

Fact Sheet: Medicare Part D Inflation Rebates for October 1, 2023 - September 30, 2024

The Centers for Medicare and Medicaid Services (CMS) assesses inflation rebates to drug manufacturers that raise the prices of certain Medicare Part D drugs faster than the rate of inflation. This fact sheet summarizes the invoices that CMS delivered to drug manufacturers for the 12-month applicable period beginning with October 1, 2023. In general, the rebate amount is equal to the number of units of the Part D rebatable drug dispensed during the applicable period multiplied by the amount by which the drug's annual manufacturer price exceeds the inflation-adjusted payment amount. For further information on how Part D rebatable drugs are identified and how the Part D rebate amount is calculated, refer to 42 CFR § 428.101 and 42 CFR §§ 428.200-428.303 respectively. For further information on how CMS conducts reconciliation for Part D inflation rebates, refer to 42 CFR § 428.401 and 42 CFR § 428.402.

The following table contains the NDC-9s and product names for which manufacturers owed a Part D rebate and the total Part D rebate amounts owed for the applicable period beginning October 1, 2023. As of September 2026, CMS has updated the amounts shown for the applicable period in this fact sheet to reflect the results of CMS's first reconciliation of the rebate amount for the applicable period beginning with October 1, 2023. Total Part D rebates owed to Medicare for the applicable period amount to more than **\$850 million**. Inflation rebate funds are deposited in the Federal Supplementary Medical Insurance Trust Fund as required by law.

Rebate Amounts Owed for Applicable Period 2, October 1, 2023 – September 30, 2024, as of September 2026

55513-0137	Otezla	\$73,656,124.53
