- Certification and Standards Criteria

Definition of Terms

Specific Conditions – Those conditions listed in the active patient problem list.

Attestation Requirements

YES/NO

Eligible professionals (EPs) must attest YES to having generated at least one report listing patients of the EP with a specific condition to meet this measure.

Additional Information

- This objective does not dictate the report(s) which must be generated; therefore an EP or a member of the EP's staff could generate the list and meet this measure. An EP is best positioned to determine which reports are most useful to their care efforts.
- The report generated could cover every patient whose records are maintained using certified EHR technology (CEHRT) or a subset of those patients at the discretion of the EP.
- Each EHR reporting period should be identified with a different report. Reports generated in past EHR reporting periods cannot be used to satisfy this measure in the current EHR reporting period.

Certification and Standards Criteria

Below is the corresponding certification and standards criteria for electronic health record technology that supports achieving the meaningful use of this objective.

Certification Criteria

§ 170.314(a)(14) Patient list creation	Enable a user to electronically and dynamically select, sort, access, and create patient lists by: date and time; and based on each one and at least one combination of the following data: <ul style="list-style-type: none">(i) Problems;(ii) Medications;(iii) Medication allergies;(iv) Demographics;(v) Laboratory tests and values/results; and(vi) Ambulatory setting only - Patient communication preferences.
