Document Change History

Version	Date	Changed By	Items Changed Since Previous Version
1.0	12/17/2014	Melanie Combs-Dyer	Initial submittal

After the implementation of Release 3.1, an error has been identified which consists of an incorrect Request ID received for the First Notification. This error has been reported occurring on an intermittent basis.

Information is being provided to the HIH community that there is a possibility of receiving an inaccurate First Notification and provide assurances this will be corrected with the implementation of Release 4.0.

This incorrect First Notification has no impact on submissions successfully reaching the Enterprise File Transfer system or upon the Review Contractor's ability to download the submissions.

The inaccurate notification reported is the following:

```
<ns21:RegistryResponse requestId="esMD - Audit"  
status="urn:oasis:names:tc:ebxmlregrep:ResponseStatusType:Success">
```

To reiterate, the correct request which should be received by the HIH is:

```
<ns21:RegistryResponse requestId="esMD - Delivery To EnterpriseFileTransfer"  
status="urn:oasis:names:tc:ebxmlregrep:ResponseStatusType:Success">
```
