SUBJECT: Announcement of the Fall 2018 Software Releases

The Centers for Medicare & Medicaid Services (CMS) issued an HPMS memo on August 30, 2018 announcing the planned release of systems changes scheduled for October, November, and December 2018. This memo provides details about these releases, which aim to improve the efficiency of CMS systems and Plan processing. The updates described in this communication will be included in the November 2018 Plan Communications User Guide v12.3, scheduled for publication on or around November 30, 2018.

The October 2018 Release changes include the following:

1. [Changes to the Default Enrollment Process for Newly Eligible Medicare Beneficiaries](#)

The November 2018 Release changes include the following:

2. [Discontinuation of the Medicare Advantage Disenrollment Period \(MADP\) and Establishment of a new Medicare Advantage-Open Election Period \(MA-OEP\)](#)

The December 2018 Release changes include the following:

3. [Limitations in Use of the Special Enrollment Period for Dually Eligible and Low Income Subsidy \(LIS\) Beneficiaries](#)

4. [Inclusion of National Drug Codes \(NDCs\) on Certain Other Health Information \(OHI\) Records](#)
5. [Enhanced Functionality for Drug Management Programs](#)

1. **Changes to the Default Enrollment Process for Newly Eligible Medicare Beneficiaries**

Starting October 1, 2018, a Medicare Advantage organization (MAO) may request CMS approval to implement a default enrollment process. This process permits the MAO to automatically enroll a beneficiary into one of their MA plans if the person:

- Is currently enrolled in the MAO's Medicaid Managed Care plan at the time of the individual's initial eligibility for Medicare; and
- Does not elect to receive Medicare coverage in another way.

MAOs previously approved to conduct default enrollment that will not meet the new requirements must discontinue use of this mechanism for any enrollment with an effect date of January 1, 2019 or later. See HPMS memorandum "Default Enrollment Option for Newly Medicare Advantage Eligible Medicaid Managed Care Plan Enrollees (formerly known as "Seamless Conversion Enrollment")" dated August 31, 2018 for more information.

MAOs must use Election Type J for all default enrollments. CMS will reject default enrollment transactions submitted by MAOs that are not approved for default enrollment.

The following file layout and Transaction Reply Code (TRC) updates are related to this software change:

- *Daily Transaction Reply Report (DTRR) Updates, new Election Type J, [Attachment A](#)*
- *Updates to TRCs 103, 104, 108, 367, 369, 370, [Attachment C, Table 1](#)*
- *Updates to the Medicare Advantage and Prescription Drug System (MARx) Batch Input Detail Record: Enrollment – TC 61, new Election Type J, [Attachment D](#)*

2. **Discontinuation of the Medicare Advantage Disenrollment Period (MADP) and Establishment of a new Medicare Advantage – Open Election Period (MA-OEP)**

The Medicare Advantage Disenrollment Period (MADP), which used to occur January 1 – February 14, was discontinued as a result of the 21st Century Cures Act. The law established the Medicare Advantage Open Enrollment Period (MA OEP), starting January 1, 2019. Individuals enrolled in an MA plan as of January 1 can make one (1) election during the first three (3) months of the calendar year (January 1 – March 31) to switch MA plans or to disenroll from an MA plan and obtain coverage through Original Medicare.

In addition, new Medicare beneficiaries who enrolled in an MA plan during their Initial Coordinated Election Period (ICEP) can also make one election to switch or drop MA coverage during the first three (3) months they have Medicare Parts A and B. Individuals using the MA OEP may add or drop Part D coverage. It does not allow individuals enrolled in Medicare Savings Accounts or other Medicare health plan types (such as cost plans or Programs of All-Inclusive Care for the Elderly (PACE)) or in Original Medicare (with or without stand-alone Part D coverage) to make enrollment changes.

Beginning January 1, 2019, a new election type code (M) will be created for the MA OEP to accept and process these elections. A new Transaction Reply Code (TRC 373 – Rejected, Bene without MA Enrl or ICEP) will be issued for rejections related to the improper use of the ‘M’ election type code.

The following file layout and TRC updates are related to this software change:

- *Update to the DTRR, new election type M, [Attachment A](#)*
- *Updates to TRCs 104 and 108, [Attachment C, Table 1](#)*
- *New TRC 373, [Attachment C, Table 2](#)*
- *Updates to MARx Batch Input Detail Record: Enrollment – TC 61, new Election Type M, [Attachment D](#)*
- *Updates to MARx Batch Input Detail Record: Disenrollment – TC 51 or 54, new Election Types M and D, [Attachment E](#)*

3. Limitations in Use of the Special Enrollment Period for Dually Eligible and Low Income Subsidy (LIS) Beneficiaries

CMS has established limitations to the use of the Duals/LIS SEP for all individuals which will begin January 1, 2019. This SEP may only be used once per calendar quarter during the first nine (9) months of the year (i.e., January – March, April – June, July – September). For an enrollment transaction with an election type code of ‘L’, the application date will determine which quarter the change is made in. For a disenrollment transaction, the effective date of the disenrollment will determine which quarter the change is made in.

In addition to the quarterly SEP, there are also two new SEPs that dually eligible/LIS beneficiaries may qualify to use in the following circumstances:

1. The individual gains, loses or has a change in the level of assistance (Medicaid or LIS).
2. The individual is automatically enrolled into a plan by the state or CMS.

Thus, there will be two (2) special election type codes available to dually eligible/LIS beneficiaries:

- Quarterly Duals/LIS SEP (election type code ‘L’) – used for beneficiary elected changes (“SEP for Dual-eligible Individuals and Other LIS-Eligible Individuals” - §30.4.4 #5 of Chapter 2 of the Medicare Managed Care Manual and §30.3.2 in Chapter 3 of the Medicare Prescription Drug Benefit Manual)
 - Once per calendar quarter for the first three (3) quarters of the year
 - Not allowed if there is an active “potentially at-risk” or “at-risk” CARA limitation (see Section 5).
- Dual/LIS SEP (election type code ‘U’) – used for beneficiary elected changes (“SEP for Individuals who Gain, Lose, or Have a Change in their Dual or LIS-Eligible Status” and “SEP for CMS and State-Initiated Enrollments” - §30.4.4 #12 and §30.4.7 of Chapter 2 of the Medicare Managed Care Manual and §30.3.8 #7 and §30.3.8 #15 in Chapter 3 of the Medicare Prescription Drug Benefit Manual)
 - Gains/loses Medicaid or LIS, the beneficiary’s LIS levels change.
 - Automatic enrollments (e.g. auto-enrollment, annual reassignment)
 - Passive enrollments by the state or CMS

The Beneficiary: Eligibility (M232) screen will display the application date of when the LIS SEP Election Type Code was last used.

The following file layout and TRC updates are related to this software change:

- *Updates to the DTRR, new Election Type Code L, [Attachment A](#)*
- *Updates to TRCs 104, 108, 343 & 334, [Attachment C, Table 1](#)*
- *Updates to MARx Batch Input Detail Record: Enrollment – TC 61, new Election Type L, [Attachment D](#)*
- *Updates to MARx Batch Input Detail Record: Disenrollment – 51 or 54, new Election Type L, [Attachment E](#)*

4. Inclusion of National Drug Codes (NDCs) on Certain Other Health Information (OHI) Records

In an effort to address concerns regarding listing the specific National Drug Codes (NDCs) that a Patient Assistance Program (PAP) covers on behalf of a given beneficiary, CMS is making a change to the Other Health Insurance (OHI) records that it shares with Part D Plans through MARx effective December 2018.

Effective January 2019, newly reported PAP-related OHI coverage occurrences will include at least one (1) associated NDC. Plans should be aware that typically a PAP will only provide coverage for a beneficiary for no more than two (2) drugs. Thus, in most instances, Part D Plans will only notice up to two (2) NDCs for each PAP coverage period. However, Part D sponsors should know that CMS is making internal systems changes to accommodate up to a maximum of five (5) NDCs that could potentially be reported as part of a PAP coverage period.

Though rare, it is possible that multiple PAPs may provide coverage to an individual for different prescription drugs.

The following scenario examples are associated with this software change:

- *PAP Coverage Period Scenarios, [Attachment G](#)*

5. Enhanced Functionality for Drug Management Programs

Section 704 of the Comprehensive Addiction and Recovery Act of 2016 (CARA) (Pub. L. 114-198) and the implementing final rule CMS-4182-F (April 16, 2018) include provisions that permit Part D sponsors to establish drug management programs for beneficiaries at risk of prescription drug abuse. Beginning January 1, 2019, under such programs, Part D sponsors may limit at-risk beneficiaries' access to coverage for opioids and benzodiazepines to selected prescribers and pharmacies ("lock-in") or through use of a beneficiary-specific point-of-sale claim edit after case management and notice to the beneficiaries. In implementing a drug management program, Part D sponsors should refer to the final rule and all relevant CMS guidance which will be available at <https://www.cms.gov/Medicare/Prescription-Drug-coverage/PrescriptionDrugCovContra/RxUtilization.html>.

Additional guidance on drug management programs will be forthcoming this fall.

Specifically, under drug management programs, participating sponsors must send a potentially at-risk beneficiary advance written notice of intent to implement a coverage limitation, and provide

the beneficiary an opportunity to give relevant information to the sponsor within 30 days. Participating sponsors must send the beneficiary a second written notice, if applicable, when it determines that the beneficiary is an at-risk beneficiary and implements the coverage limitation. An alternate second notice must be sent to the potential-at-risk beneficiary if the sponsor determines the beneficiary is not an at-risk beneficiary and does not implement a coverage limitation under its drug management program.

The start date of the implementation period cannot be less than 30 days or more than 60 days from the date of the initial notice. The initial implementation period can last a maximum of 12 months. The one (1) year period can be extended for an additional 12 months under the requirements of the final rule including additional notice to the beneficiary, for a total implementation period 24 months.

Currently, the Medicare Advantage Prescription Drug system (MARx) accepts Point-of-Sale (POS) edit transactions from sponsors for opioid over utilizers via the User Interface (UI) or batch process. In order to accommodate the changes for drug management programs, the M254 screen will be re-named to 'Update CARA Status' and modified. Plan sponsors will communicate drug management program information, such as notification date, intended coverage limitation(s), implementation date, implemented coverage limitation(s), changes and end date if the limitation is terminated early to MARx using the transaction type 90.

- Therefore, the Transaction Code 90 Layout will change so that sponsors can provide information on pharmacy and prescriber limitations, in addition to beneficiary-specific POS claim edits, for potentially at-risk and at-risk beneficiaries for opioids and benzodiazepines.
- The termination date field will be discontinued. In its place, two new fields will be added: notification end date and implementation end date.
 - MARx will auto-assign these dates if they are not provided by the sponsor. The auto-assigned notification end date is on the 60th day after the notification start date (day one). For example, if a notification start date is October 1, 2019 then the auto-assigned notification end date will be November 29, 2019.
 - When an implementation start date is provided, the notification end date is changed to one (1) day before the implementation start date.
 - If the notification and implementation start dates are the same, as applicable in limited scenarios, then the assigned notification end date will also be the same.
 - Sponsors can submit a notification end date as long as it is within 60 days after the notification start date.
 - If a sponsor decides not to implement a coverage limitation, a transaction that includes a notification end date must be submitted.
 - When MARx receives an implementation start date for a coverage limitation, an implementation end date one (1) year later than the implementation start date will be auto-assigned. For example, if an implementation start date is January 1, 2019 then the assigned implementation end date will be December 31, 2019. Plans must submit an implementation end date if they terminate a coverage limitation.

A beneficiary's active "CARA Status" will be shared with the gaining sponsor via the Beneficiary Eligibility Query (BEQ) and via the Beneficiary: Eligibility (M232) screen on the MARx UI. If a beneficiary with an active "CARA Status" switches plans, the gaining sponsor will also be notified

by TRC 376 (New Enrollee CARA Status Notification) of the beneficiary's active "CARA Status". The new sponsor will have to contact the prior sponsor to determine which "CARA Status" (either "potentially at-risk" or "at-risk") the beneficiary had in the previous plan, as well as to obtain other case management information by using the Overutilization Contact in HPMS. This information shall be used by the new sponsor to determine their next steps.

Up to and including December 30, 2018, POS Drug Edit information can be submitted to MARx using a transaction type 90. Plans may NOT submit transaction type 90s to MARx on December 31, 2018. Beginning on January 1, 2019, Plans may use transaction type 90 to submit drug management program information.

Beneficiaries notified that they are a potentially at-risk beneficiary or at-risk beneficiary cannot use the Dual/LIS quarterly SEP (election type 'L') to enroll in another plan or disenroll from their current plan. They will still be permitted to use any other election period available to them, including the Dual/LIS SEPs (election type 'U') referenced in [Section 3](#) of this announcement. If an enrollment or disenrollment using the LIS SEP (election type 'L') is attempted using an application date that falls within an active "CARA Status", it will reject.

Please see the file layouts and TRC changes listed after section 3. The following file layout updates are related to this software change:

- ***DTRR, CARA Updates, [Attachment B](#)***
- ***Updates to MARx Batch Input Detail Record: CARA Status – TC 90, [Attachment F](#)***
- ***Updates to the BEQ Response File, [Attachment H](#)***
- ***M232 and M254 Screenshots, [Attachment I](#)***

Also, in Table 2, TRC 373 is new for the MA-OEP, TRC 374 is new for the LIS SEP and TRCs 375-390, 723 and 724 are new for [Enhanced Functionality for Drug Management Program](#).

Plans are encouraged to contact the MAPD Help Desk for any issues encountered during the systems update process. Please direct any questions or concerns to the MAPD Help Desk at 1-800-927-8069 or e-mail at mapdhelp@cms.hhs.gov.

This LIS SEP transaction (‘L’ election type code) was rejected because the beneficiary has a CARA Status.</p> <ul style="list-style-type: none"> The enrollment transaction (Transaction Type 61) was submitted with an application date that falls between a CARA Status notification or implementation start and end date, including the first and last day. The disenrollment transaction (Transaction Type 51 or 54) was submitted with an effective date between a CARA Status notification or implementation start and end date, including the first and last day.
375	A	CARA Status Accepted as Submitted	CARA ACC	<p>A submitted CARA Status transaction (TC 90) was successfully processed. The TRC is applicable for add, update and delete transactions.</p> <p>The TRC will also be issued when a CARA Status record is submitted via the MARx UI by a Plan User with CARA Status Update Authority.</p> <p>Plan Action: None</p>

Attachment C Updates to Transaction Reply Code (TRCs)

New TRCs				
Code	Type	Title	Short Definition	Definition
376	I	New Enrollee CARA Status Notification	CARA ENR NOT	<p>The beneficiary had an active CARA Status associated with the enrollment immediately preceding this enrollment. The contract ID associated with this earlier enrollment is supplied in DTRR data record field 24. This TRC supplies additional information about an accepted enrollment transaction. For a beneficiary with an active CARA Status, the transaction reply with TRC376 is provided in addition to the reply with the enrollment acceptance TRC.</p> <p>Plan action: Contact the Plan associated with the previous enrollment for pertinent details about the beneficiary's CARA Status and case management file.</p>
377	R	CARA Status Invalid Enrollment	CARA INV ENR	<p>A CARA Status transaction (TC 90) was rejected for one of the following reasons:</p> <ul style="list-style-type: none"> • The notification or implementation start or end date is outside of the contract enrollment period • There is an enrollment gap between two of the dates on the transaction <p>Plan Action: Correct the date(s) and resubmit the transaction, if appropriate. If the beneficiary re-enrolled in the Contract with a gap between the two enrollments, submit new records using a notification start date that is equal to or later than the new enrollment effective date.</p>
378	R	CARA Status Invalid Contract	CARA INV CON	<p>A CARA Status transaction (TC 90) was rejected because the submitting contract is:</p> <ul style="list-style-type: none"> • A LI-Net Plan • Not a Part D Plan <p>Plan Action: Correct the contract number and resubmit the CARA Status transaction, if appropriate.</p>
379	R	CARA Date Invalid	CARA DT INVALID	<p>A CARA Status transaction (TC 90) rejected because one of the following occurred:</p> <ul style="list-style-type: none"> • Notification end date prior to notification start date • Implementation end date prior to implementation start date • Implementation end date without an implementation start date • Notification end date more than 60 days from notification start date • Implementation start date later than one day after the notification end date • Implementation start date is before notification start date <p>Plan Action: Correct the date(s) and resubmit the transaction, as appropriate.</p>

Attachment C Updates to Transaction Reply Code (TRCs)

New TRCs				
Code	Type	Title	Short Definition	Definition
380	R	CARA Status Duplicate Transaction	CARA DUP	<p>A CARA Status transaction (TC 90) was rejected because it is a duplicate. The submitted transaction matched the following values on an existing CARA Status record:</p> <ul style="list-style-type: none"> • Notification start and end dates <ul style="list-style-type: none"> ○ If the notification end date exists • Implementation start and end dates <ul style="list-style-type: none"> ○ If either exists • POS Edit Code (PS1, PS2 or blank) • Prescriber Limitation (Yes or No) • Pharmacy Limitation (Yes or No) • Drug Class Code <p>This TRC will only be issued for add and update transactions, not delete transactions.</p> <p>Plan Action: None required.</p>
381	R	CARA Limitation Overlap	CARA LIMIT OVERLAP	<p>A CARA Status transaction (TC 90) was rejected because it caused an overlap with an existing CARA Status record within the same date ranges. An overlap is defined as two records for the same beneficiary, contract, drug class with any of the below simultaneously:</p> <ul style="list-style-type: none"> • POS Edit Codes – either the same or different • Prescriber Limitation • Pharmacy Limitation <p>Plan Action: Correct the transaction and resubmit the transaction, as appropriate.</p>
382	R	Invalid Implementation End	INVL IMPL END	<p>This CARA Status transaction (TC 90) was rejected because</p> <ul style="list-style-type: none"> • The original implementation end date is one year from the implementation start date OR • A subsequent update will cause the implementation end date to be more than two years after the implementation start date. <p>Plan Action: Correct the date(s) and resubmit the transaction, as appropriate.</p>
383	R	Late Implementation Extension	LATE IMPL EXTN	<p>This CARA Status “Update” transaction (TC 90) was rejected because there was an end date extension after:</p> <ul style="list-style-type: none"> • An implementation end date has passed AND • The transaction was submitted more than thirteen months from the implementation start date <p>Plan Action: Correct the date(s) and resubmit the transaction, as appropriate.</p>

Attachment C Updates to Transaction Reply Code (TRCs)

New TRCs				
Code	Type	Title	Short Definition	Definition
384	R	Blank CARA Transaction	BLANK CARA TRNS	<p>This CARA Status “Add” transaction (TC 90) was rejected because the POS Edit Status Code, Prescriber Limitation, AND Pharmacy Limitation are ALL ‘N’ (no) or blank</p> <p>This CARA Status “Update” transaction (TC 90) was rejected because as a result of processing the transaction, the POS Edit Status Code, Prescriber Limitation, AND Pharmacy Limitation would ALL be ‘N’ (no) or blank</p> <p>Plan Action: Correct the transaction and resubmit, as appropriate. An add or update transaction must have a value of ‘Y’ for at least one of the following fields: POS Edit Status Code, Pharmacy Limitation, or Prescriber Limitation. A delete transaction may be necessary, instead of an add or update transaction.</p>
385	R	CARA POS Edit Status /Code Error	POS STATUS ERR	<p>This CARA Status transaction (TC 90) was rejected because the submitted:</p> <ul style="list-style-type: none"> • POS Edit Status field is blank or N and the POS Edit Code field is populated with PS1 or PS2 • POS Edit Status field is Y but the POS Edit Code field is blank <p>Plan Action: Correct the POS Edit Code and resubmit the transaction, as appropriate.</p>
386	R	Invalid CARA Edit Code/Limitation	INV EDIT/LIMIT	<p>This CARA Status transaction (TC 90) was rejected because the submitted:</p> <ul style="list-style-type: none"> • Prescriber Limitation Status contains an invalid value OR • Pharmacy Limitation Status contains an invalid value OR • POS Edit Status contains an invalid value OR • POS Edit Code contains an invalid value <p>Plan Action: Correct the Limitation and/or POS Edit and resubmit the transaction, as appropriate.</p>
387	R	CARA Status Delete Error	CARA DEL ERR	<p>A CARA Status transaction (TC 90) was rejected because the transaction attempted to delete an existing CARA Status Record but there is no corresponding existing record.</p> <p>Plan Action: Correct the information provided and resubmit the transaction, if appropriate.</p>
388	R	Future CARA Status Start Date Exceeds CCM Plus One	CARA FUT	<p>A CARA Status transaction (TC 90) was rejected because the submitted notification or implementation start date is later than the end of the month that follows the current calendar month.</p> <p>Plan Action: Correct the date(s) and resubmit the transaction, as appropriate.</p>

Attachment C Updates to Transaction Reply Code (TRCs)

New TRCs				
Code	Type	Title	Short Definition	Definition
389	F	Failed, CARA Status Date Invalid for DB Insertion	F CARA DT INVALID	<p>A CARA Status transaction (TC 90) failed because one of the following dates is either not formatted as YYYYMMDD (e.g., “Aug 1940”) or is formatted correctly but contains a nonexistent month or day (e.g., “19400199”):</p> <ul style="list-style-type: none"> • Notification Start Date <ul style="list-style-type: none"> • A blank notification start date on a transaction (TC 90) • Notification End Date • Implementation Start Date • Implementation End Date <p>The failed transaction record is not returned in the DTRR data file. It is returned on the Batch Completion Status Summary (BCSS) data file.</p> <p>Plan Action: Correct the date(s) and resubmit the transaction, as appropriate.</p>

Attachment G, Patient Assistance Program (PAP) Coverage Period Scenarios

PAP Coverage Period Scenarios

Scenario A: No NDC changes during year

The PAP coverage record is representative of the NDC coverage and termination dates. Thus, if NDC code 1 and NDC code 2 display with a common coverage effective date of January 1, 2018, this means that the PAP is covering the two indicated drugs starting January 1, 2018. Therefore, Scenario A, is representative of this situation:

A PAP submits the NDCs that are covered at the beginning of the year and identifies no changes to coverage throughout the year:

- The PAP submits a coverage record with an effective date of 1/1/18 with two NDCs, NDC-1 and NDC-2.
- No further updates/changes are needed to the coverage record, as no NDCs are added.
 - Therefore, NDC-1 is covered from 1/1/2018 through 12/31/2018; and
 - NDC-2 is covered from 1/1/2018 through 12/31/2018.

Scenario B: Addition of new NDC during year

There may be times when a particular PAP covers one or more NDC with the start of a calendar year, but then begins to cover an additional new NDC at some point before the end of a calendar year.

When this situation presents itself, the Benefits Coordination & Recovery Center (BCRC) will require the PAP to terminate the previous PAP coverage record and then include the previous NDC(s) on the revised PAP record along with the newly added NDC. Scenario B, is representative of this situation:

A PAP submits the NDCs that are covered at the beginning of the year but identifies a new NDC that should be covered part-way through the year. For the example below, the effective date of coverage for the new NDC is 3/1/2018:

- The PAP submits a coverage record with an effective date of 1/1/18 with two NDCs, NDC-1 and NDC-2.
- On 3/1/18, coverage for NDC3 should be added.
- On the next monthly file submission (i.e., March), the Plan will send two (2) records:
 - An update with a 2/28/18 termination date for the original coverage record which contained NDC-1 and NDC-2.
 - **A new coverage record with an effective date of 3/1/18 is submitted which includes NDC-1, NDC-2, and NDC-3.**
- Therefore, NDC-1 and NDC-2 are covered from 1/1/2018 through 12/31/2018; and
- NDC-3 is covered from 3/1/2018 through 12/31/2018.

Attachment H, Updates to the Beneficiary Eligibility Query (BEQ) Response File

The BEQ process will limit the beneficiary’s display of CARA Status Periods to the ten most recent occurrences sorted in descending order based on the CARA Status Start Date.

Updates also consist of the inclusion of the date that the beneficiary last used the Duals SEP; these additional fields will appear in the filler of the current detail record. Below is the layout for the new fields:

Updates to the Beneficiary Eligibility Query (BEQ) Response File					
Item	Field	Length	Position	Format	Valid Values
175	Most Recent Duals SEP Use Date	8	1567-1574	Numeric	CCYYMMDD
176	CARA Status Start Date (1)	8	1575-1582	Numeric	CCYYMMDD
