Counseling Check List

- Discuss the need for immediate isolation, even before results of the test are available.
- Advise patients to inform their immediate household/contacts that they may wish to be tested and quarantine as well. Review locations and people they have been in contact with in the past two weeks.
- Review the signs and symptoms of COVID-19.
- Inform patients that if positive, they will likely be contacted by a public health worker and asked to provide a list of the people they've been with for contact tracing, encourage them to ‘answer the call’.
- Discuss services that might help the patient successfully isolate and quarantine at home.
