PMT_AMT | Claim Payment Amount | Amount of payment made from the Medicare trust fund for the services covered by the claim record. Generally, the amount is calculated by the FI or carrier; and represents what was paid to the institutional provider, physician, or supplier, with the exceptions noted below. **NOTE:** In some situations, a negative claim payment amount may be sent; e.g., (1) when a beneficiary is charged the full deductible during a short stay and the deductible the amount Medicare pays; or (2) when a beneficiary is charged a coinsurance amount during a long stay and the coinsurance amount exceeds the amount Medicare pays (most prevalent situation involves psych hospitals who are paid daily per diem rate no matter what the charges are.)
Under IP PPS, inpatient hospital services are paid based on a predetermined rate per discharge, using the DRG classification system and the PRICER program. On the PPS claim, the payment amount includes the DRG approved payment amount, disproportionate share (5/1/86), indirect medical education (since 10/1/88), total PPS capital (since 10/1/91). It does NOT include the pass thru amounts (i.e., capital-related costs, direct medical education costs, kidney acquisition costs, bad debts); or any beneficiary-paid amounts (i.e., deductibles and coinsurance); or any other payer reimbursement.

Under SNF PPS, SNFs will classify beneficiaries using the patient classification system known as RUGS III. For the SNF PPS claim, the SNF PRICER will calculate/return the rate for each revenue center line item with revenue center '0022'; multiply the rate times the units count; and then sum the amount payable for all lines with revenue center code '0022' to determine the total claim payment amount.

Under Outpatient PPS, the national ambulatory payment classification (APC) rate that is calculated for each APC group is the basis for determining the total payment. The Medicare payment amount takes into account the wage adjustment and the beneficiary deductible and amounts. NOTE: There is no CWF edit check to validate the revenue center Medicare payment amount equals the claim level Medicare payment amount.

Under Home Health PPS, beneficiaries will be classified in an appropriate case mix category known as the Home Resource Group. A HIPPS code is then generated corresponding to the case mix category (HHRG).

For the RAP, the PRICER will determine the payment appropriate to the HIPPS code by computing 60% (for first episode) or 50% (for subsequent episodes) of the case episode payment. The payment is then wage index.

For the final claim, PRICER calculates 100% of the due, because the final claim is processed as an RAP, reversing the RAP payment in full. Although the final claim will show 100% payment amount, the provider actually receive the 40% or 50% payment.

Exceptions: For claims involving demos and BBA data, the amount reported in this field may not just represent the actual provider payment.

For demo Ids '01','02','03','04' -- claims contain amount paid to the provider, except that special 'differentials' paid outside the normal payment system are not included.

For demo Ids '05','15' -- encounter data 'claims' contain amount Medicare would have paid under FFS, instead of the actual payment to the MCO.
For demo Ids '06','07','08' -- claims contain actual provider payment but represent a special negotiated bundled payment for both Part A and Part B services. To identify what the conventional provider Part A payment would have been, check value code = 'Y4'. The related noninstitutional (physician/supplier) claims contain what would have been paid had there been no demo.

For BBA encounter data (non-demo) -- 'claims' contain amount Medicare would have paid under FFS, instead of the actual payment to the BBA plan.

DB2 ALIAS: CLM_PMT_AMT
SAS ALIAS: PMT_AMT
STANDARD ALIAS: CLM_PMT_AMT
TITLE ALIAS: REIMBURSEMENT
EDIT-RULES:
+9(9).99
COMMENT:
Prior to Version H the size of this field was S9(7)V99. Also the noninstitutional claim records carried this field as a line item. Effective with Version H, this element is a claim level across all claim types (and the line item field has be renamed.)
SOURCE:
CWF
LIMITATIONS:
Prior to 4/6/93, on inpatient, outpatient, and physician/supplier claims containing a CLM_DISP_CD of '02', the amount shown as the Medicare reimbursement does not take into consideration any CWF automatic adjustments (involving erroneous deductibles in most cases). In as many as 30% of the claims (30% IP, 15% OP, 5% PART B), the reimbursement reported on the claims may be over or under the actual Medicare payment amount.

PRPAYAMT  Carrier Claim Primary Payer Paid Amount

Effective with Version H, the amount of a payment made on behalf of a Medicare beneficiary by a primary payer other than Medicare, that the provider is applying to covered Medicare charges on a non-institutional claim.

NOTE: During the Version H conversion, this field was populated with data throughout history (back to service year 1991) by summing up the line item primary payer amounts.

CPO_PROV | Care Plan Oversight (CPO) Provider Number

Effective with NCH weekly process date 3/7/97, the Medicare provider number of the HHA or Hospice rendering Medicare covered services during period the physician is providing care plan oversight. The purpose of this field is to ensure compliance with the CPO requirement that the beneficiary must be receiving covered HHA or Hospice services during the billing period. There can be only one CPO provider number per claim, and no other services but CPO physician services are to be reported on the claim. This field is only present on the non-DMERC processed carrier claim.

NOTE: On the Version G format, this field is stored as a redefinition of the NEAR_LINE_ORGNL_BENE_CAN_NUM (the first 3 positions contain 'CPO', followed by the 6-position provider number). During the Version H conversion the data was moved to this dedicated field.

**HCPSCD{x}** | **Line HCPCS Code**
where \( x \) ranges from 1 to 13

The Health Care Financing Administration (HCFA) Common Procedure Coding System (HCPCS) is a collection of codes that represent procedures, supplies, products and services which may be provided to Medicare beneficiaries and to individuals enrolled in private health insurance programs. The codes are divided into three levels, or groups, as described below:

DB2 ALIAS: LINE_HCPCS_CD
SAS ALIAS: HCPCS_CD
STANDARD ALIAS: LINE_HCPCS_CD
TITLE ALIAS: HCPCS_CD

COMMENT:
Prior to Version H this line item field was named: HCPCS_CD. With Version H, a prefix was added to denote the location of this field on each claim type (institutional: REV_CNTR and non-institutional: LINE).

Level I
Codes and descriptors copyrighted by the American Medical Association's Current Procedural Terminology, Fourth Edition (CPT-4). These are 5 position numeric codes representing physician and non-physician services.

**** Note: ****
CPT-4 codes including both long and short descriptions shall be used in accordance with the HCFA/AMA agreement. Any other use violates the AMA copyright.
Variable Name | Label
---|---

Level II
Includes codes and descriptors copyrighted by the American Dental Association's Current Dental Terminology, Second Edition (CDT-2). These are 5 position alpha-numeric codes comprising the D series. All other level II codes and descriptors are approved and maintained jointly by the alpha-numeric editorial panel (consisting of HCFA, the Health Insurance Association of America, and the Blue Cross and Blue Shield Association). These are 5 position alpha-numeric codes representing primarily items and non-physician services that are not represented in the level I codes.

Level III
Codes and descriptors developed by Medicare carriers for use at the local (carrier) level. These are 5 position alpha-numeric codes in the W, X, Y or Z series representing physician and non-physician services that are not represented in the level I or level II codes.
