Date: September 30, 2020
From: Samara Lorenz, Director, Oversight Group, Center for Consumer Information & Insurance Oversight
Title: Draft Insurance Standards Bulletin Series – INFORMATION
Subject: Treatment of Risk Corridors Recovery Payments in the Medical Loss Ratio and Rebate Calculations

I. Purpose

Section 2718 of the Public Health Service Act (PHS Act), as added by the Patient Protection and Affordable Care Act (PPACA), and the implementing regulations at 45 C.F.R. Part 158 require health insurance issuers (issuers) offering group or individual health insurance coverage to submit a report to the Secretary of the Department of Health and Human Services (HHS) concerning their medical loss ratio (MLR) and requires them to issue an annual rebate to enrollees if the issuer’s MLR is less than the applicable MLR standard established in section 2718(b)(1)(A)(i) and (ii).

Section 1342 of the PPACA and the implementing regulations at 45 C.F.R. Part 153 established a temporary risk corridors (RC) program covering issuers of qualified health plans (QHPs) in the individual and small group markets for the 2014, 2015, and 2016 benefit years. Under the RC program, HHS collected charges from issuers whose allowable costs\(^1\) fell below 97 percent of the target amount\(^2\) and made payments to issuers whose allowable costs exceeded 103 percent of the target amount. HHS outlined in regulation and guidance that it would operate the program in a budget neutral manner.\(^3\) In the event that charge collections were insufficient to make full payments, HHS explained that payments for the 2014 benefit year would be reduced pro rata to the extent of any shortfall, and the charge amounts collected in subsequent years would be used to address any payment shortfalls from prior years.\(^4\)

---

1 Allowable costs include claims and quality improvement activity (QIA) expenses.
2 The target amount is 80% of after-tax premium.
Congress included language in appropriations laws beginning in December 2014 \(^5\) that barred the use of other appropriated program funds from being used for RC payments to issuers. Because the RC payments owed to issuers significantly exceeded the RC charges collected and there was no appropriation to make RC payments in excess of RC charges collected, issuers received less than the full calculated RC payments for the 2014 benefit year and no payments for the 2015 or 2016 benefit years. Issuers filed multiple lawsuits seeking to collect the unpaid RC payments, and on April 27, 2020, the Supreme Court ruled that section 1342 created an enforceable government obligation to pay RC amounts as calculated under the RC formula. \(^6\) Since that time, the United States has made (and is continuing to make) payments from the Judgment Fund to issuers for their previously unpaid RC amounts.

Under section 2718 of the PHS Act, an issuer’s MLR and rebate calculations must account for, among other things, the net payments or receipts related to the RC program. The purpose of this draft guidance is to describe how issuers must treat the RC payment amounts recovered as a result of the Supreme Court decision in their MLR and rebate calculations. The contents of this document do not have the force and effect of law and are not meant to bind the public in any way, unless specifically incorporated into a contract. This document is intended only to provide clarity regarding existing requirements under the law.

CMS welcomes comments on this proposed guidance. Please send comments on this Bulletin to MLRQuestions@cms.hhs.gov by October 21, 2020.

II. Background

Section 2718(b) of the PHS Act, and the implementing regulations at 45 C.F.R. Part 158, require an issuer to provide an annual rebate to enrollees, \(^7\) on a pro rata basis, if the ratio of the amount of premium revenue expended by the issuer on reimbursement for clinical services provided to enrollees under the health insurance coverage and for activities that improve health care quality to the total amount of premium revenue (excluding Federal and state taxes and licensing or regulatory fees) is less than 80 percent in the individual and small group markets and 85 percent in the large group market. \(^8\) The MLR requirements generally apply to all health insurance issuers offering large group, small group, or individual health insurance coverage.

In order to determine whether its MLR met the applicable standard, an issuer is required to submit to the Centers for Medicare & Medicaid Services (CMS), by July 31st of the year following the end of an MLR reporting year, an Annual MLR Reporting Form concerning premium revenue and expenses related to the group and individual health insurance coverage.

---

\(^7\) For the sole purpose of determining who is entitled to receive an MLR rebate, the term “enrollee” means the subscriber, policyholder, and/or government entity that paid the premium for health care coverage received by an individual during the respective MLR reporting year. See 45 C.F.R. § 158.240(b).

\(^8\) States have the option to set higher MLR thresholds. See section 2718(b)(1)(A) of the PHS Act and 45 C.F.R. § 158.211.
that it issued in the prior benefit year. Under 45 C.F.R. § 158.140(b)(4)(ii), RC payments received by an issuer are subtracted from the MLR numerator, reducing the MLR, and potentially increasing rebates; while RC charges paid by an issuer are added to the MLR numerator, increasing the MLR, and potentially reducing rebates.

When issuers submitted the 2014 MLR reporting form by July 31, 2015, the actual amount of RC payments that issuers would receive for the 2014 benefit year was not known. CMS instructed issuers to report the full value of the calculated RC amount in the 2014 MLR reporting form regardless of whether the issuer would receive the full payment. As a result, the MLR and rebate calculations for the 2014 reporting year accurately captured the impact of the full calculated RC payment amounts for the 2014 benefit year. However, with no additional appropriation to make RC payments in excess of RC charges collected, it subsequently became uncertain whether issuers would receive the full calculated RC payments for the 2014, 2015, or 2016 benefit years. In recognition of this uncertainty, CMS instructed issuers, starting with the 2015 MLR reporting form, to report only the RC payments actually received from HHS; that is, to report the reduced RC payment amount actually received from HHS for 2014 and $0 for 2015 and 2016. Because the MLR and rebate calculations are based on three years of data, reporting less than the full calculated RC payment amounts impacted the MLR and rebate calculations for the 2015 through 2018 reporting years.

As a result of the Supreme Court ruling, issuers may recover the remaining calculated RC payment amounts for the 2014, 2015, and 2016 benefit years (recovered RC payment amounts). For issuers who reported less than the full calculated RC payment amount and receive additional RC payments as a result of the litigation, the MLR reports filed for the 2015 through 2018 reporting years will no longer accurately reflect the RC amounts received. Consistent with 45 C.F.R. §153.710(g)(3), CMS drafted this guidance to propose instructions to guide issuers in how to revise the affected MLR reports for the 2015 through 2018 reporting years to include the recovered RC payment amounts. Further, if the issuer’s updated MLR calculations for the individual and small group markets using the recovered RC payment amounts do not meet or exceed the applicable MLR standard, the rebate owed by the issuer for the affected reporting years may be higher than the rebate previously calculated for the respective reporting year. This guidance therefore also details the proposed requirements to

9 45 C.F.R. § 158.110(b).
12 The MLR reporting form for a given year collects information for each of the two prior reporting years. For example, the 2014 data is reported on the 2014, 2015, and 2016 reporting forms. In 2014, the issuers reported the full calculated RC payment amount. In the 2015 and 2016 reporting forms, issuers revised the 2014 amount to reflect the amount of the payment received.
13 The inclusion of the additional RC payment amounts will increase the MLR numerator. However, it is possible that the recalculated MLR, which is rounded to the third decimal place, will be unchanged. In this case, the issuer’s rebate liability will be unchanged.

Some issuers, at their discretion, reported the full calculated RC payment amount or an amount in excess of the payments actually received from HHS but less than the full RC payment amount calculated.
pay additional rebates owed as a result of recalculating an issuer’s MLR to include the recovered RC payment amounts.

III. Proposed Guidance

We propose the following instructions to guide the reporting of the recovered RC payment amounts and the issuance of additional rebates.

Issuers must submit a revised MLR reporting form(s) for the 2015 through 2018 reporting years for each state, market, and year in which the issuer has a greater rebate liability based on inclusion of the recovered RC payment amounts. Issuers must pay the outstanding rebate amounts to the enrollees who were enrolled in the respective MLR reporting year.\(^{14}\) Issuers that do not have a higher rebate obligation based on the inclusion of the recovered RC payment amounts for any of the applicable reporting years do not need to submit a revised MLR reporting form.

Issuers must revise their MLR and rebate calculations and pay the additional rebate amounts based on the full calculated RC payment amount, even if the issuer sold their rights to receive all or a portion of its recovered RC payment amounts to a third party.

If an issuer has been acquired by a new company and the ceding issuer’s rebate obligation based on the inclusion of recovered RC payment amounts is higher than the rebate amount paid in the respective reporting year, the assuming company is responsible for submitting the revised prior year MLR reporting forms(s) and paying the additional rebate amount to the ceding entity’s enrollees in the respective MLR reporting year(s).

**Timing of Submission of the Revised Prior Year MLR Annual Reporting Form(s)**

Issuers with a higher rebate obligation based on the inclusion of the recovered RC payment amounts for one or more of the applicable prior reporting years must submit the revised reporting forms to CMS by December 31, 2020, or within 60 days of receiving additional RC payments, whichever is later. Affected issuers should contact CMS at MLRQuestions@cms.hhs.gov for instructions on how to submit the applicable prior year reporting forms in the CMS Health Insurance Oversight System (HIOS).

**Timing of the Disbursement of Additional Rebates**

Issuers must disburse additional rebate payments to enrollees in the respective year within 60 days of submitting their revised MLR reporting forms to CMS. If an issuer fails to pay the additional rebates by the required deadline, rebate payments must then include late payment interest amounts at the Federal Reserve Board lending rate or ten percent annually, whichever is higher, on the total amount of the additional rebate, accruing from the date on which the additional rebate was due as outlined in this guidance.\(^{15}\)

---

\(^{14}\) 45 C.F.R. § 158.240(b).

\(^{15}\) 45 C.F.R. § 158.240(f).
Rebate Disbursement

The pro-rata rebate amount, the form of the rebate, and the rebate recipient must be determined in accordance with 45 C.F.R. §§ 158.240, 158.241, and 158.242, and based on the year in which health insurance coverage was received and not based on the year in which the issuer receives the recovered RC payment amounts or when the additional rebate is paid. Consistent with 45 C.F.R. § 158.250, additional rebate disbursements must include a notice explaining to enrollees why they are receiving a rebate or an additional rebate. Attached to this bulletin are proposed model rebate notices.

For the purposes of determining whether a rebate amount is considered de minimis pursuant to the applicable threshold established in 45 C.F.R. § 158.243(a), the issuer must use the full rebate amount in the respective reporting year and not just the additional rebate amount.

Consistent with 45 C.F.R. § 158.244, issuers must make a good faith effort to locate and deliver to an enrollee the additional rebate amount. To the extent that issuers’ contact information for the recipients of the additional rebates may be outdated by several years, to demonstrate a good faith effort, issuers should pursue alternative means if necessary in addition to steps they ordinarily take to locate rebate recipients. If, after making a good faith effort, an issuer is unable to locate a former enrollee, the issuer must comply with any applicable State law regarding the disposition of unclaimed rebates.

IV. Where to Get More Information

If you have any questions regarding this Bulletin, please contact CMS by email at MLRQuestions@cms.hhs.gov.
Attachment 1
This proposed model notice is for use with any (additional) rebates paid in the individual market for the 2015, 2016, 2017, and/or 2018 MLR reporting years as a result of Risk Corridor payments that are received by the Issuer from the Federal Government pursuant to the April 27, 2020 Supreme Court decision in Maine Community Health Options v. United States, 140 S. Ct. 1308 (2020), 590 U.S. __ (2020).

Notice of Health Insurance Premium Rebate

[Month Day, Year]

[Subscriber or Policyholder Name]
123 Main Street
Anytown, USA

Re: Health Insurance Premium Rebate for Year [X]; [Policy #XXXXX]

Dear [Subscriber or Policyholder Name]:

This letter is to inform you that you will receive a rebate of a portion of your health insurance premiums for the year(s) stated above. This rebate is required by the Affordable Care Act. As a result of the United States Supreme Court decision on April 27, 2020 in Maine Community Health Options v. United States, [Health Insurer] recently received additional payment from the Federal Government that impacted our Medical Loss Ratio for that year(s), and we are providing you with a premium rebate that is due as a result.

The Affordable Care Act requires [Health Insurer] to issue a rebate to you if [Health Insurer] does not spend at least 80 percent of the premiums it receives on health care services, such as doctors and hospital bills, and activities to improve health care quality, such as efforts to improve patient safety. No more than 20 percent of premiums may be spent on administrative costs such as salaries, sales, and advertising. This requirement is referred to as the “Medical Loss Ratio” standard or the “80/20 rule.” The 80/20 rule in the Affordable Care Act is intended to ensure that consumers get value for their health care dollars. You can learn more about the 80/20 rule and other provisions of the health reform law at: https://www.healthcare.gov/health-care-law-protections/rate-review/.

[The Affordable Care Act allows States to require health insurers to meet a higher ratio. [Your State] sets a higher Medical Loss Ratio standard, so [Health Insurer] must meet a [XX%] Medical Loss Ratio, meaning that [XX%] of premiums must be spent on medical services and activities to improve health care quality, and no more than [XX%] of premiums can be spent on administrative costs.]

What the Medical Loss Ratio Rule Means to You

The Medical Loss Ratio rule is calculated on a State-by-State basis. In [your State], [Health Insurer] did not meet the Medical Loss Ratio standard for [X] as a result of recalculating the Medical Loss Ratio to account for payments we recently received from the Federal
Government. After recalculation, [Health Insurer 17] spent only [XX% 18] of a total of [$YYY 19] in premium dollars on health care and activities to improve health care quality in [X 20]. Since it missed the [80 percent target / target in your State 21] by [XX% 22] of premium received, [Health Insurer 23] must rebate [XX% / $XX 24] of your health insurance premiums for [X 25]. [[Health Insurer 26] previously rebated [XX% / $XX 27] of your health insurance premiums for [X 28] and is now providing the additional rebate resulting from the recalculation.] We are required to provide [this / this additional] rebate to you by March 1, 2021 or within 120 days of receiving payment from the Federal Government, whichever comes later.

[We are enclosing a check / We are sending you a check separately from this letter / We are giving you this rebate by reducing your next premium payment / We are issuing a credit to the credit or debit card you used to pay your premium 29]. [OPTIONAL FOR ISSUERS: Your rebate / credit provided right now is $XX 30].

Need more information?

If you have any questions about the Medical Loss Ratio and your health insurance coverage, please contact [Health Insurer 31] toll-free at [1-XXX-XXX-XXXX 32] or [website or email address 33].

Sincerely,

[Jane Doe, Authorized Executive 34] [Health Insurer 35]
Attachment 2
This proposed model notice is for use with any (additional) rebates paid in the small group market to the group policyholder for the 2015, 2016, 2017, and/or 2018 MLR reporting years as a result of Risk Corridor payments that are received by the Issuer from the Federal Government pursuant to the April 27, 2020 Supreme Court decision in Maine Community Health Options v. United States, 140 S. Ct. 1308 (2020), 590 U.S. ___ (2020).

Notice of Health Insurance Premium Rebate

[Month Day, Year 1]

[Subscriber or Policyholder Name 2a
123 Main Street 2b
Anytown, USA 2c]

Re: Health Insurance Premium Rebate for Year [X 3]; [Policy #XXXXX 4]

Dear [Subscriber or Policyholder Name 5]:

This letter is to inform you that [Health Insurer 6] will be rebating a portion of your health insurance premiums for the year(s) stated above through your employer or group policyholder. This rebate is required by the Affordable Care Act. As a result of the United States Supreme Court decision on April 27, 2020 in Maine Community Health Options v. United States, [Health Insurer 7] recently received additional payment from the Federal Government that impacted our Medical Loss Ratio for that year(s), and we are providing your employer or group policyholder with a premium rebate that is due as a result.

The Affordable Care Act requires [Health Insurer 8] to rebate part of the premiums if it does not spend at least 80 percent of the premiums it receives on health care services, such as doctors and hospital bills, and activities to improve health care quality, such as efforts to improve patient safety. No more than 20 percent of premiums may be spent on administrative costs such as salaries, sales, and advertising. This requirement is referred to as the “Medical Loss Ratio” standard or the “80/20 rule.” The 80/20 rule in the Affordable Care Act is intended to ensure that consumers get value for their health care dollars. You can learn more about the 80/20 rule and other provisions of the health reform law at: https://www.healthcare.gov/health-care-law-protections/rate-review/.

[The Affordable Care Act allows States to require health insurers to meet a higher ratio. [Your State 9] sets a higher Medical Loss Ratio standard, so [Health Insurer 10] must meet a [XX% 11] Medical Loss Ratio, meaning that [XX% 12] of premiums must be spent on medical services and activities to improve health care quality, and no more than [XX% 13] of premiums can be spent on administrative costs.]

What the Medical Loss Ratio Rule Means to You

The Medical Loss Ratio rule is calculated on a State-by-State basis. In [your State 14], [Health Insurer 15] did not meet the Medical Loss Ratio standard for [X 16] as a result of recalculating
the Medical Loss Ratio to account for payments we recently received from the Federal Government. After recalculation, [Health Insurer 17] spent only [XX% 18] of a total of [$YYY 19] in premium dollars on health care and activities to improve health care quality in [X 20]. Since it missed the [80 percent target / target in your State 21] by [XX% 22] of premium received, [Health Insurer 23] must rebate [XX% / $XX 24] of total health insurance premiums paid by the employer and employees in your group health plan for [X 25]. [[Health Insurer 26] previously rebated [XX% / SXX 27] of the total health insurance premiums for [X 28] and is now providing the additional rebate resulting from the recalculation.] We are required to provide [this/this additional] rebate to your employer or group policyholder by March 1, 2021 or within 120 days of receiving payment from the Federal Government, whichever comes later. Employers and other group policyholders must follow certain rules for distributing the rebate to employees and subscribers.

Ways in Which an Employer Can Distribute the Rebate

If your group health plan is a non-Federal governmental plan, the employer or group policyholder must distribute the rebate in one of two ways:

- Reducing premium for the upcoming year; or
- Providing a cash rebate to employees or subscribers that were covered by the health insurance on which the rebate is based.

If your group health plan is a church plan, the employer or group policyholder has agreed to distribute the portion of the rebate that is based on the total amount all of the employees contributed to the health insurance premium in one of the ways discussed in the prior paragraph.

If your group health plan is subject to the Federal Employee Retirement Income Security Act of 1974 (ERISA), the employer or the administrator of the group health plan may have fiduciary responsibilities regarding use of the Medical Loss Ratio rebates. Some or all of the rebate may be an asset of the plan, which must be used for the benefit of the employees covered by the policy. Employees or subscribers should contact the employer or group policyholder directly for information on how the rebate will be used. For general information about your responsibilities regarding the rebate, you may contact the Department of Labor’s Employee Benefits Security Administration at 1-866-444-EBSA (3272) or review the Department’s technical guidance on this issue on its web site at https://www.dol.gov/agencies/ebsa/employers-and-advisers/guidance/technical-releases/11-04.

Need more information?

If you have any questions about the Medical Loss Ratio and your health insurance coverage, please contact [Health Insurer 31] toll-free at [1-XXX-XXX-XXXX 32] or [website or email address 33].

Sincerely,

[Jane Doe, Authorized Executive 34] [Health Insurer 35]
Attachment 3
This proposed model notice is for use with any (additional) rebates paid in the small group market directly to subscribers for the 2015, 2016, 2017, and/or 2018 MLR reporting years as a result of Risk Corridor payments that are received by the Issuer from the Federal Government pursuant to the April 27, 2020 Supreme Court decision in Maine Community Health Options v. United States, 140 S. Ct. 1308 (2020), 590 U.S. __ (2020).

Attachment 4
Instructions for Completing the Proposed Model Notices of MLR Rebates for the 2015-2018 MLR Reporting Years resulting from the receipt of Risk Corridor Payments – Individual and Small Group Market Policyholders and Small Group Market Subscribers

These instructions describe the information to be entered in each numbered field. Within each notice, many of the labeled fields require the same information. The information entered on each notice should be for the relevant state and market (individual, small group) for the policyholder or subscriber receiving the notice. A single notice may be used if the issuer is providing a combined rebate amount for multiple years; in this case, the issuer should expand the relevant sentences to separately provide the information with respect to each affected year.

- **1** Enter the date the notice is sent.
- **2** Enter the subscriber’s name and mailing address.
  - **2a** - Enter the subscriber’s first and last name.
  - **2b** - Enter the subscriber’s street address.
  - **2c** - Enter the subscriber’s city, State and zip code.
- **3, 16, 20, 25, 28** Enter the year(s) to which the Notice applies.
- **4** Enter the policy number of the subscriber’s/policyholder’s policy
- **5** Enter the policyholder’s or subscriber’s full name.
- **6, 7, 8, 10, 15, 17, 23, 26, 31, 35** Enter the name of the issuer responsible for providing the estimated rebate.
- **9-13** The entire paragraph that contains Fields 9-13 should only be used if the subscriber resides in a State that requires a loss ratio higher than 80 percent in the applicable market.
- **9, 14, 21** Enter either the name of the State in which the MLR experience applies or the words “your State.”
- **11, 12** Enter the MLR standard required by the subscriber’s State for the applicable market.
- **13** Enter the percentage difference between 100 percent and the MLR standard entered in Fields 11 and 12.
- **18** Enter the issuer’s actual credibility-adjusted MLR, as reported on the MLR Form.
- **19** Enter the total amount of premium dollars the issuer received, adjusted for taxes and regulatory fees, for the MLR reporting year at issue.
- **21** Enter “80 percent target” if issuers in the applicable market in the policyholders’/subscriber’s State must meet an 80 percent MLR. Enter the MLR standard required by the State if the policyholder’s/subscriber’s State requires an MLR standard that is higher than 80 percent.
- **22** Enter the percentage difference between the MLR the issuer is required to meet and its actual MLR.
- **24** Enter the percentage of the health insurance premiums that the issuer is rebating, or enter the dollar amount of the rebate being provided to each policyholder/subscriber.
- **27** Enter the percentage of the health insurance premiums or the dollar amount that the issuer previously rebated.
- **29** Select the wording in this bracket that represents the method of the rebate.
• **30** OPTIONAL FOR ISSUERS: Issuers may, at their option, choose to insert the amount of the rebate being provided to each policyholder/subscriber.

• **32, 33** Enter both the toll-free telephone number that policyholders/subscribers may call and also a website or email address that policyholders/subscribers may visit or email if they have questions regarding the MLR and their rebate.

• **34** Enter the name of one of the executives of the issuer authorized to attest to the information in the MLR Annual Reporting Form. The notice must be signed by one of these authorized executives. No exceptions are permitted.
