A: *Glossary and List of Abbreviations and Acronyms*

Table A-1: Glossary

Term	Definition
Accepted Transaction	The successful application of a requested action that was processed by MARx.
Account Number	A number obtained from the Resource Access Control Facility (RACF) or system administrator.
Application Date	The date that the beneficiary applies to enroll in a Plan. Enrollments submitted by CMS or its contractors, such as the Medicare Beneficiary Contact Center, do not need application dates.
Batch Transaction	An automated systems approach to processing in which data items to be processed must be grouped and processed in bulk.
Beneficiary Identification Code (BIC)	The portion of the Medicare health insurance claim number that identifies a specific beneficiary.
Benefit Stabilization Fund (BSF)	Established by CMS upon request of an HMO or CMP, when the HMO or CMP must provide its Medicare enrollees with additional benefits, to prevent excessive fluctuation in the provision of those benefits in subsequent contract periods.
Button	A rectangular icon on a screen which, when clicked, engages an action. The button is labeled with word(s) that describe the action, such as Find or Update.
Cancellation Transaction	A cancellation may result from an action by the beneficiary, CMS, or another Plan before the effective date of the election. A cancelled enrollment restores the beneficiary to his/her prior enrollment state.
Checkbox	A field that is part of a group of options, for which the user may select any number of options. Each option is represented with a small box, where ‘x’ means “on” and an empty box means “off.” When a checkbox is clicked, an ‘x’ appears in the box. When the checkbox is clicked again, the ‘x’ is removed.
Connect:Direct	The proprietary software that transfers files between systems.
Correction	A record submitted by a Plan or CMS office to correct or update existing Beneficiary data.
Cost Plan	A type of contract under which a Plan is reimbursed by CMS for its reasonable costs.
Current Calendar Month (CCM)	Represents the calendar month and year at the time of transaction submission. For batch, the current month is derived from the batch file transmission date; for User Interface transactions, the current month is derived from the system data at the time of transaction submission.
Current Processing Month	The calendar month in which processing occurs to generate payments. The Current Processing Month is distinguished from the CPM, the month in which Plans receive payment from CMS.
Current Payment Month (CPM)	The month for which Plans receive payment from CMS, not the current calendar month.
Creditable Coverage	Prescription drug coverage, generally from an employer or union, that is equivalent to, or better than, Medicare standard prescription drug coverage.
Data entry field	A field that requires the user to enter information.
Deductible	The amount a Beneficiary must pay for medical services or prescription drugs before a Plan starts paying benefits.
Disenrollment	A record submitted by a Plan, Social Security Administration District Office (SSA DO), Medicare Customer Service Center (MCSC), or CMS when a beneficiary discontinues membership in the Plan.
Dropdown list	A field that contains a list of values from which the user chooses. Clicking on the down arrow on the right of the field enables the user to view the list of values, and then click on a value to select it.

Term	Definition
Dual Eligible	Individuals entitled to both Medicare and Medicaid benefits
Election Period	Time periods during which a Beneficiary may elect to join, change, or leave Medicare Part C and/or Part D Plans. These periods are fully defined in CMS Enrollment and Disenrollment guidance for Part C and D Plans available on the Web at: http://www.cms.gov/home/medicare.asp under "Eligibility and Enrollment."
Enrollment	A record submitted when a Beneficiary joins an MCO or a drug plan.
Enrollment Process	A process in which a Plan submits a request to enroll in a Plan, change enrollment, or disenroll.
Exception	A transaction that is unprocessed due to errors or internal inconsistencies.
Failed Payment Reply Codes	Codes used for the Failed Payment Reply Report that identify incomplete payment calculations for a beneficiary.
Failed Transaction	A transaction that did not complete due to problems with the format of the transaction or internal system problems.
Formulary	The medications covered by an MA organization or prescription drug plan.
Gentran	The Gentran servers provide Electronic Data Interchange (EDI) capabilities between CMS and CMS business partners. These servers provide MARx with transaction files from the Plans, and provide the Plans with MARx reports.
Hospice	A health facility for the terminally ill.
Logoff	The method of exiting an online system.
Logon	The method for gaining entry to an online system.
Lookup field	A field that provides a list of possible values. When the user clicks on the "binocular" button next to the field, a window pops up with a list of values for that field. Clicking on one of those values closes the pop-up window and the field is filled with the value chosen.
Medicaid	A jointly funded, Federal-State health insurance program for certain low-income and needy people. It covers approximately 36 million individuals including children, the aged, blind, and/or disabled, and people eligible to receive Federally assisted income maintenance payments.
Managed Care Organization (MCO)	A type of contract under which CMS pays for each member, based on demographic characteristics and health status; also referred to as Risk. In a Risk contract, the MCO accepts the risk if the payment does not cover the cost of services, but keeps the difference if the payment is greater than the cost of services. Risk is managed through a membership where the high costs for very sick members are balanced by the lower cost for a larger number of relatively healthy members.
Menu	A horizontal list of items at the top of a screen. Clicking on a menu item displays a screen and may display a submenu of items corresponding to the selected menu item.
Network Data Mover (NDM)	Software used for transmitting and receiving data; replaced by Connect:Direct.
MicroStrategy	A tool used for generating and viewing standard and ad hoc reports.
Nursing Home Certifiable (NHC)	A code that reflects the relative frailty of an individual. NHC Beneficiaries are those whose condition would ordinarily require nursing home care. The code is only acceptable for certain social health maintenance organization (SHMO)-type Plans.
Off-cycle	A retroactive transaction awaiting CMS approval because its effective date is too old for automatic acceptance.

Term	Definition
Online	An automated systems approach that processes data in an interactive manner, normally through computer input.
Premium	The monthly payment a Beneficiary makes to Medicare, an insurance company, or a healthcare Plan.
Premium Payment Option (PPO)	The method selected by the beneficiary to pay the premium owed to the Plan. PPO choices are: (1) withhold from SSA (S) or RRB (R) benefit check or (2) Direct self-pay (D) to the Plan.
Program for All Inclusive Care for the Elderly (PACE) Plans	PACE is a unique capitated managed care benefit for the frail elderly provided by a not-for-profit or public entity that features a comprehensive medical and social service delivery system. It uses a multidisciplinary team approach in an adult day health center supplemented by in-home and referral service in accordance with participants' needs.
Radio button	A field that is part of a group of options, of which the user may only select one option. A radio button is represented with a small circle; a filled circle indicates the button is selected, and an empty circle means it is not selected. Clicking a radio button selects that option and deselects the existing selection.
Required field	A field that the user must complete before a button is clicked to engage an action. If the button is clicked and the field is not filled in, an error message displays and the action does not occur. There are two types of required fields: • Always required, which are marked with an asterisk (*) • Conditionally required, where the user must fill in at least one or only one of the conditionally required fields. These are marked with a plus sign (+).
Risk	A contract under which Beneficiaries are “locked in” to network providers and a payment is received from CMS for each member, based on demographic characteristics and health status. In a Risk contract, the MCO accepts the risk if the payment does not cover the cost of services, but keeps the difference if the payment is greater than the cost of services. Risk is managed through a membership where the high costs for very sick members are balanced by the lower costs for a larger number of relatively healthy members.
Special Needs Plan (SNP)	A certain type of MA Plan that serves a limited population of individuals in CMS special-needs categories, as defined in CMS Part C Enrollment and Eligibility Guidance. This Plan is fully defined on the Web at: http://www.cms.gov/home/medicare.asp under “Health Plans.”
Submenu	A horizontal list of items below the screen’s menu. Clicking on a submenu item displays a screen.
Transaction Code (TC)	Identifies batch transactions submitted by the Plans or CMS.
Transaction Reply Code (TRC)	The code that explains the action taken by the system in response to new information from CMS systems or in response to input from MCOs, CMS, or other users.
User ID	Valid user identification code for accessing the CMS Data Center and the Medicare Data Communications Network.
User Interface	The screens, forms, and menus that display to a user logged on to an automated system.

Note: The January deposit is the first business day of the month.

F.1 820 Format Payment Advice Data File

The 820 Format Payment Advice data file is a Health Insurance Portability & Accountability Act (HIPAA)-compliant version of the Plan Payment Report, which is also known as the Automated Plan Payment System (APPS) Payment Letter. The data file itemizes the final monthly payment to the Plan. It is produced by APPS when final payments are calculated, and is available to Plans as part of the month-end processing. This file is not available through Medicare Advantage and Prescription Drug System (MARx).

The following records are included in this file:

- Header Record (numbers 1-6 below)
- Detail Record (numbers 7-10 below)
- Summary Record (number 11 below)

The segments are listed in a required order:

1. ST, 820 Header
2. BPR, Financial Information
3. TRN, Re-association Key
4. DTM, Coverage Period
5. N1, Premium Receiver's Name
6. N1, Premium Payer's Name
7. RMR, Organization Summary Remittance Detail
8. IT1, Summary Line Item
9. SLN, Member Count
10. ADX, Organization Summary Remittance Level Adjustment
11. SE, 820 Trailer

The physical layout of a segment is:

- Segment Identifier, an alphanumeric code, followed by
- Each selected field (data element) preceded by a data element separator ("*")
- And terminated by a segment terminator ("~").

Fields are mostly variable in length and do not contain leading/trailing spaces. If fields are empty, they are skipped by inserting contiguous data element separators ("*") unless they are at the end of the segment.Fields that are not selected are represented in the same way as fields that are selected, but as this particular iteration of the transaction set contain no data, they are skipped.

For example, in fictitious segment XXX, fields 2, 3, and 5 (the last field) are skipped:

XXX*field 1 content*field 4 content~**

BALANCING REQUIREMENTS[1]

Following two balancing rules are given:

1. BPR02 = total of all RMR04
2. RMR04 = RMR05 + ADX01

To comply with balancing rules, BPR02 and RMR04 are set equal to Net Payment (paid amount), RMR05 is set equal to Gross/Calculated Payment (billed amount), and ADX01 is set equal to Adjustment amount.

On Cost/Health Care Premium Plan (HCPP) contracts, Plans should enter the actual dollars billed, rather than the "risk equivalent" dollar amounts, into RMR05.

F.2 September Preliminary Prescription Drug Plan (PDP) Notification File for Plans Losing Beneficiaries to Reassignment

This file is sent to PDPs losing Beneficiaries to reassignment due to premium increase, i.e., the premium going above Low-Income Subsidy (LIS) benchmark in the next year, or going from basic to enhanced benefit. It is a preliminary list of those Beneficiaries CMS expects the Plan to lose due to reassignment. It is used to help PDPs target the appropriate Annual Notice of Change to these Beneficiaries. Please note the file does not include individuals who may regain deemed status in October, nor those Beneficiaries a State Pharmaceutical Assistance Program (SPAP) may reassign if it has the authority to enroll on its members' behalf.

There is no header or footer for this file.

F.3 Batch Completion Status Summary Data File

As of the April 2011 release, the Batch Completion Status Summary (BCSS) file is a hybrid file that communicates the status of file transmissions, as well as reporting and reports on submitted transaction records that failed due to formatting issues. Previously, this file also returned the processing results of accepted and rejected transactions, but as of the April 2011 release, those are reported only on the Daily Transaction Reply Report (DTRR) Data file. Note: The Enrollment Transmission Message File (STATUS) was discontinued as of the April, 2011 Release.

This data file is sent to the submitter after a batch of submitted transactions is processed. It provides a count of all transactions within the batch and details the number of rejected and accepted transactions. It also provides an image of each failed transaction.

F.3.1 Failed Record

Below, the example of a BCSS report displays the format of the file transmission status. Plans get a sense of how the file status incorporates the new Transaction Codes (TCs) 76 through 81 and that the counts for accepted, rejected and failed transactions are displayed.

F.15 Transaction Reply Activity Data File (Daily)

The DTRR is created each evening, Monday through Saturday, and is available for Plans the following business day. All Plans receive a DTRR for all contracts whether the Plan has or has not submitted transactions for processing by MARx. The TRC of 000 indicates that there is no data within the DTRR for processing by the Plan. In turn, the Plan does not need to take any action and may discard this file.

The file also contains records that report the submitted transactions verbatim back to the Plans (F.15.1).

F.18 Loss of Subsidy Data File

This is a file sent to notify Plans about Beneficiaries' loss of LIS deemed status for the following calendar year based on CMS' annual re-determination of deemed status or SSA's re-determination of LIS awards. The file is sent to Plans twice per year, once in September and once in December.

The September file is informational only and is used to assist Plans in reaching out to the affected population and encouraging them to file an application to qualify for the upcoming calendar year.

The December file is for transactions and is used by Plans to determine who has lost the LIS as of January 1st of the coming year. The TRC is 996, which indicates the loss of the LIS. This means the Beneficiary is not LIS eligible as of January 1st of the upcoming year.

F.27 Long-Term Institutionalized (LTI) Resident Report Data File

The LTI Resident Report provides Part D sponsors with a list of their beneficiaries who are LTI residents during July and January annually. This report contains basic information on the beneficiaries and their institutions, i.e., Skilled Nursing Home or Nursing Home.

This new report provides information to Part D Sponsors on which of their enrollees are institutionalized, as well as the names and addresses of the particular long-term care (LTC) facilities in which those beneficiaries reside. This information is obtained by linking Medicare enrollment information with data from the Minimum Data Set (MDS) of nursing home assessments. The list of beneficiaries represents those who are LTI residents as of July and January annually with a reported length of stay of more than 90 days.

The file is sent via HPMS to Part D sponsors in late April and late September. The report is provided in a fixed-length text format and the record layout is described below.

F.28 Agent Broker Compensation Report Data File

For Plan enrollments, MARx establishes a status of initial or renewal as well as a six-year compensation cycle, which provides Plans with the information necessary to determine how to pay agents for specific Beneficiary enrollments. Plans can pay agents an initial amount or a renewal amount as provided in the CMS agent compensation guidance.

Based on the qualification rules, year 1 is the initial year and years 2 through 6 are the renewal years. Plans are responsible for using this information in conjunction with their internal payment and enrollment tracking systems to determine an agent's use and how much to pay the agent.

The Agent Broker Compensation Report Data File is generated and sent to Plans along with the first DTRR of each calendar month.

F.31 No Premium Due Data File Layout

MA enrollees who elect optional supplemental benefits may also elect SSA premium withholding. In mid-November, MARx begins preparing the premium records for the next year. Since MARx cannot anticipate which optional premiums an enrollee may elect for next year, an enrollee only paying optional premiums may convert from “SSA Premium Withholding” status in one year to “No Premium Due” status for the next year. Plans should use the No Premium Due Data File identify enrollees in a “No Premium Due” status for the next year. Plans should review the report and submit both a Part C Premium Update (TC 78) to update the Part C premium Amount, and a PPO Update (TC 75) to request SSA Withholding Status, for enrollees who are renewing both elections for the next year.

F.32 Failed Payment Reply Report (FPRR)Data File

Along with the other monthly payment reports, MARx generates the FPRR. If payment calculation for a beneficiary cannot complete, MARx identifies the beneficiary and time period for which the payment calculation is not performed. The records in this file are the same length as those in the TRR and contain their own unique reply codes.

G: *Screen Hierarchy*

The Common User Interface (UI) screens are accessed via the drill-down method of navigation. Functions are grouped together under a common menu item. For example, most of the Beneficiary-specific information is found under the Beneficiary menu item. **Table G-1** lists the names of the Common UI screens accessible to Managed Care Organizations (MCOs) and their screen numbers, for reference only.

I: *Codes*

This appendix lists the numerical value and descriptions for codes that are highly visible to users.

I.2 Transaction Reply Codes

Table I-2 lists the reply codes returned for transactions found in Table I-1.

Transaction Reply Code (TRC) Types:

A -	Accepted -	A transaction is accepted and the requested action is applied (Example: enrollment or disenrollment)
R -	Rejected -	A transaction is rejected due to an error or other condition. The requested action is not applied to the CMS System. The TRC indicates the reason for the transaction rejection. The Plan should analyze the rejection to validate the submitted transaction and to determine whether to resubmit the transaction with corrections.
I -	Informational -	These replies accompany Accepted TRC replies and provide additional information about the transaction or Beneficiary. For example: If an enrollment transaction for a Beneficiary who is “out of area” is accepted, the Plan receives an accepted TRC (TRC 011) and an additional reply is included in the Transaction Reply Report (TRR) that gives the Plan the additional information that the Beneficiary is “Out of Area” (TRC 016).
M -	Maintenance -	These replies provide information to Plans about the Beneficiaries enrolled in their Plans. They are sent in response to information received by CMS. For example: If CMS is informed of a change in a Beneficiary’s claim number, a reply is included in the Plan’s TRR with TRC 086, giving the Plan the new claim number.
F -	Failed -	A transaction failed due to an error or other condition and the requested action did not occur. The TRC code indicates the reason for the transaction’s failure. The Plan should analyze the failed transaction and determine whether to resubmit with corrections.

Legend for Type: A = Accepted R = Rejected I = Informational M = Maintenance F = Failed

Table I-2: Transaction Reply Codes

Code	Type	Title	Short Definition	Definition
000	I	No Data to Report	NO REPORT	This TRC can appear on both the Daily Transaction Reply Report (DTRR) and the Failed Payment Reply Report (FPRR) data files. On the TRR it indicates that none of the following occurred during the reporting period for the given contract/PBP, a beneficiary status change, user interface (UI) activity, or CMS or plan transaction processing. The reporting period is the span between the previous TRR and the current TRR. On the FPRR it indicates the presence of all prospective payments for the plan (contract/PBP), none are missing. **Plan Action**: None
001	F	Invalid Transaction Code	BAD TRANS CODE	A transaction failed because the Transaction Code (field 16) contained an invalid value. Valid Transaction Code values are 01, 51, 61, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81. This transaction should be resubmitted with a valid Transaction Code. Note: Transaction Types 41 and 54 are valid but not submitted by the Plans. This TRC will be returned in the Batch Completion Status Summary (BCSS) Report along with the failed record and is not returned in the TRR. Plan Action: Correct the Transaction Code and resubmit if appropriate.
002	F	Invalid Correction Action Code	BAD ACTION CODE	A correction transaction (Transaction Type 01) failed because the supplied action code was an invalid value. The valid action code values are D, E, F and G. The transaction should be resubmitted with a valid action code. This TRC is returned in the Batch Completion Status Summary (BCSS) Report along with the failed record. This TRC is not returned in the TRR. **Plan Action:** Correct the Action Code and resubmit if appropriate.
003	F	Invalid Contract Number	BAD CONTRACT #	A transaction (Transaction Types 01, 51, 61, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81) failed because CMS did not recognize the contract number. 106	R	Rejected, Another Trans Rcvd with Later App Date	LATER APPLIC	An enrollment transaction (Transaction Type 61) was rejected because a transaction with a more recent application date or same date as another application date was received for the same effective date. The submitted enrollment has been overridden by an enrollment in another contract/PBP. When multiple transactions are received for the same beneficiary with the same effective date but with different contract/PBP #s, the application date is used to determine which enrollment to accept. 107	R	Rejected, Invalid or Missing PBP Number	BAD PBP NUMBER	An enrollment or Record Update transaction (Transaction Types 61, 72, 73, 74, 75, 77, 78, 79, 80) was rejected because the PBP # was missing or invalid. 114	R	Drug Coverage Change Rejected; not AEP or OEPI	RX NOT AEP/OEPI	An enrollment change transaction (Transaction Type 61) was rejected because the beneficiary is not allowed to add or drop drug coverage using an O (OEP) or N (OEPNEW) election types. Using O or N, a beneficiary who is in a Plan that includes drug coverage may only move to another Plan with drug coverage. Likewise, if in a Plan without drug coverage, the beneficiary may not enroll in a Plan with drug coverage or a PDP. *Occasionally, if a beneficiary is moving from a Plan with drug coverage to a combination of stand-alone MA and PDP plans, the enrollment transaction in the MA-only plan may be processed prior to the enrollment transaction in the PDP plan. Since this appears to CMS as if the beneficiary is trying to drop drug coverage, the enrollment into the MA only Plan will be rejected with TRC 114. Once the enrollment in the PDP is processed, the enrollment in the MA-only may be resubmitted.* **Plan Action:** Review CMS enrollment guidance on the O and N election type limitations in Chapter 2 of the MMCMor the PDP Guidance on Eligibility, Enrollment and Disenrollment. Take the appropriate actions as per CMS enrollment guidance. ***Note:*** As of 1/1/2011 the OEP and OEPNEW election types are obsolete. Plans will no longer see TRC114 unless the effective date of the transaction is set retroactively prior to 1/1/2011. If TRC 114 is received by an MA-only Plan when using the OEP or OEPNEW, the Plan should determine if the beneficiary is enrolled in an accompanying PDP. Once that enrollment is complete, the MA-Only Plan may resubmit their enrollment transaction.

If the Plan is attempting to move the beneficiary to a new contract number, an enrollment transaction (Transaction Type 61) must be used.
112	R	Rejected; Conflicting Effective Dates	OBSOLETE	A PBP change transaction (Transaction Type 61) was rejected because beneficiary was not enrolled in the submitted contract as of the effective date for the PBP change. This TRC provides additional information about an enrollment or PBP change transaction (Transaction Type 61) for which an acceptance was sent in a separate Transaction Reply with an acceptance TRC. The effective date of the enrollment for which this information is pertinent is reported in TRR data record field 18. **Plan Action:** Update the Plan's records accordingly, ensuring that the beneficiary's information matches zero Part D premium amount included in the TRR record.

I.5 Payment Reply Codes

Table I-4 lists the reply codes returned for transactions found in Table I-1.

PRC Types:

A -	Accepted -	A transaction is accepted and the requested action is applied (Example: enrollment or disenrollment)
R -	Rejected -	A transaction is rejected due to an error or other condition. The requested action is not applied to the CMS System. The TRC code indicates the reason for the transaction rejection. *The Plan should analyze the rejection to validate the submitted transaction and to determine whether to resubmit the transaction with corrections.*
I -	Informational -	These replies accompany Accepted TRC replies and provide additional information about the transaction or Beneficiary. For example: If an enrollment transaction for a Beneficiary who is "out of area" is accepted, the Plan receives an accepted TRC (TRC 011) and an additional reply is included in the TRR that gives the Plan the additional information that the Beneficiary is "Out of Area" (TRC 016).
M -	Maintenance -	These replies provide information to Plans about their Beneficiaries enrolled in their Plan. They are sent in response to information received by CMS. For example: If CMS is informed of a change in a Beneficiary's claim number, a reply is included in the Plan's TRR with TRC 086, giving the Plan the new claim number.
F -	Failed -	A transaction failed due to an error or other condition and the requested action did not occur. The TRC code indicates the reason for the transaction's failure. *The Plan should analyze the failed transaction and determine whether to resubmit with corrections.*

J.3 Demographic Report

Description

This report provides a summary, by state and county, of the membership of the MCO. Members are counted in categories that parallel the factors used in calculating the demographic payment (age and sex, Medicaid, and institutional status), as well as ESRD and hospice status.

Example

Below is a section of a Demographic Report that covers one state and county. The section is repeated for each SCC in which the MCO has members.

J.13 Interim Plan Payment Report (IPPR)

Description

Also known as the Interim Payment Letter, this report itemizes interim payments to the MCO. It is produced by the APPS when interim payments are calculated. CMS computes interim payments on an as-needed basis. When this occurs, the interim payment letter is pushed to the involved Plan(s).

IPPR

The APPS IPPR is provided when a Plan is approved for an interim payment outside of the normal monthly process. The report contains the amount and reason for the interim payment to the Plan.

Plans may request the IPPR via the MARx User Interface under the weekly reports section of the menu.

12 Plan Payment Report

Note: For a sample of this report, refer to I- (PPR) for the file format.

J.14 Daily Transaction Reply Activity Report (DTRR) Description

This report lists all of the transactions that CMS processed for an MCO in that week, regardless of source, and gives a final disposition code for each transaction.

Note: A monthly version of this report is also made available to Plans. The report uses the same format as the DTRR.

M: *Valid Election Types for Plan-Submitted Transactions*

Table M-1 shows the valid election types for Plan-submitted enrollment and disenrollment transactions. Plans must ensure the requirements in the CMS Enrollment and Disenrollment guidance applicable to the Plan type are followed to properly determine and report the election type.

Election Types						
PLANS	**AEP (A)**	**OEPI (T)**	**SEP (Note 2)**	**IEP (E/F)**	**MADP**	**ICEP (I)**
MSA	**Y**	**N**	**Y**	**N**	**N**	**Y**
MSA Demo	**Y**		**Y**		**N**	**Y**

Note 1: For code usage, refer to the previously released MMA Guidance and PDP Guidance.

Note 2: For election type SEP, use the following values under these specific circumstances:

- U - for Duals and Individuals with LIS
- W - for EGHP
- V - for permanent moves
- Y - CMS Casework use only (not submitted by Plans)
- S - Any other SEP as provided in guidance that is not one of the above values.

Note 3: In addition to these election period identifiers, CMS provides a valid value of 'X' for use in the election period identifier field. This value is an Administrative Action and Plans may use when a submitted transaction is not reflective of an actual Beneficiary election, as follows:

- Plan submitted "rollover"- Year-end processing occasionally requires that Plans submit transactions to accomplish the Plan crosswalk from one contract year to another. When required, as defined in the CMS Call Letter instructions, Plans should use the 'X' value in the election period field of the enrollment transaction submitted for this purpose.

- Involuntary Disenrollment - In limited circumstances, Plans may involuntarily disenroll individuals for specific reasons and when meeting all of the conditions provided in CMS enrollment guidance. Since these actions are not "elections," Plans should use the value of 'X' in the election period field of the disenrollment transaction submitted for this purpose.

- Premium Option Option Change - Plans may submit changes to an individual's premium withholding status via a 72 transaction. When doing so, Plans should use the 'X' value in the election period field of the 72 transaction submitted for this purpose.

- Plan-submitted "canceling" Transaction - Since beneficiaries may choose to cancel an enrollment or disenrollment request prior to the effective date of the request, occasionally Plans submit "canceling" transactions to CMS to cancel an already submitted action. Plans should use the value TC 80 to cancel and enrollment or TC 81 to cancel a disenrollment transaction.
