7.1 Installation of IRISV3 with IRIS95 IRIS, Version 3 - Release Date 12/97

The Centers for Medicare & Medicaid Services (CMS), in response to comments and suggestions from fiscal intermediaries and providers who use the IRIS95 software to report data on interns and residents, has revised the software to make its data more useful and accurate. The new release is known as IRIS, Version 3. The name of the program has been changed from IRIS95.EXE to IRISV3.EXE. Version 3 is the first part of a general redesign effort that will culminate in the release of a fully functional WINDOWS application that will assure consistency between IRIS data and the information filed with the corresponding sections of the CMS Cost Report. Version 3 was released as an interim upgrade because there were several essential changes that could not wait for the final redesign to be completed. For this reason, you may also hear Version 3 referred to as the “Quick-Fix” version.

The new release requires several changes to IRIS’ data (DBF) files, and a conversion procedure must be executed before IRISV3 can be used. We have done everything possible to make this a turnkey activity, however. The new release includes a number of files that can simply be copied over their older counterparts, and a conversion utility program called IR95UPDT.EXE, which performs the necessary changes to the other table structures and the data for you. If you read and follow the simple instructions that follow carefully, you should have no difficulty with the conversion.

The following sections:

- summarize the differences between IRIS95 and IRISV3;
- provide instructions for installing IRISV3 and using IR95UPDT;
- address conversion of data files that will be imported into IRISV3;
- describe what to do if your December 31, 1997 IRIS data has already been processed in the old format.

Changes Made to IRIS95 in Version 3, Known as the “Quick-Fix” Initiative*

- Graduation dates and foreign graduate certification dates are now entered as complete dates instead of months and years.
- All dates are year 2000 enabled.
- The program has been modified to permit:
 - up to 60 rotations per physician per fiscal year;

***- Also shown in Part I of IRISV3 Operating Instructions**

- one day rotations;
 - entering a graduation date within the reporting fiscal year, as long as it precedes all rotations recorded for that physician -- rotations will be permitted to begin on or after the physician's graduation date;
 - for foreign medical graduates, entering a certification date within the reporting fiscal year, as long as it precedes all rotations recorded for that physician, and occurs on or after the graduation date -- rotations will be permitted to begin on or after the certification date; and
 - hyphens in physician name fields.
- A non-fatal warning edit has been added to alert providers when an IME% that exceeds the GME% for a rotation has been entered.
 - Two new fields have been added to the assignment (rotation) records. One indicates which year of residency the current rotation attaches to. The second indicates the current residency code during the rotation. (NOTE: the original residency code, on which the number of years of the physician's eligibility is based, and the number of years completed as of July 1 of the reporting FY, remain as fields in the physician's master record.)
 - The Employer field in the master record will be retained as it is, and it has an accessible Help screen. The contents are not edited by IRIS, and providers have used this field for employer identification.
 - The Foreign Graduate question and the FOREIGN field in the physician's master record have been eliminated. Instead, the value will be inferred from the medical school code. The foreign graduate's certification date will be requested whenever medical school code "99999" is used.
 - Medical school code "99998" has been added to cover all foreign dental schools and other updates to the table of medical school codes have been made.
 - A tenth (prefix) character has been added to the social security number field to distinguish between American and Canadian identifying numbers. The prefix will default to "U" for United States graduates, but will be able to be overridden to "C" for Canadians.
 - The table of residency codes has been updated.
 - Help screens have been added to cover all new fields and existing help screens were modified to include any new text submitted by the Instructions Subgroup.
 - A utility program is included with the new IRIS program that:

- updates data structures;
- converts graduation and certification dates to their new formats;
- back-fills the new fields in records entered before the new version of IRIS was received by the provider; and
- adds the tenth character to the social security number in those records.

Note that the new assignment record fields match current residency year and specialty code data with specific rotations, while the residency year charged for the current fiscal reporting year and the base residency code of the physician are stored in the physician's master record for the fiscal year. Hospitals may, if they wish, go back and edit records already in the system to add the new data. If they prefer not to do that, they can use this utility program to fill the new fields in the assignment records with the same values that appear in the master records. Individual records can still be edited after the utility program is run.

Installation of IRISV3.EXE and the Use of IR95UPDT.EXE

The utility program, IR95UPDT.EXE, modifies existing intern and resident (IR) data files to make them usable with IRISV3, with NO other changes required by the user.

The utility program does the following:

- Modifies the SSN field in both the master and assignment files and fills the first character with either all "U"s, or "U" or "C" at the user's discretion.
- Adds the ARESYEAR and ARESTYPE fields to the assignment file and fills them with values from the master record. ARESYEAR can either be filled with the value of RESYEAR in the master record or the user may enter an anniversary date for each IR so the program can increment ARESYEAR at the appropriate time.
- Modifies the MSGRADDATE and FORCERTDAT fields in the master record and converts all the mm/yy values to mm/01/yyyy.

WARNING: It is absolutely essential that the following instructions be strictly adhered to.

IR95UPDT has been thoroughly tested, and should handle your data file conversions flawlessly.

However, personal computers sometimes suffer from events beyond the control of the user (power outages, lightning strikes, and other unforeseen events) and these instructions are designed to protect you from a catastrophic loss of data.

Installation Instructions

These instructions assume that you run on **Drive C**, and that your IRIS95 program resides in a **directory named C:\IRIS95**. If you run on a different drive, simply substitute its drive letter (D, E, F, and so on) for C in what follows.

- (1) Make sure that your primary IRIS data files (IRISMAST.DBF and IRISASGN.DBF) are backed up in a safe place before you begin. This can mean copied onto a diskette/CD, in a clean directory, in a shared directory on your network, or on a tape.
- (2) Create a new directory on your operating drive, called IRISV3. Copy the entire contents of the C:\IRIS95 directory into the new IRISV3 directory.
- (3) At the "C:\IRISV3>" prompt, insert your Update IRISV3 diskette/CD in drive A and type the command:

A:\IRV3INST<Enter>

At each "Overwrite (y/n)?" prompt, type:

y<Enter>

The updated program is now installed.

- (4) At the "C:\IRISV3>" prompt, type:

IR95UPDT<Enter>

This program consists of three functions, each with a self containing screen of explanatory information. Each may only be run once, and each will prevent you from re-running it if you attempt to repeat it. Simply run the three functions in order, and your data tables will be converted for use with IRISV3.

- (5) Before running the IRISV3 program, the following program initialization steps **must** be performed the first time you run IRISV3. Do not attempt to execute any other IRIS functions until this step is complete. Before proceeding, make sure the <Caps Lock> key is "On".

To initialize the program from the "C:\IRISV3>" prompt, type

IRISV3 <Enter>

Select "Reference Files/Data Management" from the main menu by pressing <5> and run each of the first four procedures in the next menu that appears. The Reference Files menu reappears after each procedure is completed. (The Reference Files menu is discussed in detail in section 3.3):

- first, select “Rebuild Data Indexes” by pressing <3>. This causes IRIS to create “index files” which enable the program to search and display data in various orders that are required by the different program functions (section 3.3.3);
 - second, select “Generate Data Help Windows” by pressing <4>. This causes IRIS to create the text screens that are used when the help key is pressed during program execution (section 3.3.4);
 - third, select “Set up Administrative Data” by pressing <1>; this tells IRIS that you are entering (at a minimum) the requested information about the provider and the fiscal reporting period (section 3.3.1);
 - fourth, select “Employer Names” by pressing <2> and enter the list of employer names for the resident data selection list. If you have followed the previous steps in order, the employer names list will initially contain only the provider name that was entered in the previous step (section 3.3.2).
- (6) You are now ready to run IRISV3. Use it as you previously used IRIS95. It has nearly the same look and feel of the current version, except where the modifications described earlier required changes in design.

Special Instructions for Importing Data into IRIS

Just as it was necessary to modify IRISMAST.DBF and IRISASGN.DBF so that they would conform to IRISV3, providers that use one of IRIS’ data import procedures will have to change the structures of the data files that they import before they execute the import procedure. Just as it was necessary to carefully format the import files in the earlier release, to assure that data were appended properly, it is equally important to adjust those formats for the new release. To assist with this process the old and new formats (files structures) are displayed on the following pages. Although the conversion utility, IR95UPDT.EXE, discussed above converts the structures of the IRIS data tables automatically, it normally cannot do so for the files from which you import data.

OLD Structure for table IRISMAST.DBF:

<u>Field Name</u>	<u>Type</u>	<u>Length</u>	<u>Usage</u>
SSN	CHARACTER	9	999999999
FNAME	CHARACTER	14	AAAAAAAAAAAAAA
MNAME	CHARACTER	1	A
LNAME	CHARACTER	20	AAAAAAAAAAAAAAAAAAAA
EMPLOYER	CHARACTER	50	AAAAAAAAAAAAAAAAAAAAA...
RESTYPCODE	CHARACTER	4	9999
RESYEAR	NUMERIC	1	9
MEDSCHOOL	CHARACTER	5	99999
MSGRADDATE	CHARACTER	4	mmyy
FOREIGN	CHARACTER	1	A
FORCERTDAT	CHARACTER	4	mmyy
PROVNUMBER	CHARACTER	6	999999
FYBEGIN	DATE	8	mm/dd/yy
FYEND	DATE	8	mm/dd/yy
CREATEDATE	DATE	8	mm/dd/yy
MODIFYDATE	DATE	8	mm/dd/yy

NEW Structure for table IRISMAST.DBF:

<u>Field Name</u>	<u>Type</u>	<u>Length</u>	<u>Usage</u>
SSN	CHARACTER	10	A999999999
FNAME	CHARACTER	14	AAAAAAAAAAAAAA
MNAME	CHARACTER	1	A
LNAME	CHARACTER	20	AAAAAAAAAAAAAAAAAAAA
EMPLOYER	CHARACTER	50	AAAAAAAAAAAAAAAAAAAAA...
RESTYPCODE	CHARACTER	4	9999
RESYEAR	NUMERIC	1	9
MEDSCHOOL	CHARACTER	5	99999
MSGRADDATE	DATE	8	mm/dd/yy
FORCERTDAT	DATE	8	mm/dd/yy
PROVNUMBER	CHARACTER	6	999999
FYBEGIN	DATE	8	mm/dd/yy
FYEND	DATE	8	mm/dd/yy
CREATEDATE	DATE	8	mm/dd/yy
MODIFYDATE	DATE	8	mm/dd/yy

OLD Structure for table IRISASGN.DBF

<u>Field Name</u>	<u>Type</u>	<u>Length</u>	<u>Usage</u>
PROVNUMBER	CHARACTER	6	999999
SSN	CHARACTER	9	999999999
FYBEGIN	DATE	8	mm/dd/yy
TIMEPERC	NUMERIC	3	999
IMEPERC	NUMERIC	3	999
GMEPERC	NUMERIC	3	999
ASGNBEGDAT	DATE	8	mm/dd/yy
ASGNENDDAT	DATE	8	mm/dd/yy

NEW Structure for table IRISASGN.DBF

<u>Field Name</u>	<u>Type</u>	<u>Length</u>	<u>Usage</u>
PROVNUMBER	CHARACTER	6	999999
SSN	CHARACTER	10	A999999999
FYBEGIN	DATE	8	mm/dd/yy
TIMEPERC	NUMERIC	3	999
IMEPERC	NUMERIC	3	999
GMEPERC	NUMERIC	3	999
ASGNBEGDAT	DATE	8	mm/dd/yy
ASGNENDDAT	DATE	8	mm/dd/yy
ARESYEAR	NUMERIC	1	9
ARESTYPE	CHARACTER	4	9999

Note that although IRIS is now year 2000 enabled, date fields are still eight characters wide, including two slashes and a two digit year. "DBF" files always store years in date fields as 4 digit integers internally. The two digit year in the date format can be misleading in this regard. The reason we can use that format during the conversion is that there are not yet any dates in IRIS that extend past January 1, 2000. And for future dates, the program handles the century indicator invisibly to the user. The exceptions are the graduation and certification dates which will be entered from now onward with explicit four digit years, as "mm/dd/yyyy".

We recommend that the conversion of imported data be handled external to IRIS, either by manual manipulation of the files or by adjustments to the system that originally created them. Surely, the latter would have to be done for future reporting periods, anyway. During the conversion to the new version of IRIS, however, there is a way to use IR95UPDT to convert your imported data, but this method is not for everyone. We don't recommend using it unless you are confident in your ability to manage these files on your own. If you would like to try this approach, refer to the end of the next section.

Reformatting Your Import Files with IR95UPDT.EXE

Users who feel confident in their ability to manipulate files manually can use IR95UPDT.EXE to modify their import data, if they were already formatted for the old IRIS95 by the time you received IRISV3. The procedure is not difficult once you realize that IR95UPDT can only modify files named IRISMAST.DBF and IRISASGN.DBF.

Thus, to modify your import files with IR95UPDT:

- Create a temporary directory on your hard drive, and copy your import files into that directory, while naming them IRISMAST.DBF and IRISASGN.DBF. If you name your temporary directory IMPORT, and your import files were originally named IMPMAST.DBF and IMPASGN.DBF, you will issue the DOS commands:

```
COPY A:\IMPMAST.DBF C:\IMPORT\IRISMAST.DBF
COPY A:\IMPASGN.DBF C:\IMPORT\IRISASGN.DBF
```

Of course, since you are not placing these files in the IRISV3 directory, they may be given the same names as your IRIS tables.

- Copy IR95UPDT.EXE into the IMPORT directory, and execute it there. It will now perform exactly the same operations on your import data that it did on your IRIS data tables. But running IR95UPDT in the IMPORT directory has no effect on your original data tables because they are safely in another directory. IR95UPDT can only see files in the directory in which it is stored.

If you use this method be extremely cautious. The risks associated with using sets of identically named files in different directories should be obvious. **Do not attempt to do this unless you are sure you know what you are doing!**

If your December 31, 1997 IRIS data have already been processed using the old version of IRIS95

... and you have followed the update installation instructions and the instructions for running IR95UPDT, above, you have already done everything you have to do, and you have lost nothing by entering your December 31, 1997 IRIS data early. You can now produce an IRIS diskette/CD to send to your MAC by simply re-running the program function that creates the diskette/CD. Even if you have already submitted your disk/CD by the time you receive these instructions, the only duplicated work you will have to do is regenerating your submission disk/CD.

7.2 Medical School Code Table

ACRONYM REFERENCE TABLE FOR OBSOLETE CODES

Allopathic Residency Type Codes:

EM/FM – EMERGENCY MEDICINE/FAMILY MEDICINE
IM/FM – INTERNAL MEDICINE/FAMILY MEDICINE
IM/N – INTERNAL MEDICINE/NEUROLOGY
IM/PRM – INTERNAL MEDICINE/PREVENTIVE MEDICINE
N/PHM&RE – NEUROLOGY/PHYSICAL MEDICINE & REHABILITATION
N/R,D/NR – NEUROLOGY/RADIOLOGY, DIAGNOSTIC/NEURORADIOLOGY
PE - PEDIATRICS
PE/DERM – PEDIATRICS/DERMATOLOGY
PE/MG – PEDIATRICS/MEDICAL GENETICS
PE/PHM&R – PEDIATRICS/PHYSICAL MEDICINE & REHABILITATION
PE/PS/CA – PEDIATRICS/PSYCHIATRY/CHILD & ADOLESCENT PSYCHIATRY
PHM&R/N – PHYSICAL MEDICINE & REHABILITATION/NEUROLOGY
PS/N – PSYCHIATRY/NEUROLOGY
R,D – RADIOLOGY, DIAGNOSTIC
SM – SLEEP MEDICINE

Osteopathic Residency Type Codes:

DR – DIAGNOSTIC RADIOLOGY
FM/INMM – FAMILY MEDICINE/INTEGRATED NEUROMUSCULAR MANIPULATIVE MEDICINE
HEM - HEMATOLOGY
IM – INTERNAL MEDICINE
N - NEUROLOGY
OB/GYN – OBSTETRICS/GYNECOLOGY
PA,LM – PATHOLOGY, LABORATORY MEDICINE
PE - PEDIATRICS
PS – PSYCHIATRY

7.5 Help Screens

Main Menu Help

Screen 1:

IRIS data is divided into three groups that are described below.

REFERENCE DATA -- While entering IRIS data, the user selects residency type codes, medical school codes, and employer names from display windows. Residency and medical school tables are supplied and maintained by CMS. The Employer Name Table is created by selecting Main Menu Option <5>.

ADMINISTRATIVE DATA -- The hospital provider number and name, fiscal year (FY) start & end dates, and two flags that determine the display order of the residency and medical school tables are also accessed from Main Menu Option <5>.

INTERN/RESIDENT (IR) DATA -- Assignment Master Records identify an IR, hospital FY, residency years completed and type of residency, and medical school data. Each Master Record can have up to 60 rotational assignments. ASSIGNMENT PERIODS MAY NOT OVERLAP! If 2 or more hospitals share an IR's time, they must coordinate their report to assure that no more than 100 percent of the IR's time is claimed during any assignment period.

Adding New Records

Screen 1:

Intern/Resident records can be added in four different ways:

- (1) Create new records from the keyboard using the IRIS data entry screen.
- (2) Import System Data Format (SDF) records from ASCII files in which all records are of fixed length, and each record is parsed identically into fields. SDF records use no delimiters or punctuation marks. Character fields are left adjusted (no leading blanks) and numeric fields are right adjusted (no trailing blanks).
- (3) Import records from DELIMITED TEXT files in which records vary in length. Character fields are enclosed in quotation marks (") and contain no trailing or leading blanks. All fields are separated by commas.
- (4) Append records from Data Base Format (DBF) files that have the same structures as the IRIS databases (IRISMAST.DBF and IRISASGN.DBF). Use this option to move data entered on a diskette/CD into your central databases, or to merge data that were entered on multiple diskettes/CDs.

REFER TO YOUR **IRISV3** OPERATING INSTRUCTIONS FOR THE EXACT RECORD LAYOUTS REQUIRED.

Scrolling Data Windows

Screen 1:

<u>Pressing Key(s)</u>	<u>Causes the Program to</u>
<Up Arrow>	Scroll Up 1 record
<Down Arrow>	Scroll Down 1 record
<PgDn>	Display the next screenful of data
<Any Letter or Numeral>	Place the first record whose Key Field begins with the selected character at the top of the screen. NOTE: The Key Field for Residency Type and Medical School Windows is selected by the user in the "Setup Administrative Data" function.
<Ctrl-PgUp>, ##	Scroll Up ## Records
<Ctrl-PgDn>, ##	Scroll Down ## Records
<End>	Quit Scrolling and make a Selection

Social Security Number

Screen 1:

Enter the intern/resident's (IR) Social Security Number (SSN) and press <Enter>. Include ONLY those IRs who participate in teaching programs approved under 42 CFR 412.105(f) and 413.75(b).

In IRISV3, SSNs are ten character strings. The first character must contain either "U" (US) or "C" (Canada). This character is used for dual tracking of nine digit United States SSNs and nine digit Canadian Social Insurance Numbers as identification numbers. Characters two through ten must contain numerals between zero (0) and nine (9).

The first character always defaults to "U" in new records. To enter "C", simply type over the "U".

NOTE: You may escape from the data entry screen by entering a blank SSN.

Intern/Resident Name

Screen 1:

Enter the intern/resident's complete first name, middle initial, and last name. Do not use nicknames or abbreviations such as Bob in lieu of Robert or Chuck or Charlie in lieu of Charles. Do not use suffixes such as "Jr." or "II". If the last name is more than 20 characters long, use only the first 20 characters.

Employer's Name

Screen 1:

Select the name of the hospital or provider that is currently paying the intern/resident's (IR) salary. The user can add another name to the Employer Name Table if a different hospital or provider is involved in paying the IR's salary. The user can add, modify or delete these names in this table from option <2> of the IRIS Reference Data Management Menu. This menu is activated through option <5> of the IRIS Main Menu.

Residency Type Code (Master Record)**Screen 1:**

Enter the 4 digit Residency Type Code for the **medical** specialty program in which the intern/resident (IR) is seeking Board certification. These codes are grouped as follows:

1050-2960	Allopathic specialties
3050-6650	Osteopathic specialties
7050-7350	Podiatric specialties
8050-8850	Dental specialties
9050-9100	Other specialties (emergency medicine)
9150-9950	Reserved for future use

If you do not know the code for the specialty you wish to enter, enter a blank code **and select the appropriate code** from a display window.

Some specialties include one or more subspecialties, each of which is assigned a separate code. In addition, many of the **allopathic** specialties are **similar** to osteopathic specialties, which are assigned a different set of unique codes. That is, the **allopathic** specialty code for internal medicine is 1400; the osteopathic specialty code for internal medicine is 3900.

YOU MUST ENTER A VALID RESIDENCY TYPE CODE TO SAVE AN IR'S DATA RECORDS.

Residency Type Code (Master Record)**Screen 2:**

NOTES

1. **Some allopathic** specialties require a year of broad-based training as a prerequisite for subsequent training. This requirement is **met as follows**:

a. The year of broad-based training (**preliminary year**) is included in the accredited length of the program listed in the GRADUATE MEDICAL EDUCATION DIRECTORY (**GMED**). If the IR begins training in a program that incorporates the year of broad-based training, the initial residency period for that specialty is equal to the period listed in the **GMED**. Enter the residency type code (RTC) for the **IR's subsequent specialty program**. **It is the hospital's responsibility to maintain documentation on those IRs that have simultaneously matched for the preliminary year and the subsequent specialty**. Refer to 42 CFR 413.79(a)(10).

b. The IR completes a transitional year **program in allopathic medicine** as a prerequisite for subsequent specialty training. Enter RTC 2525 (TRANSITIONAL YEAR) in the IR's first program year. In the IR's second program year, enter the RTC for the specialty in which the IR is training. If a prerequisite year is required for this specialty, the initial residency period listed in the **GMED** incorporates the transitional year.

Residency Type Code (Master Record)**Screen 3:**

NOTES (Continued)

c. The IR completes the prerequisite year through a year of training in another specialty. Enter the RTC for the residency program in which the IR begins training. The initial residency year is equal to the period listed in the **GMED** for the initial specialty in which the IR is training even if the IR is completing the year of training as a prerequisite for another specialty.

2. If an IR changes his/her specialty during the reporting period, report the INITIAL specialty, i.e., the specialty the IR was participating in on the FIRST DAY OF THE FIRST ASSIGNMENT PERIOD OF THE REPORTING PERIOD. NOTE: Even if a FIRST YEAR IR changes his/her specialty during the reporting period, show the INITIAL specialty, i.e., the specialty program in which the IR was seeking Board certification on the first day of the first assignment period.

3. IRs in a **traditional** rotating internship year in osteopathic medicine must be assigned RTC 6400 (**TRADITIONAL ROTATIONING INTERNSHIP**). **This internship year** is the first year of post-graduate training for graduates of osteopathic medical schools. Like transitional year programs, the osteopathic rotating internship provides a year of broad-based training.

Residency Type Code (Master Record)

Screen 4:

NOTES (Continued)

4. For IRs beginning training in general emergency medicine on or after August 30, 1996, enter RTC 1250 (EMERGENCY MEDICINE). The initial residency period for these IRs will be 3 years. For IRs beginning training on or after July 1, 1995 and before August 30, 1996 in general emergency medicine, assign either RTC 9050 (EMERGENCY MEDICINE - 3 YEAR PROGRAM) or RTC 9100 (EMERGENCY MEDICINE - 4 YEAR PROGRAM).

5. **Some of the residency types in the table of residency codes originated from the Table of Initial Residency Period Limitations in the August 30, 1996 FEDERAL REGISTER (61 FR 46208-46211). The rest of these types are based on descriptions of residency types from the following organizations: American Medical Association, American Osteopathic Organization, American Dental Educational Association, and the American Podiatric Medical Organization.**

6. The Residency Type selection window always displays the same information but the order in which Residency Types are displayed (e.g., by code or by description) can be changed by selecting "Setup Administrative Data" from option <5> in the IRIS Main Menu.

Residency Years Completed (Master Record)

Screen 1:

Enter the total number of **program** years the intern/resident (IR) has COMPLETED in ALL types of approved residency programs as of July 1 of the fiscal year for which you are reporting. For example, enter "0" if the IR has completed less than **one program year in all types of approved programs**, "1" if the IR has completed less than **two program years in all types of approved programs**, etc. The range for the total number of program years is 0 through 9. Enter "9" if the total number of program years exceeds **9 years**.

NOTE: Include time spent in transitional year programs as discussed in the Help Screen notes on "Type of Residency".

Medical School Code

Screen 1:

Enter the five digit code for the medical school from which the intern/resident (IR) graduated. If you do not know the code, enter a blank field to open a selection window for the desired code. Enter "99998" for foreign dental school or "99999" for foreign medical school if the IR did not graduate from an allopathic, osteopathic, dental, or podiatry school accredited or approved as having met the standards necessary for accreditation by one of the following organizations: the Liaison Committee on Medical Education of the American Medical Assoc., American Osteopathic Assoc., Commission on Dental Accreditation, and Council on Podiatric Medical Education. Medical schools are grouped as follows:

00102-06801	Allopathic or Osteopathic Schools
10000 & 20000	Dental Schools (Obsolete - use Codes 81250-83959)
30000-30800	Podiatric Schools
81250-84052	Dental Schools
99998	Foreign Dental Schools
99999	Foreign Medical Schools

The Medical School selection window always displays the same information but the order in which medical schools are displayed can be changed by selecting "Setup Administrative Data" from option <5> in the IRIS Main Menu.

Medical School Graduation Date

Screen 1:

IRISV3 REQUIRES A COMPLETE DATE IN THIS FIELD. Enter the date the intern/resident graduated from medical school in the format "mm/dd/yyyy". Months and days must both be entered with leading zeroes such as "06/08/2001" for June 8, 2001. If the graduation month is known and the specific day of the month is unknown, enter the first day of the month.

Foreign Student Certification

Screen 1:

IRISV3 REQUIRES A COMPLETE DATE IN THIS FIELD. This field is activated only if medical school code "99999" is entered. Enter the date the IR passed the United States Medical Licensing Examination (USMLE), Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS), OR Parts I and II of the National Board of Medical Examiners Examination OR prior to July 1, 1986, received certification from, or passed an examination of, the Educational Committee for Foreign Medical Graduates (ECFMG). Use format "mm/dd/yyyy". Months and days must both be entered with leading zeroes such as "06/08/2001" for June 8, 2001. If the certification month is known and the specific day of the month is unknown, enter the first day of the month.

NOTE: Beginning June 1, 1992, foreign medical school graduates (FMSG) had the option of taking either the USMLE or the FMGEMS. Effective July 1, 1993, FMSGs MUST pass Step 1 (Basic Science) and Step 2 (Clinical Science) of the USMLE. Effective June 14, 2004, FMSGs are required to pass Step 1, Step 2

Clinical Knowledge (CK) and Step 2 Clinical Skills (CS) for certification from the ECFMG. Do not use either the issuance date or the English examination date on the ECFMG certificate as the certification date. Instead use the latest examination date of any other examination as the certification date. For example, if the FMSG passed the CK test on May 15, 2004 and the CS test on July 1, 2004, then the certification date is the later date of July 1, 2004.

Assignment (Rotation) Time Periods

Screen 1:

IRISV3 REQUIRES COMPLETE DATES IN THIS FIELD. Enter start and end dates of each rotational assignment during which the intern/resident (IR) was assigned to and worked at the hospital or any of its hospital based providers (Home Health Agency, Skilled Nursing Facility, etc.) Use format "mm/dd/yyyy". Months and days must both be entered with leading zeroes such as "06/08/2001" for June 8, 2001.

Include any time the IR worked in non-provider settings such as freestanding clinics, nursing homes, and physicians' offices in connection with approved programs, if the IR spent time in patient care activities, and: 1) there is a written agreement between the hospital and the non-provider site or entity stipulating that the hospital pays the IR's salary for training time outside the hospital setting; 2) the hospital must incur all or substantially all of the costs for the training program in the non-provider setting; and 3) the hospital is subject to the principles of community support and redistribution of costs. Refer to 42 CFR 412.105(f) and 413.78(g).

Assignment (Rotation) Time Periods

Screen 2:

All start and end dates MUST LIE WITHIN THE FISCAL YEAR for which you are reporting, and assignment periods MAY NOT OVERLAP! For example, if the fiscal year runs from October 1, 2002 to September 30, 2003, and an assignment period runs from July 1, 2003 to November 30, 2003, the assignment period to be reported during this reporting year is July 1, 2003 to September 30, 2003. The end date MAY NOT BE LATER than the end of the hospital's cost reporting period.

If, however, the assignment period spans July 1 within the fiscal year for which you are reporting, enter this assignment period as two periods. For example, if the fiscal year runs from October 1, 2002 to September 30, 2003, and an assignment period runs from May 1, 2003 to November 30, 2003, the assignment periods to be reported during this reporting year are as follows: May 1, 2003 to June 30, 2003; and July 1, 2003 to September 30, 2003. Again the end date MAY NOT BE LATER than the end of the hospital's cost reporting period.

NOTE: IRIS provides space (fields) to report 60 individual rotations for an IR.

Full Time/Part Time Percentage

Screen 1:

Enter "100" percent if the intern/resident (IR) worked full time during the

assignment period. If the IR worked part time during this period, enter the IR's percentage of an FTE (full-time equivalent). Information indicating the IR's percentage of less than full time should be available in either an employment contract or a letter from the **accrediting organization such as** the Accreditation Council on Graduate Medical Education. A hospital must receive permission from the **accrediting organization** to allow an IR to work part time **in an approved specialty program**. Refer to 42 CFR 412.105(f) and 413.78(b).

IME Percentage

Screen 1:

Enter the percentage of time the intern/resident (IR) worked in the inpatient area of the hospital subject to PPS, or in the outpatient department during the assignment period. Include the time the IR worked in a **non-provider** setting under agreement with the **hospital during** the assignment period. Refer to 42 CFR 412.105(f).

If the IR worked in more than one hospital or **non-provider** setting, enter the percentage of time spent in the inpatient and/or outpatient areas of the hospital as compared to the total time worked at all facilities. Example: an IR worked 4 hours/day in the inpatient area of hospital A and 8 hours/day in hospital B. Hospital A would report 33% under Indirect Medical Education (IME). If the IR worked an additional 4 hours/day in hospital A's home health unit, which cannot be included in the IME computation, hospital A would report 25% (4 inpatient hours at hospital A divided by 16 total hours).

NOTE - The IME percentage may be computed based upon hours, days, or months **(if appropriate)**. No more than 100%, in the aggregate, may be reported for any IR, by all hospitals reporting. **HOSPITALS MUST COORDINATE IME DATA (ESPECIALLY FOR THOSE IRs WORKING IN MORE THAN ONE HOSPITAL)** REPORTED IN IRIS.

GME Percentage

Screen 1:

Enter the unweighted percentage of time the intern/resident (IR) worked in any area of the hospital complex or in a **non-provider** setting under agreement with the **hospital during** the assignment period. **This percentage of time is not weighted for IRIS reporting purposes, and is to be weighted outside of IRISV3 for Medicare cost reporting purposes.** Refer to 42 CFR 413.78.

If the IR worked in more than one hospital or **non-provider** setting not under agreement with the hospital during the assignment period, enter the percentage of time worked in the hospital in comparison to the total time worked at all facilities. Example: an IR worked 4 hours/day at hospital A and 8 hours/day at hospital B. Hospital A would report 33% under Graduate Medical Education (GME). If the IR worked 4 days a week at hospital A and 3 days a week at hospital B, hospital A would report 57% (4 days at hospital A divided by 7 total days).

NOTE - The GME percentage may be computed based upon hours, days, or months **(if appropriate)**. No more than 100%, in the aggregate, may be reported for any IR by all hospitals reporting. **HOSPITALS MUST COORDINATE GME DATA (ESPECIALLY FOR THOSE IRs WORKING IN MORE THAN ONE HOSPITAL)** REPORTED IN IRIS.

Residency Years Completed (Assignment Records)

Screen 1:

For the first rotational assignment, enter the residency year (RY). The RY is the number of years the intern/resident (IR) has COMPLETED in all types of approved residency programs. For example, enter "0" if the IR has completed less than one **program** year in all types of approved programs, "1" if the IR has completed less than two **program** years in all types of approved programs, etc. The range for the total number of program years is 0 through 9. Enter "9" if the total number of program years exceeds 9 years. If the RY for any subsequent rotational assignments is not entered, the IRISV3 program will assign the same number of years completed as **previously** entered for the first rotational period. If the RY is entered manually for successive rotations, enter the number of years completed **as of** the first day of the rotation.

NOTE: Include time spent in transitional year programs as discussed in the **notes in the Help Screens for Residency Type Code (Master Record)**.

Residency Type Code (Assignment Records)

Screen 1:

For the first rotational assignment, enter the 4 digit Residency Type Code (RTC) for the **medical** specialty program in which the intern/resident (IR) is training **if this program is different from the RTC that was entered in the master record**. For example, enter RTC 2525 for the IR's transitional year **if the master record contains RTC 2650 for the IR's intended Board certification in urology**. If the RTC is not entered for any subsequent rotational assignment, the IRISV3 program will assign the same RTC as was **previously** entered for the first rotational assignment. If the RTC is entered manually for successive rotations, enter the RTC on the first day of the rotation. **These** codes are grouped as follows: Codes 1050-**2960** (Allopathic specialties); 3050-**6650** (Osteopathic specialties); 7050-**7350** (Podiatric specialties); 8050-**8850** (Dental specialties); 9050-9100 (Other specialties (emergency medicine)); and 9150-9950 (Reserved for future use).

If you do not know the **code for the specialty or sub-specialty** that you wish to enter, enter a blank **code and select the appropriate code** from a display window.

NOTE: **Read the notes in the Help Screens for Residency Type Code (Master Record) for information on transitional year programs, re-ordering the residency code table in the selection window, and other items of interest.**

Searching for Resident Data (Browse, Change, Delete Functions)

Screen 1:

To Browse, Edit, or Delete Intern/Resident (IR) Data, you must first locate the Master Record you are interested in. You may search for a Master Record by Social Security Number (SSN), IR's Last Name, Residency Type Code, or the Medical School Code from which the IR graduated. Finally, you may search the entire file in IR name order.

Select your search option by pressing a number from 1 to 5. If 1 through 4 is pressed, IRIS will prompt you for a "search string". You may enter a complete SSN, Name, or Code, or just the first few characters. For example,

if you select 2, and then type "JO", IRIS will display master records in last name order, starting with the first last name that begins with "JO". If you selected 1 or 2, IRIS will force you to reenter the search string until you enter characters that exist in at least one Master Record. If you entered 3 or 4, IRIS will display the message "Search Failed" if it cannot locate the search string you entered.

After IRIS displays the Master Records, follow the instructions at the bottom of the screen to scroll until the record you want is visible, then press <End>. Press <Esc> to end and/or restart the search procedure.

7.6 Viewing/Creating IRIS Diskette/CD Files or CMS Report Disk/CD Files Outside of IRISV3

1. Appearance of M3096669.XLSX in **EXCEL** 2010 and Data Entry Specifications for M3xxxxxx.XLSX (“xxxxxx” is the provider’s six-digit Medicare identification number) in **EXCEL**--

Data Entry Specifications for M3xxxxxx.CSV:

See Item Number 1 above for creating M3xxxxxx.XLSX in **EXCEL**. If you are planning to import this file into IRISV3, and you have records with code "99998" for foreign dental school, enter the date for medical [dental] school graduation date for passing the IRISV3 import edit routines. Then save this file in CSV format as M3xxxxxx.CSV in **EXCEL**. This saving process will require you to answer several or more prompts ("Yes", "OK", or "Save"), and to click the smaller "x" in the **inside** right hand corner of the spreadsheet file to continue this process; this process will end after the spreadsheet file disappears from the PC screen.

III. Description of Changes/Modifications to June '98 Release, IRISV3

June '98 Release, IRISV3 (Version 3.01)

- Residency Year (Assignment Record) -

The edit was changed from (ARESYEAR must be equal to RESYEAR or plus 1 year to RESYEAR) to (ARESYEAR must be equal to RESYEAR or plus 1 year to RESYEAR or minus 1 year from RESYEAR).

- Fiscal Year Change (Administrative Data) -

Changes made to the previously entered fiscal year begin and end dates in the Administrative Data section of IRIS now updates all master and assignment records with the changed dates.

- Evaluation of Imported Data Reports -

The social security number field on the evaluation report was made large enough to accommodate a ten character social security number.

IV. Description of Changes/Modifications to June '99 Release, IRISV3

June '99 Release, IRISV3 (Version 3.1)

- All dates are now entered and presented as complete dates as in "mm/dd/yyyy"* for Y2K compliance. Shown below are revised structures for tables IRISASGN.DBF and IRISMAST.DBF:

REVISED Structure for table IRISASGN.DBF

<u>Field Name</u>	<u>Type</u>	<u>Length</u>	<u>Usage</u>
PROVNUMBER	CHARACTER	6	999999
SSN	CHARACTER	10	A999999999
FYBEGIN	DATE	8	mm/dd/yyyy*
TIMEPERC	NUMERIC	3	999
IMEPERC	NUMERIC	3	999
GMEPERC	NUMERIC	3	999
ASGNBEGDAT	DATE	8	mm/dd/yyyy*
ASGNENDDAT	DATE	8	mm/dd/yyyy*
ARESYEAR	NUMERIC	1	9
ARESTYPE	CHARACTER	4	9999

REVISED Structure for table IRISMAST.DBF:

<u>Field Name</u>	<u>Type</u>	<u>Length</u>	<u>Usage</u>
SSN	CHARACTER	10	A999999999
FNAME	CHARACTER	14	AAAAAAAAAAAAAAAA
MNAME	CHARACTER	1	A
LNAME	CHARACTER	20	AAAAAAAAAAAAAAAAAAAAAAAA
EMPLOYER	CHARACTER	50	AAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAA . . .
RESTYPCODE	CHARACTER	4	9999
RESYEAR	NUMERIC	1	9
MEDSCHOOL	CHARACTER	5	99999
MSGRADDATE	DATE	8	mm/dd/yyyy*
FORCERTDAT	DATE	8	mm/dd/yyyy*
PROVNUMBER	CHARACTER	6	999999
FYBEGIN	DATE	8	mm/dd/yyyy*
FYEND	DATE	8	mm/dd/yyyy*
CREATEDATE	DATE	8	mm/dd/yyyy*
MODIFYDATE	DATE	8	mm/dd/yyyy*

*- Date fields in text files are formatted as: yyyy/mm/dd

- The program now handles the leap year date of February 29, 2000 for Y2K compliance.
- Pages 1-3, 1-5, 1-6, 7-20, 7-22, and 7-26 through 7-28 contain deletions and additions; deletions are indicated by lined-out characters, and additions are indicated by shaded characters.

V. December 2005 Updates to June '99 Release, IRISV3

June '99 Release, IRISV3 (Version 3.1)

- Except for reproductions of IRISV3 screen printouts in the IRISV3 Operating Instructions, all references to HCFA (Health Care Financing Administration) were replaced with CMS (Centers for Medicare & Medicaid Services); no programming changes were made to the IRISV3 program to replace references to HCFA with CMS.
- Except for reproductions of IRISV3 screen printouts in the IRISV3 Operating Instructions, all references to IRIS disk or diskette were replaced with IRIS disk/CD or diskette/CD; no programming changes were made to the IRISV3 program to replace references to Disk or Diskette with Disk/CD or Diskette/CD.
- The last line on Page 1-1 (Part II, Section 1.1) is revised as follows: “If you need further assistance, send e-mail to: iris@cms.hhs.gov.”
- The required equipment on Page 1-5 (Part II, Section 1.4) is updated to include these items: any modern 100% **IBM compatible PC**; a CD-R/RW drive in addition to a 3.5 inch diskette drive; and a PC compatible printer, preferably one that can print at twelve characters per inch.
- Information on running IRISV3 in the Windows NT (NT, 2000, and XP) family of operating systems is updated on Page 1-6 (Part II, Section 1.5).
- The installation instructions on Pages 1-7 through 1-9 (Part II, Section 1.6) are superseded by the December 2005 “Read Me First File” for installing the IRISV3 program; this file (“Read Me IRISV3”) is in the CMS web site for IRIS programs (www.cms.gov/IRIS).
- The Federal Register citation for GME in the first line on Page 3-1 (Part II, Section 3.1) is changed from 42 CFR 413.86 to 42 CFR 413.75.
- The Medical School Code Table (Part II, Section 7.2) is updated through December 2005; this table includes revised codes for six of eight podiatry schools (Codes 30100 through 30600) and new codes for dental schools in the United States, Canada, and Puerto Rico (Codes 80002 through 80109). The replaced codes (Codes 30010 through 30090 for podiatry schools and Codes 10000 and 20000 for all dental schools) are in this table and are identified as obsolete. These updated codes (revised, replaced and new) are highlighted in yellow for easy identification.

Providers are to use the new dental school codes in IRISV3 for cost reporting periods beginning on or after July 1, 2006 for all interns and residents in dental specialties with dental school graduation dates after April 30, 2006.

- The Residency Code Table (Part II, Section 7.3) is updated through December 2005; this table is in numerical order. The updated codes in this table are highlighted in yellow for easy identification.

Providers may start using the new residency type codes in IRISV3 for cost reporting periods ending on or after December 31, 2005.

- The Residency Code Table (Part II, Section 7.4) contains the same codes in the Residency Code Table (Part II, Section 7.3); this table is in alphabetical order. The updated codes in this table are highlighted in yellow for easy identification.
- The following modifications were made to the Help Screens (Part II, Section 7.5): 1) adding a replacement category of dental schools in the medical school codes; 2) recodified Code of Federal Register citations for GME and IME; 3) determining the applicable certification date for passing the ECFMG examination; 4) clarifying the full/part time status of each intern/resident (IR); 5) reporting assignment periods spanning July 1; 6) reporting residency type codes (master/assignment records) for each IR; 7) defining which employer's name to use for each IR; 8) clarifying the number of residency years completed (master/assignment records) for each IR; and 9) reporting unweighted GME percentages for all IRs. These modifications are highlighted in yellow for your information and are not included in the IRISV3 program since no efforts were made to reprogram the Help Screens in IRISV3.
- The last bullet point on Page 8-2 (Part II, Section IV) is inapplicable for this version of IRISV3 Operating Instructions since the deletions and additions have been removed in their entirety.

VI. November 2008 Updates to June '99 Release, IRISV3

June '99 Release, IRISV3 (Version 3.1)

- Information on running IRISV3 in the Windows NT (NT, 2000, XP and Vista) family of operating systems is updated on Page 1-6 (Part II, Section 1.5).
- The installation instructions on Pages 1-7 through 1-9 (Part II, Section 1.6) are superseded by the February 2009 “Read Me First File” for installing the IRISV3 program; this file (“Read Me IRISV3”) is in the CMS web site for IRIS programs (www.cms.gov/IRIS).
- The Medical School Code Table (Part II, Section 7.2) is updated through November 2008; this table includes revised codes for 66 of 67 dental schools in the United States, Canada, and Puerto Rico (Codes 81487 through 83590). The replaced codes for dental schools (Codes 80002 through 80109) are in this table and are identified as obsolete. These updated codes (revised, replaced and new) are highlighted in green for easy identification.
- The Residency Code Table in numeric and alphabetic sequences (Part II, Section 7.3) is updated through November 2008. These updated codes (revised, replaced and new) are highlighted in green for easy identification.

Providers may start using the new residency type codes in IRISV3 for cost reporting periods ending on or after December 31, 2008.

- The following modifications were made to three Help Screens (Part II, Section 7.5): 1) updated code ranges for podiatric and dental specialties in the Residency Type Code (Master Record) Help Screen; 2) updated code ranges for dental schools in the Medical School Code Help Screen; and 3) updated code ranges for podiatric and dental specialties in the Residency Type Code (Assignment Records) Help Screen. These modifications are highlighted in green for your information and are not included in the IRISV3 program since no efforts were made to reprogram the Help Screens in IRISV3.

VII. April 2010 Updates to June '99 Release, IRISV3

June '99 Release, IRISV3 (Version 3.1)

- Information on running IRISV3 in the Windows NT (NT, 2000, XP, Vista, and 7) family of operating systems is updated on Page 1-6 (Part II, Section 1.5).
- Information on programs for accessing and using IRIS diskette/CD files is also updated on Page 1-6 (Part II, Section 1.5).
- Information on various situations for creating an IRIS diskette/CD is on Page 1-6 (Part II, Section 1.5).
- The installation instructions on Pages 1-8 through 1-10 (Part II, Section 1.6) are superseded by the April 2010 “Read Me First File” for installing the IRISV3 program; this file (“Read Me IRISV3”) is in the CMS web site for IRIS programs (www.cms.gov/IRIS).
- The information on CMS report disks/CDs (IRIS diskettes/CDs) is changed in the second, third, and fourth paragraphs on Page 3-1 (Part II, Section 3); this information is also changed in the first and second paragraphs on Page 5-1 (Part II, Section 5).
- The Medical School Code Table (Part II, Section 7.2) is updated through January 2010. The updated codes (revised and new) are highlighted in light blue for easy identification.
- The Residency Code Table in numeric and alphabetic sequences (Part II, Section 7.3) is updated through January 2010. The updated codes (revised and new) are highlighted in light blue for easy identification.

Providers may start using the new residency type codes in IRISV3 for cost reporting periods ending on or after December 31, 2009.

- The following modification was made to one Help Screen (Part II, Section 7.5): updated code ranges for dental schools in the Medical School Code Help Screen. This modification is highlighted in light blue for your information and is not included in the IRISV3 program since no efforts were made to reprogram the Help Screens in IRISV3.

VIII. December 2011 Updates to June '99 Release, IRISV3

June '99 Release, IRISV3 (Version 3.1)

- Information on PC compatible printers for printing IRIS summary reports is updated on Page 1-5 (Part II, Section 1.4).
- Information on running IRISV3 in the Windows NT (NT, 2000, XP, Vista, and 7) family of operating systems is updated on Page 1-6 (Part II, Section 1.5).
- Information on programs for accessing and using IRIS diskette/CD files is updated on Page 1-6 (Part II, Section 1.5).
- The installation instructions on Pages 1-8 through 1-10 (Part II, Section 1.6) are superseded by the December 2011 “Read Me First File” for installing the IRISV3 program; this file (“Read Me IRISV3”) is in the CMS web site for IRIS programs (www.cms.gov/IRIS).
- The Medical School Code Table (Part II, Section 7.2) is updated through November 2011. The updated codes (revised and new) are highlighted in light pink for easy identification. In addition, the obsolete codes are bolded for easy identification.

Providers are to use the revised codes for six of eight podiatry schools (Codes 30100 through 30600) in IRISV3 for cost reporting periods beginning on or after July 1, 2012, for all interns and residents in podiatric specialties. These codes were originally mentioned in Part V, December 2005 Updates to June '99 Release, IRISV3.

- The Residency Code Table in numeric and alphabetic sequences (Part II, Section 7.3) is updated through November 2011; this table includes revised codes for 17 replaced allopathic residency type codes, and 31 replaced osteopathic residency type codes. The updated codes (revised, replaced and new) are highlighted in light pink for easy identification. In addition, the obsolete codes are bolded for easy identification.

Providers may start using the new residency type codes in IRISV3 for cost reporting periods ending on or after September 30, 2011.

Providers are to use the revised residency type codes in IRISV3 for cost reporting periods beginning on or after July 1, 2012.

- The following modifications were made to three Help Screens (Part II, Section 7.5): 1) updated code ranges for allopathic and dental specialties in the Residency Type Code (Master Record) Help Screen; 2) updated code ranges for dental and podiatric schools in the Medical School Code Help Screen; and 3) updated code ranges for allopathic and dental specialties in the Residency Type Code (Assignment Records) Help Screen. These modifications are highlighted in light pink

for your information and are not included in the IRISV3 program since no efforts were made to reprogram the Help Screens in IRISV3.

IX. August 2012 Updates to June '99 Release, IRISV3

June '99 Release, IRISV3 (Version 3.1)

- Information on PC compatible printers for printing IRIS reports is updated on Page 1-5 (Part II, Section 1.4).
- Information on running IRISV3 in the Windows NT (NT, 2000, XP, Vista, and 7) family of operating systems is updated on Pages 1-7 and 1-8 (Part II, Section 1.5).
- The installation instructions on Pages 1-9 through 1-11 (Part II, Section 1.6) are superseded by the August 2012 "Read Me First File" for installing the IRISV3 program; this file is in the CMS web site for IRIS programs (www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/IRIS).
- The Medical School Code Table (Part II, Section 7.2) is updated through July 2012. The updated codes (revised and new) are highlighted in light gray for easy identification.
- The Residency Code Table in numeric and alphabetic sequences (Part II, Sections 7.3 & 7.4) is updated through July 2012. This table was re-alphabetized in alphabetic sequences only (Part II, Section 7.4). The updated codes (revised and new) are highlighted in light gray for easy identification.

Providers may start using the new residency type codes in IRISV3 for cost reporting periods ending on or after April 30, 2012.

- The following modifications were made to two Help Screens (Part II, Section 7.5): 1) updated code range for osteopathic specialties in the Residency Type Code (Master Record) Help Screen; and 2) updated code range for osteopathic specialties in the Residency Type Code (Assignment Records) Help Screen. These modifications are highlighted in light gray for your information and are not included in the IRISV3 program since no efforts were made to reprogram the Help Screens in IRISV3.

X. February 2014 Updates to June '99 Release, IRISV3

June '99 Release, IRISV3 (Version 3.1)

- Information on running IRISV3 in the Windows NT (NT, 2000, XP, Vista, 7, and 8.1) family of operating systems is updated on Pages 1-7 and 1-8 (Part II, Section 1.5).
- The installation instructions on Pages 1-9 through 1-11 (Part II, Section 1.6) are superseded by the February 2014 “Read Me First File” for installing the IRISV3 program; this file is in the CMS web site for IRIS programs (www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/IRIS).
- Information on IRIS’ import capability involving two data file formats (system data format files and comma delimited text files) is updated on Page 4-14 (Part II, Section 4.8).
- The Medical School Code Table (Part II, Section 7.2) is updated through October 2013. The updated codes (revised and new) are highlighted in dark yellow for easy identification.
- The Residency Code Table in numeric and alphabetic sequences (Part II, Sections 7.3 & 7.4) is updated through October 2013. This table was re-alphabetized in alphabetic sequences only (Part II, Section 7.4). The updated codes (revised and new) are highlighted in dark yellow for easy identification.

Providers may start using the new residency type codes in IRISV3 for cost reporting periods ending on or after October 31, 2013.

- The following modifications were made to six Help Screens (Part II, Section 7.5): 1) updated code ranges for osteopathic and podiatric specialties in the Residency Type Code (Master Record) Help Screen; 2) updated code ranges for dental schools in the Medical School Code Help Screen; 3) corrected non-hospital settings to non-provider settings and updated Code of Federal Register citation from 413.78 (e) to 413.78 (g) in the Assignment (Rotation) Time Periods Help Screen (Screen 1); 4) corrected non-hospital settings to non-provider settings in the IME Percentage Help Screen; 5) corrected non-hospital settings to non-provider settings in the GME Percentage Help Screen; and 6) updated code ranges for osteopathic and podiatric specialties in the Residency Type Code (Assignment Records) Help Screen. These modifications are highlighted in dark yellow for your information and are not included in the IRISV3 program since no efforts were made to reprogram the Help Screens in IRISV3.
- Added a new section (Part II, Section 7.6) in IRISV3 Operating Instructions (Viewing IRIS Diskette/CD Files or CMS Report Disk/CD Files Outside of IRISV3). This section pertains to the appearance of IRIS files and data entry specifications in **EXCEL** and **NOTEPAD**; it also includes the appearance of IRIS files in two file formats (“.txt” and “.csv”) for importing into IRISV3.
