

**Acute Hospital Care at Home Program
Approved List of Hospitals as of 1/29/2021**

The Acute Hospital Care at Home program is an expansion of the CMS *Hospital Without Walls* initiative launched in March 2020 as a part of a comprehensive effort to increase hospital capacity, maximize resources, and combat COVID-19 to keep Americans safe. This program creates additional flexibility that allows for certain health care services to be provided outside of a traditional hospital setting and within a patient’s home.

There are several requirements that a hospital must meet in order to participate in the program. These include:

- Having appropriate screening protocols in place before care at home begins to assess both medical and non-medical factors
- Having a physician or advanced practice provider evaluate each patient daily either in-person or remotely
- Having a registered nurse evaluate each patient once daily either in-person or remotely
- Having two in-person visits daily by either registered nurses or mobile integrated health paramedics based on the patient’s nursing plan and hospital policies
- Having the capability of immediate, on-demand remote audio connection with an Acute Hospital Care at Home team member who can immediately connect either an RN or MD to the patient
- Having the ability to respond to a decompensating patient within 30 minutes
- Tracking several patient safety metrics with weekly or monthly reporting, depending on the hospital’s prior experience level
- Establishing a local safety committee to review patient safety data
- Using an accepted patient leveling process to ensure that only patients requiring an acute level of care are treated
- Providing or contracting for other services required during an inpatient hospitalization

It is important to note that patients will only be admitted to the program from emergency departments and inpatient hospital beds, and an in-person physician evaluation is required prior to starting services at home. Additional information is available within the [Acute Hospital Care at Home Program Frequent Asked Questions](#).

Based on the above criteria, the following **40 systems, 96 hospitals in 26 states** are currently included within the program:

System	Hospital	Approval Date
Mount Sinai (NY)	Mount Sinai Hospital (NY)	November 25, 2020
	Mount Sinai Beth Israel (NY)	November 25, 2020
	Mount Sinai Morningside (NY)	November 25, 2020
Brigham and Women’s Hospital (MA)	-	November 25, 2020
Massachusetts General Hospital (MA)	-	November 25, 2020
UnityPoint (IA)	-	November 25, 2020
University of Utah Health and Huntsman Cancer Institute (UT)	-	November 25, 2020

Presbyterian Health Services (NM)	-	November 25, 2020
