Award Fee – Provider Enrollment (PE) Accuracy

What is Measured?

This metric evaluates the accuracy of processing initial and change of information applications, revalidations, and PECOS data entry. It is assessed using QASP standards with elevated thresholds.

Performance Data

Fiscal Year	Avg Standard Performance	Avg % Earned	Low %	Median %	High %
2022	98%	69%	0%	75%	100%
2023	99%	69%	0%	75%	100%
2024	98%	38%	0%	25%	100%

Trends and Observations

The average standard performance for provider enrollment has remained steady. There was a decrease in the award fee earned due to CMS' commitment to raising the bar for award fee earned. At least one MAC earned 100% each year, demonstrating that high performance remains achievable.
