

Fact Sheet: Medicare Part D Inflation Rebates for October 1, 2024 - September 30, 2025

The Centers for Medicare and Medicaid Services (CMS) assesses inflation rebates to drug manufacturers that raised the prices of certain Medicare Part D drugs faster than the rate of inflation. This fact sheet summarizes the invoices that CMS delivered to drug manufacturers for the 12-month applicable period beginning October 1, 2024. In general, the rebate amount is equal to the number of units of the Part D rebatable drug dispensed during the applicable period multiplied by the amount by which the drug's annual manufacturer price exceeds the inflation-adjusted payment amount. For further information on how Part D rebatable drugs are identified and the Part D rebate amount is calculated, refer to 42 CFR § 428.101 and 42 CFR §§ 428.200-428.303 respectively.

The following table contains the NDC-9s and product names for which manufacturers owed a Part D rebate and the total Part D rebate amounts owed for the applicable period beginning October 1, 2024, as of June 2026 (note: in accordance with 42 CFR § 428.401, these amounts will be reconciled in the future). Total Part D rebates owed to Medicare for the applicable period amount to more than **\$1.9 billion**. Inflation rebate funds are deposited in the Federal Supplementary Medical Insurance Trust Fund as required by law.

Rebate Amounts Owed for Applicable Period 3, October 1, 2024 – September 30, 2025, as of June 2026
