

## Achieving Health Equity

The Achieving Health Equity web-based training (WBT) course is being revised and will be reposted as soon as it's available. While it's being revised, use these [CMS Office of Minority Health \(OMH\)](#) resources.

Health disparities—differences in health outcomes closely linked with social, economic, and environmental disadvantage—are often driven by the social conditions in which individuals live, learn, work, and play. The [CMS Disparities Impact Statement](#) tool can be used by all health care stakeholders to achieve health equity for racial and ethnic minorities, people with disabilities, sexual and gender minorities, individuals with limited English proficiency, and rural populations.
