### **CMS Announces Resumption of Routine Inspections of All Provider and Suppliers, Issues Updated Enforcement Guidance to States, and Posts Toolkit to Assist Nursing Homes**

Guidance outlines recommendations to state agencies on Clinical Laboratory Improvement Amendments of survey activities

On August 17, CMS announced it will resume routine inspections of all Medicare and Medicaid certified providers and suppliers to improve the safety and quality of life of patients and residents. CMS had previously suspended certain routine inspections as part of its response to the coronavirus disease 2019 (COVID-19) pandemic to prioritize infection control and immediate jeopardy situations and to give health care providers and suppliers time needed to respond to the spread of COVID-19.

“At President Trump’s direction, CMS has worked closely with states to complete focused infection control surveys of virtually all nursing homes in the country in just a few months,” said CMS Administrator Seema Verma. “These surveys fortified healthcare facilities around the country to prepare for and implement actions to prevent transmission of the virus and provided indispensable insight into the situation on the ground. As CMS resumes some survey and enforcement activities that were previously put on hold, the health and safety of America’s patients will always be our top priority.”

In the guidance, CMS directed the resumption of onsite revisit surveys, non-immediate jeopardy complaint surveys, and annual recertification surveys as soon as resources are available. In addition, CMS is providing guidance on resolving enforcement cases that were previously on hold because of survey prioritization changes. The agency will also temporarily expand the desk review policy, when state surveyors ensure that facilities return back into compliance with Federal requirements without an onsite survey, to include all noncompliance reviews except for immediate jeopardy citations that have not been removed.

CMS is also issuing updated guidance for the re-prioritization of routine state survey agency activities on Clinical Laboratory Improvement Amendments. This updated guidance will provide flexibility and discretion to state survey agencies so that they can resume their survey activities based on the status of COVID-19 infections in their states.

## Reduce Provider Burden: Electronic Medical Documentation Interoperability Pilot Program

CMS encourages you to participate in an interoperability pilot to test specific medical documentation exchange use cases. The [Electronic Medical Documentation Interoperability \(EMDI\) Initiative](#) is designed to reduce provider burden by assembling a robust network of stakeholders willing to:

- Participate in piloting EMDI use cases
- Contribute to generating and testing a standard implementation guide for orders/referrals
- Participate in the CMS interoperability measurement efforts
- Collaborate with other stakeholders to achieve interoperability

Participants will have an opportunity to test interoperable solutions by piloting one or more of the three use cases:

- Submit an order or referral with attachments
- Request for medical documentation
- Request for signature

For More Information:

- [Register](#) for an EMDI introduction webinar
