DISCLAIMER

This document is a compilation of actions employed by organizations, including state governments, in the United States and outlying territories to assist nursing homes in meeting the needs of nursing home residents since the onset of the COVID-19 pandemic recognized in early 2020.

The actions were collected by the contractors of the QIO Program, a statutorily mandated program of quality improvement contractors who work for the Centers for Medicare & Medicaid Services (CMS) to improve the care of Medicare beneficiaries, including beneficiaries who reside in nursing homes. By law, a QIO works in every state and territory.

This information was collected by the QIOs in late April 2020, and compiled by CMS and its contractors to provide a rapid-access compendium for providers and administrators of nursing homes in the United States to learn from the many creative plans that state governments and other entities have put into operation in a short period of time.

This compendium is not intended as guidance from CMS. It does not replace or serve as a substitute for CMS requirements and policy. The actions outlined in this document have not been evaluated for effectiveness by CMS or any government agency. This compendium is solely an informational product offered by CMS to nursing homes as well as state and local officials during the National Public Health Emergency.
OBJECTIVE:

This toolkit catalogs the many innovative solutions designed at the state level to protect our nation’s vulnerable nursing home residents during the Coronavirus disease 2019 (COVID-19) pandemic.

ACKNOWLEDGEMENTS:

CMS wishes to thank the many health care providers, state government employees and organizations that generously contributed materials developed in the first and second quarters of 2020 to this toolkit. CMS also extends its sincere appreciation to the management, health care providers and staff members of the nursing homes who work tirelessly to provide the best care for this vulnerable population while acting to stop further transmission of the virus.

STAKEHOLDERS WHO PROVIDED INPUT INCLUDE:

- Governors’ offices and governors’ COVID-19 task forces
- State affiliates of the American Health Care Association (AHCA)
- State affiliates of the American Hospital Association (AHA)
- LeadingAge state chapters
- State Bureaus of Health Provider Standards
- State and county Departments of Public Health
- State chapters of the Society for Post-Acute and Long-term Care Medicine (formerly AMDA)
- State and private universities
- Health facilities licensing and certification agencies
- State Departments of Epidemiology
- State long-term care Ombudsman offices
- State health care-acquired infection programs
- Association for Professionals in Infection Control and Epidemiology (APIC) state chapters
- Nursing home corporations
- State accountable care organizations
- State telemedicine programs
- Area Agencies on Aging (AAA)
- The Veterans Health Administration
- U.S. corporations
- State Departments of Emergency Management
- State Infectious Diseases Associations
- State Departments of Aging
- State Medicaid programs
- Centers for Medicare and Medicaid Services Staff
- End-stage renal disease (ESRD) networks
- Governors’ reopening task forces
- State health care coalitions for disaster response
- State Project ECHO programs
- State rural health associations
- American Medical Association (AMA) state chapters
- State primary care associations
- State National Guards
- State Agencies for Emergency Preparedness for Aging and Long Term Care
ORGANIZATION OF THE DOCUMENT:

- This document has been optimized to help you find information quickly and easily. While the content is organized into sections, you may also rely on key word searches and the index to help you locate the information you need.
- Major categories include:
  - State actions for COVID Management and Response
  - Telehealth
  - Organizations That are Available to Assist Nursing Homes
- State-specific information is included when available.
- When possible, references are given for the innovations, including links to contacts and resources for more information.
1. STATE ACTIONS FOR COVID-19 MANAGEMENT AND RESPONSE

1. CLEANING/DISINFECTION

Alabama (AL)
Office of the Governor Kay Ivey
- Specially trained and equipped National Guard teams disinfect nursing homes that have COVID-19-positive residents. These teams will train staff on the techniques of donning and doffing personal protective equipment as well as sanitize and disinfect nursing homes that have COVID-19-positive residents and/or employees

Arizona (AZ)
Haven Health Group and Pioneer Health Group
- Uses a UV machine to disinfect face shields, N95 masks, iPads, nurse cart keys, and any other needed items
- Staff shower and change at the end of shifts in designated areas at the facility before leaving unit to reduce spread of COVID-19 in the community or at homes
- Use baby-nursery cameras in COVID-19-positive rooms to remotely monitor patients

Connecticut (CT)
Battelle CCDS Critical Care Decontamination System™
- Performs decontamination of the novel coronavirus (SARS-CoV-2) to address personal protective equipment (PPE) shortage (cleans up to 80,000 units/day)
- Offered free to health care personnel
- Provided in eight locations
  https://www.battelle.org/inb/battelle-ccds-for-covid19-satellite-locations

Illinois (IL)
Health Care Council of Illinois (HCCI)
- Developed COVID-19 Resource page, updated daily with information regarding state and federal regulations, infection control, personal protective equipment (PPE), and Centers for Disease Control and Prevention (CDC) information
- Prepares weekly member newsletters and email blasts on COVID-19 related resources and events throughout the state
  http://www.hccil.org/covid-19/
State Actions for COVID-19 Management and Response

1. Cleaning/Disinfection Continued

**Indiana (IN)**

*Indiana State Department of Health*

- The Department is using a Battelle Critical Care Decontamination System (CCDS)™, which can disinfect up to 80,000 N95 masks. Along with hospitals, use of this system is extended to long term care facilities
  

- Indiana has distributed alcohol hand rub and five-gallon containers of COVID-19 cleaning solution to long term care facilities that have requested it

**Iowa (IA)**

*GRX Holdings, LLC*

- GRx Pharmacies have helped a facility proactively set up an isolation unit, providing med cart, treatment cart and are waiting on a board of pharmacy waiver to provide a separate emergency kit for the unit
  
  [https://www.grxholdings.com](https://www.grxholdings.com)

**Kansas (KS)**

*BioKansas: The Bioscience Network in Kansas*

- BioKansas website contains a listing of regional companies that are currently taking orders for critical supplies (i.e., testing and personal protective equipment)
  
  [https://www.biokansas.org/page/COVIDSuppliers](https://www.biokansas.org/page/COVIDSuppliers)

**Kansas Department of Health & Environment (KDHE)**

- The KDHE Healthcare-Associated Infections & Antimicrobial Resistance Program has created a health care facility cleaning and disinfection guide

**Massachusetts (MA)**

*Battelle Critical Care Decontamination System (CCDS)™*

- Performs decontamination of the novel coronavirus (SARS-CoV-2) to address the personal protective equipment (PPE) shortage (cleans up to 80,000 units/day)
  

**Department of Public Health and the Massachusetts Emergency Management Agency**

- Serves as a bridge when an entity has a critically low supply and provide delivery for urgent needs

**Mississippi (MS)**

*Mississippi Emergency Management Agency (MEMA)*

- MEMA is providing cleaning services for long term care facilities. A subject-matter expert is also available to perform assessments. Interested facilities are contacting their county emergency management agency
  
  [https://www.msema.org/county-ema](https://www.msema.org/county-ema)

- Battelle Critical Care Decontamination System (CCDS)™ provides access to free N95 sterilization for health care facilities
  
Montana (MT)
The State of Montana

- Montana is using the Battelle Critical Care Decontamination System (CCDS)™ to perform decontamination of the novel coronavirus (SARS-CoV-2) to address the personal protective equipment (PPE) shortage (cleans up to 80,000 units/day)

New Mexico (NM)
New Mexico Department of Health

- The Department of Health Improvement (DHI) is conducting virtual audits using video to verify the cleaning protocols and use of personal protective equipment (PPE) in nursing homes, assisted living facilities, and immediate care facilities
- A review of all infection control procedures in all nursing facilities, assisted living facilities, skilled nursing facilities, and immediate care facilities was ordered
- New Mexico has contracted with cleaning company to clean all nursing homes in the state
- Specially trained and equipped National Guard teams disinfect nursing homes that have COVID-19-positive residents. These teams will train staff on the techniques of donning and doffing PPE as well as sanitize and disinfect nursing homes that have COVID-19-positive residents and/or employees
- The Battelle Critical Care Decontamination System (CCDS)™ is used to perform decontamination of the novel coronavirus (SARS-CoV-2) to address the PPE shortage (cleans up to 80,000 units/day)
- The Department is considering mandating three additional requirements for long term care facilities: deaths reporting in the data collection portal; anti-viral shoe spray for all individuals entering facilities, and mandated clothing changes for all staff upon facility entry and exit
  https://cv.nmhealth.org

North Dakota (ND)
CHI St. Alexius Health - Garrison, ND

- Facility places contact time for cleaning and disinfecting products in large numbers on side of each bottle to keep that time more present in the mind of those using the products

North Dakota Department of Health

- Awarded a Battelle Critical Care Decontamination System™ to help address the current shortage of N95 respirators
  https://www.health.nd.gov/battelle-critical-care-decontamination

Ohio (OH)
Office of the Governor Mike DeWine

- Instrumental in expediting approval for Battelle Critical Care Decontamination System (CCDS)™
- Performs decontamination of the novel coronavirus (SARS-CoV-2) to address personal protective equipment (PPE) shortage (cleans up to 80,000 units/day)
- Offered free to health care personnel
Ohio Department of Health
- Web page offers suggestions for preventive cleaning against COVID-19 if everyday supplies, such as cleaning wipes or cleaning sprays, run out

Ohio Department of Health, Ohio Department of Medicaid, Ohio Department of Aging, Ohio Department of Mental Health and Addiction Services
- Includes practical tips for cleaning and disinfecting within the COVID-19 Long Term Services and Support (LTSS) Pre-Surge Planning Toolkit
  [https://medicaid.ohio.gov/COVID/Long-Term-Services-and-Support](https://medicaid.ohio.gov/COVID/Long-Term-Services-and-Support)

Oklahoma (OK)
Oklahoma Assisted Living Association
- Posts recommendations from the Centers for Disease Control and Prevention (CDC) to prepare for COVID-19 in long term care facilities and nursing homes
- Provides additional interim guidance for infection prevention and control
- Hosts links to COVID-19 resources, such as a COVID-19 checklist, sample letters to families, volunteers and friends, and CDC and Centers for Medicare & Medicaid Services updates
  [https://www.okala.org/](https://www.okala.org/)

Texas (TX)
Office of the Governor Greg Abbott
- On May 5, 2020 at the Governor’s direction, the Texas Military Department activated 250 Texas National Guard personnel in support of nursing facilities, with additional activations to meet mission demand. These Guardsmen formed teams to disinfect COVID-19 contaminated care facilities. Teams are based across Texas and are serving the eight Emergency Medical Task Force regions
2. REPORTING/GUIDANCE/MANDATED REPORTING

Alaska (AK)
*Alaska Department of Health and Human Services*
- Receives updates and guidance from the Centers for Disease Control and Prevention (CDC), which is shared through the Alaska Public Health Alert Network (PHAN) to local health officials
  [https://covid19.alaska.gov/health-mandates](https://covid19.alaska.gov/health-mandates)

Arkansas (AR)
*Arkansas Department of Human Services (DHS) Office of Long Term Care (OLTC)*
- The state Quality Improvement Organization (QIO) is collaborating with Cecelia Vinson, Director OLTC, on National Healthcare Safety Network (NHSN) COVID-19 reporting and enrollment assistance
- Sent the Centers for Disease Control and Prevention (CDC) enrollment instructions link and the PDF
- OLTC will refer nursing homes to the QIO for any assistance needed
  [https://www.cdc.gov/nhsn/ltc/covid19/index.html](https://www.cdc.gov/nhsn/ltc/covid19/index.html)

Arizona (AZ)
*Office of the Governor Doug Ducey*
- An Executive Order was issued to strengthen protection in residential and nursing care facilities by mandating reporting of COVID-19 positive cases in nursing homes

California (CA)
*California Department of Public Health (CDPH)*
- Provides resources for skilled nursing facilities (SNFs) on preventing, detecting, and preparing for COVID-19 in a toolkit titled “Preparing for COVID-19 in California Skilled Nursing Facilities”
- CDPH released an All Facilities Letter (AFL 20-43) on May 13, 2020, requiring all skilled nursing facilities (SNFs) to report daily updates regarding current staffing levels, the number of COVID-19 patients, and equipment availability to CDPH via an online survey. This reporting is to ensure that California has the information necessary to respond to the COVID-19 outbreak and to provide resources and support to SNFs. To meet the Centers for Disease Control and Prevention (CDC) reporting requirements, CDPH modified their daily online survey to include the questions required by CDC via National Healthcare Safety Network (NHSN)
  [https://www.cdph.ca.gov/Programs/CHCQ/LCP/Pages/AFL-20-43.aspx](https://www.cdph.ca.gov/Programs/CHCQ/LCP/Pages/AFL-20-43.aspx)
- CDPH will report this data to the CDC on behalf of facilities via the online SNF COVID-19 Survey
  [https://survey123.arcgis.com/share/f4050e65e5304c7d8b00760e7718fcc4](https://survey123.arcgis.com/share/f4050e65e5304c7d8b00760e7718fcc4)
2. Reporting/Guidance/Mandated Reporting Continued

- Due to the higher risk of severe illness and death from COVID-19 among nursing home residents, CDPH required all nursing homes to submit a mitigation plan by June 1, 2020 that must include six elements, including: 1) testing and cohorting, 2) infection prevention and control, 3) personal protective equipment (PPE), 4) staffing shortages, 5) designation of space, and 6) communication. To assist nursing homes in developing their plan and expanding their infection control policies, CDPH provided a mitigation plan template and local public health departments provided technical assistance to assist nursing homes in developing their plans. [https://www.cdph.ca.gov/Programs/CHCQ/LCP/Pages/AFL-20-52.aspx](https://www.cdph.ca.gov/Programs/CHCQ/LCP/Pages/AFL-20-52.aspx)

- To ensure California has the information necessary to respond to COVID-19 outbreaks in nursing homes, CDPH requires all nursing homes to report daily updates regarding current staffing levels, the number of COVID-19 patients, and equipment availability via an online survey. Nursing homes are also required to report weekly data to Centers for Medicare & Medicaid Services via the National Healthcare Safety Network (NHSN), so to reduce reporting burden, CDPH modified their daily online survey to include the questions required by CMS in NHSN. CDPH is now reporting data to CMS via NHSN on behalf of all nursing homes that conferred rights to CDPH. [https://www.cdph.ca.gov/Programs/CHCQ/LCP/Pages/AFL-20-43.aspx](https://www.cdph.ca.gov/Programs/CHCQ/LCP/Pages/AFL-20-43.aspx)

**Florida (FL)**

*Florida Department of Health*

- Provides daily data updates for the number of positive cases, tests performed, deaths, number of long term care facilities with positive cases, number of persons under investigation, and other information. [https://floridahealthcovid19.gov](https://floridahealthcovid19.gov)

**Georgia (GA)**

*Georgia Healthcare Facility Regulation Department*

- Worked closely with the Georgia Department of Health, Georgia Health Care Association, and the Georgia National Guard to stay abreast of COVID-19 activity and the impact on centers, while remaining vigilant for highest quality of care for the residents in Georgia
- Provides website updates with changes in rules and regulations, contact information, and a nurse aide program temporary waiver for staffing
- Surveyors have been connecting with long term care organizations, collecting information related to COVID-19 and coordinating with the National Guard to develop a system for collection of COVID-19 data
- The data collection platform will update the public daily at 2 PM, replacing a previous report from the Governor’s Office
- [https://dch.georgia.gov/divisionsoffices/healthcare-facility-regulation](https://dch.georgia.gov/divisionsoffices/healthcare-facility-regulation)

**Illinois (IL)**

*Health Care Council of Illinois (HCCI)*

- Developed COVID-19 Resource page, updated daily with information regarding state and federal regulations, infection control, personal protective equipment (PPE), and Centers for Disease Control and Prevention (CDC) information
- Prepares weekly member newsletters and email blasts on COVID-19 related resources and events throughout the state. [http://www.hccil.org/covid-19/](http://www.hccil.org/covid-19/)
Illinois Department of Public Health
- Issued COVID-19 safety guidance for nursing home residents and employees (e.g., screening and reporting symptoms), as well as visitation restrictions on March 20, 2020

Indiana (IN)
Indiana State Department of Health
- On April 10, 2020, took early action to require nursing home statewide reporting of all residents and employees in long term care facilities, jails, prisons, and congregate housing with positive COVID-19 results and any COVID-19 deaths within 24 hours
- On May 4, 2020, Indiana required all long term care facilities to provide daily reports to long term care residents and their designated representatives. These reports include the requirement to report new COVID-19 cases in residents and staff and new respiratory symptoms. In addition, long term care facilities must provide total number of cases and total number of deaths in resident and staff if requested by residents or their designated representative

Iowa (IA)
Iowa Department of Inspections and Appeals
- Fields individual nursing home questions specific to survey or regulation, created a website FAQ document for support on common questions, and provides 1135 waiver guidance. During surveys, the Department encourages nursing homes to reach out to the Quality Improvement Organization (QIO) or Iowa Department of Public Health (IDPH) for support

Iowa Department of Public Health
- Website houses multiple resources for COVID-19 guidance and long term care recorded webinars
- Conducts support webinars with ample Q&A time
- Manages hotline and individual nursing home assistance via email
- Provides support through emergency response team available (for example, personal protective equipment [PPE] supply)
- Create guidance documents for state-specific requirements and reporting support
  [https://idph.iowa.gov/Emerging-Health-Issues/Novel-Coronavirus/Long-Term-Care](https://idph.iowa.gov/Emerging-Health-Issues/Novel-Coronavirus/Long-Term-Care)

Iowa Long Term Care Ombudsman
- Provides individual nursing home support for advocacy of needs at resident level
- Supports residents and families with concerns
- Encourages nursing homes to reach out to the Quality Improvement Organization, the Department of Inspections and Appeals (DIA), and the Illinois Department of Public Health (IDPH) for support
- Website houses multiple resources
  [https://www.iowaaging.gov/educational-resources/covid-19-older-iowans](https://www.iowaaging.gov/educational-resources/covid-19-older-iowans)
LeadingAge of Iowa
- Provides individual technical assistance; a weekly conference call; regular member newsletters; survey and regulatory guidance; and a website housing multiple COVID-19 topics
  https://www.leadingageiowa.org/covid-19

Kansas (KS)
Kansas Department of Health and Environment (KDHE)
- The Healthcare-Associated Infections & Antimicrobial Resistance Program released the Infection Prevention and Control Preparation Guide for Long-Term Care and Other Residential Facilities in Kansas

Maryland (MD)
Maryland Baptist Aged Home
- The nursing home joined the Maryland Department of Health group in National Healthcare Safety Network (NHSN). This means that the daily reporting requirement to Chesapeake Regional Information System for our Patients (CRISP), the Maryland health information exchange (MD HIE), and the weekly reporting to NHSN has been combined, and CRISP is now reporting to NHSN on behalf of the nursing home
  http://marylandbaptistagedhome.org

Garrett County Subacute Unit
- The daily reporting requirement to Chesapeake Regional Information System for our Patients (CRISP) and the weekly reporting requirement to National Healthcare Safety Network (NHSN) have been divided between the Administrator and the infection preventionist staff in the nursing home. This helps make the reporting requirements less burdensome for one person, as well as making sure that a back-up staff member can take over this responsibility in case of a call-out
  https://www.nursinghomes.com/md/oakland/garrett-county-subacute-unit

Michigan (MI)
Office of the Governor Gretchen Whitmer, University of Michigan
- Governor Gretchen Whitmer’s MI Safe Start Plan outlines how we will begin to re-engage while continuing to keep our communities safe. Re-engagement will happen in phases. Businesses that are necessary to protect and sustain life are already open. As we move into lower-risk phases, additional business categories will re-open and the restrictions on public gatherings and social interactions will ease
  https://www.mistartmap.info

Minnesota (MN)
Minnesota Association for Geriatrics Inspired Clinicians (MAGIC) Clinical Practice Alliance Committee (CPAC)
State Actions for COVID-19 Management and Response
2. Reporting/Guidance/Mandated Reporting Continued

**Minnesota Department of Health (MDH)**
- MDH introduced new RedCap survey to share COVID-19 positive test results. Facilities are to use this survey when a positive COVID-19 case is confirmed. Usually the assigned MDH case manager will send the survey link to the facility, but providers are also encouraged to utilize the tool prior to a case manager being assigned https://redcap-c19.web.health.state.mn.us/redcap/surveys/?s=H8MT9TTNCD

**Mississippi (MS)**
- **Mississippi Division of Medicaid**

- **Mississippi State Department of Health**
  - Partner with Mississippi State Department of Health (MSDH) Licensure & Certification with frequent contact
  - Provide consultation to prevent the spread of COVID-19 in nursing homes
  - Assist with personal protective equipment (PPE) attainment
  - Nursing homes with COVID-19 cases receive daily follow-up
  - Provides a table by county of Mississippi COVID-19 cases in long term care facilities https://msdh.ms.gov/msdhsite/_static/14,0,420.html

- **Mississippi State Department of Health, Office of Epidemiology**
  - Long term care facilities are required to report COVID-19 cases to Mississippi State Department of Health. Mississippi State Department of Health collaborates with the facility administrators to ensure that appropriate prevention measures are being taken

**Missouri (MO)**
- **The Quality Improvement Program for Missouri (QIPMO)**
  - QIPMO is a cooperative service between the University of Missouri Sinclair School of Nursing and the Missouri Department of Health and Senior Services. It is composed of gerontological nurses who provide education on state actions to improve care delivery and outcomes for nursing home residents

**Montana (MT)**
- **Montana Department of Public Health and Human Services**
  - Receives daily updates and guidance from the Centers for Disease Control and Prevention (CDC), which is shared through the state’s Health Alert Network to local health officials https://dphhs.mt.gov/Portals/85/publichealth/documents/HAN/2020/HANUD2020-17.pdf
State Actions for COVID-19 Management and Response
2. Reporting/Guidance/Mandated Reporting Continued

- The Department, in collaboration with the Mountain Pacific Quality Health Organization, is providing technical assistance and support to nursing home facilities regarding reporting to the National Healthcare Surveillance Network (NHSN) system

Nebraska (NE)
Nebraska Department of Health and Human Services (DHHS)
- Nebraska nursing homes are required to complete a comprehensive COVID-19 response planning tool by June 22, 2020. This tool is to be kept with the facility Emergency Preparedness Plan and is to be available at the request of the local health department or member of the Nebraska Department of Health and Human Services (DHHS)

New Jersey (NJ)
Centers for Disease Control and Prevention (CDC)
- Recommends CDC guidelines for members
- Promotes CDC guidelines to keep COVID-19 from entering facilities and strategies to identify infections early to prevent spread
- Shared resource guide with COVID-19 recommendations, including clarification that cloth face coverings are not considered personal protective equipment (PPE) because their capability to protect health care personnel (HCP) is unknown

Office of the Governor Phil Murphy
- Issued an Executive Order that directed health care facilities to report daily data concerning their capacity and supplies to the New Jersey Office of Emergency Management (OEM)
- The health care facilities subject to this requirement include licensed acute care hospitals, long term care facilities, hospital systems, and emergency field treatment medical facilities, with OEM having the ability to make additions or clarifications to this list

New Jersey Department of Health
- Long term care facilities in New Jersey are required to report COVID-19 cases to their local health departments
- Local health departments work with the Department of Health and the facility administrators to ensure that appropriate measures are being taken
  https://covid19.nj.gov

New Jersey COVID-19 HUB
- Website provides county-based data dashboard, COVID-19 frequently asked questions, jobs portal, symptom checks, and state-based updates
  https://covid19.nj.gov
New Mexico (NM)
State of New Mexico
- Issued COVID-19 safety guidance for nursing home residents and employees (e.g., screening and reporting symptoms), as well as visitation restrictions on March 20, 2020
- Issued an Executive Order that directed health care facilities to report daily data concerning their capacity and supplies

New York (NY)
Mount Sinai Icahn School of Medicine
- Using artificial intelligence (AI) with imaging, clinical symptoms, exposure history, and laboratory data, created an algorithm to rapidly diagnose COVID-19 in patients https://www.nature.com/articles/s41591-020-0931-3.pdf

New York State Department of Health, Johns Hopkins Bloomberg School of Public Health

New York State Department of Health, Office of the Governor Andrew Cuomo
- The plan re-opens the region in four phases based in two-week time frames, based on the following criteria:
  - Decline in total hospitalizations
  - Decline in deaths
  - New Hospitalizations
  - Hospital Bed Capacity
  - ICU Bed Capacity
  - Diagnostic Testing Capacity
  - Contact Tracing Capacity https://forward.ny.gov/regional-monitoring-dashboard

Office of the Governor Andrew Cuomo, Office of the Mayor Bill de Blasio
- Governor Cuomo coordinated COVID-19 quarantine guidance on reopening states early on with Connecticut and New Jersey; also added Pennsylvania, Massachusetts, and Vermont

Ohio (OH)
American Health Care Association (AHCA)
- The Accepting Admissions AHCA Policy provides guidance to skilled nursing facilities (SNFs) to help make decisions about accepting hospital discharges to SNFs https://www.ahcancal.org/facility_operations/disaster_planning/Documents/SNF-Admit-Transfer-COVID19.pdf
Office of the Governor Mike DeWine

- Governor DeWine’s web page announces any new changes to public policy as it pertains to COVID-19 and nursing homes. It also directs visitors to Ohio Department of Health’s COVID-19 website that provides the latest data on COVID-19. Some of this data does specifically pertain to Ohio’s nursing homes
  https://governor.ohio.gov/wps/portal/gov/governor

Ohio Department of Aging

- Created the following resources:
  - Caring for Residents with Dementia During the COVID-19 Outbreak: Provides specific guidance on caring of residents with dementia while requiring social distancing
  - COVID-19 Education for Residents and their Families: Simple one-page document explains what residents and families can do for COVID-19
    https://aging.ohio.gov/wps/wcm/connect/gov/edcf1bfa-745d-422f-ad89-f2d179e1fbae/COVID-19-Information-for-Ltc-residents.pdf?MOD=AJPERES&CVID=n4ir1lN

Oregon (OR)

Department of Human Services (DHS), Social Security Administration (SSA)

- In Oregon, there are many players working to support nursing homes and the greater Oregon health care community
- DHS and the SSA have partnered to develop facility assessment requests from the Centers for Disease Control and Prevention (CDC) and the Centers for Medicare & Medicaid Services (CMS) that are similar to aid in reporting

Pennsylvania (PA)

Pennsylvania Department of Health

- The Department of Health has shared COVID-19 resources
  https://www.health.pa.gov/topics/disease/coronavirus/Pages/Coronavirus.aspx
- State Registrar Notices include guidance on mandatory electronic reporting to the Bureau of Health Statistics and Registries of deaths caused or suspected to be caused by COVID-19
  https://www.health.pa.gov/topics/Reporting-Registries/Pages/state-registrar-notices.aspx
Tennessee (TN)
*The Middle Tennessee Regional Healthcare Quality Improvement Collaborative Communication Coalition*
- The Middle Tennessee Regional Healthcare Quality Improvement Collaborative Communication Coalition, a coalition working with Alliant Health Services, formed a task force that meets every other Thursday with representation from multiple counties in the Nashville area. Nursing homes, assisted living centers, the Mayor’s office, and the Tennessee Department of Health are represented. They are working together to coordinate Personal Protective Equipment, testing, and National Healthcare Safety Network needs, such as assistance needed for enrollment and/or reporting in the COVID-19 module. Providers in the area network to invite other providers. A Senior Quality Advisor at AHS, Julie Clark, julie.clark@allianthealth.org, is available to assist connection with this coalition.

Texas (TX)
*Texas Department of Health and Human Services*
- Developed a nursing home COVID-19 response plan, which incorporates direction from state and federal agencies into an easy-to-use set of instructions for prevention of COVID-19 and actions to prioritize and initiate when there is a suspected or confirmed COVID-19 case. It includes an easy-to-remember acronym of S.P.I.C.E. (see page 18). This document is updated regularly as guidance changes.
  

Virginia (VA)
*Virginia Hospital and Healthcare Association (VHHA)*
- VHHA launched a nursing home dashboard with statistics associated with COVID-19 cases in licensed nursing facilities. The dashboard is updated daily with information nursing facilities voluntarily submit via the Virginia Healthcare Alerting and Status System (VHASS) related to:
  - Confirmed and pending resident COVID-19 cases
  - The number of residents who have recovered from COVID-19
  - Challenges in obtaining specific types of personal protective equipment (PPE)
  

West Virginia (WV)
*Stonerise Healthcare Corporation*
- This corporation of nursing homes developed its own reporting page related to COVID-19 that listed its nursing homes along with location, current patients, and number of negative and positive COVID-19 patients in each facility. The corporation also schedules tele-visits with residents for family members.
  

*West Virginia Department of Health and Human Services, West Virginia Health Care Association*
- Offers guidelines for COVID-19 outbreaks in long term care facilities through its website, including:
  - Contact precautions
  - Hand hygiene observation tool
  - Long term care facility outbreak resources toolkit
• Outlines provider responsibility for reporting requirements for suspected or confirmed cases
• Provides general information on West Virginia resources, including medical transport guidelines
• Developed guidelines for COVID-19 outbreaks in long term care facilities. Topics include:
  o Outbreak definitions
  o Preventing an outbreak
  o What to do if a case is detected
  o Measures to control the outbreak
  o Lab testing
  o Health care personnel exposure
  o Management of residents returning from hospitalization or new admissions
  o Criteria to remove residents from isolation
    https://dhhr.wv.gov/COVID-19/Pages/default.aspx
3. TESTING

Arizona (AZ)
*Arizona Department of Health Services (ADHS), Arizona Health Care Association, SonoraQuest Lab*
- Along with local public health departments and providers, launched an initiative to test all residents and staff in Arizona’s nursing care institutions over a two-week period (May 15 – May 29, 2020). Facilities were given the option of having a lab come to their location to do the testing or obtain the supplies to do their own on-site testing. Organizations who decided not to participate needed to sign an “opt out” notice and send to ADHS

Alabama (AL)
*Office of the Governor Kay Ivey*
- An Alabama state-based COVID-19 taskforce is maintaining a website which provides a wide variety of helpful COVID-19 information, including testing sites, news, and resources. The website is intended to also connect businesses, nonprofits, and people that need help with the right program partners and to connect program partners with people and resources to help those most in need
  https://covid19.alabama.gov/

Arkansas (AR)
*Arkansas Health Care Association (AHCA), Arkansas Department of Health (ADH)*
- AHCA had the ADH infectious disease physician conduct question-and-answer session with nursing home medical directors, physicians, and mid-level providers to discuss statewide testing that is planning starting June 1, 2020
- Healthcare-associated Infections (HAI) staff are working together to plan statewide testing. AHCA shared plans with the nursing homes via scheduled webinars

California (CA)
*California Association of Long Term Care Medicine (CALTCM), Health Services Advisory Group (HSAG)*
- Convened a Delphi panel of long term care clinicians that published “Diagnostic Testing for SARS-Coronavirus in the Nursing Facility: Recommendations of a Delphi Panel of Long-Term Care Clinicians” on May 30, 2020 in the *Journal of Nutrition, Health and Aging*. The article supports facility-wide testing of all staff and residents and provides recommendations to nursing homes in hopes of providing value to the long term care industry and to policy makers

Colorado (CO)
*Office of the Governor Jared Polis*
- Colorado Governor Jared Polis initiated a COVID-19 Innovation Response Team, taking a multipronged approach that includes increased testing, tailored social-distancing measures, a reinforced health care system, and a bolstering of state epidemiological resources
State Actions for COVID-19 Management and Response

3. Testing Continued

- The Colorado National Guard was deployed to test residents and staff at three of the state’s largest nursing homes, even though outbreaks have not been reported at the facilities https://www.nationalguard.mil/News/Article/2167756/colorado-national-guard-testing-residents-for-covid-19

**Florida (FL)**

*Florida Department of Health*
- Provides daily data updates for number of positive cases, tests performed, deaths, number of long term care facilities with positive cases, number of persons of interest, and other information https://floridahealthcovid19.gov

*Florida Agency for Health Care Administration*
- Implemented emergency rules to require hospitals test all residents before discharge to a nursing home, and to require nursing homes to test all staff when arranged by the Department of Health

**Georgia (GA)**

*Georgia National Guard, Department of Public Health, Department of Community Health*
- Developed a testing strategy in response to Governor Brian Kemp’s recommendations to support broader testing and to prioritize testing of vulnerable populations and health care professionals
- Ultimately, this strategy will expand to include private or commercial labs. More than 200 nursing homes have invited teams into their centers for cleaning and sanitizing, staff education, and assistance with testing https://www.ghca.info/Files/National%20Guard%20Test%20Team%20for%20LTCF%20Process.pdf

*Georgia Department of Public Health*
- Has been a supportive agency for all facets of health care during this pandemic
- Provides on-site support and developed a process for video audits, which has been invaluable to those in “hot spots” of COVID-19 activity
- Collected data from health care facilities on the State Electronic Notifiable Disease Surveillance System (SendSS) network
- Supported health care facilities with virtual and on-site visits
- Tested COVID-19 samples at the Georgia Department of Public Health laboratory https://dph.georgia.gov

**Guam (GU)**

*Guam Office of the Governor Ralph DLG. Torres COVID-19 Task Force*
- Acquired 60,000 COVID-19 test kits, with priority one being health care facility workers, then patients in long term care facilities with symptoms and patients 65 years and older with symptoms https://chcc.gov.mp/DocumentFiles/CNMI%20acquires%2060%20k%20COVID-19%20test%20kits_%20receives%20first%2020%20kits%20.pdf
Hawaii (HI)

University of Hawaii Department of Geriatrics, Healthcare Association of Hawaii
- The Long term care (LTC) COVID-19 Project Extension for Community Healthcare Outcomes (ECHO) series has included topics such as COVID-19 testing, planning for dementia residents, symptom management, and readiness in care homes and congregate settings
  https://geriatrics.jabsom.hawaii.edu/geriatrics
  https://geriatrics.jabsom.hawaii.edu/ltss

Illinois (IL)

Chicago Department of Public Health
- Created a dedicated website with specific long term care guidance to help implement appropriate infection prevention and control, rapidly identify potentially infected staff/visitors, monitor residents for signs and symptoms of infection, access testing for residents and facility staff, investigate clusters of COVID-19, and connect to needed resources, including personal protective equipment (PPE)
  https://www.chicagohan.org/covid-19/LTCF

Health Care Council of Illinois (HCCI)
- Developed COVID-19 Resource page, updated daily with information regarding state and federal regulations, infection control, personal protective equipment (PPE), and Centers for Disease Control and Prevention (CDC) information
- Prepares weekly member newsletters and email blasts on COVID-19 related resources and events throughout the state
  http://www.hccil.org/covid-19

Office of the Governor J.B. Pritzker
- Governor J.B. Pritzker issued a Gubernatorial Disaster Proclamation in response to the ongoing COVID-19 situation to assist Illinois agencies in coordinating state and federal resources, including the Strategic National Stockpile of medicines and protective equipment, to support local governments in preparation for any actions that may be necessary related to the potential impact of COVID-19
  https://www2.illinois.gov/sites/gov/Documents/APPROVED%20-%20Coronavirus%20Disaster%20Proc%20WORD.pdf
- The Governor provides a COVID-19 update briefing daily
- Drive-through testing sites are available throughout the state; all health care workers and residents with symptoms are eligible for testing
  https://www2.illinois.gov/sites/gov/COVID-19/Pages/default.aspx

Indiana (IN)

Indiana State Department of Health
- Developed a partnership with Eli Lilly to use its research laboratories to analyze samples taken in Indiana health care facilities, including nursing homes
- Released COVID-19 Specimen Collection and Submission Guidelines update on May 18, 2020
- Partnered with OptumServe to create 50 additional test sites around the state, bringing total testing capacity up to 100,000 tests per month
State Actions for COVID-19 Management and Response

3. Testing Continued

- The Department of Health released an update to the State Health Commissioner’s Order, Requirements for Reporting COVID-19 Information to the State Department of Health, on June 1, 2020

Iowa (IA)
Office of the Governor Kim Reynolds COVID-19 Response
- TestIowa.com was launched to help officials target areas of opportunity and to help them make decisions about reopening the state. New testing sites will test an additional 3,000 people a day. First responders and medical personnel are prioritized for testing
  https://www.testiowa.com/en

Kentucky (KY)
Office of the Governor Andy Beshear
- The Governor has asked that all residents and staff at every Kentucky long term care facility be tested for COVID-19. The state is coordinating with Norton Healthcare, a comprehensive health care system operating out of Louisville, to make that possible. The state of Kentucky is paying for the initial facility-wide testing of all long term care facilities, both for staff and residents. Norton Healthcare, in conjunction with the Kentucky Department of Health and local health departments, have initial pre-testing calls with facilities that have been scheduled for testing to determine any barriers, such personal protective equipment supply, cohorting issues, and staffing, in an effort to create action plans to address needs for improvement. Norton Healthcare is contracted to do onsite testing if needed by the facility. There is an additional call with the facility after testing has occurred that includes all of the above mentioned entities to discuss results and address any issues or needs that arise. Norton Healthcare provides a 24/7 call center for senior congregate care centers to use to ask questions and to conduct follow-up calls with facilities that have had testing to ensure they are still on track

State of Kentucky
- The State of Kentucky is maintaining a website which contains information about COVID-19 testing center locations, rates of infection by state and county, a COVID-19 Hotline (800-722-5725), a link to a daily report of COVID-19 epidemiological data, and a link to the most current long term care update by the state
  https://govstatus.egov.com/kycovid19

Louisiana (LA)
Louisiana Department of Health (LDH)
- Assembled the LDH Nursing Home Facility Toolkit for nursing home support. This toolkit provides state and best practice guidance for personal protective equipment (PPE), information about an option for safely sanitizing N95 masks for re-use, staffing resources, and testing recommendations, along with a variety of pertinent contact numbers
Louisiana Nursing Home Association
- Coordinating with Louisiana State University Health Sciences Center in Shreveport and Office of the Governor John Bel Edwards to test symptomatic nursing homes residents for COVID-19 in the northwest/Shreveport-Bossier area
  https://www.lsuhs.edu/coronavirus/about-covid-19

Michigan (MI)
Michigan Department of Civil Rights
- Released Michigan COVID-19 Test Sites video in sign language
  https://www.youtube.com/watch?v=d6J5gL4Y7Lw&feature=youtu.be

Minnesota (MN)
Minnesota Department of Health (MDH)
- MDH created a health care worker consent form for Point Prevalence Testing

State of Minnesota
- The state budget agency approved spending $4,359,230 to purchase up to 1,000,000 swabs. Funding comes from the COVID-19 Minnesota Fund
  https://mn.gov/mmb/budget/covid19-mn-fund

Mississippi (MS)
Mississippi Department of Health
- Developed two-week strategy to test residents and employees in long term care facilities for COVID-19

Montana (MT)
Montana Department of Public Health and Human Services
- Developed and is implementing a testing strategy to support broader testing of vulnerable populations, including nursing home and assisted living residents and workers using the state public health laboratory and reference laboratories

Nebraska (NE)
Test Nebraska
- Test Nebraska is a new partnership with state of Nebraska leaders and private corporations to improve access to testing and reduce the spread of COVID-19
  https://www.testnebraska.com/en

Nevada (NV)
Nevada Division of Public and Behavioral Health
- Nevada issued technical bulletin expanding testing
State Actions for COVID-19 Management and Response

3. Testing Continued

New Jersey (NJ)
New Jersey Department of Health (NJDOH)

- NJDOH released a COVID-19 investigation worksheet and supplemental contact-tracing tool
- Requires that all facility residents and staff be tested no later than May 26, 2020, with additional
  follow-up testing required no more than one week later
  https://covid19.nj.gov/NJfaqs?query=screening+nursing+home+visitors&tabOrder=search.html%2CAASfaqs%2CNJfaqs%2Ccoronavirus%2Cresources%2Clocations%2Cstatus&Facets.filterbox.filter0=%5B%5D
- The Guidance for COVID-19 Diagnosed and/or Exposed Healthcare Providers resource provides
  guidance for healthcare providers as to if and when they themselves should be tested for
  COVID-19
- Pharmacists can administer a COVID-19 test without a physician’s order and with no affiliated
  agreement with a physician, a prior requirement. The pharmacist is responsible for notifying the
  patient of the test results
- Symptom Tracker uses simple questions to guide people through possible COVID-19 exposures
  and symptoms and suggested next steps, including testing recommendations
- On March 20, 2020, the New Jersey Department of Health posted an update stating “The New
  Jersey Department of Health recommends against using any antibody testing to attempt to
  diagnose current or past infection with SARS-CoV-2. A positive result on a SARS-CoV-2 antibody
  test should not be viewed as evidence of immunity to or past infection with COVID-19.”
  https://covid19.nj.gov/faqs/nj-information/testing-information/should-i-get-tested-for-covid-19-antibodies-can-antibody-testing-tell-whether-someone-has-been-exposed-to-the-virus-that-causes-covid-19#:~:text=There%20is%20still%20a%20lot%20with%20COVID%2D19
- Collaborative effort between three agencies provides onsite tests to staff, inmates, and
  residents at New Jersey Department of Corrections facilities and halfway houses

New Mexico (NM)
New Mexico Department of Health

- Developed a testing strategy in response to Governor recommendations to support broader
  testing and to prioritize testing of vulnerable populations and health care professionals
  including:
  - Created strike teams to go to nursing homes to conduct testing when potential or
    positive COVID-19 cases are seen in residents or staff members
  - Weekly surveillance testing for 15 percent of staff and residents where COVID-19 is not
    present and weekly 100 percent testing for staff and residents where COVID-19 is
    present
3. Testing Continued

- New Mexico COVID-19 website provides a list of drive-through testing sites available throughout the state; all health care workers and residents with symptoms are eligible for testing, as well as a list of vendors who will come onsite to perform COVID-19 testing.
- With the support of the New Mexico hospital and health care association, a testing protocol has been developed for patients prior to transfer from hospitals to long term care facilities.

**New York (NY)**

**New York State Department of Health**

- Issued Health Advisory: Respiratory Illness in Nursing Homes and Adult Care Facilities in Areas of Sustained Community Transmission of COVID-19
  - Any febrile acute respiratory illness or clusters of acute respiratory illness (whether febrile or not) in nursing homes and adult care facilities in New York City, Long Island, Westchester County, or Rockland County should be presumed to be COVID-19 unless diagnostic testing reveals otherwise.
  - Testing of residents and health care workers with suspected COVID-19 is no longer necessary and should not delay additional infection control actions.

**Office of the Governor Andrew Cuomo**

- Pharmacists have been added to the list of providers who can administer a COVID-19 test. New York State Medicaid will pay of the test when administered by a pharmacist. Billing instructions are included in the document [https://coronavirus.health.ny.gov/system/files/documents/2020/05/nysmedicaid_ffs_guidanceforpharmacylabtesting_5_22_20.pdf](https://coronavirus.health.ny.gov/system/files/documents/2020/05/nysmedicaid_ffs_guidanceforpharmacylabtesting_5_22_20.pdf)

**State of New York**

- As New York City prepares for Phase 1 of reopening on June 8, 2020, 10 additional testing sites will be added to hot spot areas in predominantly low-income and minority communities.
  - [https://coronavirus.health.ny.gov/home](https://coronavirus.health.ny.gov/home)

**North Dakota (ND)**

**North Dakota Department of Health and Human Services (ND DHHS)**

- Hiring furloughed health care professionals to assist with the state’s COVID-19 response, including contact tracing. In addition, the ND DHHS is enlisting public health graduate students and the National Guard as contact tracers.

**Ohio (OH)**

**Office of the Governor Mike DeWine**

- Governor DeWine released new guidelines regarding testing prioritized into three categories of symptomology, with priority one including hospitalized individuals and health care workers.
  - [https://content.govdelivery.com/attachments/OHODY/2020/05/04/file_attachments/1442911/testing%20update%205.4.2020.pdf](https://content.govdelivery.com/attachments/OHODY/2020/05/04/file_attachments/1442911/testing%20update%205.4.2020.pdf)
On April 25, 2020, Governor DeWine announced new partnerships to secure testing swabs and reagent, thereby substantially increasing access to testing in Ohio. [Source](https://coronavirus.ohio.gov/wps/portal/gov/covid-19/resources/news-releases-news-you-can-use/Reagent-and-Testing-Swabs-Contact-Tracing-Foster-Care)

Instituted a Post-Acute Regional Rapid Testing program in Central Ohio, which fields calls from nursing facilities and deploys teams to conduct tests of patients [Source](https://www.cleveland.com/coronavirus/2020/05/ohios-strategy-to-fight-coronavirus-at-nursing-homes-deploying-testing-strike-teams-to-affected-facilities.html)

**Ohio Department of Health (ODH)**

- Updated COVID-19 testing guidance that applies to all COVID-19 testing in the State of Ohio. Ohio has modified Centers for Disease Control and Prevention (CDC) guidance to meet the specific needs of the state in light of changes in testing availability and evolving knowledge of COVID-19 and its impact on Ohioans [Source](https://coronavirus.ohio.gov/wps/portal/gov/covid-19/healthcare-providers-and-local-health-districts/for-healthcare-providers/updated-covid-19-testing-guidance)
- There are five priority groups for testing based on symptoms, vulnerability, status as health care worker, residence, contact history and age [Source](https://coronavirus.ohio.gov/wps/portal/gov/covid-19/healthcare-providers-and-local-health-districts/for-healthcare-providers/updated-covid-19-testing-guidance)

**University Hospital System - Cleveland**

- The Manufacturing Advocacy and Growth Network (MAGNET), in collaboration with University Hospitals and The Ohio Manufacturing Alliance to Fight COVID-19, has developed a new protective testing platform for health care workers assessing the spread of COVID-19. Health care experts at University Hospitals and UH Ventures, its innovation and commercialization division, believe these specially designed barriers could decrease the need for valuable personal protective equipment (PPE), speed the testing process, and better protect front line health care workers [Source](https://news.uhhospitals.org/news-releases/magnet-delivers-improved-covid-19-testing-platform-in-partnership-with-university-hospitals-and-the-ohio-manufacturing-alliance.htm)

**South Carolina (SC)**

**South Carolina Department of Health and Environmental Control (DHEC)**

- Maintains a web page that provides state and federal resources and updates on changes to infection control policies and guidelines [Source](https://scdhec.gov/infectious-diseases/viruses/coronavirus-disease-2019-covid-19/nursing-homes-covid-19)
- Coordinated statewide nursing home testing and education [Source](https://www.scdhec.gov/news-releases/south-carolina-test-all-residents-staff-nursing-homes-covid-19)
South Dakota (SD)
Tieszan Memorial Home
- Tieszan Memorial Home used its social media page to inform community and resident's families about COVID-19 mass testing. The intent was for families and residents' representatives to have an opportunity to read the information prior to the personal call to obtain consent for the testing. This provided time for representatives to gather any questions they might have, ultimately contributing to a quicker process in obtaining consents
  https://www.facebook.com/104949384475413/posts/145077053795979/

Tennessee (TN)
The Middle Tennessee Regional Healthcare Quality Improvement Collaborative Communication Coalition
- The Middle Tennessee Regional Healthcare Quality Improvement Collaborative Communication Coalition, a coalition working with Alliant Health Services (AHS), formed a task force that meets every other Thursday with representation from multiple counties in the Nashville area. Nursing homes, assisted living centers, the Mayor’s office, and the Tennessee Department of Health are represented. They are working together to coordinate personal protective equipment, testing, and National Healthcare Safety Network (NHSN) needs, such as assistance needed for enrollment and/or reporting in the COVID-19 module. Providers in the area network to invite other providers. A senior quality advisor at AHS, Julie Clark, julie.clark@allianthealth.org, is available to assist connection with this coalition

Utah (UT)
- There are a number of organizations working to support nursing homes to implement and spread COVID-19 state actions
- State actions identified include:
  o Mobile unit outreach testing to all state facilities, with special emphasis on rural long term care facilities
  o Mobile testing providers bring their own personal protective equipment to perform tests, and they also guide the facility in their response to persons under investigation (PUI) cases
- With the support of the hospital and health care associations, a testing protocol has been developed for patients prior to transfer from hospitals to long term care facilities
- This has helped nursing homes ease resistance to accepting new patients in the absence of testing

Texas (TX)
Office of the Governor Greg Abbott
- On April 27, 2020, Governor Abbott released the Texans Helping Texans: The Governor’s Report to Open Texas. A key component of this plan is preventing the spread of COVID-19 cases in long term care facilities. The Report outlines the expectation that any nursing home with one case of COVID-19 should receive immediate testing for all residents and staff to immediately quantify the extent of infection. On May 11, 2020, the Governor strengthened this effort by directing that Texas state agencies test 100 percent of residents and staff in Texas nursing homes.
3. Testing Continued

Vermont (VT)
Vermont Department of Health

- Universal Testing at Facilities: When a person tests positive, testing is offered to all staff and residents
- Testing to Guide Isolation and Cohorting: Testing patients and health care personnel with rapid turn-around times can guide isolation or cohorting strategies. Facilities with no new COVID-19 cases suggesting transmission among residents or staff are recommended to test all new resident admissions (and upon implementation, any resident who has been admitted in the last 14 days), at the time of admission and at days 3, 7, 10 and 13. Residents who leave and return to the facility for any reason should follow this testing guidance. Facilities with new COVID-19 cases among residents or staff should conduct testing of all residents and staff in facility (point prevalence survey [PPS]) as soon as a new case is identified (if insufficient testing capacity for entire facility, restrict PPS to involved unit or units)

Wisconsin (WI)
Wisconsin Department of Health Services

- Expanded information for providers on ordering/securing test supplies, process, and procedures
  https://www.dhs.wisconsin.gov/covid-19/providers.htm
4. WORKFORCE AND STAFFING

Arizona (AZ)
Office of the Governor Doug Ducey
- Executive Orders were issued to:
  - Extend certain professional licenses expiring between March 1, 2020 and September 1, 2020 and defer continuing education requirements
  - Extend Good Samaritan protections for front line workers responding to the COVID-19 pandemic

California (CA)
California Department of Public Health
- Provided resources for skilled nursing facilities (SNFs) on preventing, detecting, and preparing for COVID-19 with a toolkit titled “Preparing for COVID-19 in California Skilled Nursing Facilities”

County of Santa Clara Emergency Operations Center
- Organized local resources to meet projected needs for skilled nursing facilities (SNFs)
- Distributed a survey for residents to document skills and match them with specific nursing home needs, such as janitorial services and social work
  https://www.sccgov.org/sites/covid19/Pages/i-can-help.aspx

Los Angeles County Emergency Operations Center
- Developed exemptions for emergency medical technicians (EMTs) to function as nurses’ aides to increase the staffing at the five impacted skilled nursing facilities (SNFs) in the county
- Engaged the National Guard to provide ancillary support in the SNFs with COVID-19

Delaware (DE)
Delaware Health Care Facilities Association
- Temporary nursing aide training allows staffing to increase and may be able to recruit later, giving unemployed workers a job
  https://www.dhcfa.org

Office of the Governor John Carney
- Removed restrictions on out-of-state health care workers to assist in COVID-19 response
4. Workforce and Staffing Continued

- This allowed individuals who previously held a license to practice medicine in any United States jurisdiction to provide health care services on a volunteer basis in Delaware when authorized by the Public Health Authority
- The provider must be appropriately trained, and their license must have been in good standing for a five-year period before it expired or lapsed.

Florida (FL)
Florida Department of Health
- Extended health care practitioner licensure to avoid lapse and allowed reactivation of licensure for those whose license lapsed in the last two years

Office of the Governor Ron DeSantis
- Approved a temporary personal care attendant (PCA) program requested by the Florida Health Care Association and Florida LeadingAge to allow on-the-job training program for nursing assistants to work in nursing homes. The program provides an eight-hour initial training followed by supervised on-the-job training and allows the PCA to perform additional duties.

Georgia (GA)
Georgia Association of Nurses in Long Term Care
- Continued supportive efforts of the Georgia Health Care Association for updates to nursing staff and encouraged centers to take advantage of applicable waivers to reduce staffing burdens.

https://www.ghca.info/ganltc

Georgia Healthcare Facility Regulation Department
- Worked closely with the Georgia Department of Public Health, the Georgia Health Care Association (GHCA), and the National Guard to stay abreast of COVID-19 activity and the impact on centers, while remaining vigilant for highest quality of care for the residents in Georgia.
- Provided website updates with changes in rules/regulations, contact information and nurse aide program temporary waiver for staffing.
- Surveyors have been connecting with long term care organizations collecting information related to COVID-19 and coordinating with the Georgia National Guard to develop a system for collection of COVID-19 data.
- The data collection platform will update the public daily at 2 PM, replacing a previous report from the Office of the Governor Brian Kemp.

https://dch.georgia.gov/divisionsoffices/healthcare-facility-regulation

LeadingAge
- Developed and shared an 1135 Nursing Home Blanket Waiver Chart.

- Worked to get temporary nursing assistants (TNAs) during emergency to alleviate shortages of certified nursing assistants (CNAs).
State Actions for COVID-19 Management and Response
4. Workforce and Staffing Continued

Hawaii (HI)
University of Hawaii Department of Geriatrics, Healthcare Association of Hawaii
- Long term care (LTC) COVID-19 Project Extension for Community Healthcare Outcomes (ECHO) series included topics such as COVID-19 testing, planning for dementia residents, symptom management, and readiness in care homes and congregate settings
  https://geriatrics.jabsom.hawaii.edu/geriatrics
  https://geriatrics.jabsom.hawaii.edu/ltss

Illinois (IL)
American Medical Association
- Illinois is one of eight states to partner with the American Medical Association (AMA) on volunteer health care professionals
- The AMA Guide includes information for physicians and health care professionals to support communities severely impacted by COVID-19. It tells how and where to volunteer—and things to consider before registering. For state agencies and institutions, the guide includes information on third-party organizations that can identify and match volunteers accordingly, as well as resources for credentialing in an emergency

Indiana (IN)
Indiana State Department of Health
- Indiana Governor Eric Holcomb initiated early actions Executive Orders, including authorization of temporary personal care attendant positions and training for nursing homes
- A waiver issued guidance for creating COVID-19 long term care facilities
- Facility staffing requirements have been relaxed and options expanded
- Reimbursement rates for COVID-19 facilities were enhanced by 50 percent
- Liability protection has been provided
- Data support helps hospitals identify post-acute COVID-19 facilities for transfer
- Infection control teams train facilities on COVID-19 testing
- Provision of all necessary personal protective equipment (PPE) has been offered to priority facilities, similar to hospitals
- An online workforce survey is available with a specific area to declare interest in working in long-term care. This is coupled with an Indiana health care workforce needs request form

Iowa (IA)
Meyer Pharmacy
- Meyer Pharmacy has a respiratory therapist on staff and is performing mask fit training for local nursing home staff
  https://meyerpharmacy.com/pharmacy/covid-19
University of Iowa

- The National Nursing Home Social Work Network is a geriatric workforce enhancement program funded by grants from the Health Resources and Services Administration (HRSA) to develop a health care workforce that maximizes patient safety and engagement and to improve health outcomes for older adults. Much of its work is focused on long term care.
- The program offers a weekly online support group meeting and multiple online resources for advance care planning, ethical decisions, and how to prepare and support residents, staff, families, and themselves.
  https://clas.uiowa.edu/socialwork/nursing-home/national-nursing-home-social-work-network

Kansas (KS)

Kansas Department for Aging and Disability Services (KDADS)

- Issued a policy allowing hours worked as a certified nursing assistant (CAN) Trainee II to count for the 25 hours of hands-on training needed to complete the CNA training course. This allows facilities to expedite the process for training CNAs and build workforce more quickly.
- KDADS announced hiring of COVID-19 long term supports and services (LTSS) liaison - working half-time to assist homes with:
  - LTSS technical assistance for local public health and emergency management, including education on the characteristics and needs of LTSS providers like facility and community-based providers
  - Facilitating cross-agency partnership between state and local organizations, including review and reporting at the state level on best practices
  - Identifying future priority issues and preparedness needs for LTSS consumers and providers
  - Serving as an additional channel of communication between state and local officials and stakeholders
  https://www.kdads.ks.gov/required/AllNewsItems/2020/05/12/kdads-receives-more-than-$6.7-million-in-additional-cares-act-funding-to-support-older-americans-act-programs

Louisiana (LA)

Louisiana Department of Health (LDH)

- On April 22, 2020, launched a pilot in response to COVID-19 to help facilities with acute health care staffing shortages fill those vacancies with qualified candidates who are otherwise out of work.
- Launched pilot Louisiana Health Work Connect pilot in Baton Rouge with plans for a subsequent statewide rollout. Any qualified nursing home or hospital in the Baton Rouge area can participate in the program. Interested health care workers submit their information and qualifications using a form. Participating health care facilities regularly update the Department on their staffing needs.
- The Department provides a list of candidates to facilities tailored to their staffing needs. A participating facility then contacts a health care worker to begin the hiring process.
  https://healthworkconnect.la.gov
4. Workforce and Staffing Continued

- Assembled the LDH Nursing Home Facility Toolkit for nursing home support. This toolkit provides state and best practice guidance for personal protective equipment (PPE), information about an option for safely sanitizing N95 masks for re-use, staffing resources, and testing recommendations, along with a variety of pertinent contact numbers http://ldh.la.gov/assets/medicaid/hss/docs/Coronavirus_2019/LDH_NH_Facility_Toolkit.pdf

Maine (ME)

**Maine Department of Health and Human Services**

- Enacted the Extraordinary Circumstance Allowance: Maine Department of Health and Human Services boosts payments to congregate care facilities in response to COVID-19
- MaineCare will pay extra costs associated with COVID-19, including staffing, supplies, and personal protective equipment with $10.1 million in state and federal funds to support facilities https://www.maine.gov/governor/mills/news/mills-administration-takes-steps-support-nursing-homes-response-covid-19-2020-03-26

Maryland (MD)

**FutureCare Nursing Homes**

- Employee support videos by Dr. William Mansbach provide tips on managing stress during the COVID-19 pandemic https://futurecare.com/employeesupport

**Health Facilities Association of Maryland**

- David Combs, a photographer, composer, and producer of instrumental music, is offering free access to many of his music videos via YouTube. His soothing and relaxing music has proven to play a constructive role in reducing the stress and anxiety in the current stressful environment of isolation in health care facilities https://www.youtube.com/channel/UCrvuWa0VW2Umc5NgQyUQKMg

Massachusetts (MA)

**Mass.gov**

- Created a Rapid Response Clinical Team & Staff Resource on April 15, 2020 to provide short-term support for facilities with high volume of cases or with critical staffing needs
- Enacted a 10 percent MassHealth rate increase (approximately $50 million) across the board for all nursing facilities
- A long term care portal matches individuals that have registered through the portal with the staffing requests submitted by facilities (with a $1,000 sign on bonus) https://www.mass.gov/info-details/covid-19-updates-and-information

Michigan (MI)

**Vanderbilt University Medical Center, Michigan Medicine**

- The multi-institutional collaborative is developing tools to support hospitals, nursing homes, and other medical institutions in projecting front-line workforce needs, re-deploying clinical teams, and protecting the health and well-being of providers
- Tools include a hospital staffing needs calculator, staffing needs projections, COVID-19 response planner, staffing surveys and allocation tools, daily personal protective equipment usage calculator, provider care and resources, and educational resources https://www.covidstaffing.org
Wayne State University Institute of Gerontology

- Researchers at Wayne State University and Eastern Michigan University are studying the impact of the COVID-19 pandemic on front line health care workers

Minnesota (MN)
Statewide Health Care Coordination Center

- Partnered with stakeholders, such as the Board of Nursing, to recruit nursing staff to work in long term care facilities that are not able to fully staff due to staff illness

Missouri (MO)
St. Louis County Department of Public Health

- Established a High-Risk Task Force Team composed of volunteer doctors and registered nurses. Team members serve as liaisons between long term care facilities and the Department of Public Health. Working remotely, team members answer questions, meet informational needs and monitor each facility’s supply of personal protective equipment (PPE)
- In some cases, the task force has worked with the St. Louis County Police’s Office of Emergency Management to provide PPE to facilities that lack adequate supplies

University of Missouri Sinclair School of Nursing’s Quality Improvement Program for Missouri (QIPMO)

- QIPMO is a cooperative service between the University of Missouri Sinclair School of Nursing and the Missouri Department of Health and Senior Services. It is composed of gerontological nurses who provide education on best practices to improve care delivery and outcomes for nursing home residents
- QIPMO hosts nursing home leadership support group meetings from which the best practices emerged from participating homes:
  - Alternating staff in teams (one team of 7-10, including housekeeping, dietary, nursing, and one from nursing administration) work 5-7 days on, then 5-7 days off
  - Staff team in 12-hour shifts—again, all staff—this keeps the consistency of patients to staff and allows the staff real rest time, which otherwise they are not getting
  - COVID-19-specific teams in 12-hour rotations
  - Cross-training of staff for housekeeping tasks in the COVID-19 unit to minimize the number of people in the unit
  - Place for staff to change and keep their street clothes, perhaps even shower so it reduces the spread and reduces staff anxiety about bringing it out of the building
  https://nursinghomehelp.org/qipmo-program

Montana (MT)
Montana Healthcare Mutual Aid System (MHMAS)

- MHMAS is the emergency system for the advance registration of volunteer health professionals for the state of Montana. It serves as the system for identifying, activating, and deploying volunteers during disasters, and functions as a communication tool to provide volunteers with information about training and exercises
  https://dphhs.mt.gov/publichealth/phep/mhmas
Nebraska (NE)

_The National Emerging Special Pathogen Training and Education Center (NETEC)_

- NETEC developed a webinar to support health care workers in managing the unique challenges in a pandemic and the elements of a comprehensive “care of the caregiver” strategy, including peer support, building resilience, streamlined behavioral health referrals, preventing moral injury, supporting health care worker families, and leadership. The webinar includes downloadable resources to implement a program
  https://www.nebraskamed.com/for-providers/covid19/workforce-behavioral-health-support

Nevada (NV)

_State of Nevada_

- Battle Born Volunteers
- State licensed nursing pools provided as a resource to facilities that require assistance with staffing

New Hampshire (NH)

_New Hampshire Employment Security_

- Established the Long Term Care Workforce Stabilization Program
- This temporary stabilization funding incentivizes front line, direct-care workers to remain or rejoin this critical workforce during the COVID-19 emergency
  https://www.nhes.nh.gov/services/employers/longtermcare.htm

New Jersey (NJ)

_New Jersey Department of Health_

- The Guidance for COVID-19 Diagnosed and/or Exposed Healthcare Providers worksheet provides guidance for health care providers to determine if and when they should return to work; and if they do, how to transition back safely
- The State of New Jersey COVID-19 Jobs and Hiring Portal provides job postings for those out of work due to COVID-19 as well as an additional link for employers to post open positions related to COVID-19
  https://jobs.covid19.nj.gov/?Facets.filterbox.filter0=%5B%5D&Facets.filterbox.filter1=%5B%5D
- The Road Back: Restoring Economic Health Through Public Health references six key principles for stages of reopening businesses and safely staffing them in New Jersey

_New Jersey Poison Center_

- Introduced a health hotline to address the concerns of New Jersey residents. Anyone in the state of New Jersey can call 1-800-962-1253 to speak directly with a health care professional who can provide general information and answer questions about the current outbreak
  https://www.njpies.org/coronavirus
Office of the Governor Phil Murphy
- On March 28, 2020, Governor Phil Murphy issued an Executive Order waiving the requirements for registered medical technicians (RMT) and certified home health aides (HHA) and allowed them to function in the role of certified nursing assistants (CNA) in long term care facilities [https://nj.gov/infobank/eo/056murphy/pdf/EO-111.pdf](https://nj.gov/infobank/eo/056murphy/pdf/EO-111.pdf)
- Facilities are expected to provide basic safety and infection orientation
- Facilities must document attempts to meet the staffing standards

New Mexico (NM)
State of New Mexico
- Nursing homes have designated staff for COVID-19 wings, which helps staff take ownership of these residents
- Some staff are now asking to be part of the designated COVID-19 staff team, whereas previously facilities had staff resigning once active cases were identified
- Condensed certified nursing assistant (CNA)/certified medical assistant (CMA) training program to reduce training time without reducing quality
- Removed restrictions on out-of-state health care workers to assist in COVID-19 response

New York (NY)
New York State Department of Health
- COVID-19 Nursing Home Letter Regarding Residents outlines protocols to separate residents into cohorts of positive, negative, and unknown as well as separate staffing teams to care for COVID-19-positive residents and non-positive residents. If a facility is unable to cohort properly, it must transfer residents to another long term care facility or another non-certified location [https://coronavirus.health.ny.gov/system/files/documents/2020/05/nhletterregarding-residents-4.29.20.pdf](https://coronavirus.health.ny.gov/system/files/documents/2020/05/nhletterregarding-residents-4.29.20.pdf)
- Health Advisory: Nursing Home Cohorting FAQs states that roommates of a resident who tests positive for COVID-19, who themselves have a negative test, are at high risk of being infected and having a positive test within the next 14 days. They should be immediately separated from the resident who tests positive and placed in a private room [http://leadingagency.org/home/assets/File/5_13_20-DOH-Nursing_Home_Cohorting_FAQs.pdf](http://leadingagency.org/home/assets/File/5_13_20-DOH-Nursing_Home_Cohorting_FAQs.pdf)
- A National Guard COVID-19 response team provides medical staff at Javits Center and New York City hospitals and testing sites
New York State Health Facilities Association, New York State Center for Assisted Living

- COVID-19 – Skilled Nursing Facility Visitation Guidance: Utilizing Non-Direct Care Staff to Support Needs describes how some direct or non-direct, non-urgent care can be redirected during the pandemic to assist staff in essential activities. Typical Nurse Aide duties can be shifted to other non-direct care staff so Aides can support staff and resident care

Office of the Governor Andrew Cuomo

- The Governor and the Commissioner of Health have sent out letters to active and inactive licensees in New York State seeking volunteers to assist in the COVID-19 response efforts
  http://www.op.nysed.gov/COVID-19Volunteers.html

North Carolina (NC)
North Carolina Division of Health and Human Services

- Established online registration for medical providers interested in picking up additional staffing that includes long term care facilities
- These applications will be matched with requests from health care facilities
  https://nc.readyop.com/fs/4cjq/697b

North Dakota (ND)
North Dakota Department of Health and Human Services (ND DHHS)

- Hiring furloughed health care professionals to assist with the state’s COVID-19 response, including contact tracing. In addition, the ND DHHS is enlisting public health graduate students and the National Guard as contact tracers

Ohio (OH)
The Cleveland Clinic, SAS

- The Cleveland Clinic and SAS have combined forces and data to create new predictive models to better plan staffing, supply chains, financing, etc. due to COVID-19

Ohio Department of Health

- Responsible Restart Ohio: A Guide for Health Care designed to provide insight and best practices to resume non-urgent health care services across the state through a stepwise approach. This guide is intended to be a resource for patients, providers, health systems, and Ohio’s COVID-19 Three Zone response infrastructure as the state begins to resume typical standards of health care
4. Workforce and Staffing Continued

- COVID-19 Checklist: Recommendations for essential employees in health care and other high-risk settings on actions to help protect their households from COVID-19

**Ohio Department of Medicaid**
- Significantly enhanced Medicaid’s telehealth policy to allow reimbursement for a wider group of practitioners, services, and setting, including those delivered to residents in nursing facilities and other long term care settings. This was part of the state’s overall effort to help reduce exposure to COVID-19 for patients, their families, and the health care workforce engaged in Ohio’s response to the pandemic

**Rhode Island (RI)**
*Rhode Island Responds*
- Offers recruitment and management of Rhode Island’s health care volunteers under one statewide system
  [http://www.riresponds.org](http://www.riresponds.org)

**South Carolina (SC)**
*South Carolina Department of Health and Environmental Control (SC DHEC)*
- SC DHEC waived Regulation 61-17, Section 603.C to temporarily allow nursing homes to employ certified South Carolina Emergency Medical Technicians (EMTs) to perform tasks that nurse aides generally perform, including meeting residents’ needs for personal hygiene, nutrition, ambulation, and elimination, as well as taking vital signs. This waiver will remain in effect during the declared State of Emergency

**Tennessee (TN)**
*Vanderbilt University Medical Center, the University of Michigan, the Procedural Learning and Safety Collaborative*
- Volunteers created a website to help hospitals and nursing facilities of all sizes anticipate their staffing and personal protective equipment (PPE) needs for the COVID-19 surge. Modules included:
  - COVID-19 Staffing Needs Calculator: Calculated staffing needs by clinical role as inpatient census increased
    [https://www.covidstaffing.org/modules/staffing-needs](https://www.covidstaffing.org/modules/staffing-needs)
  - COVID-19 Response Planner: Planned a phased staffing response to COVID-19, based on available beds, staff, and locations
    [https://www.covidstaffing.org/modules/response-planner](https://www.covidstaffing.org/modules/response-planner)
  - Personal Protective Equipment (PPE) Needs Calculator: Calculated PPE needs as inpatient census increased
    [https://www.covidstaffing.org/modules/daily-ppe-calculator](https://www.covidstaffing.org/modules/daily-ppe-calculator)
  - Staff Skills Surveys: Determined staff skills specific to COVID-19 patient care needs
    [https://www.covidstaffing.org/modules/supply](https://www.covidstaffing.org/modules/supply)
4. Workforce and Staffing Continued

- Role Allocation Toolkits: Based on staff and trainee skills, assessed COVID-19 patient care roles where staff members could re-deploy
  https://www.covidstaffing.org/modules/supply

Texas (TX)
State of Texas Assistance Request (STAR), Texas Health and Human Services Commission (HHSC)
- To ensure the safety of residents in facilities that have COVID-19-infected staff, Texas has contingency contracts to provide short-term staffing assistance to facilities that cannot maintain adequate staffing due to COVID-19. This assistance may be requested through a STAR (State of Texas Assistance Request) in coordination with HHSC or local emergency management

Virginia (VA)
Virginia Department of Health (VDH)
- VDH developed a resource page that provides information and the tools to request and mobilize volunteers from the Virginia Medical Reserve Corp to provide long term care staffing and medical surge support needed for COVID-19 response in the Commonwealth
  https://www.vdh.virginia.gov/mrc/covid19request

West Virginia (WV)
Stonerise Healthcare LLC
- Stonerise, a nursing home chain in West Virginia, has started “safe harbor” units used to safely accept new admissions. Safe harbor is designed exclusively for all new admissions, distinct units with dedicated staff, and more stringent admission criteria to limit the risk of COVID-19 to existing patients
  http://www.stonerisehealthcare.com/coronavirus-update

West Virginia Responder Emergency Deployment Information (REDI) System
- Web-based system was developed to facilitate health and medical response through identification, credentialing, and deployment of West Virginians willing to serve in an emergency, as well as non-emergent situations
- Registration is open to West Virginia’s health and medical professionals, as well as others who live or work in West Virginia and are willing to assist during a health-related emergency or event
  https://www.wredni.org

Wisconsin (WI)
Wisconsin Department of Health Services
- Nurse Aide training was revised by the Wisconsin Department of Health Services, Division of Quality Assurance to address the unprecedented need for additional nursing assistants to join the workforce
  https://www.dhs.wisconsin.gov/covid-19/nurse-aide.htm
5. COHORTING

California (CA)

*California Department of Public Health*

- Provided resources for skilled nursing facilities (SNFs) on preventing, detecting and preparing for COVID-19 through the following:
  - A toolkit titled “Preparing for COVID-19 in California Skilled Nursing Facilities”
  - A toolkit titled “Assessment of California Skilled Nursing Facilities to Receive Patients with Confirmed COVID-19”
  - A toolkit titled “Detection and Management of COVID-19 Cases in Skilled Nursing Facilities”

*San Mateo County Health and the Health Plan of San Mateo*

- Announced Centers of Excellence Program for Skilled Nursing Facilities
- Designated three skilled nursing facilities (SNFs) as Centers of Excellence to proactively coordinate care for COVID-19 residents, which were identified for their high standards of patient care and expertise with infection control
- Centers of Excellence will treat COVID-19-positive patients discharged from local hospitals, as well as patients from community settings who have COVID-19 and require a higher level of care

*County of San Luis Obispo, in partnership with Cal Poly San Luis Obispo, Dignity Health and Tenet Healthcare*

- Opened its Alternate Care Site located at Cal Poly San Luis Obispo's Recreation Center
- This site will help relieve local hospitals and nursing homes by housing patients with needs between home care and hospitalization

Connecticut (CT)

*Northbridge Health Care Center (NHCC)*

- As a COVID-19 home, NHCC has established routines and care that lend comfort to residents and staff alike
  https://ctmirror.org/2020/05/01/a-visit-outside-a-home-where-all-the-patients-have-covid-19
Delaware (DE)
Office of the Governor John Carney
- An April 15, 2020 Emergency Order sought to protect residents and workers in nursing facilities.
- Governor Carney’s order required all nursing facilities in Delaware to immediately:
  - Establish a cohort of staff assigned to care for known or suspected COVID-19 residents.
  - Designate a room, unit, or floor of the nursing facility as a separate observation area where newly admitted and re-admitted residents are kept for 14 days, while being observed every shift for signs and symptoms of COVID-19.
  - Designate a room, unit or floor of the nursing facility to care for residents with known or suspected COVID-19.

Florida (FL)
Agency for Health Care Administration
- In the state of Florida, the Agency for Health Care Administration is maintaining a web page which identifies COVID-19 Isolation Centers throughout the state with information about which types of patients are appropriate for transfer, who can discharge patients to these isolation centers and contact information to discuss potential discharge.

Georgia (GA)
Office of the Governor Brian P. Kemp
- Issued guidance in consultation with the Centers for Medicare & Medicaid Services (CMS) to help mitigate the spread of COVID-19 in nursing homes to include symptom screening for visitors, staff and residents, and separate staffing teams, facilities and units for COVID-19-positive/unknown and COVID-negative residents.

Hawaii (HI)
University of Hawaii Department of Geriatrics, Healthcare Association of Hawaii
- Long term care (LTC) COVID-19 Project Extension for Community Healthcare Outcomes (ECHO) series continues and has since included topics, such as COVID-19 testing, planning for dementia residents, symptom management, readiness in care homes, and congregate settings.

Idaho (ID)
The Idaho Healthcare Association, Idaho Department of Health
- In Idaho, the prevalence of active COVID-19 cases in nursing homes is relatively low. The Idaho Healthcare Association, the Idaho Department of Health, and the long term care community have contributed ideas to a state actions report.
- Larger nursing home corporations are setting up COVID-19-only units for COVID-19-positive residents and for residents transferred from hospitals for treatment of COVID-19.
Indiana (IN)

**Indiana State Department of Health (ISDH)**

- On May 11, 2020, a hospital to post-acute care transfer COVID-19 assessment form was updated. [https://www.coronavirus.in.gov/files/IN_COVID-19_Hospital%20to%20Post-Acute%20Care%20Transfer%205.11.20.pdf](https://www.coronavirus.in.gov/files/IN_COVID-19_Hospital%20to%20Post-Acute%20Care%20Transfer%205.11.20.pdf)
- On May 7, 2020, COVID-19 guidance for hospital discharge to long term care facilities was updated. [https://www.coronavirus.in.gov/files/IN_COVID-19_LTCtransfer%205.7.20.pdf](https://www.coronavirus.in.gov/files/IN_COVID-19_LTCtransfer%205.7.20.pdf)
- On May 3, 2020, Communication guidelines for long term care facilities were released. [https://www.coronavirus.in.gov/files/IN_COVID-19_comm%20guidelines%205.3.20.pdf](https://www.coronavirus.in.gov/files/IN_COVID-19_comm%20guidelines%205.3.20.pdf)
- On March 23, 2020, a COVID-19 infection prevention toolkit was distributed to 737 facilities by a long term care (LTC) nurse survey team. This comprehensive toolkit included Centers for Medicare & Medicaid Services (CMS) and Centers for Disease Control and Prevention (CDC) tools and checklists for infection control and ISDH standard operating procedures for cohorting. This included a plan to rapidly implement cohorting of confirmed or presumed COVID-19 patients in long term care facilities.
- Long term care nurse surveyors are assigned to nursing homes with COVID-19-positive cases. These surveyors make daily onsite visits to congregate facilities to help them manage resident cohorting.
- The state infection preventionist is available daily to all facilities and nurse surveyors with COVID-19-positive residents to help coordinate care and develop an infection prevention plan to keep staff and other residents safe.
- The state infection preventionist and long term care nurse surveyors use bed boards and color-coded facility maps to help identify residents, visualize testing results, and facilitate cohorting of residents to appropriate zones. [https://www.coronavirus.in.gov/files/IN_COVID-19%20IP%20Toolkit%20ISDH_5.5.2020.pdf](https://www.coronavirus.in.gov/files/IN_COVID-19%20IP%20Toolkit%20ISDH_5.5.2020.pdf)

Iowa (IA)

**GRX Holdings, LLC**

- GRx Pharmacies have helped a facility proactively set up an isolation unit, providing med cart, treatment cart and are waiting on a board of pharmacy waiver to provide a separate emergency kit for the unit. [https://www.grxholdings.com](https://www.grxholdings.com)

Massachusetts (MA)

**Beaumont Rehabilitation and Skilled Nursing Center, Worcester County, UMass Memorial Medical Center**

- UMass Memorial Medical Center helped transform the Beaumont nursing home into a recovery center by helping the facility set up infection control protocols and procedures and providing recommendations to adapt its physical structure.
• To properly isolate staff from the residents, Beaumont created walls on each of the four resident care floors, separating the last two resident rooms and the sitting room from the rest of the resident care area. The staff use the two resident rooms for donning and doffing personal protective equipment (PPE) at the beginning and end of shifts, while the sitting room is used for storing PPE and other supplies.

Mass.gov
• Approaches to expand capacity for dedicated COVID-19 skilled nursing facilities have included converting existing occupied facilities to fully dedicated COVID-19 facilities; converting empty facilities to new dedicated COVID-19 nursing facilities; and creating dedicated COVID-19 wings within a broader nursing facility.
• On-site management and operational support has been provided to assist with staffing, vendors, implementing infection control measures, etc.

Minnesota (MN)
Minnesota Department of Health
• Bed tracking and cohorting is available to help the Minnesota Department of Health (MDH) identify and communicate to homes where there are private rooms, cohorted units, and cohorted buildings to help facilitate care of COVID-19 nursing home residents. Providers are asked to complete a MDH Red Cap survey. Data from the survey is uploaded into the MNTrac system.

https://dps.mn.gov/divisions/hsem/seoc/Pages/default.aspx
• COVID-19 case workers are assigned once a nursing home has a COVID-19-positive case. Case managers make daily calls to congregate facilities to help them manage their cases.
• The case manager is responsible for communicating, collaborating, and coordinating the care of the COVID-positive residents and develops an infection prevention plan to keep staff and other residents safe.

Nebraska (NE)
Callaway Good Life Nursing Home Nebraska Infection Control Assessment and Promotion (ICAP) Program, Nebraska Department of Health and Human Services
• A coding system for cohorting residents was developed by a Nebraska nursing home administrator, then spread state-wide by the Nebraska ICAP/Health care-acquired infection team.
• Residents are identified/cohorted as:
  o Red – tested positive area for residents
  o Yellow – not positive, tested negative but exposed to Red people
  o Gray – could be possible exposure
  o Green – with no exposure

State Actions for COVID-19 Management and Response

5. Cohorting Continued

Nevada (NV)

* Nevada Division of Public and Behavioral Health
  - Issued technical bulletin to health care facilities that included cohorting information
  - Issued chief medical officer orders regarding cohorting to facilities experiencing infection control issues

New Jersey (NJ)

* New Jersey Department of Health
  - New resource guides long term care facilities to amend outbreak plans to include plans for testing and retesting staff and residents, cohort COVID-19-positive residents, exclude staff who test positive, and set timeframes and requirements for returning to work in accordance with Centers for Disease Control and Prevention (CDC) and Department of Health recommendations [https://www.nj.gov/health/news/2020/approved/20200512a.shtml](https://www.nj.gov/health/news/2020/approved/20200512a.shtml)

New Mexico (NM)

* State of New Mexico
  - A COVID-19-only nursing home opened with the support of the health care association and the state survey agency, offering a creative way to address reimbursement of beds that remain open for future COVID-19-positive patients
  - An NCI was developed for special populations in a seriously affected rural areas
  - Medical shelters were created statewide to provide medical monitoring for self-isolating COVID-19-positive individuals

New York (NY)

* Greater New York Hospital Association (GNYHA) Continuing Care Leadership Coalition (CCLC)
  - Two New York nursing homes that continue to share their dialysis service quality practice during the COVID-19 outbreak separate COVID-19-positive patients in an isolation room. As the number of COVID-19-positive patients increase, and only if numbers go beyond the isolation room capacity, positive patients will cohort in one unit under Centers for Disease Control and Prevention (CDC) guidelines. All patients and staff are masked at all times; handwashing practices are strictly enforced; all dialysis chairs are six feet or more from each other; and routine practice includes cleaning of all surfaces with bleach (1:10 solution) between uses [http://www.cclcny.org](http://www.cclcny.org)

* New York State Department of Health
  - COVID-19 Nursing Home Letter Regarding Residents outlines protocols to separate residents into cohorts of positive, negative, and unknown as well as separate staffing teams to care for COVID-19-positive residents and non-positive residents. If a facility is unable to cohort properly, it must transfer residents to another long term care facility or another non-certified location [https://coronavirus.health.ny.gov/system/files/documents/2020/05/nhletterregarding-residents-4.29.20.pdf](https://coronavirus.health.ny.gov/system/files/documents/2020/05/nhletterregarding-residents-4.29.20.pdf)
5. Cohorting Continued

- Health Advisory: Nursing Home Cohorting FAQs states that roommates of a resident who tests positive for COVID-19, who themselves have a negative test, are at high risk of being infected and having a positive test within the next 14 days. They should be immediately separated from the resident who tests positive and placed in a private room
  [http://leadingageny.org/home/assets/File/5_13_20-DOH-Nursing_Home_Cohorting_FAQs.pdf](http://leadingageny.org/home/assets/File/5_13_20-DOH-Nursing_Home_Cohorting_FAQs.pdf)

**Ohio (OH)**

*Office of the Governor Mike DeWine*

- Governor DeWine created a Minority Health Strike Force to help address issues with COVID-19 and minorities

**Rhode Island (RI)**

*Oak Hill Center in Pawtucket*

- Oak Hill Center will now be a central facility to accept COVID-19-positive patients who no longer require acute inpatient care. This will allow these patients to receive specialized rehabilitation and step-down, post-acute care while reserving beds for patients who need inpatient treatment

**Texas (TX)**

*Texas Health and Human Services Commission Regulatory Services*

- Created COVID-19 response plan for nursing facilities, which is updated regularly based on federal guidance and state COVID-19 response actions.
- Nursing facilities have created plans for cohorting residents with symptoms of respiratory infection

**Utah (UT)**

*State of Utah*

- In Utah, a COVID-19-only nursing home opened with the support of the health care association and the state survey agency, offering creative ways to handle reimbursement of beds that remain open for future positive COVID-19 patients

**Vermont (VT)**

*Vermont Department of Health*

- Memory care units pose unique challenges, and the safety and comfort of patients must be taken into consideration before moving them to isolation units or alternate care facilities. Facilities should consider the feasibility of isolating patients in units where they reside and conducting sequential testing on each patient. In facilities where at least one COVID-19-positive resident or staff member has been identified, its memory care units should be established as negative units. If one or more COVID-19 positive residents or staff are detected within the memory care unit, the entire unit should be designated as a positive cohort.
6. INFECTION CONTROL “STRIKE TEAMS”

California (CA)
California Department of Public Health
- Provided resources for skilled nursing facilities (SNFs) to help prevent, detect, and prepare for COVID-19 through the following:
  - A toolkit titled “Assessment of California Skilled Nursing Facilities to Receive Patients with Confirmed COVID-19”
  - A toolkit titled “Detection and Management of COVID-19 Cases in Skilled Nursing Facilities”

Health Services Advisory Group (HSAG)
- HSAG infection preventionists created a mini-webinar series to assist nursing homes with the Centers for Medicare & Medicaid Services (CMS) COVID-19 Focused Survey for Nursing Homes. The series highlights the components of the survey and provides guidance. Each 10-minute section is meant to be reviewed with nursing home staff members, possibly during daily huddles. Sections include:
  - Part 1 and 2: General Standard Precautions and Hand Hygiene
  - Part 2: Transmission-Based Precautions
  - Part 2.1: Personal Protective Equipment
  - Part 3: Resident Care and Infection Prevention Standards, Policies, and Procedures
  - Parts 4 and 5: Infection Surveillance
  - Parts 6 and 7: Visitor Entry, Education, Monitoring, and Screening of Staff
  - Parts 8 and 9: Emergency Preparedness, Staffing in Emergencies, and a Summary of the Survey

District of Columbia (D.C.)
The District of Columbia Health Care Association
- Implemented Secret Shoppers for Hand Hygiene, when workers secretly observe other workers and record compliance
  https://www.dchca.org

Florida (FL)
Florida Department of Health and Florida Health Care Association (FHCA)
- Created COVID-19-dedicated web pages, with links to details of emergency response/strike teams (mobile units)
Office of the Governor Ron DeSantis

Orlando Health System
- Orlando Health System (a.k.a. Orlando Health) implemented “COVID Safety Officers (CSOs)” in all their facilities. This health system includes acute care, two long term care facilities and physician practices. Every shift, a designated staff person is the CSO tasked to observe employees donning and doffing personal protective equipment (PPE), performing appropriate hand hygiene, and assuring that all other infection control and prevention policies and procedures are being followed. This has provided a level of reassurance to the long term care facilities in the greater Orlando area when accepting transfers from acute care from this health system.

Idaho (ID)
The Idaho Healthcare Association, Idaho Department of Health
- The Office of the Governor Brad Little COVID-19 strike team has focused primarily on supporting hospitals and nursing homes by releasing emergency funding and enacting stay-at-home guidance.

Indiana (IN)
The Indiana State Department of Health Division of Survey and Certification
- Developed COVID-19-focused state survey requirements
- Created strike teams conduct testing in nursing homes when potential or positive COVID-19 cases are seen in residents or staff members

Iowa (IA)
Office of the Governor Kim Reynolds
- A testing strike team was sent to Tama County in response to an outbreak at a long term care facility. All staff at the facility were tested for COVID-19

Maryland (MD)
Office of the Governor Larry Hogan
- Launched statewide strike teams on April 7, 2020 comprised of the National Guard, state and local health department representatives, emergency medical services (EMS) clinicians, and doctors and nurses from local hospital systems
- The strike teams provide on-site medical triage, supplies, and equipment to overburdened nursing homes in order to slow the spread of the virus among Maryland’s most vulnerable population
- Three strike teams will be activated in response to requests from nursing homes, local health departments and Maryland Department of Health (MDH) infectious disease experts
- Testing teams identify those in close contact with a confirmed case and collect and send out specimens for the fastest test available
State Actions for COVID-19 Management and Response

6. Infection Control “Strike Teams” Continued

- Assistance teams quickly assess the situation on-site, determine equipment and supply needs and triage residents
- Clinical teams include doctors, nurse practitioners and registered nurses from major hospital systems, tasked with providing on-site medical triage and stabilizing residents
  

Minnesota (MI)
Department of Health
- Implemented enhanced respiratory surveillance in long term care facilities to rapidly identify any potential outbreaks of COVID-19 on March 17, 2020

Mississippi (MS)
Mississippi State Department of Health, Office of Epidemiology
- Created regional outbreak response teams to facilitate testing in nursing homes when potential or positive COVID-19 cases are seen in residents or staff members. Providing guidance and support to nursing homes with outbreaks

New Jersey (NJ)
Office of Congressman Josh Gottheimer
- Sponsored Outside Support (SOS) Act of 2020 legislation to create strike teams of clinical and non-clinical staff to provide immediate support to nursing homes, long term care facilities, and skilled nursing facilities experiencing outbreaks of COVID-19 in New Jersey and across the country. Bill will authorize the U.S. Secretary Health and Human Services (HHS) to allocate investment to states for the creation of these strike teams

U.S. Department of Veterans Affairs (VA)
- The VA organized five 10-person health care strike teams in five New Jersey nursing homes, consisting of VA medical workers, clinical staff, nurses, and nursing assistants

New Mexico (NM)
State of New Mexico
- Implemented enhanced respiratory surveillance in long term care facilities to rapidly identify any potential outbreaks of COVID-19

New York (NY)
Continuing Care Leadership Coalition
- Members established and educated staff regarding their COVID-19 response strategic plan
State Actions for COVID-19 Management and Response

6. Infection Control “Strike Teams” Continued

- Responses comprise the areas of clinical management; personal protective equipment (PPE) and relevant supplies inventory, procurement, distribution, use and conservation; staff management and volunteer coordination; wellness and symptom monitoring; risk assessment; establishment of criteria for testing; infection control; non-essential personnel suspension; immediate reporting of significant changes in resident and/or staff condition; ancillary services management; partnership with hospitals; advance care planning establishment or review; and ongoing communication with staff, residents and families

New York State Department of Health

- COVID-19 Infection Control Guidance for Nursing Homes and Adult Care Facilities: Official state guidance regarding infection control practices, case reporting, and other vital aspects of the COVID-19 response in nursing homes in New York

- Interim Guidance for Cleaning and Disinfection of Public and Private Facilities for COVID-19: Official state recommendations regarding supplies and processes to be utilized to reduce transmission of COVID-19

North Dakota (ND)

State of North Dakota

- The State of North Dakota Hospital Coordination and Vulnerable Population Protection Plan 2020 COVID-19 Pandemic Response plan was drafted to ensure that hospitals and communities have resources to handle a potential surge of COVID-19 patients. The plan provides the framework for the State of North Dakota in collaboration with hospitals, long term care facilities, the North Dakota National Guard (NDNG), and other state and local agencies to serve the health care needs of citizens with COVID-19 that require hospitalization. A six-point plan identifies key actions that will guide the State, hospitals, and care facilities through a tiered system

Ohio (OH)

Office of the Governor Mike DeWine

- To address the coronavirus crisis in Ohio nursing homes, the state is conducting more aggressive strategies to stop the virus by deploying a strike team to nursing homes to organize both preventative and treatment measures

Ohio Department of Health (ODH), Ohio Department of Medicaid (ODM)
• ODH and ODM partnered to develop a regulatory and payment structure for Health Care Isolation Centers that will provide a nursing facility level of care to patients who require quarantine and/or those who require care for an active COVID-19 infection
https://leadingageohio.org/aws/LAO/asset_manager/get_file/444806?ver=58

Texas (TX)
Office of the Governor Greg Abbott
• On April 27, 2020, Governor Abbott announced the formation of the Rapid Assessment Quick Response Force to provide rapid response to nursing facilities that can be deployed upon request by the Texas Health and Human Services Commission and Department of State Health Services through the Long-Term Care Regulatory and Emergency Medical Task Force. If needed, an additional team can be sent to assist the facility with immediate needs
7. INFECTION CONTROL SURVEYS AND OTHER STATE SURVEY ACTIVITY

Alaska (AK)
*Alaska State Department of Epidemiology and State Survey Agency*
- Organized collaborative weekly sessions to review and provide updates to nursing homes and assisted living facilities
- Revised infection prevention assessment checklists to be relevant to smaller rural settings
- Updated survey assessment tool

California (CA)
*Health Services Advisory Group (HSAG)*
- HSAG infection preventionists created a mini-webinar series to assist nursing homes with the Centers for Medicare & Medicaid Services (CMS) COVID-19 Focused Survey for Nursing Homes. The series highlights the components of the survey and provides guidance. Each 10-minute section is meant to be reviewed with nursing home staff members, possibly during daily huddles. Sections include:
  - Part 1 and 2: General Standard Precautions and Hand Hygiene
  - Part 2: Transmission-Based Precautions
  - Part 2.1: Personal Protective Equipment
  - Part 3: Resident Care and Infection Prevention Standards, Policies, and Procedures
  - Parts 4 and 5: Infection Surveillance
  - Parts 6 and 7: Visitor Entry, Education, Monitoring, and Screening of Staff
  - Parts 8 and 9: Emergency Preparedness, Staffing in Emergencies, and a Summary of the Survey

Colorado (CO)
*Office of the Governor Jared Polis*
- Initiated a COVID-19 Innovation Response Team, taking a multipronged approach to include increased testing, tailored social-distancing measures, a reinforced health care system, and a bolstering of state epidemiological resources
- The Colorado Department of Health and Environment (CDPHE) conducts infection control surveys and weekly stakeholder calls with the infectious disease division, the survey and certification division, and the nursing homes weekly; it also works with the emergency command center to support nursing homes

Connecticut (CT)
*Connecticut Department of Public Health*
- Conducts on-site visits to all of Connecticut’s nursing homes and long term care facilities for infection control survey
Florida (FL)
Agency for Health Care Administration (SSA)
- Nursing home infection control surveys are being completed and shared on its website
  https://ahca.myflorida.com

Georgia (GA)
Georgia Department of Public Health
- The ability to provide on-site support and develop a process for video audits has been invaluable to those in “hot spots” of COVID-19 activity. The agency collects data from health care facilities on the State Electronic Notifiable Disease Surveillance System for Georgia (SENDSS) network, supports health care facilities with virtual and on-site visits, and tests COVID-19 samples at the Georgia Department of Public Health Laboratory
  https://dph.georgia.gov

Indiana (IN)
The Indiana State Department of Health Division of Long-term Care
- Beginning on April 6, 2020, the Department has followed up on every new positive case, either by daily long term care surveyor phone call or visit, to ensure a plan is in place to care for COVID-19-positive residents
- Since April 15, 2020, protocols have included:
  o 1-10 positive cases receive weekly visits and calls
  o 11-20 positive cases receive twice-weekly visits
  o 21 cases and higher receive daily visits until stable, then visits every other day
  o Positive staff cases only receive Monday, Wednesday, and Friday calls
- Referrals for infection preventionist follow-up occur when concerns or additional assistance is needed
- The Department has contracted with a professional long term care nursing company to perform outreach and test result calls

Montana (MT)
State of Montana
- Montana has requested that all long term care and assisted living facilities complete and submit the infection control self-assessment worksheet provided in QSO-20-14-NH dated March 13, 2020. State survey and licensing staff are reviewing all submissions and working with facilities on a case-by-case basis to strengthen infection control
- Montana is conducting targeted infection control surveys in facilities using risk-based criteria to determine facility selection and scheduling

Nevada (NV)
Nevada Division of Public and Behavioral Health
- Distributed infection control and prevention assessment surveys tailored to relevant settings, analyzing information to identify gaps to help target education
- Organized collaborative weekly sessions with skilled nursing facility and assisted living associations to review and provide updates to nursing homes and assisted living facilities
- Currently performing onsite infection control surveys in skilled nursing facilities, larger assisted living facilities, and long term acute care hospitals
7. Infection Control Surveys and Other State Survey Activity Continued

- Collaborating with the Nevada National Guard to visit smaller group homes and provide educational materials on donning and doffing personal protective equipment (PPE), environmental cleaning, hand hygiene, and preventive measures to protect residents from contracting COVID-19. This information is being translated into Spanish and Tagalog. The National Guard will help smaller facilities order PPE if needed.

New Jersey (NJ)
New Jersey Department of Health
- The New Jersey COVID-19 Information Hub provides the most up-to-date information about COVID-19 and the State's response, including information about services such as food support and small business assistance.
  https://www.nj.gov/health/cd/topics/ncov.shtml

New Mexico (NM)
State of New Mexico
- Organized collaborative weekly sessions to review and provide updates to nursing homes, intermediate care facilities (ICFs), skilled nursing facilities (SNFs) and assisted living facilities.
- State survey staff use video monitoring for daily surveillance calls to nursing facilities.

New York (NY)
LeadingAge New York
- “Recommendations to Nursing Homes in COVID-19 Crisis” provides guidance to nursing homes on infection control, including the new Centers for Medicare & Medicaid Services (CMS) infection control survey tool. LeadingAge has created a supplemental tool to be used in conjunction with the CMS tool to help nursing homes prepare for and respond to COVID-19.

North Dakota (ND)
North Dakota State Survey Agency
- Every nursing home in North Dakota receives a state survey visit focused on infection prevention.
- The agency collaborated with the Great Plains Quality Innovation Network using an online tool to assess all nursing homes on infection preparedness; about 30 nursing homes volunteered for a more comprehensive assessment.

South Carolina (SC)
South Carolina Department of Health and Environmental Control (DHEC)
- SC DHEC maintains a web page that provides state and federal resources and updates on changes to infection control policies and guidelines.
Texas (TX)
State of Texas
- Created a surveyor job aid tool to help ensure thorough reviews during a focused infection control survey or investigation. The job aid tool details questions the surveyor must ask and information that must be gathered. It includes the tag/regulatory reference for the requirements related to the questions or information, and space for the surveyor to document information.

Texas Department of State Health Services
- The Texas Department of State Health Services has created a robust contact tracing program and web-based application to find and follow up with people who have been in close contact with someone who has tested positive for COVID-19. This will also be helpful for tracking cases related to nursing facility outbreaks.

Vermont (VT)
Vermont Department of Disabilities, Aging and Independent Living
- The Self-Assessment of Infection Control Program for State Licensed Homes tool is intended to provide a framework for homes and residences to assess infection control readiness. Managers or nurses may use the tool to confirm that the infection control program aligns with health care standards (if applicable to population), or to identify gaps in existing policies and procedures that may need to be addressed during the COVID-19 pandemic.

Virginia (VA)
Health Quality Innovators (HQI)

West Virginia (WV)
West Virginia Department of Health and Human Resources
- The Office of Inspector General, Office of Health Facility, Licensure and Certification maintains regular contact and communication via a statewide listserv with all nursing home administrators, regional nursing home representatives, corporate nursing home representatives, the provider association, and the state long term care ombudsman to disseminate information and answer questions. In addition, the office, among other actions:
  - Coordinated the fitting of 12 nursing home surveyors with N95 masks and Tyvek suits
  - Disseminated Centers for Medicare & Medicaid Services (CMS) and Centers for Disease Control and Prevention (CDC) guidance to all West Virginia nursing homes via listserv, including the Infection Control Toolkit
  - Mandated all nursing home administrators and key personnel participate in a webinar to discuss statewide testing requirements for the Governor’s Executive Order
Wisconsin (WI)
Wisconsin Department of Human Services Division of Quality Assurance
- Offers weekly Q&A calls for nursing homes; shares resources for community and health care providers; and integrates the expertise of infectious disease leader Dr. Chris Crnich, State Survey Agency Bureau of Nursing Home Resident Care Director Ann Angell, and state public health leadership

Wyoming (WY)
Wyoming Aging Division, Survey and Certification Bureau and Surveillance Epidemiologist, Wyoming Healthcare Association
- The Wyoming Healthcare Association offers weekly collaborative calls and bilateral support sessions for long term care and assisted living facilities
8. NURSING HOME (NH) COMMUNICATIONS

Alabama (AL)
Office of the Governor Kay Ivey
- The Office of the Governor amended the "Safer at Home Order," effective May 22, 2020 through July 3, 2020. The amended Safer at Home Order is the second phase of a multiphase statewide plan to mitigate the spread of COVID-19 in Alabama. The new updates apply to the re-opening of entertainment venues, athletic activities, educational institutions, child care facilities, and summer camps. Hospitals and long term care facilities are still to prohibit visitors and non-essential health care personnel. See #16 on the linked document regarding nursing home restrictions on visitation

Alaska (AK)
Office of the Governor Mike Dunleavy, Alaska Department of Health and Social Services, Alaska Division of Homeland Security and Emergency Management
- The Alaska.gov website includes a unified command page with a section providing guidance and a checklist for developing critical infrastructure community/workforce protective plans
- Plans must be developed and submitted to the state prior to the start of any interstate and intra-state travel of essential employees unable to complete a 14-day self-quarantine
  https://covid19.alaska.gov/unified-command

Arizona (AZ)
2-1-1 Arizona
- Launched a statewide COVID-19 Hotline that offers an entry point to field questions and concerns from Arizona residents about COVID-19
  https://211arizona.org/covid-19

Bandera Healthcare
- Hosts weekly calls with key physicians in nursing homes and local nearby hospitals (e.g., hospitalists, skilled nursing facilities (SNFs), primary care providers, and infectious disease physicians) to identify gaps in knowledge, training, and personal protective equipment (PPE) issues and to provide updates on the current state of operations and address staff shortages and fears

Health Services Advisory Group (HSAG)
- Convenes a weekly call with stakeholders to coordinate communication between hospitals and nursing homes. Calls focus on providers sharing status of COVID-19 inpatients, emergency department surges, nursing home capacity, personal protective equipment (PPE) and testing resources, infection prevention training, and use of telemedicine. Participants include hospitals, nursing homes, state agencies, and nursing home trade associations
- HSAG developed a special SharePoint site that included a section for Q&As, announcements, and new resources. This site also included a nursing home bed-count tracker to improve care coordination between hospitals and post-acute care
Maricopa County Public Health Department
- Holds weekly calls with long term care providers to update the community of case counts, guidelines, personal protective equipment (PPE) distribution, and other important issues during the pandemic
  https://www.maricopa.gov/5496/Long-Term-Care-Facilities
- Facilities receive a weekly survey, which is then analyzed by county officials. Infection preventionists can then target facilities most in need of technical assistance and PPE distribution
- The Arizona Department of Human Services and Unified Command are both purchasing PPE and are prioritizing distributing the bulk of the PPE to long term care facilities for the protection of the most vulnerable
  https://www.maricopa.gov/5460/Coronavirus-Disease-2019

The Navajo Nation Commission on Emergency Management
- Declared a public health state of emergency for the Navajo Nation and created a web page with information, maps, and resources about the coronavirus response in their local area

Poison Control Hotline
- Developed an additional line to field COVID-19-specific questions from nursing homes across the state
- COVID-19 Hotline: 1-844-542-8201

Windsor Ridgecrest
- This nursing home leverages social media (Facebook and LinkedIn) to increase morale, optimism, and reassure their community about loved ones in their nursing home
  https://drive.google.com/file/d/1pRpLD4wLHac4T_gY8D1_aWpHsvdjDNVn/view

California (CA)
California Association of Long term Care Medicine (CALTCM)
- Has hosted weekly webinars since March 9, 2020, featuring state actions to help nursing homes understand infection prevention state actions. In addition, CALTCM actively appears in the media and writes white papers and guidelines to assist public health officials and providers to ensure the safety of nursing home residents and staff
- CALTCM developed the Long term Care Quadruple Aim, which includes 1) stellar infection control, including a full-time infection preventionist in every nursing home; 2) access to sufficient personal protective equipment (PPE); 3) readily available testing for symptomatic and asymptomatic staff and residents; and 4) incident command mode

Colorado (CO)
Office of the Governor Jared Polis
- Colorado Governor Jared Polis initiated a COVID-19 Innovation Response Team, taking a multipronged approach and including increased testing, tailored social-distancing measures, a reinforced health care system, and a bolstering of state epidemiological resources
State Actions for COVID-19 Management and Response
8. Nursing Home Communications Continued

Delaware (DE)
Delaware Health Care Facilities Association (DHCF)
- Placed large signs with room numbers on long term care facility windows so families could easily identify their loved ones
- Initiated a cohort for medical directors, directors of nursing, and infection preventionists within nursing homes and assisted living facilities in collaboration with the AMDA - Society for Post-Acute and Long-term Care Medicine. This cohort has hosted speakers on best practices and lessons learned from other states
- A medical director listserv was created for peer-to-peer communication
- Facilitates one-on-one electronic communication with facility ombudsman to ensure families are connected to staff on important information
  https://www.dhcfa.org

Delaware (DE) and New Jersey (NJ)
LeadingAge
- Offered a free one-week program to help caregivers and the aging population overcome COVID-19 challenges. The program was held daily via Zoom for one week, with a different daily topic delivered by experts

Florida (FL)
Florida Department of Health and Agency for Health Care Administration
- The Florida Health Care Association hosts weekly conference calls for all nursing homes with presentations and Q&A sessions with the State Surgeon General Scott Rivkees and Secretary Mary Mayhew of the Florida Agency for Health Care Administration. Each session is recorded and posted online
  https://www.fhca.org/facility_operations/coronavirus
- Information is routinely shared through Eblasts and posted on the Agency’s COVID-19 website at
  http://ahca.myflorida.com/COVID-19_Facilities.shtml#facility

Florida Health Care Association (FHCA)
- Created a COVID-19-dedicated web page with information on their personal protective equipment (PPE) train-the-trainer webinar and more
  https://www.fhca.org/facility_operations/coronavirus
- Created a special communication designed to keep FHCA members, legislators, state officials, and other stakeholders abreast of the positive news in the long term care profession during the COVID-19 public health emergency

Florida Medical Director’s Association
- Convened a collaborative call with the Florida Healthcare Association, Florida Hospital Association, Emergency Medical Services, and Social Security Administration

Hawaii (HI)
Office of the Governor David Ige
- Provides a COVID-19 Project ECHO education and training series. Sessions occur weekly and all long term care and assisted living facilities are invited
8. Nursing Home Communications Continued

- Series topics include: donning/doffing personal protective equipment (PPE), repurposing PPE, COVID-19 testing procedures, resident isolation and staff quarantine, and telemedicine in long term care
  - [https://geriatrics.jabsom.hawaii.edu/geriatrics](https://geriatrics.jabsom.hawaii.edu/geriatrics)
  - [https://geriatrics.jabsom.hawaii.edu/ltss](https://geriatrics.jabsom.hawaii.edu/ltss)

**Illinois (IL)**

*Chicago Department of Public Health*

- Created a dedicated website with specific long term care guidance to implement appropriate infection prevention and control, rapidly identify potentially infected staff/visitors, monitor residents for signs and symptoms of infection, access testing for residents and facility staff, investigate clusters of COVID-19, and connect to needed resources, including personal protective equipment (PPE)
  - [https://www.chicagohan.org/covid-19/LTCF](https://www.chicagohan.org/covid-19/LTCF)

*Health Care Council of Illinois (HCCI)*

- Developed COVID-19 Resource page, updated daily with information regarding state and federal regulations, infection control, personal protective equipment (PPE), and Centers for Disease Control and Prevention (CDC) information
- Prepares weekly member newsletters and email blasts on COVID-19 related resources and events throughout the state
  - [http://www.hccil.org/covid-19](http://www.hccil.org/covid-19)

*Illinois Department of Public Health*

- Created the Coronavirus Disease 2019 website, which includes long term care guidance, information on facility outbreaks and a link to Governor J.B. Pritzker’s daily briefing
  - [https://www.dph.illinois.gov/covid19](https://www.dph.illinois.gov/covid19)

*Illinois Department of Public Health*

- Alerts Illinois long term care providers daily through the COVID-19 communication plan and the State of Illinois Rapid Electronic Notification System (SIREN)
  - [https://www.siren.illinois.gov](https://www.siren.illinois.gov)
  - [https://www.dph.illinois.gov/covid19/daily-communications](https://www.dph.illinois.gov/covid19/daily-communications)

**Indiana (IN)**

*Indiana State Department of Health (ISDH)*

- On May 3, 2020, communication guidelines for long term care facilities were released
- Developed communication guidelines for reporting facility COVID-19 status
- Developed strategy guidelines for COVID-19 in memory care units
- Created an outreach email for those families having difficulty receiving COVID-19 communication on loved ones from long term care facilities
- Released the Outdoor Family Visitation at long term care facilities on June 3, 2020; followed CMS and CDC guidance restricting visitation, except in end-of-life circumstances. These restrictions, however, are not without consequences. Recognizing that isolation has serious impacts on the health and wellbeing of residents in these facilities, Indiana State Department of Health released guidance that facilities must follow to allow for outdoor visitation with residents
  - [https://www.coronavirus.in.gov/files/IN_COVID-19%20outdoor%20visit%206.3.20.pdf](https://www.coronavirus.in.gov/files/IN_COVID-19%20outdoor%20visit%206.3.20.pdf)
On June 3, 2020, ISDH released an update to their COVID-19 Toolkit for Long Term Care Facilities to include guidelines update memory care facilities that had been issued on May 16, 2020.

The Richard M. Fairbanks School of Public Health ECHO Center at Indiana University Purdue University of Indianapolis

- Developed a COVID-19-specific ECHO program effective April 1, 2020. ECHO uses Zoom teleconferencing for real-time answers from subject-matter experts to questions from physician practices, produced live and at no-cost with clinical continuing medical education (CME) credits available.

Iowa (IA)
Iowa Department of Inspections and Appeals
- Fields individual nursing home questions specific to survey or regulation, created a website FAQ document for support on common questions, and provides 1135 waiver guidance. During surveys, the Department encourages nursing homes to reach out to the Quality Improvement Organization (QIO) or Iowa Department of Public Health (IDPH) for support.
https://dia.iowa.gov/about/novel-coronavirus-covid-19

Iowa Long Term Care Ombudsman
- Provides individual nursing home support for advocacy of needs at resident level
- Supports residents and families with concerns
- Encourages nursing homes to reach out to the Quality Improvement Organization, the Department of Inspections and Appeals (DIA), and the Illinois Department of Public Health (IDPH) for support
- Website houses multiple resources
https://www.iowaaging.gov/educational-resources/covid-19-older-iowans

Kansas (KS)
LeadingAge Kansas
- Guide to outdoor time for residents during COVID-19
https://lks.memberclicks.net/outdoor-time-for-residents

Maryland (MD)
FutureCare Nursing Homes
- In light of COVID-19, FutureCare has rolled out a robust new telecommunication system. It enables each patient to have remote face to face communications with their loved ones.
State Actions for COVID-19 Management and Response

8. Nursing Home Communications Continued

**Health Facilities Association of Maryland (HFAM)**
- Provides daily email updates to facilities with information about new Centers for Medicare & Medicaid Services (CMS) or Centers for Disease Control and Prevention (CDC) guidance, new Maryland Health Department transmittals, and reminders to submit COVID-19 information daily to CRISP (Chesapeake Regional Information System). They include links to the CMS weekly COVID-19 calls. There have been links to personal protective equipment (PPE) suppliers, available childcare, best practices, etc. They have included supportive letters and YouTube clips from legislators.
  https://www.hfam.org/covid-19
- HFAM sends out daily COVID-19 updates to its member facilities in Maryland with information on reporting requirements and other important regulatory issues
  https://www.hfam.org

**LifeSpan Network**
- Provides long term care providers with COVID-19 resources for the State of Maryland and nationwide via its website. Lifespan is the official Chesapeake Regional Information System for our Patients (CRISP) liaison for Maryland nursing homes
  https://www.lifespan-network.org/coronavirus-resources-long-term-care-providers

**Lorien Health Services**
- Released a CEO letter to the families, giving them an update on the current status of positive COVID-19 cases amongst residents and staff in all their different nursing centers
  https://www.lorienhealth.com/coronavirus-info

**Massachusetts (MA)**

**Executive Office of Health and Human Services/MassHealth**
- Through Mass Health Nursing Facility Bulletin 145, MassHealth is implementing measures to monitor infection control policies employed at nursing facilities to protect against the spread of COVID-19, specifically requiring submission of infection control self-assessment and attestation
- Through Administrative Bulletin 20-53, MassHealth is establishing supplemental payments for MassHealth-covered nursing facility services. The payments are in part associated with compliance with COVID-19 testing requirements as outlined in the bulletin
- The Office of Health and Human Services has issued reopening guidelines on its COVID-19 website
Massachusetts Senior Care
- Secured donations of 750 tablets from companies including Amazon, Walmart, Teel Technologies, and Acer, as well as a financial contribution from Personable, Inc., to nursing home residents across the state to facilitate face-to-face communication with their loved ones during the COVID-19 pandemic

Minnesota (MN)
Minnesota Department of Health (MDH)
- Offers public reporting of congregate facilities with COVID-19 cases updated daily on the MDH website. MDH waits 48 hours to list the congregate facilities to allow the facility to notify residents and families

The State Emergency Operations Center (SEOC)
- The SEOC Health Care Resource Call Center is available for providers to access a special long term care line and receive prompts to reach information related to specific topics such as infection control, personal protective equipment (PPE), COVID-19 testing or licensing issues, as well as triage support in crisis management and finding a COVID-19 support site
  https://dps.mn.gov/divisions/hsem/seoc/Pages/default.aspx

Missouri (MO)
Long-Term Care Ombudsman Program
- Provides guidance and links to the national Long Term Care Ombudsman Resource Center, fact sheets, Q&As, newsletters, and Centers for Medicare & Medicaid Services communications regarding COVID-19 for long term care facilities, residents, and their families

Missouri Department of Health and Senior Services (MDHSS)
- The MDHSS website provides a local, zip code-level map of positive cases as well as charts/graphs of COVID-19 cases and deaths by age, sex and race. A map of testing locations also is provided, with a hotline number and resources for the public
  https://www.stlcorona.com

Montana (MT)
Association for Professionals in Infection Control and Epidemiology (APIC)
- Provides infection control tools and resources for providers via long term care email listserv and weekly conference calls in coordination with the Montana Department of Health and Human Services
- Communicable Disease Prevention and Control Bureau APIC Chapter, Pam Webb: pwebb@bresnan.net

State of Montana
- The State Emergency Coordination Center website provides COVID-19 related epidemiologic data and situational reports updated daily
State Actions for COVID-19 Management and Response

8. Nursing Home Communications Continued

Nevada (NV)

*Nevada Division of Public and Behavioral Health*

- Skilled nursing facilities and assisted living facilities were contacted to assess personal protective equipment (PPE) needs and prepared an inventory of facilities with PPE requests

New Jersey (NJ)

*Deaf and Hard of Hearing COVID Communication Card*

- Communication cards in English and Spanish are available that enable deaf or hard of hearing patients or care partners to communicate COVID-19-related symptoms and potentially related exposure
  
  

*New Jersey Department of Health*

- Provided daily COVID-19 updates, including COVID-19 cases by age and number of hospitalizations
  

*New Jersey Department of Health (NJDOH), New Jersey Poison Control Center*

- A COVID-19 hotline is staffed by health care providers to answer questions and address concerns. The Poison Control Center works closely with the NJDOH to stay up-to-date on new or changing information, if people think they have been exposed to COVID-19
  
  - [https://www.njpies.org/coronavirus](https://www.njpies.org/coronavirus)

*Official Site of the State of New Jersey*

- The COVID-19 HUB website provides a county-based data dashboard, COVID-19 frequently asked questions (FAQs), a jobs portal, symptom checks, and state based updates
  

New Mexico (NM)

*New Mexico Ombudsman Program*

- The long term care ombudsman communicates directly with residents and families of those who have died from or contracted COVID-19
- Town Halls are used to answer questions from the public and family members and educate on resident rights; family councils and their importance and impact; technology innovations; Create Connect; and the ombudsman program
- The ombudsman is setting up a process to track and analyze the use of tablets in long term care facilities
- A tiered approach to volunteering creates a fast track to increase volunteer capacity

*New Mexico State Entities (Survey Agency, Health and Human Services, Aging and Long term Services, the Health Care Association)*

- State entities hold weekly 30-minute calls to support communication between nursing homes, assisted living, and intermediate care facilities for intellectually/developmentally disabled individuals with immediate needs
8. Nursing Home Communications Continued

State of New Mexico
- Hosts weekly calls with nursing homes, assisted living facilities, and skilled nursing facilities to identify gaps in knowledge, training, and personal protective equipment (PPE) issues, provide updates on the current state of operations, and address staff shortages and fears.

New York (NY)
New York State Department of Health (NYSDOH)
- Early Warning Dashboard: Governor Cuomo announced the implementation of a new Early Warning Dashboard to monitor and review how the virus is being contained on an ongoing basis [https://forward.ny.gov/early-warning-monitoring-dashboard](https://forward.ny.gov/early-warning-monitoring-dashboard)

North Dakota (ND)
CHI St. Alexius Health - Garrison, ND
- Facility places contact time for cleaning and disinfecting products in large numbers on side of each bottle to keep that time more present in the mind of those using the products.

Great Plains Quality Innovation Network (QIN)
- With so many meetings and trainings scheduled every day, it is a challenge for organizations to attend all. Great Plains QIN staff have been sharing their meeting notes from the Centers for Medicare & Medicaid Services (CMS) National COVID-19 Nursing Home Weekly Meeting via email to nursing home colleagues in North Dakota and South Dakota. Nursing home colleagues have been very appreciative of this action.

North Dakota Office of the Governor Doug Burgum, North Dakota Department of Health, ProudCrowd
- The Care19 app was developed in North Dakota and stores the location of any place a person visits for 10 minutes or more. If an individual tests positive for COVID-19, it assists with contact tracing [https://ndresponse.gov/covid-19-resources/care19](https://ndresponse.gov/covid-19-resources/care19)

North Dakota Health Information Exchange (HIE)
- Works with Department of Health to identify addresses for patients being tested to track disease spread where they live rather than where they sought health care; when there are positives, they can look at patient history to project what the disease manifestation might be.
- Creates notifications to the state epidemiologist for positive tests to start contact tracing and to track hospital admissions and discharges (in development).
- Onboards providers to have the electronic medical record (EMR) connect to the state lab system.
- Works with EMR vendors to add occupation and employer to the feed sent to the HIE to assist with contact tracing.
North Dakota Reuniting Families & Residents Task Force/Committee

- Task force of ND nursing home residents, staff, leadership, and family members working towards "opening" of visitation and social support for nursing home residents. Task force is led by Chris Larson, resident of Luther Memorial Home in Mayville, ND
  [Link to article](https://www.kvrr.com/2020/05/27/live-long-term-care-center-task-force)

State of North Dakota

- The State of North Dakota Hospital Coordination and Vulnerable Population Protection Plan 2020 COVID-19 Pandemic Response plan was drafted to ensure that hospitals and communities have resources to handle a potential surge of COVID-19 patients. The plan provides the framework for the State of North Dakota in collaboration with hospitals, long term care facilities, the North Dakota National Guard (NDNG), and other state and local agencies to serve the health care needs of citizens with COVID-19 that require hospitalization. A six-point plan identifies key actions that will guide the State, hospitals, and care facilities through a tiered system
  [Link to plan](https://ndresponse.gov/sites/www/files/documents/covid-19/Additional%20Resources/Hospitals%20and%20VP3%20FINAL.pdf)

Ohio (OH)

Ohio Department of Health

- COVID-19 education/resources are made available through a website. Selected topics include basic care guidelines, infection control/resident care posters, basic infection control guidelines, nursing home infection control preventionist training, and links to resources from the Centers for Disease Control and Prevention (CDC)

Ohio Health Care Association

- The following steps are being implemented to ramp up COVID-19 testing of residents and staff of nursing homes to better prevent the spread of the disease among some of Ohio’s most vulnerable residents
- Statewide organization providing updates on most current and authoritative information on COVID-19 relevant to facilities in Ohio
  [Link to website](https://www.ohca.org/covid19_1)

Ohio Hospital Association (OHA)

- OHA is coordinating COVID-19 communications and protocols between state and federal agencies and Ohio’s health care delivery network. OHA previously partnered with the Ohio Department of Health to develop a regional emergency preparedness network and to lead the Ohio Emerging Pathogen Coalition established specifically to coordinate response to pathogens new to Ohio
  [Link to website](https://ohiohospitals.org/Patient-Safety-Quality/Innovation-Leadership/COVID-19-Emerging-Pathogens)
State Actions for COVID-19 Management and Response

8. Nursing Home Communications Continued

- OHA provides COVID-19 education and resources on selected topics, including basic care and infection control guidelines, infection control/resident care posters, nursing home Infection control preventionist training, and links to resources from the Centers for Disease Control and Prevention (CDC)

**Office of the Governor Mike DeWine**

- The Governor, Lt. Governor, agency directors, and other state leaders provide updates on COVID-19 in Ohio during near-daily press conferences
- In March, Ohio launched a COVID-19 Hotline to address questions from Ohio Citizens, providers, and others in the medical community

**Oklahoma (OK)**

**Oklahoma State Department of Health**

- A COVID-19 website was created for additional notifications and resources, including 77 swab-pods set-up around the state
  https://coronavirus.health.ok.gov

**Oregon (OR)**

**Oregon Office of Oversight and Quality**

- The Oregon Office of Oversight and Quality (the state survey agency) wrote a letter to health care providers to express appreciation and share results of its technical assistance review. The survey agency also partnered with the health care authority to provide supportive, non-punitive messaging to providers

**The State of Oregon**

- Developed a media campaign to support health care workers under the tag: #ORHealthcareHeroes

**Pennsylvania (PA)**

**Pennsylvania Department of Aging, Office of State Long-Term Care Ombudsman Program**

- Family and friends who are unable to see loved ones living in long term care facilities because of the COVID-19 emergency may struggle with changes in protocol, rights, and policies. The Pennsylvania Long-Term Care Ombudsman Program is available to help with a new statewide resource called Virtual Family Council. The program offers weekly online meetings with a local ombudsman and a team of 10 local experts. Anyone can participate and ask questions, share concerns, or just listen to learn and gather information. The meetings will not only provide an opportunity for dialogue and networking, but updates to resources and policies will be provided as well. The meetings will not address specific issues regarding a resident or a facility

**PHCA-Pennsylvania Health Care Association**

- Developed a recommended long term care facilities preparedness assessment for COVID-19 in checklist format for communication
  https://www.phca.org/covid19
8. Nursing Home Communications Continued

South Dakota (SD)

Great Plains Quality Innovation Network (QIN)
- With so many meetings and trainings scheduled every day, it is a challenge for organizations to attend all. Great Plains QIN staff have been sharing their meeting notes from the Centers for Medicare & Medicaid Services (CMS) National COVID-19 Nursing Home Weekly Meeting via email to nursing home colleagues in North Dakota and South Dakota. Nursing home colleagues have been very appreciative of this action.

South Dakota Department of Health
- The Care19 app (developed in North Dakota) helps users log and categorize locations they had visited for at least 10 minutes, assists in contact tracing, and is a tool to stay informed on potential exposure. [https://covid.sd.gov/care19app.aspx](https://covid.sd.gov/care19app.aspx)

South Dakota Department of Health (SD DOH), South Dakota Association of Healthcare Organizations (SDAHO), South Dakota Health Care Association (SDHCA)
- All 104 South Dakota nursing home facilities received four iPads to provide an increased opportunity for residents to communicate with family and friends and connect to social media and the internet. Additionally, the iPads can be used in telehealth visits. The South Dakota Department of Health, South Dakota Association of Healthcare Organizations, and South Dakota Health Care Association partnered in securing Centers for Medicare & Medicaid Services (CMS) funding for the project [https://sdaho.org/2020/05/21/south-dakota-nursing-homes-receive-ipads/](https://sdaho.org/2020/05/21/south-dakota-nursing-homes-receive-ipads/)

Tieszan Memorial Home
- Tieszan Memorial Home used their social media page to inform community and resident’s families about COVID-19 mass testing. The intent was families and residents’ representatives will have an opportunity to read the information prior to the personal call to obtain consent for the testing. This would provide time for representatives to gather any questions they might have, ultimately contributing to a quicker process in obtaining consents [https://www.facebook.com/104949384475413/posts/145077053795979](https://www.facebook.com/104949384475413/posts/145077053795979)

Texas (TX)

Office of the Governor Greg Abbott
- The Governor’s Report to Open Texas includes a recommendation that nursing facilities immediately inform all those who have interacted with residents of facilities with positive patients to further limit the spread of the virus [https://gov.texas.gov/uploads/files/organization/opentexas/OpenTexas-Report.pdf](https://gov.texas.gov/uploads/files/organization/opentexas/OpenTexas-Report.pdf)

Texas Health and Human Services Commission
- The Texas Health and Human Services Commission sends communications to its regulated nursing homes through Surveyor staff. State and regional levels speak with the nursing facilities in their regions daily.
- The Texas Health and Human Services Commission Regulatory Services hosts biweekly calls with long term care provider associations to communicate policy changes and answer questions.
8. Nursing Home Communications Continued

- The agency has also produced over 100 guidance communications to providers, including letters, webinars, alerts, emergency rules, and temporary suspensions of regulatory requirements to give providers flexibility in responding to COVID-19.

**Vermont (VT)**

*Vermont Department of Health*

- The Department is proactively contacting all long term care facilities, nursing homes, assisted living facilities, and senior housing facilities to review strategies to prevent COVID-19 infection and to develop plans to respond immediately if an infection is identified.
- If a case of COVID-19 is associated with a long term care facility, an epidemiology team is quickly activated. The team contacts the facility to provide recommendations and infection control support and begins contact tracing to determine the source of the infection and how it may be spreading.
  

**Wisconsin (WI)**

*LeadingAge Wisconsin*

- The organization created a template that facilities can use to inform stakeholders about stay-at-home policies.
  
9. PERSONAL PROTECTIVE EQUIPMENT (PPE): ACTIONS TO IMPROVE ACCESS TO PPE

Arizona (AZ)

_Pioneer Health Group_

- To increase the supply of personal protective equipment (PPE) at the nursing home level, visited hardware stores, which have large supplies of PPE (coveralls to supplement gowns, eye protection, face shields, shoe covers, masks, and gloves)

Arkansas (AR)

_Walmart Foundation_

- On March 21, 2020, the Walmart Foundation announced a $5 million grant to the COVID-19 Solidarity Response Fund, a program set up to support the World Health Organization (WHO). In part, the fund will enable WHO to send essential supplies, such as personal protective equipment (PPE) to front line health workers

California (CA)

_California Association of Health Facilities (CAHF)_

- CAHF developed the “Just-In-Time Respiratory Protection Program” to assist nursing homes in responding to events or situations, such as COVID-19, that will require them to implement a program for the respiratory protection of their employees. The nine-page guide contains a step-by-step process to get nursing homes prepared in setting up and implementing a plan to protect their employees, including a Fit-Test video to assist in preparing staff to use personal protective equipment (PPE)

Colorado (CO)

_Department of Health Care Policy and Financing (HCPF)_

- Prioritized facilities for personal protective equipment and testing distribution

  [https://www.colorado.gov/pacific/hcpf/COVID](https://www.colorado.gov/pacific/hcpf/COVID)

Connecticut (CT)

_Battelle Critical Care Decontamination System (CCDS)™_

- Performed decontamination of the novel coronavirus (SARS-CoV-2) to address personal protective equipment (PPE) shortage (cleans up to 80,000 units/day)
- Offered free to health care personnel
- Provided in eight locations

  [https://www.battelle.org/inb/battelle-ccds-for-covid19-satellite-locations](https://www.battelle.org/inb/battelle-ccds-for-covid19-satellite-locations)
State Actions for COVID-19 Management and Response
9. Personal Protective Equipment (PPE): Actions to Improve Access to PPE Continued

**District of Columbia (D.C.)**
*Office of the Mayor Muriel Bowser*

- Provided guidelines on universal masking and use of face coverings for residents, health care workers, staff, and visitors in long term care facilities

**Delaware (DE)**
*The Delaware Collaboration with Community Volunteers Ombudsman Office Collaboration*

- Volunteers called “Help for Healthcare Delaware” made masks for all non-clinical staff generating 20 thousand masks for all facilities

**Florida (FL)**
*Florida Health Care Association (FHCA)*

- Conducted a personal protective equipment train-the-trainer webinar on April 8, 2020
  https://www.fhca.org/facility_operations/coronavirus

*Florida Division of Emergency Management (FDEM)*

- The Division made another major push for personal protective equipment (PPE) to support health care workers in long term care facilities. This includes 4 million masks, 200,000 face shields, and 500,000 gloves
  https://floridadisaster.org/covid19

*Orlando Health System*

- Orlando Health System (a.k.a. Orlando Health) implemented “COVID Safety Officers (CSOs)” in all their facilities. This health system includes acute care, two long term care facilities and physician practices. Every shift, a designated staff person is the CSO tasked to observe employees donning and doffing personal protective equipment (PPE), performing appropriate hand hygiene, and assuring that all other infection control and prevention policies and procedures are being followed. This has provided a level of reassurance to the long term care facilities in the greater Orlando area when accepting transfers from acute care from this health system

**Georgia (GA)**
*Georgia Health Care Association (GHCA)*

- The GHCA emergency preparedness leader has been in constant contact with the Georgia Emergency Preparedness Command Center and stands ready to assist with all facets of needs from personal protective equipment (PPE) to all other equipment needed
  https://www.ghca.info

**Idaho (ID)**
*Idaho Health Care Association, Idaho Department of Health (IDOH)*

- IDOH has taken the lead in coordination between Idaho nursing homes and the Federal Emergency Management Agency (FEMA) for distribution of personal protective equipment (PPE) supplies
Illinois (IL)

Health Care Council of Illinois (HCCI)

- Developed COVID-19 Resource page, updated daily with information regarding state and federal regulations, infection control, personal protective equipment (PPE), and Centers for Disease Control and Prevention (CDC) information
  

Office of the Governor J.B. Pritzker Task Force

- Illinois Governor J.B. Pritzker issued a Gubernatorial Disaster Proclamation in response to the ongoing COVID-19 situation to assist Illinois agencies in coordinating state and federal resources, including the Strategic National Stockpile of medicines and protective equipment, to support local governments in preparation for any action that may be necessary related to the potential impact of COVID-19
  
  [https://www2.illinois.gov/sites/gov/Documents/APPROVED%20-%20Coronavirus%20Disaster%20Proc%20WORD.pdf](https://www2.illinois.gov/sites/gov/Documents/APPROVED%20-%20Coronavirus%20Disaster%20Proc%20WORD.pdf)

  - The Governor provides a COVID-19 update briefing daily
  - Drive-through testing sites are available throughout the state; all health care workers and residents with symptoms are eligible for testing

  [https://www2.illinois.gov/sites/gov/COVID-19/Pages/default.aspx](https://www2.illinois.gov/sites/gov/COVID-19/Pages/default.aspx)

Indiana (IN)

Indiana State Department of Health (ISDH)

- An ISDH waiver issued guidance for creating COVID-19 long term care facilities:
  - Waiving facility staffing requirements
  - Enhancing reimbursement rates for COVID-19 facilities by 50 percent
  - Providing liability protection
  - Giving data support to help hospitals identify post-acute COVID-19 facilities for transfer
  - Providing infection control teams to train facilities on COVID-19 testing
  - Provisions all necessary personal protective equipment (PPE) as a “priority” facility, similar to hospitals

- Indiana has prioritized long term care facilities for the distribution of PPE. As part of this, all long term care facilities report their daily PPE stores in our EMResource database. When data shows that facilities have decreased supplies of PPE, local health departments will deliver PPE directly to the facility. If local health departments have limited supplies, ISDH will deliver PPE from its stores directly to the facility. From the time of the emergency declaration, ISDH has been able to respond to every PPE request from long term care facilities

Iowa (IA)

Iowa Department of Public Health

- Provides support through emergency response team available (for example, personal protective equipment [PPE] supply)

  [https://idph.iowa.gov/Emerging-Health-Issues/Novel-Coronavirus/Long-Term-Care](https://idph.iowa.gov/Emerging-Health-Issues/Novel-Coronavirus/Long-Term-Care)
Louisiana (LA)
*Louisiana Department of Health (LDH)*
- Assembled the LDH Nursing Home Facility Toolkit for nursing home support. This toolkit provides state and best practice guidance for personal protective equipment (PPE), information about an option for safely sanitizing N95 masks for re-use, staffing resources, and testing recommendations, along with a variety of pertinent contact numbers

Maine (ME)
*Maine Department of Health and Human Services (MDHHS)*
- MDHHS boosted payments to congregate care facilities in response to COVID-19 through an Extraordinary Circumstance Allowance
  - MaineCare will pay extra costs associated with COVID-19, including staffing, supplies, and personal protective equipment (PPE)
  - $10.1 million in state and federal funds was allocated to support facilities

*Maine Health Care Association*
- Statewide Think Tank Friday meeting
  - Small group of corporate leaders in partnership with the Maine Health Care Association collaborated on sharing “vetted” vendors as they looked to procure PPE for their facilities

Minnesota (MN)
*Minnesota Department of Health, Regional Health Care Preparedness Coordinators*
- Nursing homes communicate personal protective equipment (PPE) shortages or supply chain issues to Minnesota Department of Health Regional Health Care Preparedness Coordinators (RHPC)

Mississippi (MS)
*Mississippi State Department of Health (MSDH) Epidemiology Department*
- Partner with MSDH Licensure and Certification with frequent contact
- Provide consultation to prevent the spread of COVID-19 in nursing homes
- Assist with personal protective equipment (PPE) attainment
- Nursing homes that have COVID-19 cases receive daily follow-up
- Partner with Mississippi Emergency Management Agency (MEMA)
- Nursing homes are to request PPE from their county Emergency Management Agency (EMA) contact
https://www.msema.org/county-ema

Missouri (MO)
*State Emergency Management Agency (SEMA)*
- Nursing homes experiencing a shortage of personal protective equipment (PPE) can contact SEMA to obtain immediate short term PPE supplies
New Jersey (NJ)
Federal Emergency Management Agency (FEMA)
- By the beginning of July, each facility will receive two separate packages containing a seven-day supply of eye protection, surgical masks, gowns, and gloves. Each package will be individualized for each nursing home based upon their level of staffing. Items are blue tarp material

New Mexico (NM)
State of New Mexico
- Personal protective equipment (PPE) reporting portal established to monitor PPE levels statewide pursuant to Executive Order
- Nursing homes are to request PPE from their county Emergency Manager; working in conjunction with the Department of Homeland Security, critical PPE is delivered to the point of request

North Dakota (ND)
North Dakota Information Technology, EduTech, Gateway to Science, Microsoft Corporation
- A North Dakota Statewide personal protective equipment (PPE) portal helps distribute PPE across the state. Individuals and organizations with 3D printers, laser cutters, and Computer Numerical Control (CNC) machines can register on the PPE portal to help produce face shields or other high-tech solutions to COVID-19. Requests for PPE will be matched with producers close by to deliver products efficiently. Donations, including materials, are used to help cover the cost of supplies

University of North Dakota Medical School, North Dakota State University (NDSU), Grand Forks County, and SkySkopes
- A collaboration with NDSU and Grand Forks County is testing drones to deliver medical supplies, check people’s temperatures from the air, and sanitize playground equipment

Ohio (OH)
Ohio Department of Health, Ohio Department of Developmental Disabilities
- A Pre-Surge Planning Toolkit for Providers of Long Term Services and Supports (LTSS) includes concept diagrams and tools related to COVID-19; provides resources to support evaluation and re-evaluation of needs and capacity to address future quarantines of people who have been exposed; offers guidelines for isolation of people who are tested or presumed positive; and assistance with planning for critical shortages of personal protective equipment (PPE)
- Resource provides guidance on masks or face coverings in the workplace and COVID-19 frequently asked questions
State Medical Board of Ohio, Centers for Disease Control and Prevention (CDC)

- Shared CDC website including information on eye protection, isolation gowns, gloves, face masks, N95 respirators, powered air purifying respirators, elastomeric respirators, and ventilators
  

Oklahoma (OK)

Oklahoma State Department of Health (OSDH)

- The OSDH COVID-19 website was created for additional notifications and resources, including a personal protective equipment (PPE) survey and the ability to compile and submit PPE burn rate data

Oklahoma State Ombudsman

- Coordinates and delivers personal protective equipment (PPE) to long term care facilities
  
  http://www.okdhs.org/services/aging/Pages/ombudsman.aspx

Pennsylvania (PA)

Office of the Governor Tom Wolf

- On May 6, 2020, Governor Wolf announced a program to provide free N95 respirator decontamination for long term care providers experiencing a shortage of respirators due to limited availability of personal protective equipment
- The Pennsylvania Emergency Management Agency (PEMA) is collaborating with Battelle Memorial Institute to deploy a decontamination unit in southeast Pennsylvania that has the capacity to sterilize up to 80,000 N95 respirators per day
- An eligible organization that wishes to use the system for N95 decontamination must register and enter into a use agreement with Battelle, at which time they will receive additional guidance regarding the types of N95s that are allowed and instructions for shipping and delivery
- The service is available free of charge for use by eligible organizations – the federal government is absorbing 100% of the cost. The only cost to an eligible organization is for shipping to and from the site
  

Pennsylvania Health Care Association (PHCA)

- This nursing home association developed a recommended long term care facilities preparedness assessment for COVID-19 in checklist format to track availability of personal protective equipment (PPE) and other supplies
  
  https://www.phca.org/covid19

South Carolina (SC)

South Carolina COVID-19 Emergency Supply Collaborative

- The state established a collaborative between federal, state, and local South Carolina governments and organizations that connects South Carolina health care providers with sources for clinical care equipment, clothing and protection, disinfectants, eyewear and masks, gloves, and hazardous waste handling
  
  https://sccovid19.org/#criticalneeds
South Dakota (SD)
Sanford Health
• Provided instructions on how to sew a face mask, how to make a no-sew face mask, and how to wear a face mask. Volunteers were asked to sew masks for health care personnel

Tennessee (TN)
Tennessee Health Care Association (THCA)
• Developed COVID-19 resources for consumers
• Created guidance for facilities facing personal protective equipment (PPE) shortage
• Developed a PPE request form
  https://www.thca.org/for-consumers/resource-center
• Posted a toolkit for facility visitor screening

COVID-19 Staffing Project
• Volunteers created a website to help hospitals and nursing facilities of all sizes anticipate their staffing and personal protective equipment (PPE) needs for the COVID-19 surge
  https://www.covidstaffing.org
• Modules included:
  o COVID-19 Staffing Needs Calculator: Calculated staffing needs by clinical role as inpatient census increased
    https://www.covidstaffing.org/modules/staffing-needs
  o COVID Response Planner: Planned a phased staffing response to COVID-19, based on available beds, staff, and locations
    https://www.covidstaffing.org/modules/response-planner
  o PPE Needs Calculator: Calculated PPE needs as inpatient census increased
    https://www.covidstaffing.org/modules/daily-ppe-calculator
  o Staff Skills Surveys: Determined staff skills specific to COVID-19 patient care needs
    https://www.covidstaffing.org/modules/supply
  o Role Allocation Toolkits: Based on staff and trainee skills, assessed COVID-19 patient care roles where staff members could re-deploy

Hamilton County
• Task force meets weekly with nursing homes and assisted living facilities to help them obtain personal protective equipment (PPE) and testing for COVID-19 and antibodies. All Hamilton County hospitals are part of the task force
  http://www.hamiltontn.gov

Mid-South Emergency Planning Coalition
• Works with the Memphis Task Force for Skilled Nursing and Assisted Living to obtain personal protective equipment (PPE)
• Developed a request form for skilled nursing facilities to request PPE and posted drive-through testing locations
  http://www.midsouthepc.org
The Middle Tennessee Regional Healthcare Quality Improvement Collaborative Communication Coalition

- The Middle Tennessee Regional Healthcare Quality Improvement Collaborative Communication Coalition, a coalition working with Alliant Health Services, formed a task force that meets every other Thursday with representation from multiple counties in the Nashville area. Nursing homes, assisted living centers, the Mayor’s office, and the Tennessee Department of Health are represented. They are working together to coordinate personal protective equipment, testing, and National Healthcare Safety Network needs, such as assistance needed for enrollment and/or reporting in the COVID-19 module. Providers in the area network to invite other providers. A Senior Quality Advisor at AHS, Julie Clark, julie.clark@allianthealth.org, is available to assist connection with this coalition.

Texas (TX)
Office of the Governor Greg Abbott
- On March 22, 2020, the Governor created the Supply Chain Strike Force to actively acquire personal protective equipment (PPE) supplies and initiate production of PPE. This includes a partnership between the Texas Military Department and Ameritech, which has led to the production and distribution of thousands of masks and PPE supplies to Texas facilities. Throughout the COVID-19 response, nursing facilities with outbreaks have been a prioritized group to receive PPE from the state.

Washington (WA)
Washington State Entities
- Established the Washington State COVID-19 Health System Response Management Team, appointed by the Office of the Governor Jay Inslee, to coordinate and optimize health care resources
- Implemented a centralized state-wide process to request emergency restocking of personal protective equipment (PPE) and volunteer health care staff to address staffing shortages

Wisconsin (WI)
Wisconsin Health Care Association
- Provides daily COVID-19 updates for members and business partners with a focus on acquiring personal protective equipment (PPE)
  https://www.whcawical.org
10. PERSONAL PROTECTIVE EQUIPMENT (PPE): ACTIONS TO IMPROVE UTILIZATION OF PPE

Arkansas (AR)
Arkansas Health Care Association (AHCA), Arkansas Department of Health (ADH)
- AHCA had ADH’s health care-associated infections preventionist and infectious disease physician present on findings from their COVID-19 visits and answer questions
- The virtual event was open to all nursing homes and assisted living facilities
- Arkansas Department of Human Services Office of Long Term Care were also present

California (CA)
California Department of Public Health All Facilities Letters (AFL)
- Provides resources for skilled nursing facilities (SNFs) on preparing for COVID-19 and a toolkit for management of exposures and recognized cases in SNFs
- The Assessment of California SNFs to Receive Patients with Confirmed COVID-19 provides guidance for SNFs planning to designate a specific wing/unit to care for residents with suspected or confirmed COVID-19

Delaware (DE)
Delaware Health Care Facilities Association (DHCFA)
- Gowns are in such short supply, they are being made from old shirts and bedsheets
- Volunteers called “Help for Healthcare Delaware” made masks for all non-clinical staff, generating 20 thousand masks for all facilities
- Organizations took out a credit line to bulk purchase personal protective equipment (PPE), which was distributed among the facilities
  https://www.dhcfa.org

Florida (FL)
Florida Health Care Association (FHCA)
- Conducted a personal protective equipment (PPE) train-the-trainer webinar on April 8, 2020

Hawaii (HI)
Office of the Governor David Ige
- Provided a COVID-19 Project ECHO education and training series, with weekly sessions for all long term care and assisted living facilities. The series topics included: donning/doffing personal protective equipment (PPE), repurposing PPE, COVID-19 testing procedures, resident isolation and staff quarantine, and telemedicine in long term care
  https://geriatrics.jabsom.hawaii.edu/geriatrics/
  https://geriatrics.jabsom.hawaii.edu/ltss

https://www.dhcfa.org
10. Personal Protective Equipment (PPE): Actions to Improve Utilization of PPE Continued

Iowa (IA)
Meyer Pharmacy
- Meyer Pharmacy has a respiratory therapist on staff and is performing mask fit training for local nursing home staff
  https://meyerpharmacy.com/pharmacy/covid-19

Maine (ME)
Maine Health Care Association
- Guidance was created by the Maine Health Care Association on optimizing personal protective equipment (PPE) during a crisis

Maryland (MD)
University of Maryland Medical System
- Conserve Personal Protective Equipment (PPE): Informative video in regards to the conservation of PPE, proper ways to re-use specific types of masks and how to correctly remove PPE
  https://www.youtube.com/watch?v=l6JqZyu9du4

Missouri (MO)
St. Louis County Department of Public Health
- Established a High-Risk Task Force Team composed of volunteer doctors and registered nurses. Team members serve as liaisons between long term care facilities and the Department of Public Health. Working remotely, team members answer questions, meet informational needs, and monitor each facility’s supply of personal protective equipment (PPE). In some cases, the task force has worked with the St. Louis County Police Office of Emergency Management to provide PPE to facilities that lack adequate supplies

Nebraska (NE)
Infection Control Assessment and Promotion (ICAP) Program, Nebraska Department of Health and Human Services
- Provided guidance on personal protective equipment (PPE) and zoning for long term care facilities related to COVID-19

New Jersey (NJ)
Centers for Disease Control and Prevention (CDC)
- Shared resource guide with COVID-19 recommendations, including clarification that cloth face coverings are not considered personal protective equipment (PPE) because their capability to protect health care personnel (HCP) is unknown

Sanford Health
- Provided instructions on how to sew a face mask, how to make a no-sew face mask, and how to wear a face mask. Volunteers were asked to sew masks for health care personnel
Ohio (OH)

Office of the Governor Mike DeWine

- Ohio Governor Mike DeWine and Lt. Governor Jon Husted were appreciative of the U.S. Food and Drug Administration’s (FDA’s) approval of the Battelle Critical Care Decontamination System (CCDS™), which is being used to perform decontamination of the novel coronavirus (SARS-CoV-2) to address personal protective equipment (PPE) shortage (cleans up to 80,000 units/day) in Columbus, Ohio. [Link](https://coronavirus.ohio.gov/wps/portal/gov/covid-19/resources/news-releases-news-you-can-use/Governor-DeWine-Lt-Governor-Husted-Thank-FDA-for-Approval-Use-Battelle-Technology)

State Medical Board of Ohio, Centers for Disease Control and Prevention

- Shared information on the process to safely put on (don) and take off (doff) personal protective equipment (PPE) recommended for health care personnel caring for patients with COVID-19 [Link](https://www.cdc.gov/coronavirus/2019-ncov/hcp/using-ppe.html)

Ohio Department of Health, Ohio Department of Developmental Disabilities

- Pre-Surge Planning Toolkit for Providers of Long Term Services and Supports (LTSS): Resource with strategies on assistance with planning for critical shortages of personal protective equipment (PPE) [Link](https://dodd.ohio.gov/wps/portal/gov/dodd/providers/all-provider-resources/resource-ltss-pre-surge-planning-toolkit)

Oklahoma (OK)

Oklahoma State Department of Health (OSDH)

- The OSDH COVID-19 website was created for additional notifications and resources, including information on county task forces to assist nursing homes with testing, delivery, and identification of personal protective equipment (PPE) needs

Texas (TX)

Texas Health and Human Services Commission Regulatory Services

- The Texas Health and Human Services Commission Regulatory Services and the Strike Force are trained to teach staff at facilities the “donning and doffing” of personal protective equipment (PPE)
- The Texas Health and Human Services Commission is also offering webinars on best-practices of PPE use in infection control

West Virginia (WV)

West Virginia Department of Health and Human Services, Bureau of Public Health

- COVID-19 website includes homeless service providers and home care resources, such as home care and self-isolation guidance for people with suspected or confirmed COVID-19 and guidance on cleaning when caring for ill person in the home [Link](https://dhhr.wv.gov/COVID-19/Pages/default.aspx)
11. HOUSING AND SHELTERING

California (CA)
*The County of San Luis Obispo, in partnership with Cal Poly San Luis Obispo, Dignity Health, and Tenet Healthcare*

- Opened its Alternate Care Site located at Cal Poly San Luis Obispo's Recreation Center. This site will help relieve local hospitals and nursing homes by housing patients with needs between home care and hospitalization
  

Connecticut (CT)
*Athena Health Care Systems*

- Operates four designated COVID-19 recovery centers to accept COVID-19 patients who no longer require acute care but are still impacted by the infection – paid $600 per patient per day
  

Iowa (IA)
*Iowa Long Term Care Ombudsman*

- Provides individual nursing home support for advocacy of needs at resident level
- Supports residents and families with concerns
- Encourages nursing homes to reach out to the Quality Improvement Organization, the Department of Inspections and Appeals (DIA), and the Illinois Department of Public Health (IDPH) for support
- Website houses multiple resources
  
  [https://www.iowaaging.gov/educational-resources/covid-19-older-iowans](https://www.iowaaging.gov/educational-resources/covid-19-older-iowans)

Maryland (MD)
*Chesapeake Regional Information System for our Patients (CRISP) Health Information Exchange Daily Bed Reporting*

- This new daily CRISP bed reporting survey provides key pieces of skilled nursing facility availability information
- The Post-Acute Capacity form has been relocated to the CRISP Unified Landing Page (ULP) at
  
  [https://ulp.crisphealth.org](https://ulp.crisphealth.org)
- Simply log in using your existing CRISP credentials, then click the "Post Acute Capacity" tab at the top of the screen to enter your facility's information as usual. For a refresher on submitting your facility's information through the Post-Acute Capacity form
  
- If you do not have access to the CRISP Unified Landing Page, please contact the CRISP Customer Care Team and request access to "Post Acute Capacity." Call 1-877-952-7477 or email
  
  support@crisphealth.org
Michigan (MI)
Michigan Office of the Governor Gretchen Whitmer
• COVID-19 Regional Hubs are dedicated to treating COVID-19-affected individuals from congregate care settings who do not require hospital-level care. The Hubs will be designated by the Michigan Department of Health and Human Services and announced as they are established.
• Facilities across the state are being considered for this model based on willingness to serve as a hub facility, capacity to contribute to local need for services, proximity to acute care facilities experiencing high COVID-19-related demand, ability to effectively quarantine COVID-19-affected residents, and performance history of the facility.
• COVID-19 Regional Hubs will be required to complete daily enhanced reporting to the department. [Link]

Nebraska (NE)
Department of Health and Human Services (DHHS)
• Temporary housing for health care workers, emergency medical services, and law enforcement personnel is provided to mitigate the potential of COVID-19 exposure to their loved ones when they return home after shifts worked. The goal of this program is to reduce spread and exposure to families of health care workers and first responders while they continue to work their assigned shifts. [Link]

Department of Health and Human Services (DHHS), University of Nebraska, Nebraska National Guard
• Temporary lodging and accommodations are available to Nebraskans exposed to COVID-19 and in need of a quarantine/isolation location outside of their usual residence due to a high-risk household member. [Link]

Nevada (NV)
Nursing Homes
• Larger, urban nursing homes are creating COVID-19 units at COVID-19-naïve facilities.

New Jersey (NJ)
Housing and Community Development Network of New Jersey
• Received funding from the Federal Emergency Management Agency (FEMA) to house COVID-19 positive individuals and families who required isolation using hotels, motels and dormitories. The five-category criteria includes:
  o Homeless individuals and families who live in congregate shelters who are symptomatic or tested positive for COVID-19
  o Homeless individuals who require quarantine or isolation due to being symptomatic or having a positive test for COVID-19
  o Children and adults living in congregate living settings who have tested positive for COVID-19
  o First responders and health care workers who do not require hospitalization but nevertheless need to avoid direct contact with their families due to exposure to COVID-19.
State Actions for COVID-19 Management and Response

12. Transportation Needs Continued

- Other groups that may need assistance as the State continues to respond to the COVID-19 pandemic, such as COVID-19 positive patients who do not require hospitalization in a traditional setting, but nevertheless require quarantine and isolation outside their residence to prevent the further spread of the virus. [https://www.hcdnnj.org/coronavirusresources#homeless](https://www.hcdnnj.org/coronavirusresources#homeless)

**New Jersey Department of Health**

- Funding for 21 counties has been allocated to support home delivered meals and other food to boost senior nutrition for older New Jersey residents during the COVID-19 pandemic. [https://www.state.nj.us/humanservices/news/pressreleases/2020/approved/20200501.html](https://www.state.nj.us/humanservices/news/pressreleases/2020/approved/20200501.html)

**Office of the Governor Phil Murphy**

- The Federal Emergency Management Agency (FEMA) has approved New Jersey’s request to use emergency, non-congregate sheltering for individuals impacted by COVID-19 that do not have the means or ability to isolate themselves. [https://www.nj.gov/governor/news/news/562020/20200411a.shtml](https://www.nj.gov/governor/news/news/562020/20200411a.shtml)

**New Mexico (NM)**

**Nursing Homes**

- Larger nursing home corporations have instituted COVID-19-specific facilities

**New York (NY)**

**Coalition for the Homeless**

- The Coalition has developed COVID-19 guidance material for shelters. The guidance material, all of which are available for viewing, download, and use, includes:
  - Best practices for shelters
  - Isolation procedures and guidance
  - Face mask guidance
  - Isolation discharge criteria
  - COVID-19 overview and testing form

**Women In Need NYC (WINNYC: Provider of shelter services in New York City)**

- New housing recovery and stability plan due to COVID-19 crisis called “The Aftermath Plan”:
  - Establish a new Stay-at-Home Emergency Rental Assistance Voucher to help low-income renters stay in their homes
  - Create New York City Rapid Rehousing to help families avoid shelter by providing temporary accommodations (30 to 60 days) in apartment-style student housing and hotels and an enhanced rental assistance voucher to help families quickly find a new home
  - Convert vacant hotels to family shelters and provide social services
  - Make common-sense adjustments to the City Family Homelessness Eviction Prevention Supplement (FHEPS) rental voucher so the program widens the door out of shelter now
Ohio (OH)
Ohio Department of Health
- The Health Department created a checklist that can be used by shelters and congregate sites to minimize exposure to COVID-19. Shelters and other congregate housing sites can use this checklist to ensure they are following COVID-19 precautions. The directions are clear and succinct
- Released a resource that speaks to emergency preparedness in long term care facilities and the resident transport component of the preparedness plan as it links to infectious disease (transfer agreements and outside sources of transportation)
- Created a resource that discusses Ohio workplaces COVID-19 requirements for cloth masks or face coverings and addresses FAQs pertaining to the topic (i.e., proper way to wear, available face coverings, why to wear face coverings, and types of face coverings)

Pennsylvania (PA)
Pennsylvania Health Care Association
- Provided hotel rooms for staff needing distancing
  https://www.phca.org/covid19

Texas (TX)
Texas Department of State Health Services
- Contracts to staff and outfit alternate care sites are in place throughout the state, as well as to coordinate planning efforts with multiple jurisdictions that may have their own surge capacity plans. For instance, the City of Austin used models from the University of Texas to prepare to set up hospital-level care sites with select buildings

West Virginia (WV)
West Virginia Department of Health and Human Services, Bureau of Public Health
- COVID-19 website includes homeless service providers and home care resources, such as home care and self-isolation guidance for people with suspected or confirmed COVID-19 and guidance on cleaning when caring for ill person in the home
  https://dhhr.wv.gov/COVID-19/Pages/default.aspx
12. TRANSPORTATION NEEDS

California (CA)
The State of California
- California partnered with United Airlines in April 2020 to provide free, round-trip flights for volunteer medical professionals from across California and the country who join the state’s health care workforce

Georgia (GA)
Georgia Health Care Association (GHCA)
- Developed a modified infection control transfer form to help members communicate when admitting hospital transfers. This form can be used bi-directionally by hospitals and skilled nursing facilities
  https://www.ghca.info//Files/Final%20Infection%20Control%20Transfer%20Form%20-%20Fillable.pdf

Iowa (IA)
Iowa Long Term Care Ombudsman
- Provides individual nursing home support for advocacy of needs at resident level
- Supports residents and families with concerns
- Encourages nursing homes to reach out to the Quality Improvement Organization, the Department of Inspections and Appeals (DIA), and the Illinois Department of Public Health (IDPH) for support
- Website houses multiple resources
  https://www.iowaaging.gov/educational-resources/covid-19-older-iowans

New Mexico (NM)
State of New Mexico
- Developed transportation capacity with state emergency management function to transport individuals requiring medical sheltering and placement at an alternative care site

New York (NY)
New York State Department of Health
- Interim Guidance for Cleaning and Disinfection of Public Transportation Settings for COVID-19: Resource speaks to cleaning and disinfection guidelines to prevent the spread of COVID-19 in public transportation, including information on routine cleaning; high risk locations; cleaning and disinfection; and staff guidance (hand hygiene, personal protective equipment, and respiratory hygiene)
State Actions for COVID-19 Management and Response

12. Transportation Needs Continued

West Virginia (WV)
West Virginia Department of Health and Human Services, Bureau of Public Health
- COVID-19 website includes information on medical transport guidelines
  https://dhhr.wv.gov/COVID-19/Pages/default.aspx
13. PATIENT TRANSFER

Arizona (AZ)

Arizona Department of Health Services (ADHS)

- Newly developed, centralized 24/7 call line facilitates interfacility transfer of patients to and from hospitals and nursing homes. This free service is an algorithm based on protocols created by Arizona transfer centers, ADHS, and chief medical officers. In addition, the state has identified two large alternative sites in the event of large hospital surges. This includes St. Luke’s Medical Center, which recently closed, and a mall department store.

- This system will manage throughput and deter bottlenecks in the emergency department (ED) with four key components:
  - Expediting patient transfer to a higher level of care
  - Expediting patient transfer to a lower level of care
  - Providing a safety net for interfacility transport
  - Providing critical care and palliative care consultation
  - 1.877.SURGE.AZ (1.877.787.4329)
  - [azhealth.gov/surgeline](http://azhealth.gov/surgeline)

- An algorithm for nursing homes and hospitals on accepting admissions and readmissions from higher acuity facilities clarifies when patients need to be in isolation or quarantine due to COVID-19.

- By Executive Order, Arizona nursing homes are required to report daily bed availability and status of COVID-19 patients. To facilitate this, a web-based application, the Post Acute Care Capacity Tracker (PACCT), was developed. Having a centralized reporting mechanism will ensure appropriate level of care and reduce redundant phone calls from various hospitals to nursing homes.

California (CA)

The County of Los Angeles

- The Department of Public Health provides guidance to skilled nursing facilities (SNFs) on clinical care related to COVID-19 under the direction of the dedicated Hospital Acquired Infection-Antimicrobial Resistance Committee (HAI-ARC) to include directives on interfacility transfer, discharge rules, preventing and managing COVID-19 in long term care facilities and return to facility rules.
  - [http://publichealth.lacounty.gov/media](http://publichealth.lacounty.gov/media)
13. Patient Transfer Continued

San Mateo County Health, Health Plan of San Mateo
- San Mateo County Health designated three skilled nursing facilities (SNFs) as Centers of Excellence to proactively coordinate care for COVID-19 residents. These facilities were identified for their high standards of patient care and expertise with infection control. These Centers of Excellence will treat COVID-19-positive patients discharged from local hospitals, as well as patients from community settings who have COVID-19 and require a higher level of care.

County of San Luis Obispo, Cal Poly San Luis Obispo, Dignity Health, Tenet Healthcare
- The County of San Luis Obispo, in partnership with Cal Poly San Luis Obispo, Dignity Health, and Tenet Healthcare opened its Alternate Care Site located at Cal Poly San Luis Obispo's Recreation Center. This site will help relieve local hospitals and nursing homes by housing patients with needs between home care and hospitalization.

Connecticut (CT)
Athena Health Care Systems
- Operates four designated COVID-19 recovery centers to accept COVID-19 patients who no longer require acute care but are still impacted by the infection – paid $600 per patient per day.

Delaware (DE)
Delaware Health Care Facilities Association (DHCFA)
- A discharge planning task force works with accountable care organizations (ACOs) for each county and eBright Health, the state ACO, and all hospitals. It coordinates transfers from hospital to nursing home or assisted living, or vice versa. This takes a lot of communication and has worked extremely well. They want to keep this in place after the crisis.

https://www.dhcfa.org/

Florida (FL)
Florida Agency for Health Care Administration
- Early in the epidemic, worked with Florida Health Care Association and Florida Hospital Association to provide guidance related to transfers between nursing homes and hospitals.

http://ahca.myflorida.com/COVID-19_Facilities.shtml#facility
- Implemented emergency rule mandating hospital testing prior to discharge to long-term care facility
- Directed nursing homes to transfer residents if the nursing home is unable to appropriately isolate and following Centers for Disease Control and Prevention (CDC) guidance.

http://ahca.myflorida.com/COVID-19_Facilities.shtml#facility
- Facilitated regional collaboratives of hospitals and nursing homes to provide critical infection control education and support
13. Patient Transfer Continued

**Georgia (GA)**

*Georgia Health Care Association (GHCA)*
- Developed a modified infection control transfer form to help members communicate when admitting hospital transfers. This form can be used bi-directionally by hospitals and skilled nursing facilities
  https://www.ghca.info//Files/Final%20Infection%20Control%20Transfer%20Form%20-%20%20Fillable.pdf

**Illinois (IL)**

*Illinois Critical Access Hospital Network (ICAHN)*
- Provides swing beds for COVID-19-positive patients upon discharge from the hospital

*Illinois Health and Hospital Association (IHA)*
- IHA collaborated with three nursing homes trade associations and the Illinois Department of Public Health on the development of transfer guidance from hospital settings to skilled and intermediate long-term care settings
  https://www.team-iha.org/files/non-gated/quality/guidance_regarding_hospital_4-7-20.aspx

**Indiana (IN)**

*Indiana State Department of Health (ISDH)*
- An ISDH waiver issued guidance for creating COVID-19 long term care facilities:
  - Waiving facility staffing requirements
  - Enhancing reimbursement rates for COVID-19 facilities by 50 percent
  - Providing liability protection
  - Giving data support to help hospitals identify post-acute COVID-19 facilities for transfer
  - Providing infection control teams to train facilities on COVID-19 testing
  - Provisioning all necessary personal protective equipment (PPE) equipment as a “priority” facility, similar to hospitals
- ISDH negotiated a transfer agreement between the hospital and long term care facility associations, which uses five categories of resident/patient transfers to facilitate the safest movement of persons between facilities
- Working with local organizations, ISDH created documents and best-practice sheets to help facilities and hospital to better communicate around facility transfers
  - Hospital to Post-Acute Care Transfer COVID-19 Assessment:
    https://www.coronavirus.in.gov/files/IN_COVID-19_Hospital%20to%20Post-Acute%20Care%20Transfer%205.11.20.pdf
  - Best Practices When Transferring to the Hospital:
    https://www.coronavirus.in.gov/files/Tips%20for%20Transferring%20to%20Hosp%20Final.pdf
  - COVID-19: Hospital Hand-off to Nursing Home:
13. Patient Transfer Continued

- COVID-19 Nursing Home Accepting Transfer from Hospital:  
  https://www.coronavirus.in.gov/files/NH%20accepting%20transfer%20from%20Hosp%20Final.pdf

**Indiana Department of Homeland Security**
- Emergency Medical Services, through the Indiana Department of Homeland Security, coordinated with the 911 system and nursing homes to use 911 as the method of communication for a positive COVID-19 resident prior to transfer to the hospital so that emergency medical services (EMS) crews are prepared and 911 dispatch is aware that the unit will be out of service for two hours after transfer to decontaminate

**Iowa (IA)**
**Unity Point Healthcare (UPH) Accountable Care Organization Response**
- Unity Point Healthcare launched an initiative to ensure safe transfers of patients transitioning to a skilled nursing facility (SNF)
- UPH will test any patient for COVID-19 prior to transition to a SNF. UPH is identifying space within each of its hospitals where patients who remain positive for COVID-19 but no longer require acute care can remain until they are safe to transition to a SNF  
  https://www.unitypoint.org/coronavirus.aspx

**Kentucky (KY)**
**Kentucky Association of Health Care Facilities (KAHCF)**
- KAHCF, in collaboration with long term care administrators, developed guidance on hospital transfer from hospitals to long term care facilities

**Maine (ME)**
**MaineHealth, Northern Light Healthcare**
- Two large health systems collaborated with hospital, nursing home, and home health associations to create a protocol/recommendations for skilled nursing facility (SNF) transfers  
  https://files.constantcontact.com/61812921601/bbba135e-b54a-4d96-8385-d3218b31397f.pdf

**Massachusetts (MA)**
**Buoy Health**
- Developed an artificial intelligence assistant app that has an online coronavirus symptom checker, which uses an algorithm to determine the need for residents to be transferred from the nursing home to the hospital  
13. Patient Transfer Continued

**Michigan (MI)**
*University of Michigan*
- Increasingly, many individuals transition from hospitals to nursing homes to complete their recovery from serious health events as post-acute care patients. The Preventing Resistance and Infection by Integrating Systems in Michigan (MI PRIISM) project aims to develop a robust, integrated infection prevention program leveraging the increasingly close relationship between hospitals and their preferred referral nursing homes.
  
https://priism.med.umich.edu/home

**New Jersey (NJ)**
*New Jersey Department of Health*
- Resident Transfer Protocol aligns with the New Jersey health commissioner plan to work with long term care centers to identify which facilities can separate infected residents or those with symptoms from the resident population. Facilities without wing/floor cohort ability are prioritized for transfer.

**New Jersey Long Term Care Ombudsman (LTCO)**
- Centers for Medicare & Medicaid Services (CMS) drafted a memorandum to State Survey Agency Directors. The CMS memorandum directed notification requirements for facilities when transferring residents to an acute care facility on an emergent basis. The resource speaks to the LTCO responding to requests for clarification about what information facilities should send to LTCO when a resident is subject to a transfer to an acute care facility on an emergency basis, the background of this issue, and direction on what information the LTCO will accept.

https://ichoosehome.nj.gov/ooie/emergency.shtml

**New Mexico (NM)**
*New Mexico Department of Health, Home Care Association and Medical Advisory Team*
- Collaborated with New Mexico Home Care Association and Medical Advisory Team on the development of transfer guidance from hospital settings to skilled and intermediate long-term care settings

**New York (NY)**
*New York State Department of Health (NYSDOH)*
- Outlined the public health emergency response, guidance, and recommended practices to assist nursing homes in the processing and removal of decedents during the COVID-19 outbreak:

- Created an Advisory: Hospital Discharges and Admissions to Nursing Homes/ Expedited Receipt of Residents Returning from Hospitals to Nursing Homes
  - Residents are deemed appropriate for return to a nursing home upon a determination by the hospital physician or designee that the resident is medically stable for return
  - Hospital discharge planners must confirm to the nursing home, by telephone, that the resident is medically stable for discharge. Comprehensive discharge instructions must be provided by the hospital prior to the transport of a resident to the nursing home.
13. Patient Transfer Continued

- No resident shall be denied re-admission or admission to the nursing home solely based on a confirmed or suspected diagnosis of COVID-19. Nursing homes are prohibited from requiring a hospitalized resident who is determined medically stable to be tested for COVID-19 prior to admission or readmission. 
- Reviewed the New York State Governors policy and specific guidance related to COVID-19 returns to nursing homes. New protocols on testing inside nursing homes are also included: 
  [https://www.ny1.com/nyc/all-boroughs/news/2020/05/10/state-reverses-controversial-coronavirus-nursing-home-policy-]

**Office of the Governor Andrew Cuomo**

- This resource speaks to Governor Cuomo’s Executive Order for the suspension and modification of various laws and regulations authorized under applicable to nursing homes, which are no longer suspended and fully effective as of May 8, 2020 (facilitate transfers, rapid discharge, and transfer between hospitals and nursing homes) 

**Nevada (NV)**

*Nevada Health Care Association, Hospital Association, and Rural Hospital Partners*

- A COVID-19-specific transfer form has been developed and is being implemented across these memberships, representing a very large portion of the Nevada health care community

**North Carolina (NC)**

*North Carolina Health Care Foundation (NCHA)*

- The NCHA created a workforce document, “Strategies to Support Nursing Surge Capacity During Biological Events,” in collaboration with the North Carolina Healthcare Foundation, North Carolina Organization of Nurse Leaders, and the North Carolina Directors of Nursing Administration in Long Term Care (NCDONA/LTC)
- The document is based off of a New Jersey Hospital Association toolkit for long term care facilities 

**Ohio (OH)**

*End-Stage Renal Disease (ESRD) Network*

- To ensure care quality and patient safety, the ESRD Network established education to assist in care transitions

**LeadingAge Ohio**

- This resource includes Q&A discussion and guidance to health care providers related to protocols in place for patients returning from hospitalization; screening new admissions; and accommodating individuals and families requesting a tour of the facility in anticipation of admission
  [https://www.leadingageohio.org/aws/LAO/asset_manager/get_file/434627?ver=49]
Ohio Department of Health

- The Health Department created a checklist that can be used by shelters and congregate sites to minimize exposure to COVID-19. Shelters and other congregate housing sites can use this checklist to ensure they are following COVID-19 precautions. The directions are clear and succinct

- Released a resource that speaks to emergency preparedness in long term care facilities and the resident transport component of the preparedness plan as it links to infectious disease (transfer agreements and outside sources of transportation)

- Created a resource that discusses Ohio workplaces COVID-19 requirements for cloth masks or face coverings and addresses FAQs pertaining to the topic (i.e., proper way to wear, available face coverings, why to wear face coverings, and types of face coverings)

Ohio Funeral Directors Association

- The Ohio Funeral Directors Association prepared recommendations to facilitate the transfer of deceased patients from nursing homes, long term care, and hospitals into the care of the funeral director

OMDA - The Ohio Society for Post-Acute and Long term Care Medicine

- The Skilled Nursing Facility to Hospital and Hospital to Skilled Nursing Facility COVID-19 Transfer Communication Tool documents an individual’s medical status related to COVID-2019 to help facilitate communication between skilled nursing facilities and hospitals during patient transfers and admissions
  http://ohioamda.org/aws/OMDA/pt/sp/resources

Pennsylvania (PA)

Pennsylvania Health Care Association (PHCA)

- Nursing home association representing most nursing homes in Pennsylvania allows nursing homes to transfer residents if unable to care for them
  https://www.phca.org/covid19

Texas (TX)

Texas Health and Human Services Commission Regulatory Services

- A patient/resident transfer assessment guidance and process flow assists with transfers of patients from hospitals to long term care facilities
Virginia (VA)
Virginia Health Care Association (VHCA)
- Created and distributed two documents to provide guidance for patient transfers during the pandemic. The first document, “Guidance on Hospital Transfer and Admission of Patients to Long Term Care Facilities (LTCFs) During COVID-19 Emergency,” is a protocol for hospitals that discharge patients to LTCF as admissions or readmissions: https://www.vhca.org/files/2020/04/VHCA-LA-VHHA-COVID-19-LTCF-Hospital-Guidance_Final_04-22-20.pdf
- The second document is an algorithm for assessing if a patient can be transferred safely and appropriately to a LTCF: https://www.vhca.org/files/2020/04/COVID-Hospital-to-Post-Acute-Transfer-Form_04-22-20final.pdf

Washington (WA)
State of Washington
- The state of Washington has responded well to the pandemic, with many organizations working to support the implementation and spread of nursing home-related state action
- Larger facilities and corporations are establishing COVID-19-specific facilities to receive discharges from hospitals, with increased hazard pay for employees and dedicated resources
- The state of Washington, with support of the hospital and nursing home associations, developed a standardized state-wide process for coordinating discharges from hospitals to nursing homes so as not to overwhelm any one facility

West Virginia (WV)
West Virginia Health Care Association and West Virginia Department of Health and Human Services (WVDHHS)
- In conjunction with WVDHHS Bureau for Public Health Division of Infectious Disease Epidemiology, developed guidelines for COVID-19 outbreaks in long term care facilities, which covers management of residents returning from hospitalization or new admissions; criteria to remove residents from isolation; and nursing facility transfers: https://dhhr.wv.gov/COVID-19/Pages/default.aspx
14. RESOURCES

Alabama (AL)
Alabama Nursing Home Association (ANHA), Alabama Department of Health (ADPH), Alliant Health Solutions

Host COVID-19 office hours on Tuesdays and Thursdays through August 27, 2020 for facilities to discuss and share COVID-19 best practices. These partners are also planning a monthly Health care acquired-infection (HAI) Huddle webinar on the last Friday of each month to provide guidance on some of the common themes brought forth during the office hour calls. Information related to these calls will be included in the ANHA newsletter.

Office of the Governor Kay Ivey
- An Alabama state-based COVID-19 taskforce is maintaining a website which provides a wide variety of helpful COVID-19 information, including testing sites, news, and resources. The website is intended to also connect businesses, nonprofits, and people that need help with the right program partners and to connect program partners with people and resources to help those most in need.
  https://covid19.alabama.gov

Alaska (AK)
Alzheimer’s Resource of Alaska
- This organization provides care coordination services and education and connects residents to meaningful activities and community.
  https://www.alzalaska.org/programs-services-2

Arizona (AZ)
Arizona Health Care Association (AHCA)
- AHCA developed a program to implement emergency preparedness and incident command training for nursing homes.
- This work is funded by a grant from the Arizona Department of Health Services.
- The program also created a COVID-19 web page with information relevant to nursing homes, which includes information on national, state, and local guidelines.

California (CA)
California Health Care Foundation
- Provides COVID-19 resources to support nursing home providers, patients, and families to have conversations about serious illness and end-of-life care.
- Online resources cover topics such as support for health care providers, patients, and families; the importance of advance care planning and palliative care in the context of COVID-19; and support for health systems regarding critical care resources.
  https://www.chcf.org/publication/covid-19-resources-serious-illness-end-of-life-care
Coalition for Compassionate Care of California
- Offers a COVID-19 Conversations Toolbox for patients, families, and providers in nursing homes as they navigate end-of-life decision-making during these challenging times
- The toolbox includes decision aids, COVID-19-specific scripts, conversation tips, and other tools to help facilitate conversations about care
  https://coalitionccc.org/covid-conversations-toolbox

County of Santa Clara Emergency Operations Center
- Organized local resources to meet projected needs for skilled nursing facilities
- Distributed a survey for residents to document skills and matched them with specific nursing home needs, such as janitorial services and social work
  https://www.sccgov.org/sites/covid19/Pages/i-can-help.aspx

YMCA of Orange County
- Twenty-eight YMCAs in Orange County are offering childcare services from 6:45 AM to 6:00 PM so that nurses can go to work. A staff member is dedicated at each site to sterilize and disinfect everything that the children and staff come in contact with. Children are screened for symptoms each day and stay in the same group of 10 throughout the day

Colorado (CO)
Office of the Governor Jared Polis
- Amended Executive Order D 2020 070 to change the fund source for the accounting of certain CARES Act Fund dollars for education, and to clarify the permissible uses of CARES Act Fund dollars for units of local government
- Initiated a COVID-19 Innovation Response Team, taking a multipronged approach that includes increased testing, tailored social-distancing measures, a reinforced health care system, and a bolstering of state epidemiological resources

Delaware (DE)
Delaware Health Care Facilities Association (DHCFA)
- Arranged a dance party for staff
- There was a DJ set up outside of the facility and staff came out to dance while residents watched from the windows
  https://www.dhcfa.org

Florida (FL)
Florida Health Care Association
- Shares COVID-19 information on its website
  https://www.fhca.org

Florida Health Care Coalitions
- Offers dedicated page on website for COVID-19 information, including information about symptoms, handwashing, social distancing, and Q&As
  https://floridahealthcovid19.gov
Florida Hospital Association
- Shares COVID-19 information on its website
  http://www.fha.org

Florida Society for Post-Acute and Long-Term Care Medicine (FMDA)
- Provides COVID-19 library of related resources on web page

Georgia (GA)
Georgia Department of Public Health (GA DPH)
- Georgia DPH has been a supportive agency for all facets of health care during this pandemic
- Its ability to provide on-site support and develop a process for video audits has been invaluable to those that are in “hot spots” of COVID-19 activity
- Collects data from health care facilities on the State Electronic Notifiable Disease Surveillance System (SENDSS) network
- Supports health care facilities with virtual and on-site visits
- Tests for COVID-19 samples at the GA DPH laboratory
  https://dph.georgia.gov

Hawaii (HI)
Center to Advance Palliative Care
- Created COVID-19 toolkit to assist with palliative care, hospice, and end-of-life decisions
  https://www.capc.org/toolkits/covid-19-response-resources

Kokua Mau Continuous Care
- Deployed a COVID-19-specific resource page
  https://kokuamau.org/covid-19-resources

Illinois (IL)
Health Care Council of Illinois (HCCI)
- Developed COVID-19 Resource page, updated daily with information regarding state and federal regulations, infection control, personal protective equipment (PPE), and Centers for Disease Control and Prevention (CDC) information
- Prepares weekly member newsletters and email blasts on COVID-19 related resources and events throughout the state
  http://www.hccil.org/covid-19/

Illinois Department of Public Health (IDPH)
- Had long term care facilities complete a COVID-19 infection control assessment
- Telligen has partnered with IDPH to conduct outreach to nursing homes that do not have any cases of COVID-19, in order to proactively support infection prevention practices
- COVID-19 website includes long term care guidance, information on facility outbreaks, and links to the governor’s daily briefings
  https://www.dph.illinois.gov/covid19
Illinois Health Care Association (IHCA)
- Offers resource on steps to prevent COVID-19 from entering facility https://www.ihca.com/Files/Comm_Article%20Info&Updates/Preventing%20COVID-19%20From%20Entering%20Facilities.pdf

Office of the Governor J.B. Pritzker
- Illinois Governor J.B. Pritzker issued a Gubernatorial Disaster Proclamation in response to the ongoing COVID-19 situation to assist Illinois agencies in coordinating state and federal resources, including the Strategic National Stockpile of medicines and protective equipment, to support local governments in preparation for any action that may be necessary related to the potential impact of COVID-19 in the state of Illinois https://www2.illinois.gov/sites/gov/Documents/APPROVED%20-%20Coronavirus%20Disaster%20Proc%20WORD.pdf
- The Governor provides a coronavirus update briefing daily
- Drive through testing sites are available throughout the state; all health care workers and residents with symptoms are eligible for testing https://dph.illinois.gov/covid19/covid-19-testing-sites

Rush University Geriatric Workforce Enhancement Program (GWEP)
- Collaborating and supporting other Rush facilities and Illinois trade associations by providing free COVID-19 and infection prevention-related learning collaboratives and learning sessions to all provider types http://catch-on.org/

Indiana (IN)
Indiana State Department of Health (ISDH)
- Created a position to oversee the state’s COVID-19 long term care response. This position worked between both ISDH, which provides the regulatory oversight of the facilities, and the Family and Social Services Administration (FSSA) Medicaid Agency and Division of Aging, which oversees the payment and care responses
- Created dedicated area on its page for all long term care guidance https://www.coronavirus.in.gov/2399.htm
- Reports weekly aggregate long term care data on its web page dashboard https://www.coronavirus.in.gov/2393.htm

Iowa (IA)
Iowa Department of Inspections and Appeals
- Fields individual nursing home questions specific to survey or regulation, created a website FAQ document for support on common questions, and provides 1135 waiver guidance. During surveys, the Department encourages nursing homes to reach out to the Quality Improvement Organization (QIO) or Iowa Department of Public Health (IDPH) for support https://dia.iowa.gov/about/novel-coronavirus-covid-19
State Actions for COVID-19 Management and Response

14. Resources Continued

**Iowa Department of Public Health**
- Website houses multiple resources for COVID-19 guidance and long term care recorded webinars
- Conducts support webinars with ample Q&A time
- Manages hotline and individual nursing home assistance via email
- Provides support through emergency response team available (for example, personal protective equipment [PPE] supply)
- Create guidance documents for state-specific requirements and reporting support
  https://idph.iowa.gov/Emerging-Health-Issues/Novel-Coronavirus/Long-Term-Care

**Iowa Health Care Association**
- Provides individual technical assistance; group meeting support; a weekly conference call; regular member newsletters; survey, reporting, and regulatory guidance; and a website that houses multiple COVID-19 resources, including a toolkit, the Telligen Telehealth Guide, updates and other topics
  https://www.iowahealthcare.org/member-resources/emergency-preparedness/infection-control-resources/

**Iowa Long Term Care Ombudsman**
- Provides individual nursing home support for advocacy of needs at resident level
- Supports residents and families with concerns
- Encourages nursing homes to reach out to the Quality Improvement Organization (QIO), the Department of Inspections and Appeals (DIA), and the Illinois Department of Public Health (IDPH) for support
- Website houses multiple resources
  https://www.iowaaging.gov/educational-resources/covid-19-older-iowans

**LeadingAge of Iowa**
- Provides individual technical assistance; a weekly conference call; regular member newsletters; survey and regulatory guidance; and a website housing multiple COVID-19 topics
  https://www.leadingageiowa.org/covid-19

**Office of the Governor Kim Reynolds**
- The governor’s COVID-19 website includes information for long term care facilities that link to resources from the Centers for Disease Control and Prevention (CDC)
  https://coronavirus.iowa.gov

**University of Iowa**
- The National Nursing Home Social Work Network is a geriatric workforce enhancement program funded by grants from the Health Resources and Services Administration (HRSA) to develop a health care workforce that maximizes patient safety and engagement and to improve health outcomes for older adults. Much of its work is focused on long term care
14. Resources Continued

- The program offers a weekly online support group meeting and multiple online resources for advance care planning, ethical decisions, and how to prepare and support residents, staff, families, and themselves

Kentucky (KY)

**Norton Health Care**
- Developed a post-acute team and call line to assist skilled nursing facilities
- Expects the call line to be rolled out statewide (more guidance on the web page)
  [https://kahcfkcal.org](https://kahcfkcal.org)

State of Kentucky
- The State of Kentucky is maintaining a website which contains information about COVID-19 testing center locations, rates of infection by state and county, a COVID-19 Hotline (800-722-5725), a link to a daily report of COVID-19 epidemiological data, and a link to the most current long term care update by the state
  [https://govstatus.egov.com/kycovid19](https://govstatus.egov.com/kycovid19)

Maine (ME)

**Maine Department of Health and Human Services (DHHS)**
- MaineCare will pay extra costs associated with COVID-19, including staffing, supplies, and personal protective equipment, with $10.1 million in state and federal funds to support facilities
- The Division of Licensing and Certification partnered with the state health department and the ombudsman program to pool resources to complete Infection Control Assessment and Response (ICAR) programs in all Maine nursing facilities within three days

**Maine Health Care Association**
- Encouraged children to write notes, upload a drawing, or send a short video to residents in nursing homes and assisted living facilities
  [https://www.mehca.org/e-notes4ltc](https://www.mehca.org/e-notes4ltc)

Maryland (MD)

**FutureCare Nursing Homes**
- Established an employee phone line for staff to answer questions related to COVID-19
- The phone line is open between 9 AM – 5 PM daily
  [https://futurecare.com/covidanswerline](https://futurecare.com/covidanswerline)
- Dr. William Mansbach developed five employee support videos on diet and hydration, breathing, information overload, physical exercise, and cognitive exercises
  [https://futurecare.com/employeesupport](https://futurecare.com/employeesupport)

**SavaSeniorCare Administrative Services**
- Created a toolkit to support residents and staff in having meaningful engagement while practicing social distancing and precautions
- The goal is to ensure there is connection in the ways it matters most
  [https://www.savaseniorcare.com/sava-announcements](https://www.savaseniorcare.com/sava-announcements)
Massachusetts (MA)
- State waived requirement for in-person documentation related to Medical Orders for Life Sustaining Treatment (MOLST). This allowed for conversations to continue with family and practitioners supporting the resident choice for end-of-life care
  https://www.honoringchoicesmass.com/ma-allows-verbal-consent-on-molst

Michigan (MI)

Detroit Health Department, Office of the Mayor Mike Duggan, Henry Ford Health System Division of Infectious Diseases
- Conducted multiple testings for residents and health care workers at 26 Detroit nursing homes, provisioned personal protective equipment, and conducted in-person education and consultation on infection prevention and control for all 26 facilities
  https://www.henryford.com/coronavirus

Henry Ford Health System (HFHS)
- Uses information technology with CarePort to help find appropriate beds for patients during peak crisis
- Donated excess personal protective equipment (PPE) to skilled nursing facilities, home health care agencies, and community partners
- Work collaboratively with CarePort/Allscripts to help home dialysis facilities cohort patients. Certain organizations are contacted twice daily to notify them of patients being discharged and their COVID-19 status. This ensures that these organizations were able to isolate and protect all patients and staff
- Collaborate with a regional hub for an outpatient COVID-19 unit by providing staff support to prepare the new unit to accept COVID-19-positive patients that needed placement
  https://www.henryford.com/coronavirus

Michigan Department of Health and Human Services (MDHHS)
- The COVID-19 Infection Prevention Resource and Assessment Team (iPRAT) was activated by MDHHS to prevent COVID-19 infections and contain the spread of COVID-19 in long term care facilities
- The team works closely with the Medical Services Administration, Michigan Long Term Care Ombudsman, Michigan Licensing and Regulatory Affairs, and local health department partners

Michigan Hospital Association
- Launched a hospital donation tool
  https://protecttheheroes.org
- Hosts hospital donation sites link to collect financial and personal protective equipment donations to help their local facilities

Wayne State University Institute of Gerontology
- Hosts virtual tool for elder abuse (misappropriation)
  https://iog.wayne.edu/iogrespondtocovid-19
University of Michigan College of Engineering, Precision Health, Michigan Medicine
- Developed the model which uses a machine-learning algorithm to crunch more than 200 health and demographic variables of individual COVID-19 patients. The model then outputs a numerical score, updated every four hours, that predicts the patient’s likelihood of requiring intensive care unit-level care. Preliminary validation of the model has shown it to be effective in predicting the progression of the disease

Minnesota (MN)
Beaumont
- Advance care planning in-service provides skilled nursing facilities and other health care settings tools and resources for initiating the advance care planning conversation during COVID-19
  www.beaumont.org/patients-families/respecting-choices-at-beaumont-advance-care-planning

Minnesota Department of Health (MDH)
- The COVID-19 Infection Control Assessment and Response (ICAR) Action Plan developed by MDH prepares nursing homes for COVID-19 by addressing these topics: administrative, surveillance, education, hand hygiene, transmission-based precautions, personal protective equipment, cleaning, and transfers
- Posted a long term care toolkit, intended for use to plan for a potential COVID-19 case or during an outbreak at a facility. Nursing homes can download this toolkit to implement measures to prevent and control disease spread in their homes, and to collect data that will help track respiratory illness and COVID-19 in residents and staff
  https://www.health.state.mn.us/diseases/coronavirus/hcp/ltctoolkit.pdf

Minnesota Association for Geriatrics Inspired Clinicians (MAGIC)
- Created Managing COVID-19: A Guide for Skilled Nursing Facilities and Assisted Living Settings developed by MAGIC Clinical Practice Alliance Committee (CPAC)
- MAGIC thoroughly reviewed publications from the Centers for Disease Control and Prevention (CDC), Minnesota Department of Health (MDH), and AMDA The Society for Post-Acute and Long Term Care Medicine and developed a comprehensive guide to provide concise information for managing COVID-19

Mississippi (MS)
Mississippi State Department of Health (MSDH) – Epidemiology Department
- Partners with MSDH Licensure & Certification with frequent contact
- Provides consultation to prevent the spread of COVID-19 in nursing homes
- Assists with personal protective equipment attainment
- Nursing homes that have COVID-19 cases receive daily follow-up

Missouri (MO)
Missouri Department of Public Health
- Website provides a local, zip code-level map of positive cases, as well as charts/graphs of COVID-19 cases and deaths by age, sex, and race
- A map of testing locations also is provided, with a hotline number and resources for the public
  https://www.stlcorona.com
Quality Improvement Program for Missouri (QIPMO)
- In addition to an online COVID-19 resource compendium, QIPMO recently developed a COVID-19 SBAR (Situation, Background, Appearance/Assessment, Review/Recommendation) tool for nursing homes
- The COVID-19 SBAR is used by facilities to document and communicate changes in resident status due to COVID-19 that would require action to be taken such as transfer to acute care

Montana (MT)
Montana Department of Public Health
- Emergency preparedness program assists providers and communities with COVID-19 resources, information, and supplies/personal protective equipment requests
  https://dphhs.mt.gov/publichealth/PHEP

Nebraska (NE)
American Red Cross Innovative Blood resources (IBR)
- Facilitates plasma donation from people who have fully recovered from COVID-19 for at least two weeks
  https://www.innovativebloodresources.org/
  https://www.ncbb.org/

Catholic Health Initiatives (CHI)
- Lists facilities involved in Mayo Clinic Protocol-COVID-19 convalescent plasma donation

Nevada (NV)
Nevada Rural Hospital Partners
- The Nevada rural hospital partners that support all rural health care facilities, including nursing homes, developed a COVID-19 resource toolkit

New Jersey (NJ)
LeadingAge
- Resident engagement during social isolation: Presentations and recommendations from members to keep residents engaged during social isolation
  https://leadingage.org/resident-engagement-during-social-isolation?mkt_tok=eyJpIjoiT1RReVIXSTFZekl3TkdVeilsInQjOiGRUJKZehBckJuQ2hnM2tBDWZCdZBV2xuNJeV9XC9mTE1XQ1cR1pZVnFnm8yUW45NkNSWTBVMkVBU5CZXBycDJmc2xiYkt4Sm5zNihaXC9RQzRHY09aeIA1TWhGaXJkS1VubW5XeXpW
New Jersey Department of Health

- The Tele-ICAR tool for long-term care and assisted living facilities was developed by the Centers for Disease Control and Prevention (CDC) and is intended to help long term care (LTC) and assisted living facilities (ALF) respond effectively to COVID-19 by evaluating the status of their current response activities

- The Guidance for COVID-19 Diagnosed and/or Exposed Healthcare Personnel resource addresses the widespread transmission of COVID-19 in New Jersey, the likelihood of asymptomatic and pre-symptomatic transmission, and the feasibility and benefits of formal contact tracing in health care settings

- The Quick Reference: Discontinuation of Transmission-Based Precautions and Home Isolation for Persons Diagnosed with COVID-19 tool helps health care facilities, health care providers, and local public health officials determine when to discontinue isolation for persons with confirmed COVID-19

- Developed the retrospective assessment tool for health care personnel (HCP) potentially exposed to COVID-19. This tool can be used to assess HCP exposure risk prior to the patient being identified as having COVID-19

- This document can be used to assess the type of potential exposure health care personnel may have experienced while caring for the COVID-19 patient and assign risk level (high, medium, low, or no risk). It also provides guidance on the management of exposed health care personnel

- This tool can be used to monitor and assess the appropriate use of personal protective equipment (PPE) for health care personnel caring for the COVID-19 patient after they have been identified in the facility

- Tool incorporates recommendations and reporting requirements to assist in the control of outbreak at facility

- Information for providers and families on Physicians Orders for Life Sustaining Treatment (POLST) and end-of-life conversations
  [https://nj.gov/health/advancedirective/polst](https://nj.gov/health/advancedirective/polst)

- Tool can be used by a health care facility or local health department to track HCP under active monitoring

- This tool can be used by a health care facility or local health department to assist HCP with daily symptom monitoring
New Jersey Department of Human Services
- Funding used to expand access to counseling and other mental health support during the pandemic. The funds help New Jersey residents facing behavioral health issues during this crisis get the emotional support they need
  https://www.state.nj.us/humanservices/news/pressreleases/2020/approved/20200518.html

New Mexico (NM)
State of New Mexico
- Set up a COVID-19 website, including information about symptoms, handwashing, social distancing, and Q&As
- Informational hotlines established to educate and inform on fact vs. fiction
- Nursing homes have distributed iPads for residents to facilitate virtual communication and visits with families
- Infection preventionists from the local public health districts and state departments of health are providing consultations to nursing homes

New York (NY)
Long Term Care Community Coalition
- The Emergency Action Plan: Save Lives of Residents in New York Long Term Care Facilities resource highlights components of a recommended COVID-19 action plan based on existing policies, known issues and concerns (i.e., preventing COVID-19 from entering nursing homes, daily resident monitoring, sufficient staffing, infection prevention and control transparency, personal protective equipment availability, resident and staff testing)
  https://nursinghome411.org/covid-emergency-action-plan

New York State Department of Health
- Health care workers can text NYFRONTLINE to 741-741 to access 24/7 emotional support services
  https://coronavirus.health.ny.gov/home

New York State Long Term Care Ombudsman Program COVID-19 Response
- In an effort to assist the public and relieve anxieties, the New York State Ombudsmen Offices have done systematic outreach to inform the public of its continued services, including letters to the editors of local newspapers

New York State Office of Mental Health
- Released a resource on managing anxiety in an anxiety-provoking situation, including guidance and tips for individuals receiving mental health services; parents, including parents of children with pre-existing anxiety disorders; caregivers of older adults; and mental health providers
- Outlines health care decisions process for individuals who are intellectually disabled and Medical Orders for Life Sustaining Treatment (MOLST) to comply with New York State public health law for end-of-life decisions for individuals with developmental or intellectual disorders
  - Links to resources and information to expedite the process for obtaining urgent
approval for end-of-life decisions for individuals who are intellectually disabled

- Instructions on how to get urgent access and training to utilize the electronic MOLST and access the MOLST electronic database
  https://molst.org/covid-19-guidance

New York University (NYU)

- On the Front Line – COVID-19 Initiatives outlines ways to manage different facets of life under the spread of the COVID-19 virus, ranging from how to combat racially driven bias and fake news to how to increase cooperation and better manage stress

Office of the Governor Andrew Cuomo, New York Department of Health

- Governor Andrew Cuomo has ordered all nursing home staff to be tested at least twice a week for the virus and has barred hospitals from discharging any COVID-19 patient to a nursing facility until that individual tests negative for infection. If a nursing home is deemed unable to provide proper treatment and support for a recovering resident, that person is to be transferred to the care of the state, which has ample hospital bed capacity for such patients

- Due to a statutory change which the legislature approved at the beginning of March, Governor Cuomo can change or suspend laws unilaterally, so long as doing so assists the state in its disaster response

- With respect to nursing homes, individuals who do not work for boards of elections are now allowed to help residents of nursing homes fill out absentee ballots

- Issued guidance and recommended practices to assist nursing homes in processing the removal of decedents

Soho MD

- Soho MD psychiatrists offer virtual and text messaging support via telehealth. The company has begun using the Lief Smart Patch to monitor a patient’s heart rate and breathing patterns to identify anxiety levels in real time. This information can be downloaded into the electronic health record (EHR)

North Carolina (NC)

Division of Health and Human Services, Office of the Governor Roy Cooper

- The Governor’s COVID-19 task force created a website specific to long term care facilities and a long term care facility toolkit
Duke University, DukeHealth Population Health Management
- DukeHealth Population Health Management offers a website and updates for skilled nursing facilities
  https://phmo.dukehealth.org/covid-19-snf
- Offers frequent updates to the COVID-19 for skilled nursing facilities materials repository
  https://duke.app.box.com/v/COVID19forSNF

Ohio (OH)
Canterbury Rehab
- Lessons learned from the COVID-19 outbreak at Canterbury Rehab useful for pre-surge planning on stocking STAT boxes, cohorting, testing, personal protective equipment supplies, and tracking

LeadingAge
- Website on helping residents stay connected during the pandemic created a warrior spirit while preparing for COVID-19 cases
- State actions shared for preparing staff for “normalizing the experience” of caring for residents who are COVID-19 positive
- Includes collaborative activities/drills performed in an effort to allay staff fears and elevate morale
  https://leadingage.org/helping-residents-stay-connected-during-pandemic?mkt_tok=eyJpIjoiWTJRNVpWTJRNVPvUSTRNR1F4WwpMrMsINoi0c7zaWZXNC9LUkFvcGRUd
  kVMa18xNzpPa2J0U1RiZ3ioZys4VTRxbGZZb0BU21j4a4azJ3YXRiekpKQjBxR0izbWNaeFFkaTh6V
  VVHK0hCeG0xR1Z1bmxMQ05pVU9SeEtnanl

National Rural Health Association
- Offers COVID-19 resource toolkit for rural providers and health systems
- Toolkit for rural providers is maintained and updated by rural health providers
  https://www.ruralhealthweb.org/programs/resources/covid-19-resources

Office of the Governor Mike DeWine
- Governor DeWine’s web page announces any new changes to public policy as it pertains to COVID-19 and nursing homes
- Web page also directs visitors to Ohio Department of Health’s COVID-19 website that provides the latest data on COVID-19
- Some of this data does specifically pertain to Ohio’s nursing homes
  https://governor.ohio.gov/wps/portal/gov/governor (log in required)

Ohio Council for Home Care and Hospice
- Personal protective equipment (PPE) COVID-19 recommendations: PowerPoint presentations covering PPE strategies, optimization of supplies, and use and re-use protocols
  https://www.dropbox.com/s/gah35m6xfijutim/PPE%20PP%202.pptx?dl=0
Ohio Department of Mental Health and Addiction Services
- Developed a free confidential call line to assist those struggling with mental health issues stress and mental fatigue (including health care workers)
  https://mha.ohio.gov/Health-Professionals/About-Mental-Health-and-Addiction-Treatment/Emergency-Preparedness/Coronavirus/COVID-CareLine

Ohio Department of Health
- Created a call center to answer questions about COVID-19 that operates from 9 AM to 8 PM daily, including weekends. Call center staff includes licensed nurses and infectious disease experts available to answer questions and provide accurate information about COVID-19, how to protect yourself and prepare for COVID-19 in your community, its risk to the public, and the state’s response
  https://coronavirus.ohio.gov/wps/portal/gov/covid-19/resources/COVID-19-Call-Center
- COVID-19 education/resource allocation
- Allocation of personal protective equipment from the federal government
- Education/resources made available through website
  - The What Workers and Employers Can Do to Manage Workplace Fatigue During COVID-19 web page outlines general strategies that workers and employers can use to manage workplace fatigue and work safely
  - Other topics include but are not limited to: face mask decontamination, emergency preparedness, preserving personal protective equipment, lab testing, trauma-informed care, exposure management, medication use, care for critically ill, infection control practices, Centers for Disease Control and Prevention resources, World Health Organization resources, and health care provider stress
- STRIVE: The new Strategies for Preventing health care acquired infections (HAIs) training is the latest of 11 new infection control training courses. These courses are part of the new STRIVE curriculum intended for the infection prevention team, hospital leaders, clinical educators, nurse and physician managers, environmental services managers, all patient care staff, and patient/family advisors
- Infectious Disease Control Manual: The Infectious Disease Control Manual (IDCM) is a project of the Ohio Department of Health State Bureau of Infectious Diseases created with the assistance of the Bureau of Health Services and the Bureau of Public Health Laboratories. It is designed to be a reference for local health departments, hospitals, laboratories, and physicians in providing information about infectious diseases from a public health perspective, including prevention, control, and reporting of suspected and diagnosed cases
- Avoiding Scams - COVID-19 Checklist: Scammers are trying to monopolize on the fear and uncertainty that COVID-19 has brought to so many
Shelters and other congregate housing sites can use this checklist to ensure they are following COVID-19 precautions. The directions are clear and succinct

Created a resource that discusses Ohio workplaces COVID-19 requirements for cloth masks or face coverings and addresses FAQs pertaining to the topic (i.e., proper way to wear, available face coverings, why to wear face coverings, and types of face coverings)

Ohio Department of Health, Department of Veterans Services

Issued directive limiting nursing home visits, except in end-of-life cases

Ohio Department of Health, Ohio Department of Developmental Disabilities

Created pre-surge planning toolkit for providers of long term services and supports (LTSS) that includes concept diagrams and tools related to COVID-19
Provides resources to support evaluation and re-evaluation of needs and capacity to address future quarantines of people who have been exposed, isolation of people who are tested or presumed positive, and planning for critical shortages of personal protective equipment (PPE)
https://dodd.ohio.gov/wps/portal/gov/dodd/providers/all-provider-resources/resource-ltss-pre-surge-planning-toolkit

The Academy of Senior Health Sciences

A listing of various links/guides/educational resources regarding COVID-19 in relation to nursing home resident care
http://www.seniorhealthsciences.org/covid.shtml

Oklahoma (OK)

Be a Neighbor Organization

Ready.Help.Go. is a volunteer readiness program to connect Oklahomans to volunteer opportunities in their communities
https://beaneighbor.ok.gov/s/volunteer-page

Care Providers of Oklahoma

Links to resources on developments, guidelines, protocols, policies, and tools for partners and providers
https://www.careoklahoma.com

LeadingAge of Oklahoma

Offers detailed provider updates four to five times a week
Hosts daily conference calls with national association for provider updates
Provides triage for provider concerns, such as personal protective equipment, staff, etc.
https://leadingageok.org
Oklahoma Assisted Living Association
- Posts recommendations from the Centers for Disease Control and Prevention (CDC) to prepare for COVID-19 in long term care facilities and nursing homes
- Provides additional interim guidance for infection prevention and control
- Hosts links to COVID-19 resources, such as a COVID-19 checklist, sample letters to families, volunteers and friends, and CDC and Centers for Medicare & Medicaid Services updates
  https://www.okala.org

Oklahoma Association for Home Care & Hospice
- Hosts Oklahoma COVID-19 call center: (877)215-8336
- Offers resources for information, direction, and recommended health protocols based on Centers for Disease Control and Prevention (CDC) guidelines
  https://oahc.com

Oklahoma Hospice & Palliative Care Association
- Home page includes COVID-19 resource links and training
  https://ohpca.wildapricot.org

Oklahoma Mental Health and Aging Coalition
- Offers website resources, educational materials, and videos for health care staff
  http://omhac.org

Oklahoma Pharmacists Association
- Offers technical assistance, education, and website resources (login required)
  https://www.opha.com/resources

Oklahoma State Department of Health (OSDH)
- OSDH COVID-19 website created for additional notifications and resources
- Assistant Deputy Commissioner James Joslin, Service Director Mike Cook, and the Long Term Care Survey Division are holding weekly conference calls with providers and stakeholders

Oklahoma Long-term Care Ombudsman
- Provides aid and resources to residents and families during the COVID-19 crisis
  http://www.okdhs.org/services/aging/Pages/ombudsman.aspx

Oklahoma State University Center for Health Sciences
- Updates Extension for Community Healthcare Outcomes (ECHO) to keep health care providers updated as the situation changes, including the state surge plan, extensive resources and tools and State of the State COVID-19 updates every Monday, Wednesday, and Friday
  https://health.okstate.edu/echo/covid-19-project-echo.html

Oregon (OR)

Oregon Health Authority
- In Oregon, there are many players working to support nursing homes and the greater Oregon health care community. State actions identified include:
State Actions for COVID-19 Management and Response

14. Resources Continued

o Developed a toolkit for nursing homes
  https://www.oregon.gov/oha/PH/DISEASESCONDITIONS/COMMUNICABLEDISEASE/HAI/Pages/Long-Term-Care-Facilities.aspx

o Has an excellent COVID-19 web page with resources

Pennsylvania (PA)

Pennsylvania Health Care Association
- Nursing home association representing most nursing homes in Pennsylvania
- Developed long term care facilities preparedness assessment for COVID-19 (recommended to do before any cases identified in their facility) in checklist format for:
  - Visitor restrictions
  - Steps to conduct contact tracing for COVID-19 case
  - Procedure for contact tracing if case of positive test for COVID-19 is a staff person, along with form to document date of exposure, location, and notes
  - Developed three documents on Knowledge Center Reporting Resource Guides to assist nursing homes answer state requests for information (long term care capacity reference guide, long term care manually reporting capacity reference guide, and COVID-19 electronic export information data set long term care)
  - Contracted with Pennsylvania Patient Safety Organization to provide guided technical assistance

Pennsylvania Patient Safety Authority
- Hosts overview, key data, and statistics on COVID-19 web page
- Offers educational tools and resources
- Maintains Twitter feed on COVID-19 alerts and issues
  http://patientsafety.pa.gov/pst/Pages/COVID-19_Coronavirus/hm.aspx

Rhode Island (RI)

Rhode Island Department of Health
- Completed modified infection control assessment and response (ICAR) at all high-risk sites to prioritize support
- Self-Symptom Checker assists individuals, including nursing home personnel, in determining if/when they should seek medical care, available in English, Spanish, and Portuguese
  https://covidselfcheck.ri.gov/welcome

South Dakota (SD)

Neighborhoods at Brookview, Brookings, SD
- Facility purchased two tandem wheelchair bicycles that allow residents to participate in bike riding and social engagements in a one-on-one or small-group setting, giving the residents a unique and innovative experience to enjoy the freedom of the outdoors. Each bicycle has a passenger seat at the front, while the cyclist sits behind the passenger. The passenger seat can be quickly released from the cyclist seat and used as a normal wheelchair if needed. Funding was provided through the innovation grant program from the South Dakota Department of Human Services Division of Long Term Care Services and Supports
South Dakota Department of Health (SD DOH), South Dakota Association of Healthcare Organizations (SDAHO), South Dakota Health Care Association (SDHCA)

- All 104 South Dakota nursing home facilities received four iPads to provide an increased opportunity for residents to communicate with family and friends and connect to social media and the internet. Additionally, the iPads can be used in telehealth visits. The South Dakota Department of Health, South Dakota Association of Healthcare Organizations, and the South Dakota Health Care Association partnered in securing Centers for Medicare & Medicaid Services (CMS) funding for the project.

Walworth County Care Center - Selby, SD

- Walworth County Care Center is among several nursing homes in South Dakota where staff are “dancing in the halls” to bring joy and music to residents.
- Both residents and staff look forward to the activity and bringing some silliness, fun, and laughter to the day.

Tennessee (TN)

Tennessee Health Care Association (THCA)

- Published resources for consumers
  https://www.thca.org/for-consumers/resource-center
- Created guidance for facilities facing personal protective equipment shortages
  https://www.thca.org/for-consumers/resource-center
- Posted toolkit for facility visitor screening

Texas (TX)

Texas Health and Human Services Commission, Department of State Health Services

- Provide targeted online resources for nursing facilities, including webinars, Centers for Disease Control and Prevention (CDC) resources, Centers for Medicare & Medicaid Services (CMS) resources, Occupational Safety and Health Administration guidance, mental health support lines for Texans, and provider letters

Utah (UT)

Alzheimer’s Association

- Provided guidance on managing patients with dementia as these patients can be difficult in
complying with safety guidelines, such as maintaining a safe distance

_Utah Department of Health_

- The state of Utah has modified its Provider Order for Life-Sustaining Treatment (POLST) form, waiving the requirement of in-person signing of documents and using national tools and guidance to ensure providers are prepared for end-of-life discussions and processes

_Vermont (VT)_

_Vermont State Department of Health_

- Modified infection control assessment and response (ICAR) programs in all facilities to prioritize support
- A COVID-19 hotline is available for providers to call with questions about screening patients for testing

_Virginia (VA)_

_Virginia Department of Health (VDH)_

- Virginia Project ECHO is offering a Just-in-Time COVID-19 Learning Series, covering testing, telehealth, personal protective equipment (PPE), isolation, cohorting, medical management, and vulnerable populations
- Through the Virginia’s Governor COVID-19 Long Term Care (LTC) Task Force, an LTC Facility Playbook to Access Resources to Support COVID-19 Outbreak Response was created. The playbook serves as a resource for how to access various staffing, supplies, infection control expertise, and other resources to support response to COVID-19 outbreaks
  [https://www.vdh.virginia.gov/content/uploads/sites/182/2020/05/VirginiaLongTermCareFacilityTaskForceCOVIDPlaybook.pdf](https://www.vdh.virginia.gov/content/uploads/sites/182/2020/05/VirginiaLongTermCareFacilityTaskForceCOVIDPlaybook.pdf)

_Virginia Department of Health (VDH), Virginia Hospital & Healthcare Association (VHHA)_

- VHHA and VDH are partnering to allocate support and resources to long term care facilities in Virginia. The initiative is facilitated through the Virginia Healthcare Emergency Management Program (VHEMP) and Russell Phillips and Associations (RPA). Facilities will receive infection prevention and control education and training related to personal protective equipment (PPE), testing, clinical practice, and staff support

_Virginia Hospital Alerting & Status System (VHASS)_

- VHASS, an emergency management partnership between the Virginia Department of Health and the Virginia Hospital & Healthcare Association, created an online COVID-19 resource center and Virginia COVID-19 surveillance data
- A long term care VHASS daily situation report, posted daily, includes the number of nursing home residents with reported/confirmed COVID-19, number of residents pending confirmation, and current personal protective equipment (PPE) needs in nursing homes
- Regional health care coalitions are the point of contact for skilled nursing facilities, dialysis centers, and hospitals that need PPE
State Actions for COVID-19 Management and Response

14. Resources Continued

[https://vhass.org/regional-info](https://vhass.org/regional-info)

**Washington (WA)**

*Nursing Homes*

- Nursing homes have distributed iPads and laptops to residents to facilitate virtual communication and visits with families
- Nursing homes have provided end-of-life and advance care planning education for all staff, using national tools and guidance to ensure providers are prepared for end-of-life discussions and processes
- Infection preventionists from the local public health districts and state departments of health are providing consultation to nursing homes

**West Virginia (WV)**

*West Virginia Department of Health and Human Services, Bureau of Public Health*

- Developed a COVID-19 website [https://dhhr.wv.gov/COVID-19/Pages/default.aspx](https://dhhr.wv.gov/COVID-19/Pages/default.aspx)
  - Outlines provider responsibility for reporting requirements for suspected or confirmed cases of COVID-19
  - Offers general information on West Virginia resources:
    - Resuming elective surgeries
    - Medical transport guidelines
    - Emergency department recommendations
    - Long term care (LTC) guidelines
    - Homeless service providers
    - Criteria and resources for specimen collection and testing specific to West Virginia
    - Death reporting guidelines for COVID-19

- Includes long term care (LTC) facility outbreak resources:
  - Guidelines for COVID-19 outbreaks in LTC facilities:
    - Contact precautions
    - Hand hygiene observation tool
    - Long term care facility outbreak resources toolkit
  - Home care resources:
    - Home care and self-isolation guidance for people with suspected or confirmed COVID-19
    - Guidance on cleaning when caring for ill person in the home

*West Virginia Health Care Association, West Virginia Department of Health and Human Services Bureau for Public Health Division of Infectious Disease Epidemiology*

- Developed guidelines for COVID-19 outbreaks in long term care facilities [https://dhhr.wv.gov/COVID-19/Pages/default.aspx](https://dhhr.wv.gov/COVID-19/Pages/default.aspx)
State Actions for COVID-19 Management and Response

14. Resources Continued

- Covers following topics:
  - Outbreak definitions
  - Preventing an outbreak
  - What to do if case detected
  - Measures to control outbreak
  - Lab testing
  - Health care personnel exposure
  - Management of residents returning from hospitalization or new admissions
  - Criteria to remove residents from isolation
  - Criteria for returning to work for exposed health care workers
  - Environmental cleaning and disinfection
  - Implement environmental infection control
  - Employee screening tool
  - Visitor screening tool
  - Nursing facility transfer

Wisconsin (WI)
LeadingAge
- Sends daily email for members and business partners highlighting practical tools for staff conversations
- Focus on staff morale and facilitating challenging conversations and a motivational quote called “Thought for the Day,” in addition to sharing many resources and training opportunities

Wyoming (WY)
Wyoming Department of Health Regional Long Term Care Ombudsman
- Proposed to use civil penalties monies to purchase iPads for nursing homes’ statewide use for residents to keep in contact with families and loves ones
- Wyoming Department of Health contact person is Lee Alter at lee.alter@wyogov.com

Wyoming Community Protection Initiative Team
- Community Protection Initiative team will support the Wyoming Department of Health with the following:
  - Data systems and data analysis
  - Prevention, infection control, and containment of infections in long term care facilities and psychiatric facilities
  - Community mitigation and infection prevention and control among tribal communities
  - Case identification and contact tracing
  - [https://health.wyo.gov/cdc-team-deployed-to-wyoming-to-supplement-existing-efforts](https://health.wyo.gov/cdc-team-deployed-to-wyoming-to-supplement-existing-efforts)

Wyoming Office of the First Lady Jennie Gordon, Wyoming Department of Health Aging Division
- Collaborating to send cards, letters, and notes to residents of skilled nursing facilities and senior centers
- First Lady Jennie Gordon produced a video explaining the concept
  - [https://www.facebook.com/watch/?v=519102808788094](https://www.facebook.com/watch/?v=519102808788094)
15. SCREENING/VISITORS

California (CA)
*California Department of Health AFL*
- The California Department of Public Health AFL provides resources and guidance for skilled
  nursing facilities on preparing for COVID-19 and a toolkit for management of exposures and
  recognized cases in skilled nursing facilities titled “Preparing for COVID-19 in California Skilled
  Nursing Facilities”
  https://www.cdph.ca.gov/Programs/CHCQ/LCP/CDPH%20Document%20Library/AFL-20-25-
  Attachment-01-SNF-Checklist.pdf

Florida (FL)
*Florida Agency for Health Care Administration*
- Early decisive action for visitor, staff, and vendor screening
- Imposed statewide visitor restriction at all long term care facilities
- Issued emergency orders
  http://ahca.myflorida.com/docs/DEM_ORDER_NO.20-006_In_re_COVID-
  19_Public_Health_Emergency_Issued_March_15_2020.pdf
- Shared Florida Health Care Association tool kit with screening resources
  https://www_fhca.org/facility_operations/coronavirus

Georgia (GA)
*Office of the Governor Brian P. Kemp*
- Issued guidance, in consultation with Centers for Medicare & Medicaid Services, to help
  mitigate the spread of COVID-19 in nursing homes to include symptom screening for visitors,
  staff, and residents, and separate staffing teams, facilities, and units for COVID-19
  positive/unknown and COVID-19 negative residents
  guidance-mitigate-covid-19-nursing

Hawaii (HI)
*Office of the Governor David Ige*
- Directed residents not to visit nursing homes
  https://governor.hawaii.gov/newsroom/latest-news/proper-use-of-covid-19-tests-imperative-
  there-is-a-current-shortage-of-hand-sanitizers-and-toilet-paper-in-hawaii-in-part-because-of-
  the-publics-over-reaction-to-covid-19-the-hawai

Illinois (IL)
*Illinois Department of Public Health*
- Issued COVID-19 safety guidance for nursing home patients and employees (e.g., screening and
  reporting symptoms), as well as visitation restrictions on March 20, 2020
  http://www.dph.illinois.gov/topics-services/diseases-and-conditions/diseases-a-z-
  list/coronavirus/long-term-care-guidance
Indiana (IN)

Indiana State Department of Health (ISDH)

- Restricted visitation at long term care facilities
- Restricted temporary leaves of absence for non-essential services
- Requires long term care facilities to screen all persons entering facilities
- Allows visitation (including family) for end of life situations
  https://www.coronavirus.in.gov/files/IN_COVID-19%20end%20of%20life%204.17.20.pdf
- Released the Outdoor Family Visitation at long term care facilities on June 3, 2020; followed CMS and CDC guidance restricting visitation, except in end-of-life circumstances. These restrictions, however, are not without consequences. Recognizing that isolation has serious impacts on the health and wellbeing of residents in these facilities, Indiana State Department of Health released guidance that facilities must follow to allow for outdoor visitation with residents
  https://www.coronavirus.in.gov/files/IN_COVID-19%20outdoor%20visit%206.3.20.pdf

Iowa (IA)

Office of the Governor Kim Reynolds

- Ordered health care facilities to screen staff for COVID-19 symptoms

Michigan (MI)

Office of the Governor Gretchen Whitmer

- Issued temporary restriction on entry into health care facilities, including nursing homes, on March 10, 2020
  https://www.michigan.gov/whitmer/0,9309,7-387-90499_90705-524360--,00.html

Michigan State University

- Using information from the Centers for Disease Control and Prevention (CDC) and the World Health Organization (WHO), Sophia Tessema and a group of community advocates developed a web-based questionnaire to self-screen for COVID-19
  https://www.covidscreening.org
  http://humanmedicine.msu.edu/News/2020/04.13.20-Online-Screening-Tool.htm

Minnesota (MN)

Minnesota Department of Health

- Temporarily banned all visitors to nursing homes; exceptions made for family members under special circumstances, such as critically ill or end of life patients and parents of minor children
- Implemented enhanced respiratory surveillance in long term care facilities to rapidly identify any potential outbreaks of COVID-19 – March 17, 2020 (Department of Health Order)

Montana (MT)

Office of the Governor Steve Bullock

- Issued restrictions to suspend visitation for all visitors and non-essential health care providers, except as for certain compassionate care situations (e.g., end of life)
New Mexico (NM)
*New Mexico Department of Health*
- Temporarily banned all visitors to nursing homes; exceptions made for family members under special circumstances, such as critically ill or end of life patients via Public Health Order
- Guidelines for long term care (LTC) facilities which include cancellation of group activities; active screening of residents; and screening of staff at beginning of shift for fever and respiratory symptoms

New York (NY)
*Office of the Governor Andrew Cuomo, New York State Department of Health*
- Due to a statutory change which the Legislature approved at the beginning of March, Governor Cuomo can change or suspend laws unilaterally, so long as doing so assists the state in its disaster response
- With respect to nursing homes:
  - The requirements for assessing patients entering long term care have been relaxed. So have the requirements for screening patients entering nursing homes
  - A regulation requiring patients entering nursing homes to have gotten approval from a physician first is no longer effective, and initial patient visits with individuals receiving home care no longer need to occur immediately
  - Mandated nursing homes not allow visitors due to the coronavirus pandemic

*Greater New York Hospital Association*
- Pilot Hospital Visitation Program: For a two-week time period, sixteen New York State hospitals piloted a program allowing visitors to visit hospitalized family members. Visitors are screened for temperature and symptoms and are required to wear personal protective equipment (PPE). Visits have a specified time limit
  https://www.gnyha.org

North Carolina (NC)
*North Carolina Division of Health and Human Services, Office of the Governor Roy Cooper*
- The North Carolina Division of Health and Human Services is working directly with the Governor’s COVID-19 task force to coordinate preparation and response to the pandemic
- Governor Cooper has signed a series of Executive Orders, beginning March 10, 2020
- No. 131 on April 9, 2020, addressed even more restrictions for nursing homes
- During the three-phase re-opening plan, nursing homes are to remain restricted to visitors through phase 1, 2, and 3
  https://files.nc.gov/governor/documents/files/NC-3-PHASE-PLAN.pdf
Ohio (OH)
Ohio Department of Health, Department of Veterans Services
- Issued directive limiting nursing home visits, except in end of life cases
  https://content.govdelivery.com/attachments/OHOOD/2020/03/12/file_attachments/1398815/ODH%20Order%20on%20Visitors%20to%20Nursing%20Homes.pdf

Ohio Department of Health
- Screening Employees for COVID-19: COVID-19 Information for Employers and Employees
  https://coronavirus.ohio.gov/wps/portal/gov/covid-19/resources/general-resources/Screening-Employees-for-COVID-19

Oklahoma (OK)
Governor’s COVID-19 Solution Task Force and Response Team
- Transformed Oklahoma’s 2-1-1 hotline into a tool for Oklahomans to call and receive screening support for COVID-19
  https://coronavirus.health.ok.gov/governors-actions

Pennsylvania (PA)
Pennsylvania Health Care Association (PHCA)
- Nursing home association representing most nursing homes in Pennsylvania
  https://www.phca.org/covid19
- Developed long term care facilities preparedness assessment for COVID-19 (recommended to complete before any cases identified in their facility) in checklist format for:
  - Education, monitoring, and screening of all residents
  - Document active screening of residents every 12 hours for COVID-19 symptoms
  - Screen staff prior to shift for symptoms of COVID-19

Tennessee (TN)
Tennessee Health Care Association (THCA)
- Created resources for consumers, including guidance for facilities facing personal protective equipment (PPE) shortage and a PPE request form
  https://www.thca.org/for-consumers/resource-center
- Posted toolkit for facility visitor screening

Texas (TX)
State of Texas
- All licensed long term care facilities must screen all individuals entering the facility, including staff and newly admitted residents
- Based on federal guidance, Texas restricts non-essential visitors to nursing homes and encourages the use of alternate means of communication between residents and family members and friends
**Washington (WA)**

*Office of the Governor Jay Inslee*

- Issued nursing home restrictions by Governor’s Proclamation for visitation to nursing homes, including maintenance of visitors logs for 30 days, screening staff and volunteers, and quarantine of residents (slated to end April 9, 2020)
  

*Washington State Department of Health*

- Issued guidelines for long term care (LTC) facilities, which include:
  - Cancellation of group activities
  - Active screening of residents
  - Screening of staff at beginning of shift for fever and respiratory symptoms
  - Restriction of visitors and non-essential health care personnel except for compassionate care
  

**West Virginia (WV)**

*West Virginia Health Care Association*

- In conjunction with West Virginia Department of Health and Human Services Bureau for Public Health Division of Infectious Disease Epidemiology, developed guidelines for COVID-19 outbreaks in long term care facilities
  
  [https://dhhr.wv.gov/COVID-19/Pages/default.aspx](https://dhhr.wv.gov/COVID-19/Pages/default.aspx)
  - Employee screening tool
  - Visitor screening tool
II. TELEHEALTH

Alaska (AK)
*Alaska State Hospital and Nursing Home Association*
- Developed a telehealth quick start toolkit for all care settings

Arizona (AZ)
*United Telehealth Corporation*
- This corporation facilitated telehealth technician visits for several of the post-acute facilities to test residents (free of charge) for transfer clearance to assisted living during this pandemic. They have also been utilized by physicians and staff in skilled nursing facilities

*The University of Arizona*
- The Arizona Telemedicine Program is conducting virtual webinars to help providers, such as nursing homes, across the state quickly strengthen their telemedicine programs [https://telemedicine.arizona.edu](https://telemedicine.arizona.edu)
- This group created a position dedicated to coordinating telehealth visits. This person arranges a time with the provider and nurse. This helps the nurse stay on task by not having to coordinate these efforts

California (CA)
*Los Angeles Jewish Home*
- Student pharmacists are conducting Zoom meetings with residents to review medication regimens and to provide education to residents about their medications. The student pharmacists are also providing medication regimen review to prescribers to potentially deprescribe medications. This best practice is a win-win, including active learning for the student pharmacists and social interaction for the residents

Georgia (GA)
*Office of the Governor Brian P. Kemp*
- The Governor’s Office of Planning and Budget, working with the Department of Community Health, has requested that Georgia Health Information Network (GaHIN) provide certain information as part of the State’s COVID-19 response and re-opening planning
- It is likely that the information request will be on a continuing basis during the COVID-19 public health emergency
- The data elements requested at this time include the following: admits, discharges, transfers (ADT); death reporting; electronic lab reports (ELR); and emergency management services (EMS)
- Provided member updates on Health Insurance Portability and Accountability Act (HIPAA) privacy and other Department of Health and Human Services, Centers for Medicare & Medicaid Services, and agency information [https://www.gahin.org](https://www.gahin.org)
Telehealth Continued

Hawaii (HI)
Office of the Governor David Ige
- A COVID-19 Project ECHO (Extension for Community Health Outcomes) education and training series is provided weekly. All long term care and assisted living facilities are invited. The series topics include: donning/doffing personal protective equipment (PPE), repurposing PPE, COVID-19 testing procedures, resident isolation, staff quarantine, and telemedicine in long term care
  https://geriatrics.jabsom.hawaii.edu/geriatrics
  https://geriatrics.jabsom.hawaii.edu/ltss

Iowa (IA)
Iowa Pharmacy Association (IPA)
- The IPA Long Term Care and Senior Care Advisory Committee advises the IPA Board of Trustees and staff on issues including short cycle dispensing, geriatric therapy updates, and changing federal rules related to long term care (LTC) and senior care. The committee includes about 25 IPA members that hold differing roles across LTC practice – such as dispensing only to facilities, serving as consultants to facilities, serving as geriatric clinic-based pharmacists, etc. The group recently discussed sharing sample data-sharing agreements to sign with a LTC facility to gain access to the electronic health record (EHR) for consulting documentation. Its members endorse access to facility e-charts. Facilities have also used FaceTime/Skyping services to observe medication passes, helping to ensure these requirements still occurred when a pharmacist was not present in the facility
  https://www.iarx.org

Michigan (MI)
Michigan Office of the Governor
- Theoria Medical x 5-Star Telemed is providing telemedicine in long term care facilities with 24-hour physician access, including on-demand behavioral health access, comprehensive assessment training for nursing using mobile equipment (remote auscultation, tele-ultrasound, 12-lead electrocardiogram (EKG) test, wireless spirometry, blood glucose, and blood pressure capability). A multi-camera device allows for wound assessment and integration of patient centered communication (PCC) with electronic health records (EHR) for interoperability
  https://www.5startelemed.com

Missouri (MI)
Show-Me ECHO (Extension for Community Healthcare Outcomes)
- Launched a COVID-19 ECHO. ECHO is a best-practice method for transferring appropriate specialty knowledge to non-specialist clinicians, such as primary care providers in rural areas. A multidisciplinary expert team, led by the State’s Department of Health and Senior Services director and including university physicians, uses video and teleconferencing to share the latest information, answer questions, and discuss management of patient cases presented by participants
  https://showmeecho.org/clinics/covid-19

Nevada (NV)
Various Nursing Homes
- Many nursing homes have turned to the use of technology and telehealth. Attending physicians and psychologists are using telehealth for patient visits, with some using tablets attached to an IV pole to accommodate a meaningful telehealth visit between patient and doctor
New Jersey (NJ)

*Exchange Physical Therapy Group*

- This provider was able to implement telehealth visits quickly to ensure that patients continued to receive rehabilitation services. The practice has maintained 10 percent of its patients via telehealth, continuing to employ six out of 11 therapists at about 40 percent of their pre-COVID-19 visit volume. The practice plans to continue telehealth availability for patients who are unable to get to the clinic.

New Mexico (NM)

*University of New Mexico*

- The University of New Mexico resumed its Nursing Home ECHO (*Extension for Community Healthcare Outcomes*) focusing on staff resilience and trauma, advanced care planning, and care transitions and coordination.

New York (NY)

*New York State Department of Health, LeadingAge NY*

- Developed COVID-19 response recommendations for nursing homes
  - Scheduled a call-in phone conference with the medical director specifically for families to provide information on COVID-19 and to give families the ability to ask questions in real time
  - Initiated an e-mail newsletter for families with pictures and news about what the facility is doing to help keep residents busy and occupied during this time
  - Set up an automated phone call system to make mass calls to families with updates

[https://www.leadingageny.org](https://www.leadingageny.org)

*New York State Department of Health*

- Issued comprehensive guidance regarding use of telehealth, including telephonic services during the COVID-19 State of Emergency
- New York State Medicaid will reimburse telephonic assessment, monitoring, and evaluation and management services provided to members in cases where face-to-face visits may not be recommended and it is appropriate for the member to be evaluated and managed by telephone
- Telephonic communication will be covered when provided by any qualified practitioner or service provider. All telephonic encounters documented as appropriate by the provider would be considered medically necessary for payment purposes in Medicaid Fee for Service (FFS) or Medicaid Managed Care

[https://www.health.ny.gov/health_care/medicaid/program/update/2020/no05_2020-03_covid-19_telehealth.htm#general](https://www.health.ny.gov/health_care/medicaid/program/update/2020/no05_2020-03_covid-19_telehealth.htm#general)
Telehealth Continued

Ohio (OH)
Ohio Department of Health (ODH)
- Launched a telehealth line for the general public to ask questions about how to protect themselves and prepare for COVID-19 in their community. The ODH COVID-19 call center staffers operate the center from 9 AM to 8 PM daily, including weekends. Call center staff includes licensed nurses and infectious disease experts. They are available to answer questions and provide accurate information about COVID-19, its risk to the public, and the state’s response

Ohio Guidestone
- The expansion of telehealth outreach during pandemic provided increased access to patients. Since the stay-at-home order, Guidestone has expanded its services throughout the state and increased access to people with substance abuse disorders. It transitioned its in-person visits to telephone contact. Monthly call volume is normally 850 calls; this jumped to 11,000 calls in March and 27,000 calls in April

Oregon (OR)
Various State Agencies/Stakeholders
- In Oregon, there are many players working to support nursing homes and the greater Oregon health care community. State actions identified include:
  o Larger corporations have supported facilities with the implementation of telehealth practices to conduct visits whenever appropriate

Virginia (VA)
Mid-Atlantic Telehealth Resource Center
- Created and posted resources online for rapidly deploying telehealth in post acute care and long term care settings
  https://www.matrc.org/matrc-telehealth-%20resources-for-covid-19

Our Lady of Peace Retirement Community, University of Virginia Health System (UVA)
- Upon having residents test positive for COVID-19, Our Lady of Peace Retirement Community partnered with its community academic health system, UVA, to use Project ECHO (Extension for Community Healthcare Outcomes) to provide support and clinical consultations to the facility. Using this system, the facility accessed geriatricians, a pulmonologist, and an infection preventionist. Each morning, the facility conducts virtual rounds with a medical team comprised of a geriatrician, pulmonologist and primary care physician via ECHO to review the clinical status of COVID-19-positive residents
  https://uvahealth.com/services/telemedicine/echo
**Telehealth Continued**

**West Virginia (WV)**  
*Stonerise Health Care Corporation*  
- Stonerise Healthcare Corporation owns a chain of nursing homes in West Virginia and has developed its own reporting page related to COVID-19 with scheduling tele-visits with residents for family members  

**Wisconsin (WI)**  
*Wisconsin Department of Health Services, Superior Health Quality Alliance*  
- Provides coordinated facilitation of tele-Infection Control Assessment and Response (ICAR) for nursing homes in counties with larger number of COVID-19 cases in partnership with the Division of Public Health, Division of Quality Assurance (State Survey Agency,) and Superior Health Quality Alliance  
- Cross train surveyor staff to assist with tele-ICAR completion
III. ORGANIZATIONS AVAILABLE TO ASSIST NURSING HOMES

NATIONAL GUARD

Alabama (AL)
Alabama National Guard

- The Alabama National Guard, under the leadership of Governor Kay Ivey, will assist designated nursing homes in the state response to the COVID-19 pandemic. Specially trained and equipped National Guard teams will sanitize and disinfect nursing homes that have COVID-19 positive residents and/or employees and will train staff on the techniques of donning and doffing personal protective equipment.

California (CA)
Los Angeles County Emergency Operations Center

- Developed exemptions for emergency medical technicians (EMTs) to function as nurses’ aides to increase the staffing at the five impacted skilled nursing facilities in the county and engaged the National Guard to provide ancillary support.

Colorado (CO)
Colorado National Guard

- Colorado Governor Jared Polis initiated a COVID-19 Innovation Response Team with a multi-pronged response, including increased testing, tailored social-distancing measures, a reinforced health care system, and a bolstering of state epidemiological resources.
- The Colorado National Guard was deployed to test residents and staff at three of the state’s largest nursing homes, even though outbreaks had not been reported at the facilities.

District of Columbia (D.C.)
District of Columbia Hospital Association

- Journey Live gives you guided meditation to help reduce your stress and anxiety, increase focus and productivity and find balance. Access to the App is free for the remainder of the year.

Washington D.C. National Guard

- The Washington D.C. National Guard COVID-19 Task Force Able Response Team completed a convoy pick-up of medical ventilators in Delaware and delivered them to the D.C. Department of Health as part of its COVID-19 response.

Florida (FL)
Office of the Governor Ron DeSantis
- Ordered National Guard to test for COVID-19 in nursing homes and ordered strike teams” to help patrol for asymptomatic carriers as outbreaks occurred

Georgia (GA)
Office of the Governor Brian P. Kemp
- Activated and deployed National Guard to long term care facilities with COVID-19 cases to implement infection control protocols and enhanced sanitation methods to mitigate exposure

Georgia Healthcare Facility Regulation Department
- Georgia Healthcare Facility Regulation Department worked closely with the Department of Public Health, the Georgia Health Care Association, and the National Guard to stay abreast of COVID-19 activity and its impact on centers while remaining vigilant for highest quality of care for the residents in Georgia
- Surveyors connected with long term care organizations to collect information related to COVID-19 and coordinated with the Georgia National Guard to develop a system for collection of COVID-19 data. The data collection platform was released daily at 2 PM, replacing a previous report from the Governor’s Office
  https://dch.georgia.gov/divisionsoffices/healthcare-facility-regulation

Georgia National Guard, Department of Public Health, Department of Community Health
- Developed a testing strategy in response to Governor Kemp’s recommendations to support broader testing and to prioritize testing of vulnerable populations and health care professionals
- Ultimately, this strategy will expand to include private or commercial labs. Approximately 200+ nursing homes have invited teams into their centers for cleaning and sanitizing, staff education, and assistance with testing
  https://www.ghca.info/Files/National%20Guard%20Test%20Team%20for%20LTCF%20Process.pdf

Indiana (IN)
Indiana National Guard
- Received training in personal protective equipment (PPE), self-decontamination, and patient transfer to assist their communities, including nursing homes

Iowa (IA)
Iowa Long Term Care Ombudsman
- Provides individual nursing home support for advocacy of needs at resident level
- Supports residents and families with concerns
- Encourages nursing homes to reach out to the Quality Improvement Organization, the Department of Inspections and Appeals (DIA), and the Illinois Department of Public Health (IDPH) for support
Organizations Available to Assist Nursing Homes Continued

**National Guard**

- Website houses multiple resources
  
  [https://www.iowaaging.gov/educational-resources/covid-19OLDER-iowans](https://www.iowaaging.gov/educational-resources/covid-19OLDER-iowans)

**Office of the Governor Kim Reynolds**

- TestIowa.com was launched to help officials target areas of opportunity and help them make decisions about reopening the state
- New testing sites were set up to test an additional 3,000 people a day
- First responders and medical personnel were prioritized for testing
- Iowa National Guard troops were mobilized to respond to COVID-19 outbreaks at the state’s meat packing companies. Troops helped deliver testing equipment to packing plants, transported kits to labs, and helped packing plants with cleaning
- A “testing strike team” was sent to Tama County in response to an outbreak at a long term care facility. All staff at the facility were tested for COVID-19
- Daily briefings were held, state resources were activated, and equipment, personnel, technical assistance/guidance, supplies, and essential services were deployed to provide assistance in the form of traffic control, security, vaccines, transportation, and other emergency response and recovery capabilities
- The Governor’s COVID-19 website included information for long term care facilities that link to Centers for Disease Control and Prevention (CDC) resources [https://coronavirus.iowa.gov](https://coronavirus.iowa.gov)

**Maryland (MD)**

**Health Facilities Association of Maryland**

- Maryland COVID-19 Crisis Support Program provides free, confidential mental health support to employees of Maryland’s long term health care facilities impacted by the COVID-19 outbreak [https://www.hfam.org/covid-19](https://www.hfam.org/covid-19)

**Office of the Governor Larry Hogan**

- Maryland Governor Larry Hogan launched statewide strike teams on April 7, 2020, comprised of the National Guard, state and local health department representatives, emergency medical service clinicians, and doctors and nurses from local hospital systems. The strike teams were intended to provide on-site medical triage, supplies, and equipment to overburdened nursing homes in order to slow the spread of the virus among Maryland’s most vulnerable population [https://governor.maryland.gov/2020/04/07/governor-hogan-activates-statewide-strike-teams-for-nursing-homes-enacts-order-to-shut-down-unsafe-facilities](https://governor.maryland.gov/2020/04/07/governor-hogan-activates-statewide-strike-teams-for-nursing-homes-enacts-order-to-shut-down-unsafe-facilities)

**Massachusetts (MA)**

**Massachusetts National Guard, The Broad Institute of the Massachusetts Institute of Technology, Harvard**

- Performed one-time testing at nursing homes, rest homes, and assisted living facilities for residents and staff. Mobile testing sites served eligible public safety personnel, including, emergency medical services and state active duty National Guard personnel by appointment [https://www.mass.gov/doc/mobile-testing-program-overview/download](https://www.mass.gov/doc/mobile-testing-program-overview/download)
### Organizations Available to Assist Nursing Homes Continued

#### National Guard

**Nevada (NV)**
**Nevada National Guard**
- Partnered with the Nevada Department of Health Bureau of Health Care Quality and Compliance to visit skilled nursing facilities for spot checks on infection prevention and control (cleanliness of facility, adequate staffing, and personal protective equipment)

**New Jersey (NJ)**
**Health Care Association of New Jersey**
- Statewide organization providing updates on most current and authoritative information on COVID-19 relevant to facilities in New Jersey
  - [https://www.hcanj.org/covid-19-information](https://www.hcanj.org/covid-19-information)

**New Jersey Department of Health Infection Control Assessment Response Team (ICAR)**
- New Jersey Department of Health ICAR team provides one-hour virtual consultations to nursing homes to support infection prevention and control (IPC) activities based on the nursing home’s completed tele-ICAR assessment

**New Jersey National Guard**
- Set up an alternate care site in the Atlantic City Convention Center, which provided 250 beds for non-COVID-19 patients

**New Mexico (NM)**
**New Mexico National Guard**
- Assist in decontamination of facilities where a COVID-19 infection has occurred
- Specimen collection and transport from testing sites statewide
- Staffing alternative care sites

**New York (NY)**
**Greater New York Health Care Facilities Association**
- Current updates and resources relevant to facilities in the metropolitan New York City (NYC) area
  - [https://gnyhcfa.org/covid-19](https://gnyhcfa.org/covid-19)

**New York Department of Health**
- New York City (NYC) COVID-19 Care Network: A volunteer network of support for essential workers, their families, and any uninsured New Yorkers
- Front line essential workers and their families have free access to support from a volunteer mental, emotional, or spiritual care professional
  - [https://nyccovidcare.org](https://nyccovidcare.org)

**New York State Department of Health, National Guard COVID-19 Response**
- National Guard provided medical staff at Javits Center and New York City hospitals and testing sites
Organizations Available to Assist Nursing Homes Continued

**National Guard**

- New York Air National Guard pararescue airmen, who are trained as emergency medical technicians, assisted in city hospitals

**New York State Health Facilities Association**

- Statewide organization providing updates on most current and authoritative information on COVID-19 relevant to facilities in New York
  https://www.nyshfa-nyscal.org/advocacy-updates
- Organizing tech volunteers to assist in providing technology, data driven products to provide resources for the COVID-19 response; over 6,500 experts have volunteered and tools have already been created

**North Carolina (NC)**

**North Carolina Army National Guard**

- The North Carolina Army National Guard supported North Carolina Emergency Operations with planning and predictive analysis. Soldiers also worked with the North Carolina Department of Health and Human Services to help prepare vital, in-demand medical equipment for shipment to supply centers across the state

**North Dakota (ND)**

**North Dakota Department of Health**

- North Dakota National Guard and the Southwestern District Health Unit developed the “Operation Drive-in” pilot project to provide testing in two rural communities (Amidon and Gladstone) on a Saturday and Sunday. The organizations used a reverse 911 message to notify community members of testing
- The National Guard assisted with pick-up and delivery of lab specimens and assisted with clean-up of nursing homes if needed

**Ohio (OH)**

**Ohio Health Care Association**

- The following steps are being implemented to ramp up COVID-19 testing of residents and staff of nursing homes to better prevent the spread of the disease among some of Ohio’s most vulnerable residents
- Statewide organization providing updates on most current and authoritative information on COVID-19 relevant to facilities in Ohio
  https://www.ohca.org/covid19_1
Pennsylvania (PA)

Pennsylvania National Guard
- Delaware County nursing homes used Pennsylvania National Guard medics and nurses to assist with staffing shortage due to COVID-19 outbreak

Puerto Rico (PR)

Puerto Rico National Guard
- Screened passengers at airports, saving the medical professionals for health care settings. Medical schools collaborated with the Puerto Rico National Guard during the screenings to allow health care workers to focus on providing care at hospitals and skilled nursing facilities

Rhode Island (RI)

CareLink and RI Foundation
- CareLink and the RI Foundation are sponsoring a new show, viewable on a TV, called “Room with a View,” to help reduce social isolation for older adults. This engaging TV show is designed just for older adults. It will include activities for mind, body, and spirit. The show is to bring the activities directly to patient and resident rooms

Rhode Island Office for Healthy Aging
- Rhode Island stakeholders, including the Rhode Island Office of Healthy Aging and the Rhode Island Executive Office of Health and Human Services, LeadingAge RI, the Rhode Island Health Care Association, and Rhode Island Assisted Living Association, put together a survey to learn about the technology needs of residents in nursing homes and assisted living facilities so that they can apply for grant money
  https://docs.google.com/forms/d/e/1FAIpQLSdilhFZ-91pdcnWaz4ag6zYO9KpeiZKOUWJPhUFombiqrkIQ/closedform

Texas (TX)

Office of the Governor Greg Abbott
- On May 5, 2020, at the Governor’s direction, the Texas Military Department activated 250 Texas National Guard personnel in support of nursing facilities, with additional activations to meet mission demand. These Guardsmen formed teams to disinfect COVID-19 contaminated care facilities. Teams are based across Texas and are serving the eight Emergency Medical Task Force regions

West Virginia (WV)

Office of the Governor Jim Justice
- Issued orders on April 17, 2020 for testing of all nursing home residents and workers by the West Virginia National Guard. These orders were issued before any reported nursing home outbreaks. These tests began in early April 2020 when at least one resident or staff member at a facility tested positive for COVID-19
**INDEX**
