<sup>1</sup>For hospitals participating in the Medicare prospective payment system, the case-mix index is a measure of the hospital's average cost per case in relation to the average cost per case for all hospitals.

<sup>2</sup>Includes discharges from short-stay hospitals in the 50 States and District of Columbia; excludes discharges from short-stay hospitals in all outlying areas.

NOTES: Totals include data for short-stay hospitals located in the U.S. only, and may be slightly different from U.S. totals shown in other short-stay hospital tables. Numbers may not add to totals because of rounding.
