<sup>1</sup>The Omnibus Budget Reconciliation Act (OBRA) of 1981 raised the annual SMI deductible amount from \$60 to \$75 effective January 1, 1982. OBRA 1990 raised the deductible to \$100 effective January 1, 1991.

<sup>2</sup>In previous editions of the Statistical Supplement, the cost-sharing liability amounts for SMI were understated. Estimates of cost-sharing liability beginning in 1999 are significantly higher than those reported for prior years due to improvements in the methodology used to calculate Part B cost sharing. The amounts shown for SMI deductible and coinsurance for calendar years 1991-1998 are actuarial estimates and represent revisions. Data for years prior to 1991 are not available.

<sup>3</sup>Balance billing on unassigned claims is the difference between the charge submitted by the physician and the charge allowed by Medicare; the beneficiary is liable for this difference, in addition to the 20 percent coinsurance set by law. The Medicare Physician Payment Reform Act established a limit that a physician can charge Medicare beneficiaries on unassigned claims; in 1998 a physician could not charge more than 115 percent of the amount listed in the Medicare Physician Fee Schedule for non-participating physicians.

<sup>4</sup>Under the Medicare Catastrophic Coverage Act (MCCA) of 1988, Medicare coverage for inpatient hospital care for calendar year 1989 was extended to an unlimited number of days, and beneficiaries paid only one hospital deductible and no inpatient hospital coinsurance. Skilled nursing facility (SNF) care under MCCA paid for 150 SNF covered days of care for calendar year 1989 at 100 percent of covered charges, except for \$25.50 a day coinsurance for days 1-8 of the SNF stay. The MCCA cost-sharing changes for Part B coverage were not scheduled to be implemented until January 1, 1990. However, the MCCA was repealed effective January 1, 1990.

<sup>5</sup>Beginning 1994, managed care enrollees are excluded when the average cost-sharing liability per enrollee is computed. The enrollment populations used to calculate the liability per enrollee are the fee-for-service populations with the appropriate coverage: that is, the HI and/or SMI population for total liability, HI population for HI liability, and SMI population for SMI liability. Because of the use of different denominators, the total will not equal the sum of the parts.

NOTES: Medicare cost-sharing liability represent cost sharing for fee-for-service care only and are currently only available through calendar year 2000. Numbers may not add to totals because of rounding.

<sup>1</sup>Includes Part B balance billing beneficiary liability.

NOTES: Total Medicare expenditures represent the sum of Medicare Program payments and the potential beneficiary liability for cost sharing for fee-for-service care. Payments and cost sharing for managed care are excluded. Estimates of cost-sharing liability beginning in 1999 are significantly higher than those reported for prior years due to improvements in the methodology used to calculate Part B cost sharing. A small amount of deductible payments can not be accounted for because of missing bills and truncating of cents. Data for earlier years have not been revised. Data are currently only available through calendar year 2000. Numbers may not add to totals because of rounding.

<sup>1</sup>Represents beneficiaries who received covered services under fee-for-service and for whom program payments were made. Includes a small number of Medicare beneficiaries with no cost-sharing liability.

<sup>2</sup>Includes beneficiary balance billing cost-sharing liability.

<sup>3</sup>Medicare enrollees in managed care plans are not included in the denominator used to calculate utilization rates and average payments. The numerators for the ratios of persons served per 1,000 include beneficiaries alive and enrolled in fee-for-service at any point in the year.

<sup>4</sup>Excludes persons who did not have cost-sharing liability.

<sup>5</sup>Due to the availability of expanded codes for race, the methodology for calculating data for other race has been revised from earlier years.

<sup>6</sup>Includes aged persons with end stage renal disease (ESRD).

<sup>7</sup>Includes disabled persons with ESRD and persons entitled to Medicare because of ESRD only.

<sup>8</sup>Excludes outlying areas.

NOTES: A small amount of deductible payments can not be accounted for because of missing bills and truncating of cents. MSA is metropolitan statistical area. Data are currently only available through calendar year 2000. Numbers may not add to totals because of rounding.

<sup>1</sup>Based on the area of residence of the beneficiary.

<sup>2</sup>Does not reflect beneficiaries who received covered services, but for whom no cost-sharing liability was reported during the year.

<sup>3</sup>Medicare enrollees in managed care plans are not included in the denominator used to calculate the average payments.

<sup>4</sup>Includes 50 States, District of Columbia, and outlying areas.

<sup>5</sup>Includes Puerto Rico, Guam, Virgin Islands, residence unknown, and all other outlying areas not shown separately.

NOTES: A small amount of deductible payments can not be accounted for because of missing bills and truncating of cents. Data are currently only available through calendar year 2000. Numbers may not add to totals because of rounding.

<sup>1</sup>Represents beneficiaries who received covered services under fee-for-service and for whom program payments were made. Includes a small number of beneficiaries with no cost-sharing liability.

NOTES: While the overall levels of potential liability are more accurate, the number of persons falling into certain categories and levels of cost sharing are slightly understated. This in part is due to changes during the year in some beneficiaries' health insurance claim number (HIC). Most changes to the HIC involved the beneficiary identification code (BIC), which identifies the beneficiary's relationship to the primary wage earner; for example, a wife being converted to a widow. These changes were accounted through what is known as an equatable BIC routine which was performed on the input file. Other changes involved changes in the beneficiary claim account number portion of the HIC, for example, a wife acquiring enough quarters of credit to get benefits under her own account. No cross-referencing was done to get all claims for the small number of individuals who either enter or exit the 5-percent sample. In addition, managed care people who leave managed care during the calendar year are credited with prorated shares of an estimated amount of the annual Part B deductible, based on the amount of time in managed care and estimated time for most beneficiaries to reach the Part B deductible under fee-for-service. No estimating was done to attribute such amounts to individuals. It should also be noted that certain services are not subject to deductible and/or coinsurance. Data are currently only available through calendar year 2000. Numbers may not add to totals because of rounding.
