Inpatient Rehabilitation Facility (IRF) Listening Session: Revising the Transmission Schedule for IRF-PAI Assessment Data

RTI International, on behalf of the Centers for Medicare & Medicaid Services (CMS), is hosting a public, virtual listening session on the possible revision of the transmission schedule for the IRF Patient Assessment Instrument (IRF-PAI) assessment data used in the IRF Quality Reporting Program (QRP). IRFs are required to report these data with respect to admission and discharge of all patients, regardless of payer, discharged on and after October 1, 2024. The IRF setting is unique from other post-acute care (PAC) settings, such as Long-Term Care Hospitals (LTCHs) and Skilled Nursing Facilities (SNFs), because of its single patient assessment data transmission requirements. On behalf of CMS, we are seeking feedback from clinical staff, administration and management staff, and software vendors.

Prior to the listening session, you are encouraged to prepare to speak to the following topics during the call:

- Data collection, submission, and systems considerations related to separating the submission of the IRF-PAI into multiple time points, e.g., admission, discharge, or patient expiration.
- The feasibility of creating an interim assessment, like the Minimum Data Set (MDS) 3.0 Interim Payment Assessment (IPA) that would only include items necessary to calculate a case mix group (CMG).
- Other feedback about technical aspects of IRF-PAI data collection and the submission of quality data.

Date/Time: Tuesday, October 22, 2024, at 2pm ET
