Project Title: Measuring Outcomes in Orthopedics Routinely (MOOR)

Project Overview:

The Centers for Medicare & Medicaid Services (CMS) has provided funding to Brigham and Women’s Hospital (BWH) to develop and refine electronic clinical quality measures (eCQMs) in the areas of orthopedic surgery outcomes and medication safety, and to develop and refine a Patient Reported Outcome Performance Measure (PRO-PM) related to orthopedic surgery clinical care. The cooperative agreement name is Measuring Outcomes in Orthopedics Routinely (MOOR). The cooperative agreement number is 1V1CMS331637-01-00. As part of its measure development process, Brigham and Women’s Hospital convenes groups of stakeholders and experts who contribute direction and thoughtful input to the measure developer during measure development and maintenance.

The purpose of the October 29 and October 30 TEP meetings were to gain TEP member input on the eCQMs measure specifications, testing results, and to discuss stakeholder feedback conducted as part of the measure development process.
