

Fact Sheet: Medicare Part B Inflation Rebates for Calendar Year 2025

The Centers for Medicare and Medicaid Services (CMS) assesses inflation rebates to drug manufacturers that raise the prices of certain Medicare Part B drugs faster than the rate of inflation. This fact sheet summarizes the invoices that CMS delivered to drug manufacturers for each applicable quarter in calendar year 2025. In general, the rebate amount is equal to the number of units of the Part B rebatable drug furnished during the applicable quarter multiplied by the difference between the specified amount¹ and the inflation-adjusted payment amount. For further information on how Part B rebatable drugs are identified and the Part B rebate amount is calculated, refer to 42 CFR § 427.101 and 42 CFR §§ 427.300-427.402, respectively.

The following table contains the billing and payment codes for which manufacturer(s) owed a Part B rebate and the total Part B rebate amounts owed for all four applicable quarters in calendar year 2025, as of June 2026 (note: in accordance with 42 CFR § 427.501, these amounts will be reconciled in the future). Total Part B rebates owed to Medicare for all four applicable quarters in 2025 amount to more than **\$360 million**. Inflation rebate funds are deposited in the Federal Supplementary Medical Insurance Trust Fund as required by law.

¹ The applicable calendar quarter specified amount is calculated as described in [42 CFR § 427.302\(b\)](#).

Rebate Amounts Owed for Calendar Year 2025, as of June 2026

Billing and Payment Code	Code Description	Part B Rebate Owed
J0897	DENOSUMAB INJECTION	\$189,099,274.92
J3111	INJ. ROMOSUZUMAB-AQQG 1 MG	\$27,174,670.70
