CMS updated the current HIS Manual to incorporate a change in terminology, referencing the Consensus-based Entity, or CBE. The Downloads below now include a new manual, **HIS Manual V3.01**, and the **HIS Manual Change Table V3.00 to V3.01**. These minor changes to the text in the manual had no impact on the current data sets. HIS Admission V3.00 and HIS Discharge V3.00 are still the current versions.
