

HETS MAC Open Issues

Issue ID	Summary of Issue	Type	Notes
10107	When a TA1 response is produced, the system is populating TA101 with a default value instead of the ISA13 from the 270.	Compliance	NEW - Fix may be included in the VAL Drop on 4/8/16.
9647, 10061	Users may receive a AAA03=42 or a proprietary error instead of the expected 999 or TA1 response when there are errors in the construction of the 270 request.	Compliance	A partial fix was included in the VAL Drop on 3/18/16. Additional updates are planned for the 4/22/16 VAL Drop.
9564	Users may receive a AAA03=42 or a proprietary error when there are envelope errors (ISA, IEA, GS, GE) on the 270 request.	Compliance	A partial fix was included in the VAL Drop on 3/4/16. Additional changes were included in the VAL Drop on 3/18/16 and are being verified. Additional updates are planned for the 4/22/16 VAL Drop.
9576	If the 270 contains non-supported special characters in the BHT03 or GS02, users may receive a AAA03=42 response that is not properly constructed.	Compliance	Fix was included in the VAL Drop on 2/19/16 and is being verified.
9594	In situations where a 999 or TA1 response is expected, users occasionally may receive an incorrect error code.	Compliance	A partial fix was included in the VAL Drop on 3/18/16 and is being verified. Additional updates are planned for the 4/8/16 VAL Drop.
9854	If the 270 NM103 is a valid length but <> CMS, the expected response is AAA03=79. Currently, in this scenario the system will return a 271 with eligibility data.	Compliance	Resolved
9959	Any 270 transaction that is submitted with HCPCS 90669 and no DTP date or a DTP date < 01/01/2016 will return a Next Eligible Date for a preventive service that can no longer be billed for the current date.	Functional	Resolved
9562, 9834, 9659	Users may receive a AAA03=42 or a proprietary error instead of the expected 999 or TA1 response when there are errors in the construction of the 270 request.	Compliance	Resolved
