SNF Provider Preview Reports – Now Available

The SNF Provider Preview Reports have been updated and are now available. These reports contain provider performance scores for quality measures, which will be published on the compare tool on [Medicare.gov](https://www.medicare.gov) and [Provider Data Catalog \(PDC\)](#) during the **January 2025 refresh**.

Data contained within the Provider Preview Reports are based on quality assessment data submitted by SNFs from **Quarter 2, 2023 through Quarter 1, 2024**. The Centers for Disease Control and Prevention (CDC) measures reflect Influenza Vaccination Coverage Among Healthcare Personnel measure data from **Quarter 4, 2023 through Quarter 1, 2024**, and COVID-19 Vaccination Coverage among Healthcare Personnel (HCP) measure data from **Quarter 1, 2024**. The claims-based measures data was updated for the October 2024 refresh. This data from **Quarter 4, 2021 through Quarter 3, 2023** will continue to display, as well as the SNF Healthcare-Associated Infections (HAI) measure data from **Quarter 4, 2022 through Quarter 3, 2023**.

Providers have until **November 14, 2024** to review their performance data. Only updates/corrections to the underlying assessment data before the final data submission deadline will be reflected in the publicly reported data on Medicare.gov. If a provider updates assessment data after the final data submission deadline, the updated data will only be reflected in the Facility-Level Quality Measure (QM) report and Patient-Level QM report. Updates submitted after the final data submission deadline will not be reflected in the Provider Preview Reports or on the compare tool on Medicare.gov. However, providers can request a CMS review of their data during the preview period if they believe the displayed quality measure scores within their Provider Preview Reports are inaccurate.
