¹Does not reflect beneficiaries who received covered services but for whom no program payments were reported during the year. Detail does not add to totals by type of service because one person may have used several types of services.

²Prior to April 1, 1968, outpatient hospital services were covered by hospital insurance and supplementary medical insurance. All outpatient hospital services for 1967 are shown as supplementary medical insurance services for purposes of comparison.

³Beginning with 1994, Medicare enrollees in managed care plans are not included in the denominator used to calculate the utilization rates.

NOTES: Included in the total program payments and in the total hospital insurance payments for 1997, 1999, and 2000 are \$2.0, \$2.5, and \$2.9 billion dollars respectively for hospice services not shown separately. The change in program payments and utilization for home health between 1997 and 1999 is due in part to the Balanced Budget Act of 1997 (P.L. 105-33) which called for the gradual transfer of home health services unassociated with a hospital or skilled nursing facility stay from hospital insurance to supplementary medical insurance. The impact was first noted in 1998 (not shown). Numbers may not add to totals because of rounding. Refer to glossary for definitions of program payments and benefit payments.
