

Individual Coverage Health Reimbursement Arrangement  
 Employer Lowest Cost Silver Plan Premium Look-up Table  
 Data Dictionary

1. Overview of the Individual Coverage Health Reimbursement Arrangement Employer Lowest Cost Silver Plan Premium Look-up Table

The Centers for Medicare & Medicaid Services’ (CMS’) Center for Consumer Information & Insurance Oversight (CCIIO) publishes the Individual Coverage Health Reimbursement Arrangement (ICHRA) Employer Lowest Cost Silver Plan (LCSP) Premium Look-up Table to help stakeholders access individual market Qualified Health Plans (QHPs) LCSP premium data by geographic location.

The ICHRA Employer LCSP Premium Look-up Table contains data from states with Federally-facilitated Exchanges (FFE)s and State-based Exchanges on the Federal Platform (SBE-FPs). The ICHRA Employer LCSP Premium Look-up Table does not include data from states with State-based Exchanges (SBEs) that do not use the HealthCare.gov platform.

The ICHRA Employer LCSP Premium Look-up Table contains LCSP individual rates based on an eligible subscriber’s age and geographic location. The LCSP is the least expensive individual silver QHP in a geographic area at the lowest age band.

The data originates from issuers’ Rates Table templates (Excel-based issuer QHP application form that contains QHP plan premiums) (“Template field”) or are generated by CCIIO for processing data (“System-generated field”).

This data dictionary describes the variables contained in ICHRA Employer LCSP Premium Look-up Table. Each record reports LCSP age-based rates in a geographic location.

2. Variable Attributes

Variable Name:	BusinessYear [Hidden Field]
Variable Definition:	Year for which plan provides coverage to enrollees
Data Type:	Text
Variable Label:	Business Year
Allowable Values:	2019
Data Source:	System-generated field
Field Name from Data Source:	Business Year
Comments:	N/A

---

Variable Name:	StateCode
----------------	-----------

---

Variable Definition:	Two-character state abbreviation indicating the state where the plan is offered
Data Type:	Text
Variable Label:	State Code
Allowable Values:	All 50 state abbreviations
Data Source:	System-generated field
Field Name from Data Source:	State Code
Comments:	N/A

---

Variable Name:	RatingAreaId
Variable Definition:	Identifier for the geographic rating area within a state
Data Type:	Text
Variable Label:	Rating Area ID
Allowable Values:	Rating Area n, where n is an integer between 1 and 150
Data Source:	Template field
Field Name from Data Source:	Rating Area ID
Comments:	Each rating area identifier maps to a geographic region within the state (e.g., one or more counties, three-digit zip codes, or metropolitan statistical areas)

---

Variable Name:	CountyName
Variable Definition:	The name of a geographical division in a state
Data Type:	Text
Variable Label:	County Name
Allowable Values:	Free Text
Data Source:	System-generated field
Field Name from Data Source:	County Name
Comments:	N/A

---

Variable Name:	FIPSCode
Variable Definition:	Five-digit code which uniquely identifies a county within a state
Data Type:	Text
Variable Label:	FIPS Codes
Allowable Values:	FIPS Codes within a state
Data Source:	System-generated field
Field Name from Data Source:	FIPS Code
Comments:	N/A

---

Variable Name:	ZipCode
