<sup>1</sup>ICD-9-CM is *International Classification of Diseases, 9th Revision, Clinical Modification* (Volume 1). Only the first listed or principal diagnosis has been used.

<sup>2</sup>Does not reflect persons who received covered services, but for whom no program payments were reported during the reporting year.

<sup>3</sup>Specific leading diagnoses were selected for presentation because of frequency of occurrences or because of special interest.

NOTE: Medicare program payments represent fee-for-service only and exclude amounts paid for managed care services. The change in program payments and utilization for home health between 1997 and 2007 is due in part to the Balanced Budget Act of 1997 (Public Law 105-33) which called for the gradual transfer of home health services unassociated with a hospital or skilled nursing facility stay from hospital insurance to supplementary medical insurance. The use of benefit was also affected by the efforts to identify fraudulent activities in the use of services. The impact was first noted in 1998 (not shown).
