

DROP-IN ARTICLE - ENGLISH

Medicare's "What's covered" app now available in Spanish

Medicare's first and only official mobile application – "What's covered" is now available in Spanish. More people with Medicare and their caregivers can get direct access on their favorite mobile device to some of the most-used content on Medicare.gov. Download it for free on both the App Store and Google Play.

To download the app to a mobile device, consumers just need to search for "Qué está cubierto." Once the app is installed, they can use it to get reliable Medicare information even when offline. If a consumer has previously downloaded the English version, the app will switch over to Spanish if they have their mobile device language preferences set to Spanish.

It can be used in doctor's offices, hospitals, or anywhere else mobile device can be used.

Get answers to Medicare coverage questions

"What's covered" delivers accurate cost, coverage, and eligibility details for many Original Medicare Part A and Part B items and services. Users can search for specific terms or browse to learn:

- Which items and services are covered
- How and when to get these covered benefits
- Basic cost information

There's also a list of covered preventive services, so consumers can quickly and easily find those recommended services that help keep them healthy.

Part of the eMedicare initiative

"What's covered" is part of the eMedicare initiative. eMedicare is a multi-year initiative designed to improve the channels Medicare uses for customer service with the goal of creating a more modern, personalized, and seamless customer experience for people with Medicare and their caregivers. Easy access to accurate, reliable Medicare coverage information is just one feature of this initiative. Find more features and sign up for Medicare emails at Medicare.gov. You can also follow Medicare on Twitter and Facebook to get our latest news.
