SOURCE: Centers for Medicare & Medicaid Services, Office of the Actuary, National Health Statistics Group.

¹ Expenditures by State of residence divided by expenditures by State of provider. Ratios greater than 100% mean that residents consume more health care than the state produces; ratios less than 100% mean that the state produces more health care than it's residents consume. For Drugs and Other Medical Nondurables and Other Personal Health Care, no adjustments were made between state-of-provider and state-of-residence (net flow ratios are 100% for all states).

² Includes services provided by freestanding facilities only. Additional hospital-based service expenditures of this type are included with hospital services.

Medicare Personal Health Care Expenditures by Type of Service, Region, and State of Residence: Calendar Year 2004

SOURCE: Centers for Medicare & Medicaid Services, Office of the Actuary, National Health Statistics Group.

¹ Expenditures by State of residence divided by expenditures by State of provider. Ratios greater than 100% mean that residents consume more health care than the state produces; ratios less than 100% mean that the state produces more health care than its residents consume. For Dental Services, Drugs and Other Medical Nondurables and Other Personal Health Care, no adjustments were made between state-of-provider and state-of-residence (net flow ratios are 100% for all states).

² Includes services provided by freestanding facilities only. Additional hospital-based service expenditures of this type are included with hospital services.
