Base Claim File

Variable	Description	Possible Values	Notes
DSYSRTKY	This field contains the key to link data for each beneficiary across all claim files.		
CLAIMNO	The unique number used to identify a unique claim.		
PROVIDER	This variable is the provider identification number. The first two digits indicate the state where the provider is located, using the SSA state codes; the middle two characters indicate the type of provider; and the last two digits are used as a counter for the number of providers within that state and type of provider (i.e., this is a unique but not necessarily sequential number).		Refer to CCW Technical Guidance document: "Getting Started with Medicare Data" for additional information regarding setting classifications.
THRU_DT	The last day on the billing statement covering services rendered to the beneficiary (a.k.a 'Statement Covers Thru Date').		
RIC_CD	A code defining the type of claim record being processed.	M = Part B DMEPOS O = Part B physician/supplier U = Both Part A and B institutional HHA V = Part A institutional (IP, SNF, HOS, or HHA) W = Part B institutional claim record (HOP, HHA)	
CLM_TYPE	The code used to identify the type of claim record being processed in NCH.	10 = Home Health Agency 20 = Non swing bed SNF 30 = Swing bed SNF 40 = Hospital Outpatient 50 = Hospice 60 = Inpatient 71 = Local carrier non-DMEPOS 72 = Local carrier DMEPOS 81 = Regional carrier non-DMEPOS 82 = Regional carrier DMEPOS	Effective with Version 'J', 3 new code values have been added to include a type code for the Medicare Advantage claims (IME/GME, no-pay and paid as FFS). During the Version 'J' conversion, these type codes were populated throughout history.
QUERY_CD	Code indicating the type of claim record being processed with respect to payment (debit/credit indicator; interim/final indicator).	0 - Credit adjustment 1 - Interim bill 3 - Final bill 5 - Debit adjustment	
FAC_TYPE	The first digit of the type of bill (TOB1) submitted on an institutional claim used to identify the type of facility that provided care to the beneficiary.	1 = Hospital 2 = Skilled Nursing Facility (SNF) 3 = Home Health Agency (HHA) 4 = Religious Non-medical (hospital) 6 = Intermediate Care 7 = Clinic services or hospital-based renal dialysis facility 8 = Ambulatory Surgery Center (ASC) or other special facility (e.g. Hospice)	
TYPESRVC	The second digit of the type of bill (TOB2) submitted on an institutional claim record to indicate the classification of the type of service provided to the beneficiary.	For facility type codes 1-6: 1 = Inpatient 2 = Inpatient or Home Health (covered on Part B) 3 = Outpatient (or HHA - covered on Part A) 4 = Other (Part B) - Includes HHA medical services 5 = Intermediate Care - Level I 6 = Intermediate Care - Level II 7 = Subacute Inpatient (revenue code 019x required) 8 = Swing Bed For facility type code 7 (clinics): 1 = Rural Health Clinic 2 = Hospital based or indep renal dialysis facility 3 = Free-standing provider based FQHC 4 = Other Rehab Facility (ORF) 5 = Comprehensive Rehab Center (CORF) 6 = Community Mental Health Center (CMHC) 7 = Federally Qualified Health Center (FQHC) For facility type code 8 (special facility): 1 = Hospice (non-hospital based) 2 = Hospice (hospital based) 3 = Ambulatory Surgical Center (ASC) in hospital OPT 4 = Freestanding birthing center 5 = Critical Access Hospital - OPT services	

FREQ_CD	The third digit of the type of bill (TOB3) submitted on an institutional claim record to indicate the sequence of a claim in the beneficiary's current episode of care.	<p>0 = Non-payment / zero claim 1 = Admit thru discharge claim 2 = Interim - first claim 3 = Interim - continuing claim 4 = Interim - last claim 5 = Late charges only claim 7 = Replacement of prior claim 8 = Void / cancel prior claim 9 = Final claim (HH PPS = process as debit/credit to RAP claim)</p> <p>G = Common Working File (CWF) adjustment claim H = CMS generated adjustment claim I = Misc adjustment claim (from QIO, etc) J = Other adjustment request M = Medicare secondary payer (MSP) adjustment P = Adjustment required by QIO</p>	
FI_NUM	The identification number assigned by CMS to a fiscal intermediary authorized to process institutional claim records.		<p>Effective October 2006, the Medicare Administrative Contractors (MACs) began replacing the existing fiscal intermediaries and started processing institutional claim records for states assigned to its jurisdiction.</p> <p>NOTE: The 5-position MAC number will be housed in the existing FI_NUM field. During the transition from an FI to a MAC the FI_NUM field could contain either a FI number or a MAC number. See the FI_NUM table of codes to identify the new MAC numbers and their effective dates.</p>
NOPAY_CD	The reason that no Medicare payment is made for services on an institutional claim.		<p>NOTE: Effective with Version 'J', the field has been expanded on the NCH claim to 2 bytes. With this expansion the NCH will no longer use the character values to represent the official two byte values being sent in by CWF since 4/2002. During the Version 'J' conversion, all character values were converted to the two byte values.</p>
PMT_AMT	<p>The Medicare claim payment amount.</p> <p>For hospital services, this amount does not include the claim pass-through per diem payments made by Medicare. To obtain the total amount paid by Medicare for the claim, the pass-through amount (which is the daily per diem amount) must be multiplied by the number of Medicare-covered days (i.e., multiply the CLM_PASS_THRU_PER_DIEM_AMT by the CLM_UTLZTN_DAY_CNT), and then added to the claim payment amount (this field).</p> <p>For non-hospital services (SNF, home health, hospice, and hospital outpatient) and for other non-institutional services (Carrier and DME), this variable equals the total actual Medicare payment amount, and pass-through amounts do not apply. For Part B non-institutional services (Carrier and DME), this variable equals the sum of all the line item-level Medicare payments (variable called the LINE_NCH_PMT_AMT).</p>		<p>NOTE: In some situations, a negative claim payment amount may be pre-sent; e.g., (1) when a beneficiary is charged the full deductible during a short stay and the deductible exceeded the amount Medicare pays; or (2) when beneficiary is charged a coinsurance amount during a long stay and the coinsurance amount exceeds the amount Medicare pays (most prevalent situation involves psych hospitals who are paid a daily per diem rate no matter what the charges are.) Under IP PPS, inpatient hospital services are paid based on a predetermined rate per discharge, using the DRG patient classification system and the PRICER program. After 4/1/03, the payment amount could also include a "new technology" add-on amount. It does NOT include the pass-thru amounts (i.e., capital-related costs, direct medical education costs, kidney acquisition costs, bad debts); or any beneficiary-paid amounts (i.e., deductibles and coinsurance); or any other payer reimbursement. Under IRFPSPS, inpatient rehabilitation services are paid based on a predetermined rate per discharge, using the Case Mix Group (CMG) classification system and the PRICER program. From the CMG on the IRF PPS claim, payment is based on a standard payment amount for operating and capital cost for that facility (including routine and ancillary services). The payment is adjusted for wage, the % of low-income patients (LIP), locality, transfers, interrupted stays, short stay cases, deaths, and high cost outliers. Some or all of these adjustments could apply. The CMG payment does NOT include certain pass-through costs (i.e. bad debts, approved education activities); beneficiary-paid amounts, other payer reimbursement, and other services outside of the scope of PPS.</p>
PRPAYAMT	The amount of a payment made on behalf of a Medicare beneficiary by a primary payer other than Medicare, that the provider is applying to covered Medicare charges on a non-institutional claim.		

PRPAY_CD	The code on an institutional claim, specifying a federal non-Medicare program or other source that has primary responsibility for the payment of the Medicare beneficiary's health insurance bills. The presence of a primary payer code indicates that some other payer besides Medicare covered at least some portion of the charges.	A = Working aged bene/spouse with employer group health plan (EGHP) B = End stage renal disease (ESRD) beneficiary in the 18 month coordination period with an EGHP C = Conditional payment by Medicare; future reimbursement expected D = Automobile no-fault E = Worker's Compensation F = Public Health Service or other federal agency (other than Dept of Veterans Affairs) G = Working disabled bene (under age 65 with LGHP) H = Black Lung I = Dept of Veterans Affairs L = Any liability insurance M = Override code: EGHP services involved N = Override code: non-EGHP services involved W = Worker's Compensation Medicare Set-Aside Arrangement (WCMSA) Blank = Medicare is primary payer	Values C, M, N and Blank indicate Medicare is primary payer.
PRSTATE	The two position SSA state code where provider facility is located.		
ORGNPINM	On an institutional claim, the National Provider Identifier (NPI) number assigned to uniquely identify the institutional provider certified by Medicare to provide services to the beneficiary.		
AT_UPIN	On an institutional claim, the unique physician identification number (UPIN) of the physician who would normally be expected to certify and recertify the medical necessity of the services rendered and/or who has primary responsibility for the beneficiary's medical care and treatment (attending physician).		Alert: Starting April 9, 2014 CMS is no longer encrypting physician identifiers, e.g., National Provider Identifiers (NPIs), on the SAFs. All new SAF requests will include actual NPI rather than an encrypted physician identifier. Researchers who have already purchased SAFs and have an active Data Use Agreement (DUA) with CMS may request a crosswalk linking encrypted physician identifiers to NPIs/UPINs. For more information on how to request the crosswalk visit: http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/Privacy/DUAs_-_more_actions.html
AT_NPI	On an institutional claim, the national provider identifier (NPI) number assigned to uniquely identify the physician who has overall responsibility for the beneficiary's care and treatment.		Alert: Starting April 9, 2014 CMS is no longer encrypting physician identifiers, e.g., National Provider Identifiers (NPIs), on the SAFs. All new SAF requests will include actual NPI rather than an encrypted physician identifier. Researchers who have already purchased SAFs and have an active Data Use Agreement (DUA) with CMS may request a crosswalk linking encrypted physician identifiers to NPIs/UPINs. For more information on how to request the crosswalk visit: http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/Privacy/DUAs_-_more_actions.html
OP_UPIN	On an institutional claim, the unique physician identification number (UPIN) of the physician who performed the principal procedure. This element is used by the provider to identify the operating physician who performed the surgical procedure.		Alert: Starting April 9, 2014 CMS is no longer encrypting physician identifiers, e.g., National Provider Identifiers (NPIs), on the SAFs. All new SAF requests will include actual NPI rather than an encrypted physician identifier. Researchers who have already purchased SAFs and have an active Data Use Agreement (DUA) with CMS may request a crosswalk linking encrypted physician identifiers to NPIs/UPINs. For more information on how to request the crosswalk visit: http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/Privacy/DUAs_-_more_actions.html
OP_NPI	On an institutional claim, the National Provider Identifier (NPI) number assigned to uniquely identify the physician with the primary responsibility for performing the surgical procedure(s).		Alert: Starting April 9, 2014 CMS is no longer encrypting physician identifiers, e.g., National Provider Identifiers (NPIs), on the SAFs. All new SAF requests will include actual NPI rather than an encrypted physician identifier. Researchers who have already purchased SAFs and have an active Data Use Agreement (DUA) with CMS may request a crosswalk linking encrypted physician identifiers to NPIs/UPINs. For more information on how to request the crosswalk visit: http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/Privacy/DUAs_-_more_actions.html
OT_UPIN	On an institutional claim, the unique physician identification number (UPIN) of the other physician associated with the institutional claim.		Alert: Starting April 9, 2014 CMS is no longer encrypting physician identifiers, e.g., National Provider Identifiers (NPIs), on the SAFs. All new SAF requests will include actual NPI rather than an encrypted physician identifier. Researchers who have already purchased SAFs and have an active Data Use Agreement (DUA) with CMS may request a crosswalk linking encrypted physician identifiers to NPIs/UPINs. For more information on how to request the crosswalk visit: http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/Privacy/DUAs_-_more_actions.html

OT_NPI	On an institutional claim, the National Provider Identifier (NPI) number assigned to uniquely identify the other physician associated with the institutional claim.		Alert: Starting April 9, 2014 CMS is no longer encrypting physician identifiers, e.g., National Provider Identifiers (NPIs), on the SAFs. All new SAF requests will include actual NPI rather than an encrypted physician identifier. Researchers who have already purchased SAFs and have an active Data Use Agreement (DUA) with CMS may request a crosswalk linking encrypted physician identifiers to NPIs/UPINs. For more information on how to request the crosswalk visit: http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/Privacy/DUAs_-_more_actions.html
MCOPDSW	A switch indicating whether or not a Managed Care Organization (MCO) has paid the provider for an institutional claim.	Blank = MCO has not paid the provider 0 = MCO has not paid the provider 1 = MCO has paid the provider for a claim	
STUS_CD	The code used to identify the status of the patient as of the CLM_THRU_DT.	0 = Unknown value (but present in data) 01 = Discharged to home/self care 02 = Discharged / transferred to short term hospital 03 = Discharged / transferred to SNF 04 = Discharged / transferred to intermediate care 05 = Discharged / transferred to other IPT care 06 = Discharged / transferred to HHA home care 07 = Left against medical advice or discontinue care 08 = Discharged / transferred to home IV drug care 09 = Admitted as an inpatient to hospital after OPT 20 = Expired (did not recover - Christian Science) 21 = Discharged / transferred to court /law enforce 30 = Still a patient 40 = Expired at home (hospice claims only) 41 = Expired in facility (hospice claims only) 42 = Expired place unknown (hospice claims only) 43 = Discharged / transferred to federal hospital 50 = Hospice - home 51 = Hospice - medical facility 61 = Discharged / transferred to swing bed internally 62 = Discharged / transferred to IPT Rehab 63 = Discharged / transferred to to LTC 64 = Discharged / transferred to Medicaid facility 65 = Discharged / transferred to Psychiatric Hospital 66 = Discharged / transferred to CAH 70 = Discharged / transferred to other misc facility 71 = Discharged / transferred to other OPT services 72 = Discharged / transferred internally for OPT svcs	
TOT_CHRG	The total charges for all services included on the institutional claim. This field is redundant with revenue center code 0001/total charges.		
BLDDEDAM	The amount of money for which the intermediary determined the beneficiary is liable for the blood deductible.		A blood deductible amount applies to the first 3 pints of blood (or equivalent units; applies only to whole blood or packed red cells - not platelets, fibrinogen, plasma, etc. which are considered biologicals). However, blood processing is not subject to a deductible. Calculation of the deductible amount considers both Part A and Part B claims combined. The blood deductible does not count toward meeting the inpatient hospital deductible or any other applicable deductible and coinsurance amounts for which the patient is responsible. Costs to beneficiaries are described in detail on the Medicare.gov website. There is a CMS publication called "Your Medicare Benefits", which explains the blood deductible.
PCCHGAMT	The amount of physician and other professional charges covered under Medicare Part B. For IP claims, this amount is not reflected in any of the other Part A claim fields (i.e., it is not a portion of the Medicare payment for the hospitalization).		
PRNCPAL_DGNS_CD	The diagnosis code identifying the diagnosis, condition, problem or other reason for the admission/encounter/visit shown in the medical record to be chiefly responsible for the services provided. This data is also redundantly stored as the first occurrence of the diagnosis code (variable called ICD_DGNS_CD1).		Starting in 2011, with version J of the NCH claim layout, institutional claims can have up to 25 diagnosis codes (previously only 11 were accommodated), and the non-institutional claims can have up to 12 diagnosis codes (previously only up to 8). Effective with Version 'J', this field has been expanded from 5 bytes to 7 bytes to accommodate the future implementation of ICD-10. ICD-10 is not scheduled for implementation until 10/2015.
PRNCPAL_DGNS_VRSN_CD	Effective with Version 'J', the code used to indicate if the diagnosis is ICD-9 or ICD-10.	Blank = ICD-9 9 = ICD-9 0 = ICD-10	With 5010, the diagnosis and procedure codes have been expanded to accommodate ICD-10, even though ICD-10 is not scheduled for implementation until 10/2015.

ICD DGNS CD1 to CD25	The diagnosis code identifying the beneficiary's principal or other diagnosis (including E code).		For ICD-9 diagnosis codes, this is a 3-5 digit numeric or alpha /numeric value; it can include leading zeros. Starting in 2011, with version J of the NCH claim layout, institutional claims can have up to 25 diagnosis codes (previously only 11 were accommodated), and the non-institutional claims can have up to 12 diagnosis codes (previously only up to 8). The lower the number, the more important the diagnosis is in the patient treatment/billing (i.e., ICD_DGNS_CD1 is considered the primary diagnosis).
ICD DGNS VRSN CD1 to CD25	Effective with Version 'J', the code used to indicate if the diagnosis code is ICD-9 or ICD-10.	Blank = ICD-9 9 = ICD-9 0 = ICD-10	With 5010, the diagnosis and procedure codes have been expanded to accommodate ICD-10, even though ICD-10 is not scheduled for implementation until 10/2015.
FST_DGNS_E_CD	The code used to identify the first external cause of injury, poisoning, or other adverse effect. This diagnosis E code is also stored as the first occurrence of the diagnosis E code trailer.		Prior to version 'J', this field was named: CLM_DGNS_E_CD. Effective with Version 'J', this field has been expanded from 5 bytes to 7 bytes to accommodate the future implementation of ICD-10, which is not scheduled for implementation until 10/2015.
FST_DGNS_E_VRSN_CD	Effective with Version 'J', the code used to indicate if the diagnosis code is ICD-9 or ICD-10.	Blank = ICD-9 9 = ICD-9 0 = ICD-10	With 5010, the diagnosis and procedure codes have been expanded to accommodate ICD-10, even though ICD-10 is not scheduled for implementation until 10/2015.
ICD DGNS E CD1 to CD12	The code used to identify the external cause of injury, poisoning, or other adverse affect.		Effective with Version 'J', this field has been expanded from 5 bytes to 7 bytes to accommodate the implementation of ICD-10 in October of 2015.
ICD DGNS E VRSN CD1 to CD12	Effective with Version 'J', the code used to indicate if the diagnosis code is ICD-9 or ICD-10.	Blank = ICD-9 9 = ICD-9 0 = ICD-10	With 5010, the diagnosis and procedure codes have been expanded to accommodate ICD-10, even though ICD-10 is not scheduled for implementation until 10/2015.
ICD_PRCDR_CD1 to CD12	The code that indicates the principal or other procedure performed during the period covered by the institutional claim.		Effective July 2004, ICD-9-CM procedure codes are no longer being accepted on Outpatient claims. The ICD-9-CM codes were named as the HIPAA standard code set for inpatient hospital procedures. HCPCS/CPT codes were named as the standard code set for physician services and other health care services.
ICD_PRCDR_VRSN_CD1 to CD25	The code used to indicate if the surgical procedure code is ICD-9 or ICD-10.	Blank = ICD-9 9 = ICD-9 0 = ICD-10	With 5010, the diagnosis and procedure codes have been expanded to accommodate ICD-10, even though ICD-10 is not scheduled for implementation until 10/2015.
PRCDR_DT1 to DT25	On an institutional claim, the date on which the principal or other procedure was performed.		For the Limited Data Set Standard View, the claim procedure performed date is coded as when the procedure was performed.
RSN_VISIT_CD1 to CD3	The diagnosis code used to identify the patient's reason for the Hospital Outpatient visit.		Prior to Version 'J', this field was CLM_ADMTG_DGNS_CD. With Version 'J', the name has changed and there can be up to 3 occurrences of this group.
RSN_VISIT_VRSN_CD1 to CD3	The code used to indicate if the diagnosis code is ICD-9 or ICD-10.	Blank = ICD-9 9 = ICD-9 0 = ICD-10	With 5010, the diagnosis and procedure codes have been expanded to accommodate ICD-10, even though ICD-10 is not scheduled for implementation until 10/2015.
PTB_DED	The amount of money for which the intermediary or carrier has determined that the beneficiary is liable for the Part B cash deductible on the claim.		DERIVED FROM: CLM_VAL_CD and CLM_VAL_AMT
PTB_COIN	The amount of money for which the intermediary has determined that the beneficiary is liable for Part B coinsurance on the institutional claim.		DERIVED FROM: CLM_VAL_CD and CLM_VAL_AMT
PRVDRPMT	The amount paid, from the Medicare Trust Fund, to the provider for the services reported on the Outpatient claim.		
BENEPMT	The total payments made, from the Medicare Trust Fund, to the beneficiary for the services reported on the Outpatient claim (sum of line payment amounts to the beneficiary.)		
DOB_DT	The beneficiary's date of birth, coded as a range.	0 = Unknown 1 = <65 2 = 65 Thru 69 3 = 70 Thru 74 4 = 75 Thru 79 5 = 80 Thru 84 6 = >84	For the Limited Data Set Standard View, the beneficiary's date of birth is coded as a range.
GNDR_CD	The sex of a beneficiary.	0 = Unknown 1 = Male 2 = Female	

RACE_CD	The race of a beneficiary.	0 = Unknown 1 = White 2 = Black 3 = Other 4 = Asian 5 = Hispanic 6 = North American Native	
CNTY_CD	The 3-digit SSA standard county code of a beneficiary's residence.		A listing of county codes can be found on the US Census website; also CMS has core-based statistical area (CBSA) crosswalk files available on their website, which include state and county SSA codes.
STATE_CD	The 2-digit SSA standard state code of a beneficiary's residence.		1. Used in conjunction with a county code, as selection criteria for the determination of payment rates for HMO reimbursement. 2. Concerning individuals directly billable for Part B and/or Part A premiums, this element is used to determine if the beneficiary will receive a bill in English or Spanish. 3. Also used for special studies.
CWF_BENE_MDCR_STUS_CD	The CWF-derived reason for a beneficiary's entitlement to Medicare benefits, as of the reference date (CLM_THRU_DT).	10 = Aged without ESRD 11 = Aged with ESRD 20 = Disabled without ESRD 21 = Disabled with ESRD 31 = ESRD only	
ACTIONCD	The type of action requested by the intermediary to be taken on an institutional claim.	1 = Original debit action 5 = Force action code 3 (secondary debit adjustment) 8 = Benefits refused	

Condition Code File

Variable	Description	Possible Values	Notes
DSYSRTKY	This field contains the key to link data for each beneficiary across all claim files.		
CLAIMNO	The unique number used to identify a unique claim.		
RLTCNDSQ	The sequence number of the claim related condition code (variable called CLM_RLT_COND_CD).		
THRU_DT	The last day on the billing statement covering services rendered to the beneficiary (a.k.a 'Statement Covers Thru Date').		
CLM_TYPE	The code used to identify the type of claim record being processed in NCH.	10 = Home Health Agency 20 = Non swing bed SNF 30 = Swing bed SNF 40 = Hospital Outpatient 50 = Hospice 60 = Inpatient 71 = Local carrier non-DMEPOS 72 = Local carrier DMEPOS 81 = Regional carrier non-DMEPOS 82 = Regional carrier DMEPOS	Effective with Version 'J', 3 new code values have been added to include a type code for the Medicare Advantage claims (IME/GME, no-pay and paid as FFS). During the Version 'J' conversion, these type codes were populated throughout history.
RLT_COND	The code that indicates a condition relating to an institutional claim that may affect payer processing.	01 THRU 16 = Insurance related 17 THRU 30 = Special condition 31 THRU 35 = Student status codes which are required when a patient is a dependent child over 18 years old 36 THRU 45 = Accommodation 46 THRU 54 = CHAMPUS information 55 THRU 59 = Skilled nursing facility 60 THRU 70 = Prospective payment 71 THRU 99 = Renal dialysis setting A0 THRU B9 = Special program codes C0 THRU C9 = PRO approval services D0 THRU W0 = Change conditions	

Occurrence Code File

Variable	Description	Possible Values	Notes
DSYSRTKY	This field contains the key to link data for each beneficiary across all claim files.		
CLAIMNO	The unique number used to identify a unique claim.		
RLTOCRSQ	The sequence number of the claim related occurrence code (variable called CLM_RLT_OCRNC_CD).		
THRU_DT	The last day on the billing statement covering services rendered to the beneficiary (a.k.a 'Statement Covers Thru Date').		

CLM_TYPE	The code used to identify the type of claim record being processed in NCH.	10 = Home Health Agency 20 = Non swing bed SNF 30 = Swing bed SNF 40 = Hospital Outpatient 50 = Hospice 60 = Inpatient 71 = Local carrier non-DMEPOS 72 = Local carrier DMEPOS 81 = Regional carrier non-DMEPOS 82 = Regional carrier DMEPOS	Effective with Version 'J', 3 new code values have been added to include a type code for the Medicare Advantage claims (IME/GME, no-pay and paid as FFS). During the Version 'J' conversion, these type codes were populated throughout history.
OCRNC_CD	The code that identifies a significant event relating to an institutional claim that may affect payer processing. These codes are associated with a specific date (the claim related occurrence date).	01 THRU 09 = Accident 10 THRU 19 = Medical condition 20 THRU 39 = Insurance related 40 THRU 69 = Service related A1-A3 = Miscellaneous	
OCRNCDT	The date associated with a significant event related to an institutional claim that may affect payer processing. The date for the event that appears in the claim related occurrence code field.		For the Limited Data Set Standard View, the claim procedure performed date is coded as when the procedure was performed.

Value Code File

Variable	Description	Possible Values	Notes
DSYSRTKY	This field contains the key to link data for each beneficiary across all claim files.		
CLAIMNO	The unique number used to identify a unique claim.		
RLTVALSQ	The sequence number of the related claim value code (variable called CLM_VAL_CD).		
THRU_DT	The last day on the billing statement covering services rendered to the beneficiary (a.k.a 'Statement Covers Thru Date').		
CLM_TYPE	The code used to identify the type of claim record being processed in NCH.	10 = Home Health Agency 20 = Non swing bed SNF 30 = Swing bed SNF 40 = Hospital Outpatient 50 = Hospice 60 = Inpatient 71 = Local carrier non-DMEPOS 72 = Local carrier DMEPOS 81 = Regional carrier non-DMEPOS 82 = Regional carrier DMEPOS	Effective with Version 'J', 3 new code values have been added to include a type code for the Medicare Advantage claims (IME/GME, no-pay and paid as FFS). During the Version 'J' conversion, these type codes were populated throughout history.
VAL_CD	The code indicating the value of a monetary condition which was used by the intermediary to process an institutional claim. The associated monetary value is in the claim value amount field (CLM_VAL_AMT).		
VAL_AMT	The amount related to the condition identified in the CLM_VAL_CD field which was used by the intermediary to process the institutional claim.		

Revenue Center File

Variable	Description	Possible Values	Notes
DSYSRTKY	This field contains the key to link data for each beneficiary across all claim files.		
CLAIMNO	The unique number used to identify a unique claim.		
CLM_LN	This variable identifies an individual line number on a claim. Each revenue center record or claim line has a sequential line number to distinguish distinct services that are submitted on the same claim. All revenue center records or claim lines on a given claim have the same CLM_ID.		
THRU_DT	The last day on the billing statement covering services rendered to the beneficiary (a.k.a 'Statement Covers Thru Date').		
CLM_TYPE	The code used to identify the type of claim record being processed in NCH.	10 = Home Health Agency 20 = Non swing bed SNF 30 = Swing bed SNF 40 = Hospital Outpatient 50 = Hospice 60 = Inpatient 71 = Local carrier non-DMEPOS 72 = Local carrier DMEPOS 81 = Regional carrier non-DMEPOS 82 = Regional carrier DMEPOS	Effective with Version 'J', 3 new code values have been added to include a type code for the Medicare Advantage claims (IME/GME, no-pay and paid as FFS). During the Version 'J' conversion, these type codes were populated throughout history.

REV_CNTR	The provider-assigned revenue code for each cost center for which a separate charge is billed (type of accommodation or ancillary). A cost center is a division or unit within a hospital (e.g., radiology, emergency room, pathology). EXCEPTION: Revenue center code 0001 represents the total of all revenue centers included on the claim.		
REV_DT	This is the date of service for the revenue center record. However, it is populated only for home health claims, hospice claims, and Part B institutional (HOP) claims. For home health claims, which are paid based on episodes that can last up to 60 days, this variable indicates the dates for the individual visits.		The date applicable to the service represented by the revenue center code is coded when the service represented by the revenue center code occurred.
APCHIPPS	<p>This field contains one of two potential pieces of data; the Ambulatory Payment Classification (APC) code or the Health Insurance Prospective Payment System (HIPPS) code, which corresponds with the revenue center line for the claim.</p> <p>The APC codes are used as the basis for payment for outpatient prospective payment (OPPS) service (e.g., Part B institutional).</p> <p>Some Part A claim types (e.g., home health and SNF) use resource groupings, which are similar to case-mix groups, as the basis for payment (e.g., HHRG, SNF RUGs). For home health (HH) claims, when the revenue center code (variable called REV_CNTR) is 0023, the HHRG is located in this field and is a HIPPS code. This field is only meaningful for a HH claim when CMS determines the claim should be paid using a different HIPPS code than the one submitted by the provider. When this happens, the revised HIPPS code (the one actually used for payment purposes) appears in this field and the original HIPPS code submitted by the provider remains in the HCPCS_CD field. Otherwise, this variable will always be null or have a value of "00000" for HH revenue center records.</p> <p>The resource utilization group for the particular revenue center is located in the data field called the APC or HIPPS code variable. The APC is a four byte field. The HIPPS code is a five byte field. (such as 1AFKS).</p>	HIPPS codes can be downloaded from the CMS website Prospective Payment Systems page: (see: http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ProspectivePayment/ProspectivePaymentGen/HIPPSCodes.html).	<p>NOTE1: The APC field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.</p> <p>NOTE2: Under SNFPPS, HHPPS & IRFPPS, HIPPS codes are stored in the HCPCS field. **EXCEPTION: if a HHPPS HIPPS code is downcoded/upcoded the downcoded/ upcoded HIPPS will be stored in this field.</p> <p>NOTE3: Beginning with NCH weekly process date 8/18/00, this field will be populated with data. Claims processed prior to 8/18/00 will contain spaces in this field.</p>
HCPCS_CD	<p>The HCFA Common Procedure Coding System (HCPCS) is a collection of codes that represent procedures, supplies, products and services which may be provided to Medicare beneficiaries and to individuals enrolled in private health insurance programs. The codes are divided into three levels, or groups.</p> <p>In the Institutional Claim Revenue Center Files, this variable can indicate the specific case-mix grouping that Medicare used to pay for skilled nursing facility (SNF), home health, or inpatient rehabilitation facility (IRF) services. These groupings are sometimes known as Health Insurance Prospective Payment System (HIPPS) codes. This field will contain a HIPPS code if the revenue center code (REV_CNTR) equals 0022 for SNF care, 0023 for home health, or 0024 for IRF care. For home health claims, please also see the revenue center APC/HIPPS code variable (REV_CNTR_APC_HIPPS_CD).</p>		<p>Level I Codes and descriptors copyrighted by the American Medical Association's Current Procedural Terminology, Fourth Edition (CPT-4). These are 5 position numeric codes representing physician and nonphysician services. Note1: CPT-4 codes including both long and short descriptions shall be used in accordance with the CMS/AMA agreement. Any other use violates the AMA copyright.</p> <p>Level II Includes codes and descriptors copyrighted by the American Dental Association's Current Dental Terminology, Fifth Edition (CDT-5). These are 5 position alpha-numeric codes comprising the D series. All other level II codes and descriptors are approved and maintained jointly by the alpha-numeric editorial panel (consisting of CMS, the Health Insurance Association of America, and the Blue Cross and Blue Shield Association). These are 5 position alpha-numeric codes representing primarily items and nonphysician services that are not represented in the level I codes.</p> <p>Level III Codes and descriptors developed by Medicare carriers for use at the local (carrier) level. These are 5 position alpha-numeric codes in the W, X, Y or Z series representing physician and nonphysician services that are not represented in the level I or level II codes.</p>
MDFR_CD1	A first modifier to the HCPCS procedure code to enable a more specific procedure identification for the revenue center or line item service for the claim.		
MDFR_CD2	A second modifier to the HCPCS procedure code to make it more specific than the first modifier code to identify the revenue center or line item service for the claim.		

PMTMTHD	The code used to identify how the service is priced for payment. This field is made up of two pieces of data, 1st position being the status indicator and the 2nd position being the payment indicator.	<p>0 = Unknown Value (but present in data)</p> <p>1 = Paid standard hospital OPPS amount (status indicators K, S,T,V,X)</p> <p>2 = Services not paid under OPPS (status indicator A, or no HCPCS code and not certain revenue center codes)</p> <p>3 = Not paid (status indicator M,W,Y,E) or not paid under OPPS (status indicator B,C & Z)</p> <p>4 = Paid at reasonable cost (status indicator F,L)</p> <p>5 = Additional payment for drug or biological (status indicator G)</p> <p>6 = Additional payment for device (status indicator H)</p> <p>7 = Additional payment for new drug or new biological (status indicator J)</p> <p>8 = Paid partial hospitalization per diem (status indicator P)</p> <p>9 = No additional payment, payment included in line items with APCs (status indicator N, or no HCPCS code and certain revenue center codes, or HCPCS codes G0176 (activity therapy), G0129 (occupational therapy) or G0177 (partial hospitalization program services))</p>	<p>NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.</p> <p>NOTE2: Effective 10/2005, this field will no longer represent the service indicator and the payment indicator. This field will now house the 2-byte payment indicator. The status indicator will be housed in a new field named: REV_CNTR_STUS_IND_CD.</p>
DSCNTIND	<p>This code represents a factor that specifies the amount of any APC discount. The discounting factor is applied to a line item with a service indicator (part of the REV_CNTR_PMT_MTHD_IND_CD) of 'T'. The flag is applicable when more than one significant procedure is performed.</p> <p>**If there is no discounting the factor will be 1.0.**</p> <p><input type="checkbox"/></p>	<p>*DISCOUNTING FORMULAS*</p> <p>1 = 1.0</p> <p>2 = (1.0+D(U-1))/U</p> <p>3 = T/U</p> <p>4 = (1+D)/U</p> <p>5 = D</p> <p>6 = TD/U</p> <p>7 = D(1+D)/U</p> <p>8 = 2.0/U</p> <p>VALUES D, U & T REPRESENT THE FOLLOWING:</p> <p>D = Discounting fraction (currently 0.5)</p> <p>U = Number of units</p> <p>T = Terminated procedure discount (currently 0.5)</p>	<p>NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.</p> <p>NOTE2: It has been discovered that this field may be populated with data on claims with dates of service prior to 7/00 (implementation of Claim Line Expansion OPPS/HHPPS). The original understanding of the new revenue center fields was that data would be populated on claims with dates of service 7/00 and forward. Data has been found in claims with dates of service prior to 7/00 because the Standard Systems have processed any claim coming in 7/00 and after, meeting the above criteria, through the Outpatient Code Editor (OCE) regardless of the dates of service.</p>
PACKIND	The code used to identify those services that are packaged / bundled with another service.	<p>0 = Not packaged</p> <p>1 = Packaged service (service indicator N)</p> <p>2 = Packaged as part of partial hospitalization per diem or daily mental health service per diem</p> <p>3 = Artificial charges for surgical procedure (eff. 7/2004)</p>	<p>NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.</p>
OTAF_1	The code used to indicate that the provider was obligated to accept as full payment the amount received from the primary (or secondary) payer.	<p>Y = provider is obligated to accept the payment as payment in full for the service.</p> <p>N or blank = provider is not obligated to accept the payment, or there is no payment by a prior payer.</p>	<p>NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.</p>
IDENDC	This field may contain one of three types of identifiers: the National Drug Code (NDC), the Universal Product Code (UPC), or the number assigned by the Food and Drug Administration (FDA) to an investigational device (IDE) after the manufacturer has approval to conduct a clinical trial. The IDEs will have a revenue center code '0624'.		This field was renamed to eventually accommodate the National Drug Code (NDC) and the Universal Product Code (UPC). This field could contain either of these 3 fields (there would never be an instance where more than one would come in on a claim). The size of this field was expanded to X(24) to accommodate either of the new fields (under Version 'H' it was X(7)).
REV_UNIT	A quantitative measure (unit) of the number of times the service or procedure being reported was performed according to the revenue center/HCPCS code definition as described on an institutional claim. Depending on type of service, units are measured by number of covered days in a particular accommodation, pints of blood, emergency room visits, clinic visits, dialysis treatments (sessions or days), outpatient therapy visits, and outpatient clinical diagnostic laboratory tests.		When revenue center code = '0022' (SNF PPS) the unit count will reflect the number of covered days for each HIPPS code and, if applicable, the number of visits for each rehab therapy code.

REV_RATE	Charges relating to unit cost associated with the revenue center code. Exception (encounter data only): If plan (e.g. MCO) does not know the actual rate for the accommodations, \$1 will be reported in the field.		<p>NOTE1: For SNF PPS claims (when revenue center code equals '0022'), CMS has developed a SNF PRICER to compute the rate based on the provider supplied coding for the MDS RUGS III group and assessment type (HIPPS code, stored in revenue center HCPCS code field).</p> <p>NOTE2: For OP PPS claims, CMS has developed a PRICER to compute the rate based on the Ambulatory Payment Classification (APC), discount factor, units of service and the wage index.</p> <p>NOTE3: Under HH PPS (when revenue center code equals '0023'), CMS has developed a HHA PRICER to compute the rate. On the RAP, the rate is determined using the case mix weight associated with the HIPPS code, adjusting it for the wage index for the beneficiary's site of service, then multiplying the result by 60% or 50%, depending on whether or not the RAP is for a first episode. On the final claim, the HIPPS code could change the payment if the therapy threshold is not met, or partial episode payment (PEP) adjustment or a significant change in condition (SCIC) adjustment. In cases of SCICs, there will be more than one '0023' revenue center line, each representing the payment made at each case-mix level.</p> <p>NOTE4: For IRF PPS claims (when revenue center code equals '0024'), CMS has developed a PRICER to compute the rate based on the HIPPS/CMG (HIPPS code, stored in revenue center HCPCS code field).</p>
REVBLOOD	This variable is the dollar amount the beneficiary is responsible for related to the deductible for blood products that appear on the revenue center record. A deductible amount applies to the first 3 pints of blood (or equivalent units; applies only to whole blood or packed red cells - not platelets, fibrinogen, plasma, etc. which are considered biologicals). However, blood processing is not subject to a deductible. Calculation of the deductible amount considers both Part A and Part B claims combined. The blood deductible does not count toward meeting the inpatient hospital deductible or any other applicable deductible and coinsurance amounts for which the patient is responsible.		<p>Costs to beneficiaries are described in detail on the Medicare.gov website. There is a CMS publication called "Your Medicare Benefits", which explains the blood deductible.</p> <p>NOTE: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.</p>
REVDCTBL	This variable is the beneficiary's liability under the annual Part B deductible for the revenue center record. The Part B deductible applies to both institutional (e.g., HOP) and non-institutional (e.g., Carrier and DME) services.		<p>Costs to beneficiaries are described in detail on the Medicare.gov website. There is a CMS publication called "Your Medicare Benefits", which explains the deductibles.</p> <p>NOTE: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.</p>
WAGEADJ	<p>This variable is the beneficiary's liability for coinsurance for the revenue center record.</p> <p>Beneficiaries only face coinsurance once they have satisfied Part B's annual deductible, which applies to both institutional (e.g., HOP) and non-institutional (e.g., Carrier and DME) services.</p> <p>For most Part B services, coinsurance equals 20 percent of the allowed amount. The coinsurance amount is wage adjusted, based on the metropolitan statistical area (MSA) where the provider is located.</p>		<p>Medicare payments are described in detail in a series called the Medicare Learning Network (MLN) "Payment System Fact Sheet Series" (see the list of MLN publications at: http://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts/MLN-Publications.html).</p> <p>NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. The above claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>NOTE2: This field will have either a zero (for services for which coinsurance is not applicable), a regular coinsurance amount (calculated on either charges or a fee schedule) or if subject to OP PPS the national coinsurance amount will be wage adjusted. The wage adjusted coinsurance is based on the MSA where the provider is located or assigned as a result of a reclassification.</p>

RDCDCOIN	For all services subject to Outpatient PPS, the amount of coinsurance applicable to the line for a particular service (HCPCS) for which the provider has elected to reduce the coinsurance amount.	NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field. Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward. NOTE2: The reduced coinsurance amount cannot be lower than 20% of the payment rate for the APC line.
REV_MSP1	The amount paid by the primary payer when the payer is primary to Medicare (Medicare is secondary).	NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field. Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.
REV_MSP2	Effective with Version 'I', the amount paid by the secondary payer when two payers are primary to Medicare (Medicare is the tertiary payer).	NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field. Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.
RPRVDPMT	The amount Medicare paid for the services reported on the revenue center record. This field is rarely populated for Part A claims due to per-diem or DRG payments; the claim payment amounts should be used instead. For Hospital Outpatient services (also called Institutional Outpatient claims, which consist of claim type [variable called NCH_CLM_TYPE_CD]= 40), this variable can be summed across all revenue center lines for the claim to obtain the total Medicare claim payment amount.	NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field. Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward. NOTE2: Additional information regarding claim versus revenue-line level payments can be found in a CCW Technical Guidance document entitled: "Getting Started with Medicare data."
RBENEPMT	The amount paid to the beneficiary for the services reported on the line item.	NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field. Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.

PTNTRESP	The amount paid by the beneficiary to the provider for the line item service.		<p>NOTE: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.</p>
REVPMT	To obtain the Medicare payment amount for the services reported on the revenue center record, it is more accurate to use a different variable called the revenue center Medicare provider payment amount (REV_CNTR_PRVDR_PMT_AMT). For Home Health, use the claim-level Medicare payment amount (variable that is the total of all revenue center records on the claim, which is called CLM_PMT_AMT), since each visit is not paid separately.		<p>NOTE1: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services with dates of service 1/1/02 and forward.</p>
REV_CHRG	The total charges (covered and non-covered) for all accommodations and services (related to the revenue code) for a billing period before reduction for the deductible and coinsurance amounts and before an adjustment for the cost of services provided. NOTE: For accommodation revenue center total charges must equal the rate times units (days).		<p>EXCEPTIONS:</p> <p>(1) For SNF RUGS demo claims only (9000 series revenue center codes), this field contains SNF customary accommodation charge, (i.e., charges related to the accommodation revenue center code that would have been applicable if the provider had not been participating in the demo).</p> <p>(2) For SNF PPS (non demo claims), when revenue center code = '0022', the total charges will be zero.</p> <p>(3) For Home Health PPS (RAPs), when revenue center code = '0023', the total charges will equal the dollar amount for the '0023' line.</p> <p>(4) For Home Health PPS (final claim), when revenue center code = '0023', the total charges will be the sum of the revenue center code lines (other than '0023').</p> <p>(5) For Inpatient Rehabilitation Facility (IFR) PPS, when the revenue center code = '0024', the total charges will be zero. For accommodation revenue codes (010X - 021X), total charges must equal the rate times the units.</p> <p>(6) For encounter data, if the plan (e.g. MCO) does not know the actual charges for the accommodations the total charges will be \$1 (rate) times units (days).</p>
REV_NCVR	The charge amount related to a revenue center code for services that are not covered by Medicare.		
REVSTIND	This variable indicates how the service listed on the revenue center record was priced for payment purposes. The revenue center status indicator code is most useful with outpatient hospital claims, where multiple methods may be used to determine the payment amount for the various revenue center records on the claim (for example, some lines may be bundled into an APC and paid under the outpatient PPS, while other lines may be paid under other fee schedules).	<p>A = Services not paid under OPPS B = Non-allowed item or service for OPPS C = Inpatient procedure E = Non-allowed item or service F = Corneal tissue acquisition and certain CRNA services G = Drug/biological pass-through H = Device pass-through J = New drug or new biological pass-through K = Non pass-through drug/biological, radio-pharmaceutical agent, certain brachytherapy sources L = Flu/PPV vaccines M = Service not billable to Fiscal Inter N = Packaged incidental service P = Paid partial hospitalization per diem APC payment Q1 = Separate payment made; OPPS - APC (effective 2009) Q2 = No separate payment made; OPPS - APC were packaged into payment for other services (effective 2009) Q3 = May be paid through a composite APC-based on composite-specific criteria or separately through single code APCs when the criteria are not met (effective 2009) S = Significant procedure not subject to multiple procedure discounting T = Significant procedure subject to multiple procedure discounting V = Medical visit to clinic or emergency department W = Invalid HCPCS or invalid revenue code with blank HCPCS X = Ancillary service Y = Non-implantable DME, Therapeutic shoes Z = Valid revenue with blank HCPCS and no other SI assigned</p>	<p>NOTE1: This 2-byte indicator is being added due to an expansion of a field that currently exist on the revenue center trailer. The status indicator is currently the 1st position of the Revenue Center Payment Method Indicator Code. The payment method indicator code is being split into two 2-byte fields (payment indicator and status indicator). The expanded payment indicator will continue to be stored in the existing payment method indicator field. The split of the current payment method indicator field is due to the expansion of both pieces of data from 1-byte to 2-bytes.</p> <p>NOTE2: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services.</p>

REV_CNTR_PRICNG_IND_CD	The code used to identify if there was a deviation from the standard method of calculating payment amount.		<p>NOTE: This field is populated for those claims that are required to process through Outpatient PPS Pricer. The type of bills (TOB) required to process through are: 12X, 13X, 14X (except Maryland providers, Indian Health Providers, hospitals located in American Samoa, Guam and Saipan and Critical Access Hospitals (CAH)); 76X; 75X and 34X if certain HCPCS are on the bill; and any outpatient type of bill with a condition code '07' and certain HCPCS. These claim types could have lines that are not required to price under OPPS rules so those lines would not have data in this field.</p> <p>Additional exception: Virgin Island hospitals and hospitals that furnish only inpatient Part B services.</p>
