SNF QRP Claims-Based Measure Manual and Accompanying Files – Now Available

The Skilled Nursing Facility (SNF) Quality Reporting Program (QRP) Claims-Based Measure Manual is now available. The manual serves as a resource used to calculate claims-based measures that are included in the SNF QRP. The Discharge to Community (DTC)–Post Acute Care (PAC) SNF QRP (DTC) measure, Potentially Preventable 30-Day Post-Discharge Readmission Measure for SNF QRP (PPR), and SNF Within-Stay Potentially Preventable Readmission (SNF WS PPR) measure Supplemental Codes file provides both a list of codes used to identify readmission and diagnoses and a list of covariates used in risk adjustment across the DTC, PPR, and SNF WS PPR measures. The Medicare Spending Per Beneficiary (MSPB)-PAC SNF QRP (MSPB SNF) measure Covariates file provides a list of covariates used in risk-adjustment for the MSPB SNF measure. Additionally, the MSPB SNF Clinically Unrelated Services Exclusion file and MSPB SNF First Day Service Exclusions files provide a list of services that are excluded from MSPB SNF measure calculation. Finally, the SNF Healthcare-Associated Infections (HAI) Requiring Hospitalization (SNF HAI) measure Supplemental Codes file provides both International Classification of Diseases (ICD)-10 codes used in the measure numerator and covariates used in risk adjustment for the SNF HAI measure.

These files can be accessed in the **Downloads** section of this webpage.
