Beacon of Hope

A supportive and effective healthcare system can assist those on their journey to recovery. Navigating the challenges of substance use can be difficult for individuals. The visual was derived from various interviews with key interested parties to understand barriers to accessing prevention, treatment, and recovery services for individuals with Substance Use Disorders (SUD).

- Establish a trustworthy and accessible healthcare
- Discuss and provide person-centered treatment, care, and services
- Support and empower family & caregivers
- Promote Behavioral Health services
- Make counseling and peer support available
- Eliminate stigmatizing language
- Provide equitable care for all
- Policy barriers (coverage, payment, regulations, data)
