Definition of Terms

Specific Conditions — Those conditions listed in the active patient problem list.

Attestation Requirements

YES/NO

The Eligible Hospital or CAH must attest YES to generating at least one report listing patients of the eligible hospital or CAH with a specific condition.

Additional Information

- This objective does not dictate the report(s) which must be generated. An eligible hospital or CAH is best positioned to determine which reports are most useful to their care efforts.
- Each EHR reporting period should be identified with a different report. Reports generated in past EHR reporting periods cannot be used to satisfy this measure in the current EHR reporting period.
- The report generated could cover every patient whose records are maintained using certified EHR technology or a CAH or a subset of those patients.

Certification and Standards Criteria

Below is the corresponding certification and standards criteria for electronic health record technology that supports achieving the meaningful use of this objective.

Certification Criteria

§ 170.314(a)(14) Patient list creation	Enable a user to electronically and dynamically select, sort, access, and create patient lists by: date and time; and based on each one and at least one combination of the following data: (i) Problems; (ii) Medications; (iii) Medication allergies; (iv) Demographics; (v) Laboratory tests and values/results; and (vi) Ambulatory setting only. Patient communication preferences.
