CY2022 Rule Finalizes Plan to Implement OASIS E on January 1, 2023

As finalized in the CY 2022 Home Health Rule, CMS will implement OASIS E on January 1, 2023, to initiate the capture of data for the Transfer of Health Information to Provider Post-Acute Care measure, the Transfer of Health Information to Patient-PAC measure, and certain Standardized Patient Assessment Data Elements. Implementation was previously delayed to provide maximum flexibilities for providers of Home Health Agencies to respond to the COVID-19 Public Health Emergency.

NOW AVAILABLE: Draft OASIS-E Instrument

The draft OASIS-E All Items Instrument is now available in the **Downloads** section of the [OASIS Data Sets](#) webpage. OASIS-E will be effective on January 01, 2021. Please note the instrument is not yet final. Office of Management and Budget (OMB) approval is required and expected later this year.

April 05, 2019

Revised versions of the OASIS-D All Items instrument and the Follow-up (FU) time point instrument are available. **These versions are effective January 1, 2020.** The original OASIS-D versions for all other time points remain in effect as of January 1, 2020. The revised All Items and Follow-Up instruments with the remaining OASIS-D time point versions are available together in a zip file in the Download section, below. A memorandum containing details about the changes to OASIS effective January 1, 2020, is available on the [OASIS User Manuals](#).

December 20, 2018

Effective January 1, 2019, OASIS-D is the current version of the OASIS data set. The OASIS-D instrument was approved by the Office of Management and Budget (OMB) on December 6, 2018. The final OASIS-D instrument is available in the **Downloads** section, below. The final OASIS-D Guidance Manual is available on the [OASIS User Manuals](#) webpage.

OASIS-D:

- The OASIS-D is effective January 1, 2019.
- This version includes multiple new standardized items (GG0130, GG0170a-b, d-s, J1800, J1900) to support measurement domains mandated by the Improving Medicare Post-Acute Care Transformation (IMPACT) Act. New items were also added for standardization to align with the Inpatient Rehabilitation Facility-Patient Assessment Instrument (IRF-PAI), the Long-term Care Hospital assessment set, and the Minimum Data Set (MDS): GG0100 Prior Function and G0110 Prior Device Use
- OASIS item M1311 was modified to support a new standardized pressure ulcer measure to replace the current standardized pressure ulcer measure.
- Several items were removed, including select data elements at different time points, to reduce provider and patient burden.
- The complete set of OASIS-D data items can be found in the **Downloads** section below.
