

Table 12.10
Changes in Access to or Coverage Under a Zero Premium Plan:
Calendar Years 1999-2007

Year	Medicare+Choice/Medicare Advantage Coordinated Care Plans (CCP)	
	Overall Medicare Population with Access to Zero Premium	Enrollees with Zero Premium Plan
	Percent	
1999	61	68
2000	53	61
2001	39	45
2002	34	39
2003	29	38
2004	40	48 ¹
2005	42	58 ¹
2006	61	52 ²
2007	69	50 ^{2, 3}

¹A change in methodology applies beginning in 2004. Because health plans are reporting enrollments by benefit package to CMS when an organization offers more than one benefit package in a given county, the 2004 and 2005 figures for enrollees choosing Zero-premium plans show enrollment at the actual "plan" level (that is, by benefit package). In prior years, enrollees were assigned to Zero-premium plans if one was offered by the organization in the county of residence of the individual. The figures for 2004 and 2005 would be a higher number if the methodology used in prior years were continued for 2004 and thereafter.

²For 2006 and 2007 the following conventions were observed: Zero premium refers to both zero Part C premium and zero Part D premium for MA-PD plans, or, zero Part C premium for MA-only plans. CCP includes Special Needs Plans (SNP), but excludes Employer only. Only plans with plan type Health Maintenance Organizations (HMO), HMO Point of Service (HMOPOS), Preferred Provider Organization (PPO), Provider the Sponsored Organizations (PSO) were included in the analysis. Enrollee coverage is percent of actual CCP enrollment with zero premium.

³For 2007 the Part B only plans were excluded from the computation of the Medicare population access (since no new Part B enrollees are allowed and consequently access to new enrollees is not provided). The effect of this exclusion was negligible since there are so few Part B only enrollees.

NOTES: The 2005 data are as of March 2005. The 2006 and 2007 data are as of December of that year.
