<sup>1</sup> Revisions to scope, concept and methodology related to the CPI, beginning in January 1997, make comparisons with earlier periods tenuous, as the goods or services priced in 1997 and later years may differ from that priced in 1996 and earlier years. Also, shifts of the weights assigned to various goods and services have altered the composition of aggregate indexes such as "all items" and "medical care". For changes in titles of components and in definitions, see Bureau of Labor Statistics, [CPI Detailed Report, January 2001](#).

<sup>2</sup> Calculated based on reported June 1964, December 1964 and June 1965 index levels.

<sup>3</sup> New series began in January 1997; fiscal year annual average cannot be calculated.
