Home Oxygen Therapy

Order Template Guidance

Purpose

This template is designed to assist a clinician when completing an order for home oxygen therapy to meet requirements for Medicare eligibility and coverage. This template meets the requirements for both the Detailed Written Order (DWO) and Written Order Prior to Delivery (WOPD). This template is available to the clinician and can be kept on file with the patient’s medical record or can be used to develop an order template for use with the system containing the patient’s electronic medical record.

Patient eligibility

Eligibility for coverage of home oxygen therapy under Medicare requires the ordering physician or allowed Non-Physician Practitioner (NPP)\(^1\) to complete a Certificate of Medical Necessity (CMN), OBM Form CMS-484, to establish that coverage criteria are met. This helps to ensure the oxygen equipment and services to be provided are consistent with the physician’s prescription and supported in the patient’s medical record.

Completing the “Home Oxygen Therapy Order Template” does not guarantee eligibility and coverage but does provide guidance in support of home oxygen therapy equipment and services ordered and billed to Medicare. This template may be used with the “Home Oxygen Therapy Laboratory Test Results Template” and “Home Oxygen Therapy F2F Encounter Template”.

What needs to be specified on the order?

- Beneficiary’s name
- Detailed description of Modalities and delivery devices item(s) being ordered
- Ordering Physician or an allowed NPP signature
- Date of the order and the start date, if start date is different from the date of the order
- The prescribing practitioner’s National Provider Identifier (NPI) (required if this is a WOPD)
- O2 Flow Rate
- Estimated frequency and duration of use (e.g., 2L/minute, 10 minutes/Hour, 12 Hours/Day) and
- Duration of need (e.g., 6 Months, 12 Months, 99 Months/Lifetime).

\(^1\) A Medicare allowed NPP as defined is a nurse practitioner, clinical nurse specialist, or physician assistant (as those terms are defined in section 1861 (aa) (5) of the Social Security Act) who is working in accordance with State law.
Oxygen testing timing requirements

For arterial blood gas measurement or oximetry – O2 saturation

Initial Certification Testing

- Within 2 days prior to dismissal from an acute inpatient hospitalization when ordering home oxygen therapy for a patient who is transitioning to a different level of care
- Within 30 days prior to the start of home oxygen therapy.

Who can complete the Home Oxygen Therapy Order Template?

Physician or an allowed NPP who has recently examined the patient (within 30 days prior to the start of home oxygen therapy)

Note: If the order template is used:

1) CDEs in black Calibri are required
2) CDEs in burnt orange Italics Calibri are required if the condition is met
3) CDEs in blue Times New Roman are recommended but not required

Version R4.0

Template Footnotes:
1 Hypoxia-related symptoms or findings that might be expected to improve with oxygen therapy
2 Widespread Pulmonary Neoplasm
3 Physician changed maximum flow rate or type of stationary system
Use of this template is voluntary / optional

**Provider (physician/NPP) who is performing the face-to-face evaluation:**

| Last name: ______________________ |
| First name: ______________________|
| MI: ____________________________ |
| Suffix: _________________________ |
| NPI: __________________________ |
| Date of face-to-face evaluation (MM/DD/YYYY): ______________|

**Patient Diagnoses (check all that apply):**

- COPD
- Bronchiectasis
- Hypoxemia
- Diffuse interstitial lung disease
- Cystic fibrosis
- Pulmonary neoplasm
- Erythrocytosis
- Pulmonary hypertension
- Recurring CHF d/t Cor Pulmonale
- Other: ____________________________

**Start date, if different than date of order (MM/DD/YYYY):** ______________

Length of need: _______ (months) (99 = lifetime)  Flow rate: _______ / _______ (LPM/oxygen %)

**Frequency of use (check all that apply):**

- At rest / awake
- During exertion
- During sleep

Target O2 Sat: _______ % or range _______ % to _______ %

**Frequency of O2 Sat monitoring:**

- Q ______ hrs.
- At rest / awake
- During exertion
- During sleep

**Portable system: maximum length of need for a single trip (e.g. without recharge): _______ / _______ hrs./min.**

**Oxygen supply (for portable modalities, patient must be mobile in the home):**

- Portable: __ Liquid __ Compressed gas __ Concentrator
- Stationary: __ Liquid __ Compressed gas __ Concentrator

**Means of oxygen delivery:**

- __ Nasal cannula
- __ Non-rebreather
- __ Ventilator
- __ Mask
- __ PAP Bleed in
- __ Oxygen Conserving Device
- __ High Flow Oxygen Therapy
- __ Other: ____________________________

**Other options or functions:**

**Type of order (check one category and one or more subcategory items):**

- Initial or original order for certification
- Change in status: __ Patient relocated __ Different supplier __ Other
- Revision or change in equipment: __ New Physician order __ beneficiary requested upgrade with signed ABN __ Other
- Replacement: __ lost or stolen __ end of lifetime __ repair exceeds 60% of cost

**Signature, name, date ordered and NPI (if written order prior to delivery):**

| Signature: ______________________ |
| Name (Printed): __________________|
| Date (MM/DD/YYYY): ______________|
| NPI: __________________________ |
