

Eligible Hospital and Critical Access Hospital Meaningful Use Menu Set Measures

Measure 9

Stage 1

Last Updated: June 10, 2011

Reportable Lab Results to Public Health Agencies	
Objective	Capability to submit electronic data on reportable (as required by State or local law) lab results to public health agencies and actual submission according to applicable law and practice.
Measure	Performed at least one test of certified EHR technology's capacity to provide electronic submission of reportable lab results to public health agencies and follow-up submission if the test is successful (unless none of the public health agencies to which an eligible hospital or CAH submits such information has the capacity to receive the information electronically).
Exclusion	No public health agency to which the eligible hospital or CAH submits such information has the capacity to receive the information electronically.

Definition of Terms

Public Health Agency — An entity under the jurisdiction of the U.S. Department of Health and Human Services, tribal organization, State level and/or city/county level administration that serves a public health function.

Attestation Requirements

YES / NO / EXCLUSION

- Eligible hospitals and CAHs must attest YES to having performed at least one test of certified EHR technology's capacity to submit electronic data on reportable lab results to public health agencies (unless none of the public health agencies to which the eligible hospital or CAH submits such information has the capacity to receive the information electronically) to meet this measure.
- EXCLUSION: If no public health agency to which the eligible hospital or CAH submits such information has the capacity to receive the information electronically, then the eligible hospital or CAH would be excluded from this requirement. Eligible hospitals or CAHs must select NO next to the appropriate exclusion, then click the APPLY button in order to attest to the exclusion.

Additional Information

- The test to meet the measure of this objective must involve the actual submission of information to public health agencies, if one exists that will accept the information. Simulated transfers of information are not acceptable to satisfy this objective.
- The transmission of actual patient information is not required for the purposes of a test. The use of test information about a fictional patient that would be identical in form to what would be sent about an actual patient would satisfy this objective.
- An unsuccessful test to submit electronic data to public health agencies will be considered valid and would satisfy this objective.
- If the test is successful, then the EP should institute regular reporting with the entity with whom the successful test was conducted, in accordance with applicable law and practice. There is not a measurement associated with this reporting.
- The transmission of reportable lab results must use the standard at 45 CFR 170.205(c) and, at a minimum, the standard specified in 45 CFR 170.207(c).
