
Table of Contents

Abbreviations and Acronyms	AB-1
Overview of the MITA Initiative	O-1
Introduction	O-1
What Is the Medicaid Enterprise?	O-1
What Is MITA?	O-3
Architecture Framework	O-4
Processes	O-5
Planning Guidelines	O-5
What Are the Medicaid Enterprise Mission and Goals?	O-6
What Are the MITA Mission, Goals, and Objectives?	O-6
MITA Mission	O-6
MITA Goals	O-6
MITA Objectives	O-7
What Are the Guiding Principles of MITA?	O-7
Business-Driven Enterprise Transformation	O-7
Combination of Commonalities and Differences	O-8
Standards First	O-8
Built-in Security and Privacy	O-9
Data Consistency Across the Enterprise	O-10
What Are the Key Technical Architecture Features of MITA?	O-10
Service-Oriented Architecture	O-10
Common Interoperability and Access	O-10
Adaptability and Extensibility	O-11
Hub Architecture	O-11
Performance Metrics	O-11
What Challenges Does MITA Address?	O-11
How Does MITA Benefit Stakeholders?	O-12
Benefits to the Public	O-12
Benefits to the States	O-13
Benefits to the Federal Government	O-13
How Is MITA To Be Used?	O-13
By CMS	O-13
By States	O-14
By Vendors	O-14
How Does the MITA Initiative Evolve?	O-15

Introduction to the MITA Framework 2.0	I-1
Introduction.....	I-1
What Is the MITA Framework?.....	I-1
What Are the Components of the MITA Framework?	I-2
Part I — Business Architecture.....	I-3
Part II — Information Architecture	I-6
Part III — Technical Architecture	I-8
How Do the Components of the Three Architectures Fit Together?	I-12
Walkthrough of the BA, IA, and TA Components	I-14
Business Architecture	I-14
Information Architecture	I-15
Technical Architecture.....	I-16
How Should Framework 2.0 Be Read?.....	I-17

Part I — Business Architecture

Chapter 1 — Business Architecture Introduction	I.1-1
Introduction.....	I.1-1
Purpose.....	I.1-1
Scope.....	I.1-1
Background	I.1-2
What Are the Components of the Business Architecture?.....	I.1-3
The Concept of Operations	I.1-5
The MITA Maturity Model.....	I.1-6
The Business Process Model	I.1-6
Business Capability Matrix.....	I.1-7
State Self-Assessment.....	I.1-8
What Is the Relationship Among the Components of the Business Architecture?.....	I.1-9
What Is the Relationship of the Business Architecture to the Information and Technical Architectures?	I.1-10
Chapter 2 — Concept of Operations.....	I.2-1
Introduction.....	I.2-1
Purpose.....	I.2-1
Scope.....	I.2-1
Background — Sources for the Vision	I.2-2
What Is a Concept of Operations?	I.2-4
What Part Does the Concept of Operations Play in the MITA Framework?.....	I.2-4

What Are the Medicaid and MITA Visions?	I.2-5
High-Level View of the Future	I.2-5
Medicaid Mission and Goals	I.2-8
MITA Mission, Goals, and Objectives	I.2-9
Transformation from the As-Is to the To-Be	I.2-11
How Are Stakeholder Roles Transformed?	I.2-12
How Are Information and Communications Transformed?	I.2-14
What Are the Primary Enablers of the Transformation?	I.2-17
Legislative, Funding, Federal Initiative, and Demographic Drivers	I.2-17
Technology Drivers	I.2-18
How Do Medicaid Agency Operations Evolve?	I.2-20
As-Is Operations	I.2-20
To-Be Operations	I.2-22
How Does the Transformation Occur?	I.2-25
Chapter 3 — Maturity Model.....	I.3-1
Introduction.....	I.3-1
Purpose.....	I.3-1
Scope.....	I.3-1
What Is a Maturity Model?	I.3-2
What Is the MITA Maturity Model?.....	I.3-3
Time Dimension.....	I.3-3
Space Dimension (Levels of Maturity).....	I.3-4
How Are the MMM Levels of Maturity Defined?.....	I.3-4
Qualities of Each Level of Maturity	I.3-5
Maturity Levels Applied to Medicaid Mission and Goals.....	I.3-6
MITA Goals and Objectives	I.3-7
How Is the MMM Used in the MITA Framework?.....	I.3-8
Putting It All Together	I.3-9
Use of the MITA Maturity Model	I.3-10
Chapter 4 — Business Process Model.....	I.4-1
Introduction.....	I.4-1
Purpose.....	I.4-1
Scope.....	I.4-1
What Is a Business Process Model?.....	I.4-2
What Is the MITA Business Process Model?	I.4-2
Lineage of the MITA Business Process Model	I.4-2
The Business Process Hierarchy	I.4-3

Member Management Business Area	I.4-4
Provider Management Business Area	I.4-5
Contractor Management Business Area	I.4-6
Operations Management Business Area	I.4-7
Program Management Business Area	I.4-9
Care Management Business Area	I.4-10
Program Integrity Management Business Area	I.4-10
Business Relationship Management	I.4-11
What Is a MITA Business Process?	I.4-12
How Do Business Processes Mature?	I.4-15
What Are the Next Steps in the Evolution of the BPM?	I.4-16
Chapter 5 — Business Capability Matrix	I.5-1
Introduction	I.5-1
Purpose	I.5-1
Scope	I.5-1
What Is a Business Capability?	I.5-2
Level 1	I.5-6
Level 2	I.5-7
Level 3	I.5-7
Level 4	I.5-7
Level 5	I.5-7
What Is the Business Capability Matrix?	I.5-7
Some Caveats Regarding the BCM	I.5-9
How Does the Business Capability Matrix Evolve?	I.5-10
How Do States Use the Business Capability Matrix?	I.5-10
Chapter 6 — State Self-Assessment	I.6-1
Introduction	I.6-1
Purpose	I.6-1
Scope	I.6-1
What Is a State Self-Assessment?	I.6-2
How Does a State Conduct a Self-Assessment?	I.6-4
Step 1 – List and Prioritize the State’s Goals and Objectives	I.6-4
Step 2 – Define the State’s Current Business Model and Map to the MITA Business Process Model	I.6-4
Step 3 – Assess the State’s Current Capabilities	I.6-5
Step 4 – Determine the State’s Target Capabilities	I.6-7
Develop Transition and Implementation Plan	I.6-7

What Are Other Uses of the State Self-Assessment?	I.6-8
Document State Requirements.....	I.6-8
Prepare and Review Advance Planning Documents.....	I.6-8
Prepare RFPs.....	I.6-8
Evaluate Proposals.....	I.6-9
Negotiate Contracts.....	I.6-9
Monitor Design, Development, and Implementation	I.6-9
Accept Results	I.6-9
Evaluate and Approve New Solutions	I.6-9
What Is the CMS Role in the State Self-Assessment?.....	I.6-10
Chapter 7 — Business Architecture Summary	I.7-1
Introduction.....	I.7-1
Purpose.....	I.7-1
Scope.....	I.7-2
What Methodologies and Models Are Used to Construct the Business Architecture?	I.7-2
What Are the Components of the Business Architecture?.....	I.7-3
What Is the Relationship of the Business Architecture to the Information and Technical Architectures?	I.7-6
Link to the Information Architecture.....	I.7-6
Link to the Technical Architecture	I.7-7
How Is the Business Architecture To Be Used?.....	I.7-8
What Are the Next Steps in Developing the Business Architecture?.....	I.7-10
Appendix A — Concept of Operations Details	I.A-1
Appendix B — Maturity Model Details.....	I.B-1
Appendix C — Business Process Model Details.....	I.C-1
Appendix D — Business Capability Matrix Details.....	I.D-1
 Part II — Information Architecture	
Chapter 1 — Information Architecture Introduction.....	II.1-1
Introduction.....	II.1-1
Purpose.....	II.1-1
Scope.....	II.1-2
What Is the MITA Information Architecture?	II.1-2
How Will the MITA Information Architecture Be Developed?.....	II.1-3

What Are the Components of the MITA Information Architecture?	II.1-4
Data Management Strategy.....	II.1-5
Conceptual Data Model	II.1-5
Logical Data Model	II.1-5
Data Standards Table	II.1-6
How Do States Use the MITA Information Architecture?	II.1-6
How Do States Participate in Developing the MITA Information Architecture?	II.1-7
How Will This Affect the States?	II.1-7
Conclusion	II.1-8
Chapter 2 — Data Management Strategy	II.2-1
Introduction.....	II.2-1
Purpose.....	II.2-1
Scope.....	II.2-1
What Is the MITA Data Management Strategy?	II.2-2
Practical Considerations in Data Management	II.2-2
Guiding Principles	II.2-3
Supporting MITA Mission and Goals	II.2-3
What Is MITA’s Approach to Data Management?	II.2-4
What Are the Benefits of Using the MITA Data Management Strategy?	II.2-6
What Is the Scope of the MITA Data Management Strategy?	II.2-6
What Are the Parts of the MITA Data Management Strategy?	II.2-7
How Do States Use the MITA Data Management Strategy?	II.2-8
Conclusion	II.2-8
Chapter 3 — Conceptual Data Model.....	II.3-1
Introduction.....	II.3-1
Purpose.....	II.3-1
Scope.....	II.3-2
What Is the MITA Conceptual Data Model?	II.3-2
What Are the Parts of the MITA Conceptual Data Model?.....	II.3-2
How Will the MITA Conceptual Data Model Be Developed?	II.3-3
How Do States Use the MITA Conceptual Data Model?	II.3-3
Conclusion	II.3-4
Chapter 4 — Logical Data Model.....	II.4-1
Introduction.....	II.4-1
Purpose.....	II.4-1
Scope.....	II.4-2
What Is the MITA Logical Data Model?	II.4-2

What Are the Parts of the MITA Logical Data Model?.....	II.4-3
How Is the MITA Logical Data Model Developed?	II.4-4
How Do States Use the MITA Logical Data Model?	II.4-4
Conclusion	II.4-5
Chapter 5 — Data Standards.....	II.5-1
Introduction.....	II.5-1
Purpose.....	II.5-1
Scope.....	II.5-2
What Is a MITA Data Standard?	II.5-2
What Are the Benefits of Using Data Standards?.....	II.5-3
What Is the Scope of the MITA Data Standards?.....	II.5-4
How Are the MITA Data Standards Developed?	II.5-4
Model-Based Standards	II.5-8
What Are the Key Current and Emerging Health Data Standards?.....	II.5-9
Designated Standard Maintenance Organizations	II.5-11
Other Standards Maintenance Organizations.....	II.5-13
How Do States Use the MITA Data Standards?.....	II.5-20
Conclusion	II.5-20
Chapter 6 — Information Architecture Summary.....	II.6-1
Introduction.....	II.6-1
What Is the Purpose of the Information Architecture?	II.6-1
What Methodologies and Tools Were Used?	II.6-2
What Are the Components of the Information Architecture and Their Interrelationships?	II.6-3
What Is the Connection Between the Information Architecture and the Business and Technical Architectures?.....	II.6-6
Link to the Business Architecture.....	II.6-6
Link to the Technical Architecture	II.6-7
How Will the Information Architecture Be Used?	II.6-7
What Are the Next Steps in Developing the Information Architecture?	II.6-9
 Part III — Technical Architecture	
Chapter 1 — Technical Architecture Introduction	III.1-1
Introduction.....	III.1-1
Purpose.....	III.1-1
What Are the Key Features of the MITA Technical Architecture?.....	III.1-2
What Is the Difference Between MITA and Current MMIS Technical Architectures?	III.1-4
What Is the MITA Technical Architecture?	III.1-6

How Is the MITA Technical Architecture Developed?	III.1-7
MITA Technical Architecture Development Process	III.1-7
Activity 1 — Develop Data Model	III.1-8
Activity 2 — Develop Technical Capabilities	III.1-8
Activity 3 — Define Common Services	III.1-9
Activity 4 — Complete MITA Technical Architecture	III.1-10
What Are the Components of the MITA Technical Architecture?	III.1-10
Key Elements of the Conceptual Technical Architecture Model	III.1-12
Introduction to the Concept of SOA	III.1-14
Business Services	III.1-14
Technical Capability Matrix	III.1-15
Technical Services	III.1-15
Application Architecture	III.1-16
Technology Architecture	III.1-16
Solution Sets	III.1-17
How Do States Use the MITA Technical Architecture?	III.1-17
How Does the MITA Technical Architecture Benefit a Medicaid Enterprise?	III.1-17
How Do States Participate in Developing the MITA Technical Architecture?	III.1-18
Conclusion	III.1-18
Chapter 2 — MITA Principles, Goals, Objectives.....	III.2-1
Introduction.....	III.2-1
Purpose.....	III.2-1
Scope.....	III.2-1
What Are the MITA Technical Principles?	III.2-1
What Are the MITA Technical Goals?	III.2-2
What Are the MITA Objectives?	III.2-2
Chapter 3 — SOA Concept.....	III.3-1
Introduction.....	III.3-1
Purpose.....	III.3-1
Scope.....	III.3-1
What Are the Challenges Facing MMIS Today?.....	III.3-1
What Is Service-Oriented Architecture?	III.3-3
Description of Service-Oriented Architecture	III.3-3
What Are Services?.....	III.3-5
What Is a Message?	III.3-6
Platform Independence	III.3-7

How Are Services Built?	III.3-8
What Is a Web Service?	III.3-10
Why Should Future MMISs Move to a Service-Oriented Architecture?	III.3-10
Enables Increased Business Agility	III.3-10
Business Drives the Enterprise, Not Technology	III.3-10
Facilitates Greater Reuse	III.3-11
Facilitates Insertion of New Technology	III.3-11
Increases Operational Flexibility	III.3-11
What Are the Challenges Facing MMIS?	III.3-11
How Can States Prepare for Service-Oriented Architecture Within Medicaid?	III.3-12
Training Personnel for New Approaches and Roles	III.3-12
Adjusting Skill Sets	III.3-13
Implementing Collaborative Governance for SOA Implementation	III.3-13
Conclusion	III.3-14
Chapter 4 — Business Services.....	III.4-1
Introduction.....	III.4-1
Purpose.....	III.4-2
Scope.....	III.4-2
What Is a MITA Business Service?	III.4-4
What Are the Parts of a MITA Business Service?.....	III.4-6
How Is a MITA Business Service Developed?.....	III.4-8
Business Service Solution Sets	III.4-11
What Is the MITA Business Service Flow?.....	III.4-13
How Do States Use MITA Business Services?	III.4-14
How States Can Personalize MITA Business Services?.....	III.4-14
How Do States Participate in Developing MITA Business Services?.....	III.4-15
Conclusion	III.4-16
Chapter 5 — Technical Capability Matrix.....	III.5-1
Introduction.....	III.5-1
Purpose.....	III.5-1
Scope.....	III.5-1
What Is the MITA Technical Capability Matrix?.....	III.5-2
The Technical Capability Matrix	III.5-2
MITA Goals	III.5-3
MITA Objectives	III.5-11
How Does the Technical Capability Matrix Fit Into the MITA Framework?	III.5-11
How Was the Technical Capability Matrix Created?	III.5-11

How Will the Technical Capability Matrix Evolve?	III.5-12
How Will States Use the Technical Capability Matrix?	III.5-12
Chapter 6 — Technical Services.....	III.6-1
Introduction.....	III.6-1
Purpose.....	III.6-1
Scope.....	III.6-2
What Is a MITA Technical Service?	III.6-3
Interoperability Services	III.6-3
MITA Interoperability Capabilities	III.6-7
Data Access Services	III.6-9
Security and Privacy Service	III.6-10
Goals	III.6-13
Cross-Cutting Security and Privacy Concerns.....	III.6-14
What Are the Parts of a MITA Technical Service?	III.6-16
How Is a MITA Technical Service Developed?	III.6-18
Technical Service Solution Sets.....	III.6-19
What Is the MITA Technical Services Flow?.....	III.6-20
How Do States Use MITA Technical Services?.....	III.6-21
How Do MITA Technical Services Benefit the Medicaid Enterprise?	III.6-21
How Do States Participate in Developing MITA Technical Services?	III.6-22
Conclusion	III.6-22
Chapter 7 — Application Architecture.....	III.7-1
Introduction.....	III.7-1
Purpose.....	III.7-1
Scope.....	III.7-2
What Is the MITA Application Architecture?	III.7-2
Parts of the MITA Application Architecture	III.7-3
What Are the Key Components of the MITA Application Architecture?	III.7-5
Enterprise Service Bus and Access Channels.....	III.7-6
Service Management Engine	III.7-9
Service Gateways and Mediators.....	III.7-11
Business Services.....	III.7-12
Technical Services	III.7-12

Performance Management	III.7-12
Performance Measurement Definition.....	III.7-16
Key Performance Measurement Concepts.....	III.7-16
Additional Performance Measurement Detail	III.7-16
Performance Measurement Challenges.....	III.7-17
Service Interoperability.....	III.7-17
Key Service Interoperability Elements	III.7-18
Additional Interoperability Detail.....	III.7-19
Service Interoperability Models.....	III.7-20
Logical Interoperability Level	III.7-22
Logical Hub Architecture	III.7-23
Leveraging Interoperability Projects.....	III.7-24
Candidate Future Interoperability Activities	III.7-25
Security and Privacy	III.7-26
Terminology and Concepts	III.7-26
MITA Security and Privacy Focuses	III.7-27
Basic Approach.....	III.7-30
Concept Maps	III.7-32
Basic Principles.....	III.7-32
Integrate Security and Privacy into Enterprise Architecture	III.7-33
Security and Privacy Elements	III.7-34
Objective, Model, Architecture, and Mechanism Framework.....	III.7-34
Tools	III.7-35
Forms	III.7-35
Security Threat Models (aka Attack Models) and Challenges	III.7-36
Security and Privacy Model.....	III.7-38
Concerns and Challenges.....	III.7-41
Enterprise Security and Privacy Data	III.7-42
Security Levels.....	III.7-43
Interoperability Channel Levels.....	III.7-44
How Do MITA Services Interact with the MITA Infrastructure?	III.7-44
Addition of a MITA Service	III.7-44
MITA Service Invocation and Execution	III.7-46
How Do States Use the MITA Application Architecture?	III.7-48
How Do States Participate in Developing the MITA Application Architecture?.....	III.7-48
Conclusion	III.7-48

Chapter 8 — Technology Standards	III.8-1
Introduction.....	III.8-1
Purpose.....	III.8-1
Scope.....	III.8-1
What Are the MITA Technology Standards?	III.8-2
What Is the MITA Standards Reference Model?.....	III.8-2
Key Elements of the Standards Reference Model	III.8-3
Applicable Standards	III.8-4
Service Delivery and Service Support	III.8-7
Technology Readiness and Maturity	III.8-9
Key Elements of the Technology Readiness and Maturity.....	III.8-9
What Is the MITA Technology Standards Reference Guide?	III.8-10
Overview.....	III.8-10
MITA Technology Standards Reference Guide	III.8-11
Security and Privacy	III.8-20
Chapter 9 — Solution Sets	III.9-1
Introduction.....	III.9-1
Purpose.....	III.9-1
Scope.....	III.9-1
What Is a Solution Set?	III.9-1
How Are Solution Sets Generated and Used?	III.9-4
Why Do We Need Solution Sets?.....	III.9-6
What Are the Next Steps?.....	III.9-6
Chapter 10 — Technical Architecture Summary	III.10-1
Introduction.....	III.10-1
Purpose of the Technical Architecture.....	III.10-1
Methodologies and Tools.....	III.10-2
Technical Architecture Components.....	III.10-3
What Is the Relationship of the Technical Architecture to the Business and Information Architectures?	III.10-5
Link to the Business Architecture.....	III.10-6
Link to the Information Architecture.....	III.10-6
How Will the Technical Architecture Be Used?.....	III.10-6
What Are the Next Steps in Developing the Technical Architecture?	III.10-8

List of Figures

O-1	The Medicaid Enterprise Is Defined by Core Business Processes, Interfaces with Stakeholders, and a Third Sphere of Influence.....	O-2
O-2	The Medicaid Enterprise Mission and Goals.....	O-6
I-1	MITA Framework Development Approach	I-2
I-2	To-Be Medicaid Operations — An Information-Exchange Focus.....	I-4
I-3	The Five Maturity Levels in the MITA Maturity Model.....	I-5
I-4	The Eight Business Areas of the BPM	I-5
I-5	Conceptual View of SOA in the Medicaid Enterprise.....	I-9
I-6	An Application as a Collection of Software Services	I-11
I-7	Relationships Among the Components of the BA, IA, and TA	I-13

Part I — Business Architecture

1-1	MITA Framework Relationship Diagram	I.1-1
1-2	Relationship Among the Components of the Business Architecture.....	I.1-10
1-3	Relationships Among Components of the BA, IA, and TA	I.1-12
2-1	Interviews and Source Documents Helped Shape the Medicaid Vision and the MITA COO	I.2-3
2-2	The COO Gives a 10+ Year Glimpse into the Future	I.2-6
2-3	Medicaid Communications of the Future Will Flow Through a Hub	I.2-8
2-4	Medicaid Mission and Goals Are Derived from Interviews with State Medicaid Officials and Other Sources.....	I.2-9
2-5	MITA Has a Mission, Goals, and Objectives	I.2-10
2-6	The COO Gives an As-Is Look at the Present.....	I.2-21
2-7	Most Medicaid Resources and Energies Now Go to Operational Functions	I.2-22
2-8	The COO Describes a To-Be Scenario for the Future	I.2-24
2-9	Strategic Functions Dominate in the To-Be Model.....	I.2-25
3-1	The MMM Shows Implement in Beneficiary Enrollment Over Time and Space.....	I.3-2
3-2	The MMM 10+ Year Timeline	I.3-4
3-3	The MMM: A Direction for the MITA Transformation Path.....	I.3-8
3-4	The MMM: Translating Medicaid Vision into Business Capabilities.....	I.3-9
4-1	MITA Business Process Model Business Areas.....	I.4-3
4-2	MITA Business Process Model Hierarchy	I.4-4
4-3	Member Management Business Area.....	I.4-5
4-4	Provider Management Business Area.....	I.4-6
4-5	Contractor Management Business Area	I.4-7

4-6	Operations Management Business Area.....	I.4-8
4-7	Program Management Business Area.....	I.4-9
4-8	Care Management Business Area.....	I.4-10
4-9	Program Integrity Management Business Area.....	I.4-11
4-10	Business Relationship Management Business Area.....	I.4-12
4-11	MITA Business Process Description.....	I.4-13
4-12	Business Processes and Business Capabilities	I.4-15
4-13	Business Processes.....	I.4-16
5-1	Each Business Process Has up to Five Capabilities	I.5-2
5-2	MMM Definitions Are Applied to the Business Process to Derive Its Business Capabilities	I.5-8
5-3	A Fully Populated Business Capability Matrix	I.5-9
6-1	The SS-A Is the First Phase in a State’s Transition Plan.....	I.6-3
6-2	The Business Process Model and Associated Capabilities.....	I.6-5
6-3	Example of a State’s Self-Assessment Profile.....	I.6-7
6-4	Full Life Cycle of an SS-A Document	I.6-10
7-1	Business Architecture Components.....	I.7-5
7-2	MITA Framework Architecture Relationship Diagram	I.7-6
7-3	MITA Business Process and Data Links	I.7-7

Part II — Information Architecture

1-1	Information Architecture in the Context of the MITA Framework.....	II.1-4
1-2	Shape the Future	II.1-7
2-1	MITA Data Management Approach.....	II.2-5
3-1	Simple Conceptual Data Model.....	II.3-2
4-1	Simple Logical Data Model.....	II.4-3
5-1	Scenarios Showing the Use of Data Standards.....	II.5-6
5-2	Model and Design Repository	II.5-8
5-3	DSMO Roles.....	II.5-11
6-1	IA Components.....	II.6-5
6-2	MITA Framework Architecture Relationship Diagram	II.6-6
6-3	MITA Business Process and Data Links	II.6-7

Part III — Technical Architecture

1-1	Developing the MITA Technical Architecture.....	III.1-8
1-2	Overview of the MITA Framework Components	III.1-11
1-3	MITA Conceptual Technical Architecture Model (Thumbnail)	III.1-12
1-4	Business Process, Business Capability, and Business Service Relationships.....	III.1-15
1-5	MITA Application Architecture	III.1-16
3-1	The Typical State of Current IT Systems	III.3-2
3-2	The MITA Service-Oriented Architecture.....	III.3-4
3-3	An Example of Business Services	III.3-5
3-4	Examples of Technical Services and Their Interaction with Business Services.....	III.3-6
3-5	SOA Layers Provide Platform Independence.....	III.3-7
3-6	The General Structure of Business Services.....	III.3-9
4-1	Example Service Conceptual Implementation Methods.....	III.4-3
4-2	Generic Business Process, Associated Metadata, and Business Service.....	III.4-5
4-3	Relationship Between MITA Business Process and Implementation	III.4-6
4-4	Relationship of Business Processes to Business Services	III.4-9
4-5	Relationship of Solution Sets to Business Processes.....	III.4-12
4-6	Business Process to Implementation	III.4-13
6-1	Service-Oriented Architecture Approach	III.6-5
6-2	Service-Oriented Government and Architecture	III.6-6
6-3	Conceptual Interoperability Capability.....	III.6-8
6-4	Technical Service Implementations.....	III.6-16
6-5	Conceptual Relationship Between Technical Solution Sets and Technical Areas	III.6-19
7-1	Conceptual Technical Architecture Diagram	III.7-3
7-2	Multilayer Application Architecture Model	III.7-4
7-3	Service Infrastructure.....	III.7-6
7-4	Enterprise Service Bus and Access Channel Services.....	III.7-7
7-5	Service Infrastructure's Operation Concept of Security.....	III.7-9
7-6	Service Infrastructure — Service Management Engine	III.7-10
7-7	Service Gateways and Mediators.....	III.7-12
7-8	Strategic Performance Model	III.7-13
7-9	Service-Oriented Architecture.....	III.7-18
7-10	Conceptual Interoperability Model.....	III.7-21
7-11	Logical Interoperability Model.....	III.7-22
7-12	Aligning S&P and Enterprise Architecture	III.7-32

7-13	Aligning S&P and Strategy Architecture	III.7-33
7-14	MITA S&P Standards.....	III.7-34
7-15	S&P and the OM-AM Model	III.7-35
7-16	S&P Goals and Policies	III.7-38
7-17	Security and Privacy Data and Information Subject Area Model	III.7-43
7-18	Service Infrastructure — Adding a Business Service.....	III.7-45
7-19	Service Infrastructure — Service Invocation and Execution	III.7-46
8-1	MITA Standards Reference Model.....	III.8-2
8-2	Technology Readiness and the MITA Maturity Model.....	III.8-9
8-3	Technology and Standards Put into Context	III.8-43
8-4	Web Services Security–Related Standards.....	III.8-43
9-1	Solution Set Utilization Process	III.9-5
10-1	TA Components.....	III.10-4
10-2	MITA Framework Architecture Relationship Diagram	III.10-6

List of Tables

Part I — Business Architecture

1-1	The Five Components of the Business Architecture. The Business Architecture Is a Composite of Interrelated Models and Templates	I.1-3
1-2	Business Process Example: Authorize Service; the Business Capability Aligns with the Maturity Model Definition of Levels	I.1-8
1-3	Relationships of the Business Architecture Components with the Components of the Information and Technical Architectures	I.1-11
2-1	Summary of Key Components of the Medicaid COO	I.2-4
2-2	The Medicaid Mission Realized Now and in the Future	I.2-9
2-3	Examples of MITA Goals in As-Is, 5-Year, and Long-Term Scenarios	I.2-10
2-4	Examples of Transformation from As-Is to To-Be	I.2-11
2-5	Transformation of Stakeholder Roles	I.2-13
2-6	Data and Communications Are Transformed over Time	I.2-15
3-1	State Medicaid Enterprise Levels of Maturity	I.3-4
3-2	The MMM and the Timeliness of the Business Process	I.3-6
3-3	The MMM and the Improvement of Health Outcomes	I.3-6
3-4	The MMM and Agency Adaptations to Changes	I.3-7
3-5	The MMM and Agency Ability to Provide Data	I.3-7
3-6	The MMM and the Enroll Provider Business Process	I.3-11
3-7	MMM Qualities and Agency Enroll Provider Capabilities	I.3-12
4-1	MITA Business Process Template	I.4-14
5-1	Each Business Capability Level Aligns with the General Description of the Same Level in the MMM	I.5-3
5-2	Each Business Capability Level Differs in Detailed, Measurable Ways	I.5-4
5-3	Traceability from Maturity Model to Business Capability Matrix	I.5-5
5-4	The Enroll Provider Business Process Has Five Levels of Maturity	I.5-5
5-5	Qualities Differentiate the Different Levels of Enroll Provider	I.5-6
6-1	The Enroll Provider Business Process Has Five Levels of Maturity	I.6-6
7-1	Summary of the Components of the MITA Business Architecture	I.7-3
7-2	Stakeholder Use of the Business Architecture	I.7-8

Part II — Information Architecture

5-1	Key Standards Development and Maintenance Organizations	II.5-9
5-2	Standards Consortia, Oversight, and Advisory Organizations	II.5-11
5-3	Other Standards Maintenance Organizations	II.5-13
6-1	Summary of the Components of the MITA IA.....	II.6-3
6-2	Stakeholder Use of the Business Architecture.....	II.6-7

Part III — Technical Architecture

1-1	Key Differences Between MMIS and MITA-Based Systems	III.1-5
5-1	MITA Technical Capabilities Matrix	III.5-4
6-1	The Interoperability Technical Area.....	III.6-4
6-2	The Data Access Technical Area.....	III.6-9
6-3	MITA Security Principles.....	III.6-15
7-1	The Access Channel Model.....	III.7-20
7-2	The Interoperability Model.....	III.7-24
7-3	Description of Candidate Future Interoperability Activities	III.7-25
7-4	Sample Interoperability Channel Definition.....	III.7-26
7-5	Basic MITA S&P Principles.....	III.7-31
7-6	Security and Privacy Utility Services, Features, and Connections to Related Components.....	III.7-40
7-7	Security and Privacy Questions and Answers	III.7-44
8-1	Standards Definition Template	III.8-11
8-2	Web Services Policy Framework.....	III.8-14
8-3	WS-Agreement	III.8-15
8-4	WS-Addressing.....	III.8-17
8-5	WS-Reliability	III.8-19
8-6	E Modeling Stateful Resources with Web Services	III.8-19
8-7	Web Services Security SOAP Message Security 1.0	III.8-23
8-8	Liberty Alliance — Federated Approach	III.8-24
8-9	Security Assertion Markup Language	III.8-26
8-10	Metadata for SAML 2.0.....	III.8-27
8-11	Enterprise Privacy Authorization Language.....	III.8-28
8-12	Trust Model Guidelines	III.8-28
8-13	X.509 Attribute Certification — Public Key Infrastructure	III.8-29
8-14	Electronic Health Records Security.....	III.8-30
8-15	SQL 2004.....	III.8-31
8-16	Core Extensible Markup Language	III.8-32

8-17	Standard XML Application Elements	III.8-33
8-18	Cannon XML	III.8-33
8-19	Exclusive XML Canonicalization.....	III.8-34
8-20	XML Scheme	III.8-34
8-21	SQL/XML 2003	III.8-34
8-22	XSLT	III.8-35
8-23	XQuery	III.8-35
8-24	XQuery API for Java	III.8-36
8-25	GGF Data Access and Integration Services.....	III.8-36
8-26	Storage Management Initiative Specification.....	III.8-37
8-27	HL7 Standards	III.8-38
8-28	HIPAA Code Sets Master Index.....	III.8-38
8-29	National Council on Prescription Drug Programs	III.8-39
8-30	Continuity of Care Record.....	III.8-39
8-31	Digital Imaging Communications in Medicine	III.8-39
8-32	XForms	III.8-40
9-1	MITA Solution Set Template	III.9-3
10-1	Summary of the Components of the MITA TA.....	III.10-3
10-2	Stakeholder Use of the Technical Architecture	III.10-7
