¹The total includes payments for all types of services reported on the HCFA Form-2082 and in the Medicaid Statistical Information System (MSIS), some not shown separately.

²Data shown include services shown separately in earlier years as skilled nursing facility (SNF) and intermediate care facilities (ICF-other). Beginning in fiscal year 1991, the conditions of participation for SNFs and ICF-other were unified, the distinction between them removed, and the services renamed nursing facility services. It is possible that the combined number of recipients includes some persons who used both types of nursing facility care during the reported fiscal year. This could somewhat inflate the number of users and lower the average payment per user.

³Trend in average payment per beneficiary (person served) for home health care are not strictly comparable to 1997 and prior because of changes in the definitions of related categories of service. Reporting for 1998 added categories of service for personal care support services and home and community-based waiver services (category not shown separately in table). In 1999 the home and community-based waiver services were reclassified into the other related categories of service (category not shown separately in table).

NOTES: Beginning fiscal year 1998, capitated premiums for Medicaid eligibles enrolled in managed care plans were included in this series as a component of the total payment per person served (beneficiary). Dollar amounts are adjusted using a personal consumption expenditure index for medical services, U.S. Department of Commerce, Bureau of Economic Analysis, expressed in fiscal year 2001 dollars. ICF/MR is intermediate care facility for the mentally retarded.

¹The total includes payments for all types of services reported on the HCFA Form-2082 and in the Medicaid Statistical Information System (MSIS), some not shown separately.

²Average payment per person served are not shown for these categories. The small number of users causes large fluctuations in the time series that may be misleading.

¹The total includes payments for all types of services reported on the HCFA Form-2082 and in the Medicaid Statistical Information System (MSIS), some not shown separately.

²Average payment per person served are not shown for these categories. The small number of users causes large fluctuations in the time series that may be misleading.

³Trend in average payment per beneficiary (person served) for home health care are not strictly comparable to 1997 and prior because of changes in the definitions of related categories of service. Reporting for 1998 added categories of service for personal care support services and home and community-based waiver services (category not shown separately in table). In 1999 the home and community-based waiver services were reclassified into the other related categories of service (category not shown separately in table).

NOTES: Beginning fiscal year 1998, capitated premiums for Medicaid eligibles enrolled in managed care plans were included in this series as a component of the total payment per person served (beneficiary). Dollar amounts are adjusted using a personal consumption expenditure index for medical services, U.S. Department of Commerce, Bureau of Economic Analysis, expressed in fiscal year 2001 dollars. ICF/MR is intermediate care facility for the mentally retarded.

¹The total includes payments for all types of services reported on the HCFA Form-2082 and in the Medicaid Statistical Information System (MSIS), some not shown separately.

²Data shown include services shown separately in earlier years as skilled nursing facility (SNF) and intermediate care facilities (ICF-other). Beginning in fiscal year 1991, the conditions of participation for SNFs and ICF-other were unified, the distinction between them removed, and the services renamed nursing facility services. It is possible that the combined number of recipients includes some persons who used both types of nursing facility care during the reported fiscal year. This could somewhat inflate the number of users and lower the average payments per user.

³Trend in average payment per beneficiary (person served) for home health care are not strictly comparable to 1997 and prior because of changes in the definitions of related categories of service. Reporting for 1998 added categories of service for personal care support services and home and community-based waiver services (category not shown separately in table). ¹The total includes payments for all types of services reported on the HCFA Form-2082 and in the Medicaid Statistical Information System (MSIS), some not shown separately.

²Data shown include services shown separately in earlier years as skilled nursing facility (SNF) and intermediate care facilities (ICF-other). Beginning in fiscal year 1991, the conditions of participation for SNFs and ICF-other were unified, the distinction between them removed, and the services renamed nursing facility services. It is possible that the combined number of recipients includes some persons who used both types of nursing facility care during the reported fiscal year. This could somewhat inflate the number of users and lower the average payments per user.

³Trend in average payment per beneficiary (person served) for home health care are not strictly comparable to 1997 and prior because of changes in the definitions of related categories of service. Reporting for 1998 added categories of service for personal care support services and home and community-based waiver services (category not shown separately in table). In 1999 the home and community-based waiver services were reclassified into the other related categories of service (category not shown separately in table).

NOTES: Beginning fiscal year 1998, capitated premiums for Medicaid eligibles enrolled in managed care plans were included in this series as a component of the total payment per person served (beneficiary). Dollar amounts are adjusted using a personal consumption expenditure index for medical services, U.S. Department of Commerce, Bureau of Economic Analysis, expressed in fiscal year 2001 dollars. ICF/MR is intermediate care facility for the mentally retarded.

¹The total includes payments for all types of services reported on the HCFA Form-2082 and in the Medicaid Statistical Information System (MSIS), some not shown separately are included in other.

²Data shown include services shown separately in earlier years as skilled nursing facility (SNF) and intermediate care facilities (ICF-other). Beginning in fiscal year 1991, the conditions of participation for SNFs and ICF-other were unified, the distinction between them removed, and the services renamed nursing facility services.

³Less than 0.05 percent.

NOTES: Beginning fiscal year 1998, capitated premiums for Medicaid eligibles enrolled in managed care plans were included in this series as a component of the other and of the total payment categories. Trends in home health agency program expenditures are not strictly comparable to 1997 and prior because of changes in redefining selected home health services as home and community-based waiver services in 1998 and reclassified as other in 1999.

¹The total includes payments for all types of services reported on the HCFA Form-2082 and in the Medicaid Statistical Information System (MSIS), some not shown separately are included in other.

²Data shown include services shown separately in earlier years as skilled nursing facility (SNF) and intermediate care facilities (ICF-other). Beginning in fiscal year 1991, the conditions of participation for SNFs and ICF-other were unified, the distinction between them removed, and the services renamed nursing facility services.

NOTES: Beginning fiscal year 1998, capitated premiums for Medicaid eligibles enrolled in managed care plans were included in this series as a component of the other and of the total payment categories. Trends in home health agency program expenditures are not strictly comparable to 1997 and prior because of changes in redefining selected home health services as home and community-based waiver services in 1998 and reclassified as other in 1999.

¹Includes children and foster care children.

²Last reported Medicaid payment is for fiscal year 1999.

NOTES: Beginning fiscal year 1998, capitated premiums for Medicaid eligibles enrolled in managed care plans were included in this series as a Medicaid payment. Also, States process a variety of payments that are not associated with an eligible individual (e.g., disproportionate share payments to hospitals, interim lump-sum provider reimbursement adjustments, and final cost report settlements). These adjustments can be positive (that is, an additional payment to the provider) or negative (that is, a recoupment). Because these payments cannot be associated with any one beneficiary, the eligibility and demographic characteristics for these payments are categorized as other/unknown.

¹Includes children and foster care children.

²Last reported numbers are for fiscal year 1999.

NOTES: Beginning fiscal year 1998, capitated premiums for Medicaid eligibles enrolled in managed care plans were included in this series as a Medicaid payment. Also, States process a variety of payments that are not associated with an eligible individual (e.g., disproportionate share payments to hospitals, interim lump-sum provider reimbursement adjustments, and final cost report settlements). These adjustments can be positive (that is, an additional payment to the provider) or negative (that is, a recoupment). Because these payments cannot be associated with any one beneficiary, the eligibility and demographic characteristics for these payments are categorized as other/unknown. Where distributions by basis of eligibility are not provided by the jurisdiction, and where the averages would yield negative or unusually large values, the average payments are not shown.

¹Includes beneficiaries who received any service, some not shown separately. Numbers do not add to total by type of service because one person may use several types of services.

²The relatively low number of persons served (beneficiaries) under fee-for-service by type of service for Arizona, Hawaii, and Tennessee reflect the large proportion of the covered population in managed care in these states. Eligibles only enrolled are included in the total person served but not by type of service.

³Last reported number of beneficiaries is for fiscal year 1999.

NOTES: Beginning fiscal year 1998, a Medicaid-eligible person who, during the year, received only coverage for managed care benefits was included for the first time in this series as a person served (beneficiary).

¹The total includes payments for all types of services reported on the HCFA Form-2082 and the Medicaid Statistical Information System (MSIS), some not shown separately.

²The relative lower amounts of fee-for-service payment amounts by type of service for Arizona, Hawaii, and Tennessee, reflects the large proportion of the covered population in managed care in those states. The capitated payments for members of prepaid health care are included in the total but are not distributed by the type of service.

³Last reported Medicaid payment is for fiscal year 1999.

NOTES: Beginning fiscal year 1998, capitated premiums for Medicaid eligibles enrolled in managed care plans were included in this series as a component of the total payment categories. In addition, the HCFA Form-2082 was revised to include two new service categories: personal care services and home and community-based waiver services (not shown separately in this table). This created a reallocation of payments from other categories such as home health.
