

Comments Received During Federal Public Comment Period on Colorado 1332 Waiver Amendment  
January 3, 2022 through February 2, 2022

**#1**

**1/27/22**

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

ASE

Delta, CO 81416

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity. As a Coloradan who purchases her health insurance on the exchange without subsidies, affordability is critical for myself and many others in our state. I am a stage 4 cancer survivor - going without health insurance, at whatever the price, is not an option.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. I am a social worker and have dedicated my professional life to working with vulnerable populations. Colorado's 1332 waiver would go a long way in bridging the gap by making health care more accessible. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

JAC

Colorado Springs, CO 80911

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

RL

These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

DB

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

LK

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

**1/27/22**

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,  
RM  
Littleton, CO 80120

**1/27/22**

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

LR

Strasburg, CO 80136

**2/1/22**

Dear Administrator Chiquita Brooks-LaSure,

As a physician practicing in Colorado, I support the Colorado Option and the state's 1332 waiver amendment.

Fully implementing the Colorado Option will give Colorado families a health care plan that reduces costs and expands comprehensive affordable health care to more residents. Physicians have expressed our gratitude to Colorado policymakers and leaders who fought to make the Colorado Option a reality. We would be equally thankful to the Centers for Medicare and Medicaid Services for approving Colorado's request for a 1332 waiver.

As physicians, we see this reality every day in our clinics and exam rooms.

Because of expensive premiums, skimpy insurance and huge out-of-pocket costs, health care is becoming more and more unaffordable for our patients and their families.

Implementing the Colorado Option without delay will make health care more affordable than the status quo of rising premiums and out-of-pocket costs. Physicians see with our own eyes how our patients are forced to ration health care because they can't afford to get stuck with big medical bills. When people put off care, especially for chronic medical conditions, they tend to get sicker.

By making health care more affordable, we can help people get the treatments and therapy they need to live full lives.

As a physician, I cannot wait for the day when Colorado can help more people, including many of my patients, get affordable quality health care.

Sincerely,

SN

Boulder, CO 80303

-----  
**#88**

**2/1/22**

Dear Administrator Chiquita Brooks-LaSure,

The Colorado Option can help expand access to quality and affordable health care to many communities in the state that have been overlooked and underserved for many years. These include rural, less populated communities, where one in six Colorado counties has just one insurance provider. These communities are also the ones most likely to have limited access to health care facilities. Often, critical access hospitals and rural health clinics are the ones in these underserved communities, serving people with a wide range of health care needs while stretching their own resources. All too often, these rural health facilities care for uninsured or under-insured patients who struggle to pay medical bills. Uncompensated care places a disproportionate burden on health facilities' finances, threatening margins and increasing the risk that these facilities must continuously cut costs, reduce staff or even close altogether.

As a physician, I am deeply concerned about the fragility of health care in Colorado's rural and underserved communities because of this reality. The Colorado Option is one antidote. By making health care more affordable, Colorado can help thousands of people in rural communities get the coverage they need. By expanding the pool of newly insured people in underserved communities, uncompensated care will shrink and be less of an albatross around the necks of small critical care hospitals and rural health centers. Strengthening hospitals in small communities financially allows them to sustain a range of services, from diagnostics to lab to outpatient physical therapy and chronic disease management. They are more likely to retain and recruit providers and nurses, a perennial challenge in rural Colorado.

The full and speedy implementation of the Colorado Option increases the likelihood of these health facilities' survival in their communities so they can continue serving local families for generations to come.

Helping more people have health care benefits all communities and empower them to grow and thrive.

Thank you for the opportunity to add my voice in advocating for a 1332 waiver for the Colorado Option.

Sincerely,

LC

Durango, CO 81301

**2/1/22**

Dear Administrator Chiquita Brooks-LaSure,

I am a retired physician in western Colorado who testified in the Colorado legislature for the Colorado Option to pass. We must improve our healthcare system to deliver better care - to more people.

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

CD

**2/2/22**

Dear Administrator Chiquita Brooks-LaSure,

I write to urge the Centers for Medicare and Medicaid Services (CMS) to approve Colorado's request for a 1332 waiver so our state may implement the Colorado Public Option.

In my experience as a physician, cost and affordability are two of the most common barriers preventing access to healthcare. Insurance premiums keep going up every year and prevent countless individuals from getting adequate health coverage. High out-of-pocket costs dissuade people from seeing a doctor for an illness or an injury in a timely manner. All of this to say that expensive health care is forcing too many people to gamble with their health, wellbeing and even lives.

CMS can further advance its work to expand health care to more Americans by approving Colorado's 1332 waiver and giving people in our state affordable health care options.

Many of my patients who would benefit from the Colorado Option. are those who can choose affordable coverage that can reduce out-of-pocket and prescription drug costs. They include self-employed individuals who don't see a doctor or get an MRI when they should because they don't have insurance or their coverage has high deductibles. They include individuals who don't have choices for health care because of their zip code.

The challenges these Coloradans face come as health care costs continue to go up and my patients continue to struggle to afford the care they need.

Access to affordable, quality health care can change lives. I see this in action in my practice all the time. My patients who get the care they need when they need it are more likely to be healthier, more likely to work and stay on the job, better able to care for their families and more likely to be contributors to their communities. Being able to address health care needs when they come up has helped many of my patients live meaningful lives.

By approving the 1332 waiver, CMS can help Colorado implement the Colorado Option as soon as possible and empower more people to live healthier lives, on their own terms.

Sincerely,

AC

Denver, CO 80218

**2/2/22**

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expeditiously so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

KC

Grand Junction, CO 81501

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

LL

Dear Administrator Chiquita Brooks-LaSure,

We need to address long-standing racial and health inequities and ensure we have access to the care we all need, when we need it. This waver can get thousands of uninsured Coloradans covered and will significantly improve health coverage affordability.

Please approve Colorado's waiver.

Thank you,

ES

My name: JD

Organization: Self-employed at [*name of firm*]

I support and encourage the approval of Colorado's section 1332 innovation waiver amendment. This amendment makes it easier for self-employed and gig workers to access and shop for health insurance. Approving this amendment is another step toward supporting American workers and creating more paths to self-sufficiency in today's economy.

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands

Comments Received During Federal Public Comment Period on Colorado 1332 Waiver Amendment  
January 3, 2022 through February 2, 2022

more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,  
MP  
Aguilar, CO 81020

Dear Administrator Chiquita Brooks-LaSure,

The Colorado Option directly tackles some of the most persistent problems Coloradans face in health care: high costs and lack of access. These are among the most common challenges I see among my patients and those of many of my colleagues in medicine.

The Colorado Option reduces premiums 18 percent over three years, a commitment to reverse prevailing trends in insurance premiums of going up, not down. The Colorado Option also provides more choices for people across Colorado, by standardizing benefits plans and making them available to individuals and small businesses in every county in Colorado. Additionally, the Colorado Option protects hospitals that serve people who use Medicare or Medicaid, or are not insured, including hospitals in rural and underserved areas.

Comments Received During Federal Public Comment Period on Colorado 1332 Waiver Amendment  
January 3, 2022 through February 2, 2022

These are all critical steps toward helping more people see a doctor, get a test or address a medical need. They support hospitals in small communities and help them keep their doors open so they can continue serving those communities. When communities of color and LGBTQ Coloradans are more likely to lack health care and when 89 percent of uninsured Coloradans say healthcare costs are unaffordable and a barrier to care and treatment, the Colorado Option can truly improve and save many lives, in all parts of the state.

Uninsured and under-insured Coloradans are more vulnerable to sickness and poorer outcomes, for everything from COVID-19 to chronic conditions such as diabetes and heart illnesses. I have seen for years how unaffordable health care and high out-of-pocket costs have become barriers to basic health care for too many people. Nobody should have to choose between seeing a doctor and putting food on the table. The Colorado Option can help families avoid making those impossible choices.

While insurance premiums and prescription drug costs continue to increase every year, Coloradans struggle to keep up with other basic needs. The Colorado Option is an opportunity to provide much-needed relief to my patients and many working Coloradans, in keeping with the priorities and commitment of the current administration.

Colorado has an opportunity to support our families and open the door to better health and wellbeing for more individuals so no one is denied the life and the future they choose to pursue. CMS has been at the forefront of our nation's efforts to provide affordable, quality health care to more Americans. By approving the 1332 waiver, CMS can continue this important work.

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in

Comments Received During Federal Public Comment Period on Colorado 1332 Waiver Amendment  
January 3, 2022 through February 2, 2022

2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,  
DK  
Arvada, CO 80005

Dear Administrator Chiquita Brooks-LaSure,

Hi, I support full implementation of the Colorado Health Insurance Option. I ask that you also support our state's endeavors to make health care more accessible in our communities by approving Colorado's 1332 waiver amendment.

Last year was the first time in decades that I our family could afford to see a doctor more than once and afford diagnostic tests due to the support provided through Covid legislation. Now that that support is over, we are back to the normal of high premiums with only preventative coverage, and exorbitant costs when we need more diagnostics or durables, or if one of us is injured or becomes seriously ill. The Colorado Exchange is the only reason we have health care at all, but only one actually reputable provider is willing to offer coverage in Colorado. A State option would at least give us a chance to afford to use the coverage that we pay for.

I hope for a time when the US joins the rest of the world's major economies with a fair and reasonable version of universal health care coverage. In the meantime, I'm grateful to live in a state that is moving forward to support our own version of fair and reasonable health care. I hope you will also support this work and grant the waiver.

Thanks you for your time and attention.

Manawa, NN

Sincerely,

NN

Attached for your review are AHIP's comments on Colorado's Section 1332 Waiver Amendment Request.

While AHIP supports state actions that would lower premiums and out-of-pocket costs, the Colorado Option program would not meet this goal. We recommend the Departments do not approve Colorado's Waiver Amendment Request because it does not meet the section 1332 statutory guardrails and is based on flawed economic and actuarial analyses. Our comments include a legal analysis of the statutory guardrails conducted for AHIP by Groom Law Group, which is supported by data from a new actuarial analysis of the Waiver Amendment Request.

AHIP's detailed comments are attached. Thank you for the opportunity to offer comments and please feel free to reach out if there are follow-up questions on our comment letter.

Dear Administrator Brooks-LaSure and Secretary Becerra:

Good Business Colorado (GBC) thanks you for your attention to the attached comments on Colorado's Section 1332 Innovation Waiver Amendment.

GBC is a grassroots organization of 410 business owners in 31 counties advocating for a prosperous economy, equitable communities, and a sustainable environment. Our members believe that business success cannot be measured by profit alone and that true success means that our planet, communities, and bottom lines are all thriving.

We strongly urge CMS to approve the Colorado Section 1332 Innovation Waiver Amendment.

Regards,

ARE

**2/5/2022**

Dear Administrator Chiquita Brooks-LaSure,

I am writing to urge you to approve Colorado's 1332 waiver amendment. This waiver amendment will allow full implementation of the Colorado Option and allow our state to make significant improvements in health coverage affordability and health equity.

The waiver amendment will lead to savings for the federal government based on the premium reductions required through the Colorado Option (growing to an estimated \$147 million in additional savings on top of reinsurance by 2027). Colorado seeks to draw down those savings as passthrough dollars and reinvest them to make health coverage and access more affordable through Colorado's Health Insurance Affordability Enterprise (HIAE). This waiver will allow Colorado to expand existing cost-sharing reductions through Connect for Health Colorado, which is already helping roughly 24,000 Coloradans by making it more affordable to access care with marketplace coverage. And, beginning in 2023, the HIAE will provide financial assistance to Coloradans that currently cannot qualify because they fall in the "family glitch" of the ACA or because of their documentation status. These populations are a significant portion of Colorado's remaining uninsured population because they are ineligible for tax credits under the ACA and have no viable affordable coverage options to protect their health and financial security. We know that particularly those Coloradans living without documentation, who are integral parts of our communities, experience health disparities at high rates, are overwhelmingly people of color, and rarely access health care services because they cannot afford coverage or care.

Colorado has been thoughtful and deliberate in how we have structured the HIAE, the Colorado Option, and this waiver to work together to improve affordable access to coverage and care and make important strides to address health inequities that have persisted for decades. This component of the waiver will significantly advance Colorado's ability to provide assistance to these populations that have been left out of coverage and is a crucial element in our state's overall efforts to improve racial and health equity in Colorado. This will allow Colorado to put coverage within reach of tens of thousands more Coloradans, and help tens of thousands more afford the care they need to take care of their health.

Please approve Colorado's waiver amendment expediently so we can continue our innovation in Colorado to improve health care affordability and equity.

We are counting on you!

Sincerely,

SP
