must satisfy all three measures for this objective through a combination of meeting the thresholds and exclusions (or both).

Objectives and Measures for 2018

Objective 4 of 8

Updated: July 2018

- Orders involving tele-health or remote communication (such as phone orders) may be included in the numerator as long as the order entry otherwise meets the requirements of the objective and measures.
- Providers may exclude orders that are predetermined for a given set of patient characteristics or for a given procedure (also known as “protocol” or “standing orders”) from the calculation of CPOE numerators and denominators. Note this does not require providers to exclude this category of orders from their numerator and denominator ([77 FR 53986](#)).
- CPOE is the entry of the order into the patient's EHR that uses a specific function of CEHRT. CPOE does not otherwise specify how the order is filled or otherwise carried out.

Regulatory References

- This objective may be found in Section 42 of the code of the federal register at 495.24 (d)(4)(i)(A) and (B). For further discussion please see [80 FR 62840](#).
- In order to meet this objective and measure, an EP must use the capabilities and standards of CEHRT at 45 CFR 170.315(a)(1) through (3).

Certification Standards and Criteria

Below is the corresponding certification and standards criteria for EHR technology that supports achieving the meaningful use of this objective.

Certification Criteria*	
§ 170.315(a)(1) Computerized provider order entry	(1) CPOE—medications (i) Enable a user to record, change, and access medication orders. (ii) Optional. Include a “reason for order” field.
§ 170.315(a)(2) Computerized provider order entry	(2) CPOE—laboratory. (i) Enable a user to record, change, and access laboratory orders. (ii) Optional. Include a “reason for order” field.
§ 170.315(a)(3) Computerized provider order entry	(3) CPOE—diagnostic imaging. (i) Enable a user to record, change, and access diagnostic imaging orders. (ii) Optional. Include a “reason for order” field.

* Note: Depending on the type of certification issued to the EHR technology, it will also have been certified to the certification criterion adopted at 45 CFR 170.315 (g)(1), (g)(2), or both, in order to assist in the calculation of this PI measure.
