

# CMS Framework for Health Equity 2022–2032

## Definition of Health Equity

The attainment of the highest level of health for all people, where everyone has a fair and just opportunity to attain their optimal health regardless of race, ethnicity, disability, sexual orientation, gender identity, socioeconomic status, geography, preferred language, or other factors that affect access to care and health outcomes. CMS is working to advance health equity by designing, implementing, and operationalizing policies and programs that support health for all the people served by our programs, eliminating avoidable differences in health outcomes experienced by people who are disadvantaged or underserved, and providing the care and support that our enrollees need to thrive.

## CMS Framework for Health Equity Priorities

**Priority 1:** Expand the Collection, Reporting, and Analysis of Standardized Data

**Priority 2:** Assess Causes of Disparities Within CMS Programs, and Address Inequities in Policies and Operations to Close Gaps

**Priority 3:** Build Capacity of Health Care Organizations and the Workforce to Reduce Health and Health Care Disparities

**Priority 4:** Advance Language Access, Health Literacy, and the Provision of Culturally Tailored Services

**Priority 5:** Increase All Forms of Accessibility to Health Care Services and Coverage
