

## 2015 Navigator Grant Recipients

Navigators serve as an in-person resource for Americans who want additional assistance when shopping for and enrolling in plans through the Health Insurance Marketplace.

Below are the recipients of the 2015 Navigator grants in Federally-facilitated Marketplaces and State Partnership Marketplaces, grouped by state. The tables below provide information regarding which counties the grantee will serve and their target populations (as included in their grant application). As a reminder, Navigators are required to assist any consumer seeking assistance, even if that consumer is not a member of the community(ies) or groups the applicant expects to serve as outlined in their funding proposal. If applicable, the tables include information on subgrantee/subrecipient organization(s).

Recipients marked with an asterisk (\*) are operating in more than one state. The anticipated grant amount listed in each case only applies to the amount awarded that organization for that state’s specific operations during the first 12 months of the grant project period. The 2015 Navigator grants are being awarded for a three year (36 month) project period, which runs through September 1, 2018.

As a 2013 and 2014 Navigator grantee, its project focused on enrolling and educating migrant populations in the Rio Grande Valley of Texas. Learning from last year’s successes, this year MHP will continue co-facilitating Enroll RGV, a region-wide consortium established during the first open enrollment period to facilitate communication and coordination of services among organizations providing outreach and

enrollment assistance related to the Affordable Care Act and Health Insurance Marketplace. The target population served by MHP Salud encompasses uninsured, low-income individuals with limited English proficiency; however, MHP Salud also has strategies in place to promote the Marketplace and Navigator services to the broader uninsured population in the Valley, including employers, employees, self-employed individuals, and communities that may have been underserved during the first two open enrollment periods, such as extremely rural populations.
