This manual is effective as of July 12, 2023. All enrollments made on or after July 12, 2023 should be processed in accordance with the operational requirements set forth in this document.

CMS intends to update this manual regularly. All previous versions of this manual and bulletins that have been incorporated into this version of the manual should be considered superseded by this manual. If you have questions related to content posted within this manual, please email CMS_FEPS@cms.hhs.gov.

1. **INTRODUCTION AND SCOPE**

1.1 **Background**

The Patient Protection and Affordable Care Act (ACA) (Pub. L. 111–148) was enacted on March 23, 2010. The Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152), which amended and revised several provisions of the ACA, was enacted on March 30, 2010. The statute has been updated periodically since, including provisions changed by the American Rescue Plan Act of 2021 (Pub. L. 117-2). In this manual, the law is referred to collectively as the ACA. The ACA created competitive private Health Insurance Exchanges (also referred to as Marketplaces) that enable qualified individuals (QIs) to shop for, select, and enroll in quality, affordable private health plans. The Exchanges also allow individuals to obtain eligibility determinations or eligibility assessments for coverage under Medicaid, the Children’s Health Insurance Program (CHIP), and the Basic Health Program (BHP), where applicable. In addition, the ACA created Small Business Health Options Program (SHOP) Exchanges that enable qualified employers to provide health plans to their employees. QIs and qualified employers have been able to obtain coverage from private health insurance companies through the Exchanges since October 1, 2013, for coverage beginning January 1, 2014.¹

1.2 **Types of Exchanges**

The Exchanges (or Marketplaces) established by the ACA are established in one of several different ways, including as a:

- **State-based Exchange (SBE):** A state that elected to establish its own Exchange operates an SBE.

- **Federally-facilitated Exchange (FFE):** Pursuant to Section 1321(c)(1) of the ACA, the Federal government established an FFE in any state that did not elect to establish a State-based Exchange or in a state that the Secretary of the Department of Health & Human Services (the Secretary) determined would not have an operable Exchange.

- **State-based Exchange on the Federal Platform (SBE-FP):** An SBE-FP uses the Federal eligibility and enrollment platform operated by the FFE to perform eligibility and enrollment functions. As such, the information in this manual is applicable to SBE-FPs and issuers participating in SBE-FPs in accordance with 45 CFR 155 Subpart E. SBE-FPs are directly responsible for performing certain Exchange functions, including certification of Qualified Health Plans (QHPs) and consumer assistance such as Medicaid consumer support in coordination with their respective state Medicaid agency (by phone, website, and the Marketplace Call Center).

- **State-based Small Business Health Options Program (SB-SHOP):** An SB-SHOP is a type of SBE designed to assist qualified employers with facilitating the enrollment of their employees in QHPs offered in the small group market.

- **Federally-facilitated Small Business Health Options Program (FF-SHOP):** An FF-SHOP is a type of FFE designed to assist qualified employers with facilitating the enrollment of their employees in QHPs offered in the small group market.

¹ For background information, see Section 1311(b)(1) of the ACA and 45 CFR 155.410(c)(1)(i)
1.3 Purpose of Document

This manual provides operational policy and guidance on key topics related to eligibility and enrollment within the FFE, as well as within the SBE-FPs, which use the Federal platform to perform their eligibility and enrollment functions. For ease of reference, this document will use the terms “FFE” and to refer to all individual market Exchanges that rely on the Federal eligibility and enrollment platforms.

Where necessary, CMS will indicate when the guidance pertains to both QHPs and Exchange-certified stand-alone dental plans, which this manual refers to as Qualified Dental Plans (QDPs).

The information provided in this document applies to organizations and entities that may be involved in or assist with enrolling QIs into a QHP or QDP using the FFE’s eligibility and enrollment functions. These entities include:

- SBE-FPs and issuers participating in the SBE-FPs.
- QHP and QDP issuers.
- Agents or brokers (A/Bs), including web-brokers, who are registered with the FFE.
- Navigators, Certified Application Counselors (CACs), and caseworkers.
- Third-party administrators (TPAs) of QHPs, QDPs, or employer-sponsored coverage.
- Trading partners of QHP and QDP issuers, such as healthcare clearinghouses.

1.5 Definitions

**Accumulators**: Accumulators are metrics such as deductibles or maximum out-of-pocket limits that determine how much of the medical costs an enrollee must pay before the plan pays or the plan payment amount changes.

**Advance Payments of the Premium Tax Credit (APTC)**: Eligible taxpayers who are enrolled in QHPs through an individual market Exchange can use APTC to lower their monthly premium costs. Eligible taxpayers may choose how much APTC to apply to their premiums each month, up to the maximum amount, which is then paid directly to the insurer. The APTC must be reconciled with the PTC on an individual’s Federal income tax return. If the APTC amount received for the year is less than the PTC, the individual will receive the difference as a higher refund or lower tax amount due. If the APTC amount received for the year is more than the PTC, the excess advance payments may have to be repaid with the individual’s tax return.

**Agent or Broker (A/B)**: A/B has the meaning set forth in 45 CFR 155.20.

**Applicant**: Applicant has the meaning set forth in 45 CFR 155.20.

**Application Filer**: Application filer has the meaning set forth in 45 CFR 155.20.

**Auto-Reenrollment (Passive)**: Auto-reenrollment is an enrollment transaction that automatically continues coverage in the individual market FFE for the new plan year for an enrollee who does not actively select a plan for the new plan year by the regular deadline for plan selections for January 1 coverage, without a lapse in coverage, if timely premium payment is made.

**Batch Auto-Reenrollment (BAR)**: BAR is the process the individual market FFE uses to implement auto-reenrollment.

**Consolidated Omnibus Budget Reconciliation Act (COBRA)**: COBRA is Federal legislation that amended the Employee Retirement Income Security Act of 1974, the Internal Revenue Code of 1986 (the Code), and the Public Health Service Act to provide for continuation of group health coverage that otherwise might be terminated. COBRA contains provisions giving certain former employees, retirees, spouses, former spouses, and dependent children the right to temporary continuation of group health plan coverage at group rates. COBRA coverage, however, is available only when coverage under the group health plan is lost due to specific events.

**Cost-Sharing Reduction (CSR)**: CSR has the meaning set forth in 45 CFR 155.20.

**Data Matching Issue/Inconsistency (DMI)**: When an application filer provides information to the Marketplace as a part of the application process and the Marketplace is unable to verify the information according to regulations and guidance, a DMI results. The application filer needs to resolve DMIs related to citizenship or immigration within 95 days and all other DMIs within 90 days.
Otherwise, the enrollee’s enrollment through the Marketplace may be terminated and/or the enrollee’s APTC and CSR may be terminated or adjusted, if applicable.

**Deductible**: A deductible is the amount an enrollee must pay for covered health care services before the plan starts to pay. Once the deductible is met, enrollees generally must pay only a copayment or coinsurance for covered services.

**Disconnected Application**: When an enrollee (or other third party) creates a new application rather than updating a current one, the new application is referred to as a “disconnected application”. This may result in a duplicate enrollment, with the Marketplace also auto re-enrolling the consumer based on their original application.

**Electronic Data Interchange (EDI)**: EDI is an automated transfer of data in a specific format following specific data content rules between the Marketplace and a QHP or QDP issuer. EDI transactions are transferred electronically through HealthCare.gov or an SBE.

**Enrollee**: Enrollee has the meaning set forth in 45 CFR 155.20.

**Enrollment Group (in the individual market FFE)**: An enrollment group consists of all QIs enrolled and linked by the Marketplace-assigned policy identifier. The policy identifier may link additional QIs, such as a custodial parent, but these QIs may not be considered part of the enrollment group.

**Enrollment Data Alignment (EDA)**: The ongoing processes used to ensure consistency of enrollment and financial data between issuers and the FFE. Since CMS makes payment of APTC to QHP issuers based on the enrollment files, all entities’ enrollment data must be reconciled. In addition, the enrollment data stored in the FFE is used as the basis for annual generation of Form 1095-A tax data for QIs. Discrepancies can arise when an issuer accepts a change from an enrollee based on HICS instructions (i.e., a change that has not been reflected in the FFE but one that the Enrollment Data Reconciliation process identifies) and enters the change directly into their system. By regulation, issuers are required to reconcile enrollment information with the FFE at least monthly.

**Form 1095-A**: A Form 1095-A is a tax form (like a W-2) that the Exchange furnishes to individuals who are enrolled in QHPs through the Exchange. The Form 1095-A provides enrollees with information about their health coverage so they can file their taxes, reconcile APTC, and claim the PTC.

**Health Insurance Casework System (HICS)**: HICS is the authorized and secure electronic system recognized and used by the FFE to input, track, and monitor QIs’ and enrollees’ concerns, unresolved issues, complaints, and cases that are not able to be resolved by CMS. The FFE uses HICS to appropriately assign unresolved cases and communicate effective date changes to issuers for resolution, when appropriate.

**Health Reimbursement Arrangement (HRA)**: An HRA is an account-based group health plan funded solely by employer contributions that reimburses an employee’s medical care expenses up to a maximum dollar amount for a coverage period (e.g., a calendar or non-calendar year). Medical care expenses means expenses for medical care as defined under Section 213(d) of the Code. An employer may allow unused amounts to be rolled over for use in subsequent years. In addition to the employee’s medical care expenses, an HRA may also reimburse medical care expenses incurred by the employee’s spouse, dependents, and children who, as of the end of the taxable year, have not attained age 27 (dependents).
FFE Enrollment

Insurance Affordability Programs: Insurance affordability programs include APTC and CSR, as well as Medicaid, CHIP, and, where applicable, BHP coverage.

Individual Coverage Health Reimbursement Arrangement (ICHRA): An ICHRA is a type of HRA that requires eligible employees and dependents to have individual health insurance coverage or Medicare Parts A (hospital insurance) and B (medical insurance) or Part C (Medicare Advantage). Reimbursements by the ICHRA may include premiums and cost sharing for individual health insurance coverage and for Medicare; employers could begin offering ICHRAs as of January 1, 2020.

Life Change: A circumstance (e.g., birth, adoption, foster care, or change in household income) that could affect an applicant’s or enrollee’s eligibility for enrollment through the Marketplace or for insurance affordability programs. LCs that are not reported to the applicable Marketplace (“Change in Circumstance”) could lead to an enrollee or applicable tax filer repaying all or some of the APTC the enrollee received during the year.

Marketplace Account: A Marketplace account provides an individual with a username and password to create an individual application and perform other functions related to obtaining health coverage through a Marketplace. A Marketplace account user does not need to be the policyholder for coverage purchased by the Marketplace account user.

Minimum Essential Coverage (MEC): MEC is the type of coverage an individual must have to meet the individual shared responsibility requirement under the ACA. The MEC requirement can be fulfilled by a number of different types of coverage outlined in Section 5000A(f) of the Code and in 45 CFR 156.602, such as individual health insurance coverage, job-based coverage, Medicare, Medicaid, CHIP, TRICARE, and certain other types of coverage.

Modified Adjusted Gross Income (MAGI): MAGI is the figure used to determine eligibility for insurance affordability programs in the Marketplaces and for Medicaid and CHIP. Generally, MAGI is an individual’s adjusted gross income plus certain other income, including tax-exempt Social Security, interest, or foreign income, and without certain deductions allowed for adjusted gross income (26 CFR 1.36B-1(e)(2) and 42 CFR 435.603).

Open Enrollment Period (OEP): The OEP is the period each year during which a QI may enroll for or change coverage in an individual market QHP through the Marketplace (45 CFR 155.20).

Out-of-Pocket Maximum: The out-of-pocket maximum is the maximum amount that an enrollee is required to pay for covered services provided by in-network providers during a given plan year. Once this limit is reached, the plan will cover 100 percent of coverage costs.

Partial Month Premium/Premium Proration (PMP/PP): PMP/PP occurs in the Exchange when an enrollee has periods of coverage that last less than a full month. In the FFE, the prorated monthly premium for partial coverage months is calculated based on the actual number of days that the applicable enrollee(s) has coverage. Specifically, the premium is prorated by dividing the full month premium for one month of the coverage by the number of days in the month and multiplying the resulting quotient by the number of days for which the enrollee had coverage during the partial coverage month.

Plan Year: Plan year has the meaning set forth in 45 CFR 155.20.

Plan Category Limitations (PCL): As established in the 2017 Market Stabilization Rule, enrollees and their dependents, including newly added household members, who qualify for common SEPs (e.g.
FFE Enrollment

due to a loss of health insurance, moving, or a change in household size) are generally only able to enroll in a plan from their current plan category. See 45 CFR 155.420(a)(4).

Product: Product has the meaning set forth in 45 CFR 144.103.

Qualified Health Plan (QHP): A QHP is a health insurance plan that meets certain requirements and, on the basis of meeting those requirements, is certified to be sold through an Exchange. A QHP must be certified by each Exchange through which the QHP is sold. QHP has the meaning set forth in 45 CFR 155.20.

QHP Issuer: QHP issuer has the meaning set forth in 45 CFR 155.20.

Qualified Individual (QI): QI has the meaning set forth in 45 CFR 155.20.

Qualified Employee: Qualified employee has the meaning set forth in 45 CFR 155.20.

Qualified Employer: Qualified employer has the meaning set forth in 45 CFR 155.20.

Qualified Small Employer Health Reimbursement Arrangement (QSEHRA): A QSEHRA is a type of HRA created in the 21st Century Cures Act, which permits small employers who do not offer group health plan coverage to any of their employees to provide a QSEHRA to their eligible employees. An eligible employee can use a QSEHRA to reimburse medical care expenses, as that term is defined under Section 213(d) of the Code, for themselves as well as any covered dependents (if permitted by the employer). To receive reimbursements from a QSEHRA, an employee and any covered dependents must be enrolled in MEC. Small employers could provide QSEHRAs for plan years beginning on or after January 1, 2017.

Reinstatement: Reinstatement is the correction of an erroneous termination or cancellation action that results in the restoration of an enrollment with no break in coverage (45 CFR 155.430(c)(3)).

Reenrollment: A reenrollment is an 834 enrollment transaction that continues enrollment in coverage through the individual market Exchange. Reenrollments can be either active, as for an enrollee who returns to the Exchange, generally during the OEP, to make a plan selection for the new plan year, or passive, as when the enrollee does not return to the Exchange to make a plan selection and is automatically reenrolled in accordance with the hierarchy at 45 CFR 155.335(i).

System of Exchange Enrollment Data (SEED): SEED is a web application that provides issuers and third-party administrators (TPAs) with a secure way to access real-time FFE data. SEED supports the FFE EDA and casework processes.

Small Employer: Small employer has the meaning set forth in 45 CFR 155.20.

Special Enrollment Period (SEP): SEP has the meaning set forth in 45 CFR 155.20.

Subscriber: A subscriber (or policyholder) is the individual enrolling in coverage who has elected benefits for an enrollment group or the person for whom benefits have been elected by the application filer in the event that the application filer is not the person enrolling in coverage. There is always only one subscriber per enrollment group and each member of the enrollment group is associated with the subscriber. The subscriber may also be referred to as the anchor for the group.

Tax Filer: A tax filer is an individual who will file taxes for the coverage year on behalf of a tax household.
FFE Enrollment

**Web-broker**: An individual A/B, group of A/Bs, or business entity registered with an Exchange under 45 CFR 155.220(d)(1) that develops and hosts a non-Exchange website that interfaces with an Exchange to assist consumers with direct enrollment (DE) in QHPs offered through the Exchange as described in 45 CFR 155.220(c)(3) or 155.221. The term also includes an A/B DE technology provider.

2. **ENROLLMENT IN THE INDIVIDUAL MARKET FFE (APPLICABLE TO QHPs/QDPs)**

### 2.1 Introduction

For qualified individuals (QIs) to purchase coverage in a Qualified Health Plan/Qualified Dental Plan (QHP/QDP) through the Federally-facilitated Exchange (FFE), QIs must enroll in coverage through the FFE during an Open Enrollment Period (OEP) or qualify for a Special Enrollment Period (SEP) (see Section 5, Special Enrollment Periods (Applicable to the Individual Market FFE, QHPs/QDPs)). *Exhibit 3* depicts a high-level, end-to-end flow of the process for a QI to enroll in a QHP/QDP through the FFE. Refer to *Exhibit 3* when reviewing the enrollment instructions in the succeeding sections.

**NOTE**: The following exhibit does not pertain to Direct Enrollment (DE). Refer to *Section 4, Direct Enrollment (Applicable to the Individual Market FFE, QHPs/QDPs)*, for the DE process.

*Exhibit 3: FFE Enrollment Process*
FFE Enrollment

2.2 Eligibility

Pursuant to 45 CFR 155.405, an individual completes a single streamlined application for enrollment in coverage through the Exchange. The Exchange uses this single streamlined application to determine both the QI’s eligibility to purchase coverage through the Exchange and, if the applicant chooses to apply for insurance affordability programs, the QI’s eligibility for advance payments of the premium tax credit (APTC), cost-sharing reductions (CSR), and, in some states, Medicaid and the Children’s Health Insurance Program (CHIP).²

2.2.1 Requirement to File and Reconcile Past APTC

In the 2024 Notice of Benefit and Payment Parameters,³ CMS finalized a regulation that requires Exchanges to determine that QIs are not eligible for APTC if the QIs had APTC paid on their behalf for two prior consecutive years but their tax filer did not file a Federal income tax return and reconcile APTC for either of the two prior consecutive years (45 CFR 155.305(f)(4)). When a tax filer does not comply with this requirement, it is known as Failure to File and Reconcile (FTR).

2.2.2 Special Note for FTR in Plan Years 2023 and 2024

As finalized in the 2024 Notice of Benefit and Payment Parameters,⁴ CMS will resume FTR operations in Fall 2024 at Batch Auto-Reenrollment (BAR), and effective January 1, 2025, enrollees who have failed to file and reconcile for tax years 2022 and 2023 will no longer be eligible for APTC. CMS will provide further guidance on FTR operations, including any possible changes to the FTR Recheck process, FTR warning notices, and education and outreach strategies for enrollees that are out of compliance with filing and reconciling for only one tax year, at a future date.

For plan years 2021 through 2023, CMS will not be taking certain actions in the FFE to remove the financial help enrollees receive to help pay for their health coverage because of their FTR status.

2.2.3 Medicaid and CHIP Eligibility

States with an FFE have the flexibility to decide whether the FFE or the state will make the final Modified Adjusted Gross Income (MAGI)-based Medicaid and/or CHIP eligibility determination for individuals who apply for coverage with financial assistance at the FFE. In assessment (FFE-A) states, the FFE makes a preliminary assessment of eligibility for MAGI-based Medicaid and/or CHIP, and the state Medicaid/CHIP agency makes a final eligibility determination. In determination (FFE-D) states, the state formally delegates to the FFE the authority to make final eligibility determinations for MAGI-based Medicaid and/or CHIP when the application information is fully verified.

For all states with an FFE, the FFE screens applicants for potential eligibility for Medicaid based on criteria other than MAGI; the FFE securely and electronically sends account information (known as an

² Currently, no FFE or State-based Exchange on the Federal Platform (SBE-FP) states make eligibility determinations for a Basic Health Program (BHP).
³ 88 FR 25740
⁴ Ibid.
FFE Enrollment

account transfer, or AT) for individuals who meet applicable non-MAGI criteria to the state agency for a final eligibility determination on a non-MAGI basis.

Also, applicants whom the FFE evaluates as ineligible for MAGI-based Medicaid and Emergency Medicaid and who did not attest to a recent Medicaid/CHIP denial by the state can request to have their account information sent to the state for a full determination. In FFE-A states, the state must evaluate the applicant on all bases (MAGI and non-MAGI). In FFE-D states, the state must evaluate the applicant on a non-MAGI basis only.

Consumers applying for coverage with financial assistance always have the option to apply for Medicaid and CHIP through their state Medicaid/CHIP agency directly. If the state agency determines the applicant ineligible for Medicaid and CHIP, the state will notify the applicant and send their account information securely via AT to the FFE. The FFE will mail the applicant an Inbound AT notice encouraging the applicant to submit a new or updated FFE application right away to see if they (or other members of their household) are eligible to buy an FFE plan and get help with costs.

Consumers enrolled in Medicaid (and in some cases, CHIP) may be impacted by the March 31, 2023, end of the Medicaid continuous enrollment condition, which was put in place to help consumers maintain health coverage during the COVID-19 pandemic. The end of the continuous enrollment condition means that state programs are returning to normal eligibility and enrollment operations, including processing Medicaid terminations for consumers who are determined no longer eligible. This return to normal operations is known as Medicaid continuous enrollment condition unwinding. As of April 1, 2023, states claiming temporary increased Federal funds can terminate enrollment for ineligible individuals enrolled in Medicaid, following a redetermination.

Beneficiaries who lose their current Medicaid or CHIP coverage may need to transition to other health insurance, such as coverage through the FFE. CMS is conducting a multipronged effort to help facilitate continuity of coverage for impacted individuals as the individuals transition from Medicaid or CHIP to FFE coverage. States will send account information for individuals determined ineligible for Medicaid and CHIP to the FFE via AT, and FFE outreach will include mailing these individuals an Inbound AT notice, as described above. Individuals determined ineligible for Medicaid or CHIP by the state do not need to wait for the FFE notice to apply for coverage with the FFE; as soon as the individual learns from their state that they are ineligible for Medicaid and CHIP or that their Medicaid or CHIP coverage is ending, the individual should apply for coverage with the FFE and see if they can get help paying for that coverage.

### 2.3 Open Enrollment and Coverage Effective Dates

During the OEP, a QI may enroll in a QHP. The QI can make multiple elections during the OEP and may change plans even if the originally selected coverage (active or passive) has been effectuated. However, the last effectuated election made by the end of the OEP will be the coverage in which the QI is enrolled through the FFE.\(^5\) If the QI enrolled in a QHP and paid the first month’s premium (i.e., binder payment), as required by 45 CFR 155.400(e), but then selected another QHP during the OEP and that enrollment is effectuated for the same coverage effective date, the issuer of the initial QHP in which coverage was effectuated will need to cancel the coverage and refund premiums. The issuer of

---

\(^5\) The last plan selection made by December 15 that is effectuated will be the coverage in which the QI is enrolled for a January 1 effective date, while the last plan selection made by January 15 that is effectuated will be the coverage in which the QI is enrolled for a February 1 effective date.
that initial QHP will receive notification of the plan selection change from the Marketplace. Outstanding enrollments will also be identified during Enrollment Data Reconciliation.

Generally, the coverage effective date for plan selections made during the OEP is the following January 1 (if the plan selection is made between November 1 and December 15) or the following February 1 (if the plan selection is made between December 16 and January 15). However, QIs who qualify for an SEP during the OEP may receive a coverage effective date as indicated in Section 5, Special Enrollment Periods (Applicable to the Individual Market FFE, QHPs/). Effective dates for enrollee changes to plan selection post-effectuation align with normal effective dates as established in 45 CFR 155.410(f) (although for some SEPs, accelerated or retroactive effective dates may apply). An enrollee can change plans by contacting the Marketplace Call Center or by logging into their HealthCare.gov account, accessing “My Plans and Programs,” and selecting Change Plan. Enrollees may change plans during a valid enrollment period without reporting life changes on their applications.

Note that, under 45 CFR 155.310(c), the FFE must accept an application and make an eligibility determination at any point in time during the year. Eligibility determinations made outside the OEP can enable individuals to learn whether they are QIs, whether they are eligible for an SEP for FFE coverage, whether they are eligible for APTC/CSR, or whether they are eligible for Medicaid or CHIP. There are generally no restrictions on when a QI can enroll for Medicaid or CHIP.

Exhibit 4 illustrates OEP plan selection and coverage effective dates for upcoming plan years.

2.4 Enrollment Transactions

45 CFR 155.270 requires each Exchange to use standards, implementation specifications, operating rules, and code sets adopted by the Department of Health & Human Services (HHS) under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and the ACA when conducting certain electronic transactions with a covered entity, such as a QHP or QDP issuer. Additionally, HHS oversees and monitors FFE issuers and non-Exchange entities to verify compliance with security and privacy standards, as required by 45 CFR 155.280.

The Exchange, QHP issuers, and QDP issuers transmit enrollment transactions in files using the Accredited Standards Committee (ASC) X12 834 Benefit Enrollment and Maintenance Version 5010 (834 enrollment transaction), adopted by the Secretary on January 23, 2009.

CMS released an ASC X12 834 Standard Companion Guide to be used in conjunction with the ASC X12 Version 005010 834 TR3, which outlines transactional information. Additionally, CMS published an M834 (Maintenance 834) Operations Manual to explain how certain new data elements, such as APTC and CSR data in the FFE will be included in the existing version of the 834 enrollment transaction. Issuers offering QHPs or QDPs through the FFE must use the ASC X12 834 enrollment transaction in combination with the updated Companion Guide and Operations Manual for purposes of enrollment transactions. Both documents are available on CMSzONE at https://zone.cms.gov/document/834-enrollment-0.
FFE Enrollment

For purposes of transmitting enrollment information to QHP and QDP issuers, the FFE transmits daily electronic files to the issuers, or their trading partners, in the adopted 834 enrollment transaction. Errors are reported using ASC X12 acknowledgement transactions, including the TA1 and the 999, for syntax and content. This information is explained in greater detail in the Companion Guide.

Retroactive transactions can have either an enrollment or a termination outcome, which could result in impacts to payments, including adjustments to APTC and CSR, as well as other enrollee information, since these transactions are based on plan benefit start and end dates. Retroactive effective dates can result from unforeseen life events, such as death; FFE or issuer error, such as incorrect data being manually entered from a paper application; or an administrative process, such as an eligibility appeal decision. Many of the events and circumstances that result in retroactivity are addressed by regulations on terminations (45 CFR 155.430(d)), SEPs (45 CFR 155.420(b)), redeterminations (45 CFR 155.330(f)), and appeals of eligibility determinations for Exchange participation and insurance affordability programs (45 CFR 155.545(c)). For more information on these topics, refer to Section 7, Terminations (Applicable to the Individual Market FFE, SBE-FPs, QHPs/QDPs), Section 11, Eligibility Changes for the Dually Enrolled or Deceased; Section 13, Implementation of Eligibility Appeal Decisions and Related Enrollments in the FFE.

The respective sections of the regulations outline the retroactive enrollment or termination effective dates for these triggering events and circumstances. Examples of unique circumstances that may involve retroactive enrollment include:

- If a QI fulfilled all enrollment requirements, but, for some reason, the FFE or QHP/QDP issuer was unable to process the enrollment for the required effective date, the FFE may process a retroactive enrollment effective date.
- If an enrollment was never processed or if a valid termination request was properly made but not processed or acted on by the FFE or the QHP/QDP, the FFE may grant retroactive terminations. These circumstances will be addressed on an individual basis, and the FFE will make determinations of outcomes in collaboration with issuers, when needed.

In most cases, issuers will receive an 834 transaction from the Exchange that communicates the correct retroactive enrollment or termination effective dates; however, in some cases (e.g., an eligible enrollee opts for retroactive effectuation of an appeal decision), CMS notifies the issuers using the Health Insurance Casework System (HICS), which specifies the effective date for the retroactive enrollment or termination and/or application of APTC and CSR amounts.

Unlike a reinstatement, which is a correction of records with the practical effect of “erasing” a prior disenrollment, a retroactive enrollment is an action to enroll a QI into a QHP or QDP for a new time period. Reasons and effective dates for retroactive enrollments and terminations are outlined in Exhibit 5 and Exhibit 6. In some limited cases, CMS may determine that a QI is eligible for an SEP due to an extraordinary circumstance beyond the QI’s control and may also permit retroactive enrollment and termination, as necessary.

The issuer then sends a notice to the subscriber regarding the termination of coverage. The retroactive termination date is August 31, the last day of the first month of the three-month grace period.</td>
</tr>
</tbody>
</table>

2.4.1 Initial Enrollment Transaction

Once a QI selects a QHP, and QDP if desired, the FFE sends an 834 enrollment transaction to the issuer. The FFE accumulates transactions and sends the transactions twice daily (at 6:00 a.m. and 6:00 p.m. ET).

If a QI makes a plan selection and subsequently makes a change later in the same day before daily transactions are submitted, the plan selection and the change each generate separate 834 transactions. Issuers must process each transaction in sequence based on the timestamp and Electronic Data Interchange (EDI) file; however, to accurately determine the order of transactions, issuers should pay specific attention to the date and time stamp on the actual 834 enrollment transaction, and not just the date and time on the EDI file.

2.4.2 Confirmation of the 834 Transaction in Individual Market FFE

In the FFE, once the issuer has received the initial 834 enrollment transaction and either full payment or payment within the issuer’s established premium payment threshold, in accordance with Section 6.2, Premium Payment Threshold, for any applicable initial premium due from the enrollee, the issuer must send the FFE a full 834 effectuation/confirmation transaction (Additional Maintenance Reason Code [AMRC] of CONFIRM). The confirmation transaction provides the FFE with
FFE Enrollment

verification that the issuer has effectuated the enrollment. Issuers should not wait to confirm enrollment of a QI until after the APTC has been paid. For purposes of generating the confirmation transaction, full payment occurs when the issuer receives full payment (or payment within the premium payment threshold if the issuer utilizes such) of the portion of the premium for which the QI is responsible.

When a QI pays their portion of the binder payment before the coverage effective date, CMS expects QHP and QDP issuers to send the confirmation transaction to the FFE no later than the fifth calendar day of the effective month of coverage. In the case where the binder payment is made after the effective date of coverage and the issuer retroactively effectuates coverage from the date the premium payment is made, CMS expects QHP and QDP issuers to send the confirmation transaction to the FFE without undue delay (up to 48 hours from activation of the policy in the issuer’s system). Issuers should be aware that Inbound 834 (IC834) transactions for prior years will not be accepted after the annual cutoff, which typically occurs in late March.

Additional information on sending 834 effectuation transactions to the individual FFE can be found on CMSZONE at https://zone.cms.gov/document/834-enrollment-0.

2.4.2.1 Examples

Example 2A: A QI selects a QHP on November 20 during the OEP and is therefore assigned a coverage effective date of January 1. The monthly premium is $200, and the issuer does not make use of a premium payment threshold. The QI is eligible for a maximum APTC of $75 per month. The QI selects the maximum APTC and is therefore responsible for a monthly premium payment of $125. The issuer has established a premium payment deadline of the coverage effective date. The QI is therefore required to make payment of initial month’s premium of $125 to the QHP issuer no later than January 1. The QHP issuer receives payment of $125 from the QI on December 31. The QHP issuer sends the FFE the 834 confirmation transaction on January 2. The QHP issuer has met the FFE’s expectation for timely transmission of the confirmation transaction.

Example 2B: The same circumstances exist from Example 2A. The QI mails a payment of $100 on December 16, and the issuer receives the payment on December 18. The enrollee makes an additional payment towards the initial month’s premium of $25 on December 21, and the issuer receives the payment on December 28. The QHP issuer sends the FFE the 834 confirmation transaction on December 30. The QHP issuer has met the FFE’s expectation for timely transmission of the confirmation transaction.

2.4.3 Cancellations in the Individual Market FFE

Pursuant to 45 CFR 155.430(e)(2), a cancellation transaction is a specific type of termination that ends a QI’s enrollment on the date coverage became effective, resulting in coverage never having been effective (note that the termination transaction may include a termination or end date of the day before, as of 11:59 p.m. ET, the effective date of coverage). QHP and QDP issuers in the FFE may initiate a cancellation transaction if the QI does not pay the binder payment by the deadline the issuer established. CMS expects QHP and QDP issuers to transmit cancellation transactions to the FFE without undue delay (no more than 48 hours after updating the policy to a cancelled status in the issuer’s system). However, if the issuer has sent an effectuation to the FFE, the issuer cannot submit a cancellation under certain circumstances, including when the enrollee resides in an area that is outside the plan's coverage area and in response to anti-duplication transactions.
FFE Enrollment

A QI may choose to cancel coverage prior to the coverage effective date for any reason (and during a free look period in certain states). For instance, the QI may no longer want or need health insurance coverage through the FFE because they have gained other coverage, or the QI may have changed their mind within an enrollment period about the QHP or QDP they selected and therefore wish to select a different available QHP or QDP.

Cancellation transactions initiated by the QI are voluntary, and the associated request must generally be made on HealthCare.gov, with an Enhanced DE (EDE) partner, or with the Marketplace Call Center. However, the FFE cannot automatically cancel a passive reenrollment initiated through the annual Batch Auto-Reenrollment (BAR) process (as explained in Section 3.2.2, Passive Reenrollment/BAR), and if the enrollee actively reenrolls via a disconnected application (either directly or through an assister), enrollee cancellation requests for passive reenrollments (policy origin 11) that are still in passive status (no active plan selection has been completed) can be made directly with the issuer. Issuers therefore must process cancellation requests received directly from the QI for passive reenrollments. Issuers should report the cancellations via IC834 or monthly Enrollment Data Reconciliation.

A QI must complete submission of their cancellation request to the FFE by 11:59 p.m. ET on the date prior to the coverage effective date. A QI who enrolled through the FFE cannot request a cancellation after their coverage effective date unless the enrollee is in a free look period or another exception under 45 CFR 155.430(b)(1)(iv)(B) or (C) applies. The QI may elect to cancel enrollment in a QHP or QDP and select a different available QHP or QDP as many times as they choose within an enrollment period as long as the QI submits the cancellation request prior to the coverage effective date.

NOTE: If an issuer receives a HICS case to cancel a passive reenrollment (policy origin 11), the issuer should cancel the auto-reenrollment.

Unless there is a HICS case noting an Enrollment Blocker, the enrollee must cancel or terminate an active policy through the Exchange; however, if an enrollee makes a change to a passive enrollment that results in an M834 transaction (policy origin other than 11), the enrollment is considered an active selection and so must be cancelled through the Exchange.

2.4.3.1 Examples

Example 2C: A QI selects a QHP on December 12 during the OEP and therefore is assigned a coverage effective date of January 1. The full monthly premium for the selected plan is $300, and the issuer does not make use of a premium payment threshold. The enrollee qualifies for a maximum APTC of $125 per month. The enrollee elects to receive the full APTC amount of $125. Therefore, the 834 enrollment transaction indicates the full monthly premium of $300, which includes the monthly APTC amount of $125 and the $175 enrollee-responsible portion of the monthly premium. The issuer established a premium payment deadline of 30 days from the coverage effective date.

The enrollee mails the $175 payment on January 30. The issuer does not receive the payment until February 3. The issuer should send the FFE an IC834 cancellation transaction without undue delay and refund the QI $175 because the payment was not received prior to the effective coverage date. Furthermore, the issuer must set the cancellation end date on the IC834 to January 1 as any date after January 1 would indicate a period of active coverage for the policy. Additionally, CMS will recoup

---

7 Requests for cancellation of passive reenrollments must be for the entire policy; enrollees cannot request cancellation for individual members on the policy.
FFE Enrollment

any APTC paid to the QHP or QDP issuer and adjust user fees for that enrollee. The issuer should report the cancellation to the FFE during the monthly Enrollment Data Reconciliation process.

**Example 2D:** The same circumstances exist from Example 2C. The enrollee mails a payment of $100 on December 16, and the issuer has established a premium payment deadline of the effective date of coverage. The issuer receives the payment on December 18. The enrollee makes no further payment towards the initial month’s premium. Although the issuer received payment prior to the coverage effective date, because the enrollee did not make payment in full, the issuer cannot effectuate enrollment (by sending the confirmation file) on January 1. The issuer should send the FFE the IC834 cancellation transaction without undue delay and refund the QI $100. Once again, the issuer must set the cancellation end date on the IC834 to January 1, as any later date would indicate a period of active coverage for the policy. Any APTC paid on behalf of the QI must be returned to the FFE.

### 2.4.4 Fraud Cancels Related to Approved Rescissions and Unauthorized Enrollments

Issuers may cancel FFE policies when CMS is satisfied that the issuer has demonstrated that rescission is appropriate and approves the issuer’s request to rescind the enrollment. For example, if an enrollment was made without the subscriber’s authorization and the issuer has found no evidence that the subscriber was aware of the enrollment (unauthorized enrollment), the issuer may be able to demonstrate that a cancellation is appropriate. To cancel an unauthorized enrollment, the issuer should send the FFE an IC834 cancellation transaction with a reason code of fraud, using the CANCEL-FRD AMRC, or the equivalent cancellation reasons if other Enrollment Data Alignment (EDA) channels are utilized.

Additionally, if the issuer is able to demonstrate to the satisfaction of the Exchange that the enrollee, or person acting on their behalf, made an intentional misrepresentation of material fact, as prohibited by the terms of the plan or coverage, the issuer may also be able to rescind the enrollment. In cases of intentional misrepresentation of material fact, as prohibited by the terms of the plan, issuers should use the CANCEL-RESCIND AMRC if notified that CMS has approved their rescission request (in both instances, issuers should always use a cancellation and not a termination transaction). Issuers should be aware that updates to policies for prior plan years will still be accepted through IC834 until the annual cutoff (typically late March but subject to change each plan year). After the deadline, prior year policies cannot be cancelled via IC834, so the issuer would need to submit an Enrollment Resolution and Reconciliation (ER&R) “Prior Year – End Date” dispute, setting the end date to equal the start date of the policy and using the appropriate cancellation reason of rescission.

For additional information on rescissions and unauthorized enrollments see Section 12, Addressing Individual-Reported Unauthorized Enrollments and Issuer-Reported Fraudulent Enrollments.

### 2.4.5 Free Look Provisions in the Individual Market FFE (Applicable to QHPs and QDPs)

Certain states have laws that provide a QI in health insurance coverage a free look period. These provisions allow an enrollee to retroactively cancel coverage in a QHP or QDP in the FFE, within a certain period of time after their coverage effective date. In states with laws providing for a free look period, an enrollee in the FFE may request cancellation of coverage in their QHP and QDP after first terminating their coverage through the FFE. Because rules can vary by state, QHP and QDP issuers may initiate free look cancellations as long as the requests from enrollees are consistent with
applicable state laws. Issuers are encouraged to use the AMRC for free look cancellations pursuant to the ASC X12 834 Standard Companion Guide described earlier in this section.

The premium refund policy in the case of free look cancellations follows state-specific guidelines. Generally, if an enrollee’s request to cancel coverage under a free look provision meets all required criteria, the QHP or QDP issuer must return any premium paid by the enrollee. Additionally, CMS will recoup any APTC paid to the QHP or QDP issuer and adjust user fees for that enrollee. The issuer should report the cancellation to the FFE during the monthly Enrollment Data Reconciliation process. CMS will not initiate an enrollment cancellation through an 834 or through HICS as the result of a QI seeking a cancellation under free look provisions.

If a QI cancels their QHP or QDP coverage during the OEP, the QI may select a new QHP or QDP. Cancellation under a free look period does not qualify the enrollee for an SEP for loss of minimum essential coverage (MEC).

2.4.5.1 Examples

Example 2E: In the FFE, a QI residing in a state with a free look period selects a QHP on December 5 with a coverage effective date of January 1. The enrollee takes the necessary actions that would qualify them for a free look cancellation within 30 days from the start of coverage under state law. On January 30, the enrollee requests cancellation under the free look law from the enrollee’s QHP issuer. The QHP issuer processes the request with a cancellation date of January 1. The QI may return to the FFE to select new coverage as long as they qualify for an SEP. The QI is not eligible for an SEP as a result of the cancellation of their Exchange coverage.

Example 2F: In the FFE, a QI who is eligible for an SEP and who is residing in a state with a free look period selects a QHP on January 5 with a coverage effective date of February 1. The enrollee takes the necessary actions that would qualify them for a free look cancellation within 30 days from the start of coverage under state law. On February 28, the enrollee requests cancellation under the free look provision from the enrollee’s QHP issuer. The QHP issuer processes the request with a cancellation date of February 1. The QI is not eligible for another SEP as a result of the cancellation of their Exchange coverage. To enroll in coverage through the FFE, the QI must wait until the next OEP or must qualify for an SEP, as provided for in 45 CFR 155.420.

2.5 Application and Enrollment Changes

In accordance with 45 CFR 155.330(b) and as specified in 45 CFR 155.305, enrollees and tax filers are required to report changes to information on their applications no later than 30 days after the changes happen. These changes can be reported to the FFE on HealthCare.gov or by calling the Marketplace Call Center. Some updates reported by the enrollee may result in changes to an enrollee’s eligibility for coverage or financial assistance through the FFE or may qualify the enrollee for an SEP. If changes are not reported, the tax filer may be liable for repaying some or all of the APTC received during the year.

Issuers should instruct enrollees to follow the process for reporting changes through the FFE outlined in Exhibit 8.
**Exhibit 8: Process for Reporting Changes via HealthCare.gov**

<table>
<thead>
<tr>
<th>Step</th>
<th>Process</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>The QI logs in to their account, selects their current year application, and selects the <strong>Report a Life Change</strong> button. This button is enabled only for QIs who have a current year application.</td>
</tr>
<tr>
<td>2</td>
<td>The QI lands on a page with information about the types of changes that must be reported to the Marketplace. The next screen allows the QI to change household eligibility information, make changes to notification preferences, or report a move to a new state.</td>
</tr>
<tr>
<td>3</td>
<td>If the QI reports changes that may affect eligibility, an updated copy of their application is created, pre-populating some information and attestations from their earlier application.</td>
</tr>
<tr>
<td>4</td>
<td>The QI updates the application and answers questions that determine whether the (new) applicants or (existing) QI are eligible for QHP or QDP enrollment through the FFE (and financial assistance if requested), and if so, whether the new information triggers an SEP.</td>
</tr>
<tr>
<td>5</td>
<td>If a QI is eligible for an SEP, the QI’s Eligibility Determination Notice (EDN) contains SEP eligibility language.</td>
</tr>
<tr>
<td>6</td>
<td>If any applicants for whom new information is being provided are eligible to enroll in a QHP/QDP through a Marketplace (i.e., they are QIs), the QI proceeds to the enrollment to-do list page to finish QHP and/or QDP enrollment(s) for all QIs on the application.</td>
</tr>
<tr>
<td>6a</td>
<td>If new information is being provided for an applicant based on an event that triggers an SEP, all QIs on the application can compare and select from QHPs and QDPs available in their service area under the plan category restrictions for the corresponding SEP.</td>
</tr>
<tr>
<td>6b</td>
<td>If the new information provided does not trigger an SEP, the QI is limited to selecting the QHP or QDP in which they are currently enrolled. This non-SEP selection will provide the QHP/QDP with the updated enrollment information.</td>
</tr>
<tr>
<td>7</td>
<td>If applicable, the QI eligible for an SEP sets the amount of APTC the tax household will use and selects a new plan or the existing plan (depending on the situation).</td>
</tr>
</tbody>
</table>
| 8    | Once the QI eligible for an SEP selects a plan, the system generates enrollment transactions to the issuer, as appropriate, based on the plan selected.  
  - Updates that maintain the same subscriber and the same FFE policy ID are sent as M834 transactions.  
  - Updates that change the subscriber or QHP/QDP ID also change the FFE policy ID and thus are sent as Change in Circumstance (CIC) transactions. |

In some limited cases, in addition to reporting the change on an application, the enrollee may need to submit a new application to enroll in coverage. The enrollee must create a new application when the enrollee has moved to a new state or when the enrollee will no longer be on the same Federal income tax return as the other enrollees on the current application (e.g., due to a divorce or when a young adult will no longer be claimed as a tax dependent by their parents). When this occurs outside the OEP, the enrollee could qualify for an SEP based on the loss of their previous Marketplace coverage or due to gaining access to new QHPs as a result of a permanent move. In general, however, QIs do not need to create a new application in order to report a change.
The (non-exhaustive) list of reportable changes is as follows:

- Change in projected annual household income for the coverage year or change to current month’s household income
- Addition or removal of other applicants or non-applicant household members listed on application (e.g., when there is a birth, death, or marriage)
- Relocation/change of address to a new ZIP Code or county
- Gain or loss of other health coverage
- Pregnancy (may affect Medicaid eligibility under applicable state rules)
- Change in full-time student status for 18-22-year-olds (could affect Medicaid eligibility under applicable state rules)
- Becoming the primary caretaker for a child living with you (could affect Medicaid eligibility under applicable state rules)
- Change in tax filing status (e.g., will or will not file, joint or separate filer) or change in tax dependents who will be claimed
- Newly incarcerated or released from incarceration
- Change in immigration status or citizenship
- Change in status as member of federally recognized tribe
- Change in disability status or need for long-term care
- Change to available employer coverage
- Change in enrollment in other health coverage
- Change, including corrections and updates, to the relationships between family members

Enrollees can also report changes during annual eligibility redetermination. For more information on the redetermination process, see Section 3, Redeterminations and Renewals in the Individual Market FFE (Annual Open Enrollment).

NOTE: For information on whether reported changes are classified as financial or demographic, refer to Section 2.2 of the M834 Operations Manual, which can be found on CMSzONE at https://zone.cms.gov/document/834-enrollment-0.

2.5.1 Age Rating and Accumulators

In accordance with 45 CFR 147.102(a)(1)(iii), QHP issuers must use an enrollee’s age as of the date of policy issuance or renewal to conduct age rating. Issuers are not permitted to re-rate an enrollee based on age during the plan year if the enrollee remains on the original policy. New enrollees who enroll during the middle of the plan year will be age-rated by the FFE as of the date they enroll in coverage. If a dependent is added in the middle of the plan year, the FFE age rates the dependent as of the date of their enrollment, while the subscriber retains the age rating they received when the coverage began. If an existing subscriber selects a new plan in the middle of the plan year (involving a change in the 14-character plan ID), then the FFE age rates all enrollees on the policy as of the start date of their new policy. Finally, if the original subscriber on a policy is removed during the plan year, the FFE assigns a new subscriber to the policy from the remaining enrollees and age-rates all remaining QIs as of the new policy start date.
FFE Enrollment

If the FFE does not assign the rates as described here, an issuer may generally use EDA to make corrections. If the FFE re-rates an enrollee after a CIC due to a new FFE policy ID being assigned but the issuer is required by state law or business rule to continue the original premium, the issuer may use EDA to change the FFE policy premium so that the age rating is based on the original start date. Issuers must use the annual renewal date of January 1 to age rate enrollees when coverage continues into the next plan year.

The same principle applies to accumulators, such as deductibles and maximum out-of-pocket limits. Accumulators may not be reset for an enrollee or group of enrollees remaining in the same policy, as indicated by the FFE policy ID remaining unchanged after the CIC. Accumulators may be reset at the beginning of the plan year or when a new policy is issued (typically indicated by the FFE assigning a new FFE policy ID), as occurs when a new plan is selected or a new subscriber is identified. Issuers should also refer to the laws in their state, which may be more consumer protective regarding when accumulators may be reset. Changes in eligibility for CSRs, known as CSR variants and indicated on the 834 by the two-digit suffix to the plan ID, are not new policy issuances; thus, accumulators must not be reset, consistent with 45 CFR 156.425(b).

2.5.1.1 Child Rating Limitations

In accordance with 45 CFR 147.102(c)(1), the FFE takes into account no more than the three oldest covered children when calculating the total premium. Multiple enrollment scenarios involving QIs under the age of 21 can exist, and the determination of who is included or excluded in the calculation of total family premiums is based on the following:

- When a subscriber is age 21 or older, only the three oldest dependents (any relation other than spouse) aged 20 or younger are included as the three oldest covered children.
- When a subscriber is age 20 or younger and the subscriber is neither the parent nor the spouse of any of the included dependents, the subscriber is considered to be one of the three oldest covered children.
- When a subscriber is age 20 or younger and the policy includes an individual aged 20 or younger who is the spouse of the subscriber, neither the subscriber nor the spouse are considered to be covered children.
- When a subscriber is age 20 or younger and the subscriber is the parent of any included dependent aged 20 or younger, the subscriber is not considered to be one of the three oldest covered children.

2.6 Electronic Notice Requirements

Issuers have asked CMS whether it is permissible to send notices to enrollees electronically rather than through standard mail. In general, CMS regulations do not prohibit issuers from providing notices electronically. When sending notices electronically, issuers should ensure that the following conditions are met:

- The enrollee has been given a choice of either standard mail or electronic communication.
- The enrollee has consented to electronic communication.
- The issuer satisfies the requirements for electronic notices under other applicable federal or state law.
FFE Enrollment

If an issuer cannot send all other supporting materials electronically along with the notice, the issuer must provide the notice through standard mail. Issuers are encouraged to contact their state’s Department of Insurance to ensure that any electronic communications comply with state regulations.
3. **REDETERMINATIONS AND RENEWALS IN THE INDIVIDUAL MARKET**

**FFE (ANNUAL OPEN ENROLLMENT)**

### 3.1 Introduction

Pursuant to 45 CFR 155.335, an Exchange has the flexibility to conduct annual redeterminations using either the procedures described in 45 CFR 155.335(b) through (m), alternative procedures specified by the Secretary for the applicable plan year, or alternative procedures approved by the Secretary based on a showing by the Exchange that such procedures meet specified criteria. The alternative procedures utilized by the Federally-facilitated Exchange (FFE) are published as written guidance on redetermination and reenrollment on the Center for Consumer Information & Insurance Oversight (CCIIO) website.  

In advance of the Open Enrollment Period (OEP) for each plan year, the FFE will provide a Marketplace Open Enrollment Notice (MOEN) to all qualified individuals (QIs) currently enrolled in Qualified Health Plans/Qualified Dental Plans (QHPs/QDPs) through the FFE for the upcoming plan year. This notice focuses on announcing the OEP and contains other information, including a description of the annual redetermination and renewal process, the requirement to report changes affecting eligibility and the channels for reporting such changes, and the last day’s plan selections may be made for coverage starting on January 1 or February 1 of the upcoming plan year. Information specific to the enrollment, such as the upcoming plan year premium and any financial assistance (possibly initially estimated), come from the issuer’s renewal or discontinuation notice, supplementary notice, and/or January or February invoice.

MOENs contain special messaging for QIs who are at risk of having their advance payments of the premium tax credit (APTC) discontinued in the new coverage year. These groups include, but are not limited to:

- **Opt-Out Group**: QIs enrolled in QHPs with APTC or income-based cost-sharing reduction (CSR) who did not authorize the FFE to request updated tax return information for the purpose of annual redetermination or have an expired authorization
- **Repeat Passive Reenrollees**: QIs who were automatically reenrolled with APTC or income-based CSR for the past two consecutive coverage years and have no tax data (meaning, no income or FTR indicator) available from the Internal Revenue Service (IRS) for the previous two relevant tax years

Notices for these groups contain the same information as the standard notice, along with an explanation that the FFE strongly encourages enrollees receiving APTC or CSR to contact the FFE to obtain an updated eligibility determination and make a plan selection by the last day of plan selection for a January 1 coverage effective date, as specified in 45 CFR 155.410(f).

---

---

FFE Enrollment

For a QI at risk of losing financial assistance who does not contact the FFE to obtain an updated eligibility determination and select a QHP by December 15, the FFE will establish future year eligibility based on a hierarchy of the most recent income data available and reenroll the QI in QHP coverage without APTC or CSR. The FFE may use either IRS data or verified, QI-provided application data, which is verified either through external data sources (EDSs) or a manual documentation submission process, whichever is most recent. The FFE uses this income data, together with updated Federal Poverty Level (FPL) tables and benchmark plan premium information, to update eligibility for APTC and CSR.

For information on the Failure to File and Reconcile (FTR) process for consumers, see Section 2.2, Eligibility.

3.2 Reenrollment

Reenrollment is the general term used to describe coverage continued into a new plan year, whether the next plan year’s coverage is under the same or different product (as defined in 45 CFR 144.103) or with a different issuer. Reenrollment for the next plan year can be either active or passive.

3.2.1 Active Reenrollment

An active reenrollment is initiated by an enrollee returning to the FFE during the OEP to submit an application and select a plan for the next plan year. It is important that current FFE enrollees who are seeking to actively reenroll work from future-year applications that are tied to their current-year applications, rather than creating brand new applications (e.g., through a new HealthCare.gov account) that are not pre-populated from their current year application. This approach provides enrollees with the benefit of pre-populated applications and helps the FFE and issuers maintain continuity in enrollments. Tips for enrollees who are having trouble logging into their HealthCare.gov account are available at https://www.healthcare.gov/help/i-am-having-trouble-logging-in-to-my-marketplace-account/.

Note that it is very important for enrollees or their agents or brokers (A/Bs) to access their respective existing Exchange accounts so that they can receive a pre-populated eligibility application for the future plan year. This allows the Exchange to accurately connect the future-year enrollment with the current-year enrollment. Failure to use a pre-populated application to enroll in future-year coverage may lead to duplicate enrollments and QI confusion.

Prior to assisting a QI, the A/B should determine if the QI has an existing application. Failure to follow these steps can create confusion for the enrollee as well as the issuer, as duplicate enrollments may be created if an existing enrollee’s pre-populated future-year application is not accessed. To prevent unnecessary creation of a new application, the A/B application search returns applications for both the current and future year when the A/B searches for the current-year application, prevents an A/B from pre-populating another future-year application using a current-year application when a future-year application already exists, and only displays an application with an active policy for a given year, when one is available.

3.2.2 Passive Reenrollment/BAR

Passive reenrollment, also called Batch Auto-Reenrollment (BAR), is the process that the FFE uses to reenroll current enrollees who do not return to the FFE to submit an application and select a plan by
FFE Enrollment

December 15. This helps ensure that the current enrollees have coverage on January 1 of the following year.

CMS uses a crosswalk (found at 45 CFR 155.335(j)(1) through (4)) to determine an appropriate plan for the upcoming year, which is created through a combination of issuer submissions, and in certain cases state direction. Issuers submit the Plan ID Crosswalk Template with other plan materials during the QHP certification process. The FFE uses the Plan ID Crosswalk Template to conduct the passive reenrollments.

Auto-reenrollment runs as follows:

- **October Wave:** This wave starts around mid-October and includes all enrollees eligible for renewal who are being reenrolled into a plan offered by the same issuer or matched to an alternate plan from a different issuer by CMS or a state insurance department, as applicable. CMS’s goal is to complete this wave by November 1.

- **Incremental Wave:** This wave starts around late November/early December and includes new current-year enrollees who enrolled after the October BAR wave and enrollees whose auto-reenrollment is being updated because the enrollee or Exchange reported new eligibility information for the current year after the October BAR wave.

- **December Wave:** This wave starts around mid-December and includes new current-year enrollees who enrolled after the November BAR wave and enrollees whose auto-reenrollment is being updated because the enrollee or Exchange reported new eligibility information for the current year after the November BAR wave.

CMS’s goal is for issuers to receive most passive reenrollment transactions before the start of the OEP, allowing time for the issuers to process and track renewals and prepare issuer-provided reenrollment notices that identify the reenrollment plan and financial information if the QI is auto-reenrolled. Enrollees who visit HealthCare.gov and check their Marketplace accounts during the OEP will not see their passive reenrollment until December 16; however, when the enrollee is determined eligible to enroll in a QHP through the Exchange and proceeds to plan selection, the enrollee will see the reenrollment plan pre-selected for their convenience.

Issuers may communicate with QIs regarding these reenrollment transactions but should not send an invoice for future-year coverage until after the OEP starts. An enrollee has until December 31 to indicate to the Exchange that they do not want to be auto-reenrolled by opting out of passive reenrollment through BAR on HealthCare.gov. Confirming “Stop Coverage for [Future Year]” will send a current-year policy termination that day, effective December 31, and simultaneously cancel the future-year BAR policy (if already sent) or block BAR from running for that application (if BAR has not already been executed for that application).

For passive reenrollments, issuers must reenroll each enrollee in a QHP in accordance with the BAR reenrollment transactions sent, which follow the hierarchy described in 45 CFR 155.335(j). Starting in plan year 2024, per 45 CFR 155.335(j)(1) and (2) as amended by the Notice of Benefit and Payment Parameters for 2024, this generally requires that an enrollee be renewed in the same QHP if available or a plan in the same product that has the most similar network compared with the enrollee's current QHP if available through the Exchange. If no plan in the same product is available through the Exchange, the issuer may reenroll the enrollee into a different product available through the Exchange that is the most similar to the enrollee's current product and that has the most similar network compared with the enrollee’s current QHP. If an enrollee’s current Silver-level QHP is not available
FFE Enrollment

and the enrollee's current product no longer includes a Silver-level QHP that is available to the enrollee through the Exchange, the enrollee should be reenrolled in a Silver-level QHP in the product offered by the same issuer that is the most similar to the enrollee's current product rather than in a plan one metal level higher or lower than their current Silver-level QHP but within the same product.

Starting in plan year 2024, per 45 CFR 155.335(j)(4), as added by the Notice of Benefit and Payment Parameters for 2024, CMS will auto-reenroll CSR-eligible Bronze enrollees who would otherwise be automatically reenrolled in a Bronze-level QHP into a Silver-level QHP if a Silver QHP is available in the same product as and with a monthly premium no greater than that of the Bronze plan into which they would otherwise be auto-reenrolled. Additionally, per amendments to 45 CFR 155.335(j)(1) and (2), Exchanges must take into account network similarity to the current year plan when reenrolling enrollees whose current year plans are no longer available. Issuers should not indicate an auto-reenrollment plan as determined under 45 CFR 155.335(j)(4) (for current Bronze enrollees who may be reenrolled in a Silver plan provided that certain conditions are met). Instead, CMS will determine the potential Silver plan for each Bronze crosswalk plan and determine based on applicable APTC whether to auto-reenroll enrollees from Bronze to Silver. However, issuers should take into consideration the most similar network criteria per 45 CFR 155.335(j)(1) and (2), along with all of the other requirements per these paragraphs.

If an enrollee has not yet been passively reenrolled and makes an active plan selection for the upcoming year, the enrollee will not be passively reenrolled through BAR. Additionally, active plan selections through December 15 automatically cancel or update any auto-reenrollment already sent for the enrollee. If an enrollee updates their current-year coverage after they were passively reenrolled for the next plan year, those changes generally will be carried forward to the next plan year’s policy through the December BAR process. However, if an enrollee makes an active update to their next plan year’s policy, subsequent updates to current-year coverage will not be automatically carried forward to the next plan year’s policy through the December BAR process. Absent a Special Enrollment Period (SEP), such as Loss of Minimum Essential Coverage due to the current-year issuer discontinuing coverage, a QI must make an active plan selection by December 15 for an effective date of January 1. Plan selections made between December 16 to January 15 have an effective date of February 1. If the enrollee makes an active plan selection before December 15, issuers should disregard any passive reenrollment transaction previously sent by the FFE, even if received out of sequence. A QI can make an election at any time during the OEP or during an SEP, even if a previous passive or active reenrollment has been effectuated. The new coverage starts in accordance with normal effective dates.

### 3.2.3 BAR Operational Process

The FFE completes the following:

1. Select the application with a current, active enrollment.
2. Pre-populate a future-year application.
   
   **NOTE:** This application is not visible to the enrollee until the enrollee logs into their Marketplace account on or after the first day of the OEP.
3. Create a future-year enrollment using the Plan ID Crosswalk Template provided by the issuer or in an alternate plan from a different issuer (see Section 3.2.4, Alternate Enrollments).
   
   **NOTE:** This enrollment will be visible to the QI on December 16 if the QI does not actively select a plan for the upcoming plan year.
4. Send the enrollment transaction to the issuer.
FFE Enrollment

5. Repeat steps 1–4 for the incremental and December waves.
6. Generate an Eligibility Determination Notice (EDN) and Enrollment Confirmation Message for enrollees who did not make an active plan selection by the last day of the OEP.

3.2.4 Alternate Enrollments

Where no QHP from the same issuer is available to enrollees through the Exchange, then to the extent permitted by applicable state law, an enrollee may be auto re-enrolled in a plan with a different issuer. This process does not apply to QDPs. In such cases, reenrollments are conducted as directed by the applicable state regulatory authority. If the applicable state’s regulatory authority declines to act, to the extent permitted by applicable state law, the Exchange will reenroll the affected enrollee in a similar QHP from a different issuer within a service area that covers the enrollee’s location, taking into account the issuer’s ability to absorb the new enrollment and the lowest premium plan.

The FFE performs this auto re-enrollment process according to the following hierarchy, which prioritizes finding a policy offered by a different issuer that is similar to the enrollee’s current coverage:

- The enrollee will be auto-reenrolled in a QHP at the same metal level under the same product network type in the same service area.
- If no QHP is available at the same metal level under the same product network type in the same service area, the enrollee will be auto-reenrolled in a QHP at the same metal level under a different but similar (if possible) product network type.
- If no QHP is available from the same metal level under a different product network type in the same service area, the enrollee will be auto-reenrolled in a QHP that is one metal level lower than the enrollee’s current QHP under the same product network type.
- If no QHP is available that is one metal level lower than the enrollee’s current QHP under the same product network type in the same service area, the enrollee will be auto-reenrolled in a QHP that is one metal level lower than the enrollee’s current QHP under a different but similar (if possible) product network type.
- If no QHP is available that is one metal level higher than the enrollee’s current QHP under the same product network type in the same service area, the enrollee will be auto-reenrolled in a QHP that is one metal level higher than the enrollee’s current QHP under the same product network type.
- If no QHP is available that is one metal level higher than the enrollee’s current QHP under a different product network type in the same service area, the enrollee will be auto-reenrolled in a QHP at any metal level under the same product network type.
- If no QHP is available for enrollment at any metal level under the same product network type in the same service area, the enrollee will be auto-reenrolled in a QHP at any metal level under a different but similar (if possible) product network type.

In keeping with the final Notice of Benefits and Payment Parameters for 2024, state regulatory authorities and Exchanges have the option to apply the Bronze to Silver crosswalk policy per 45 CFR
When a state defers to the Exchange, the FFE will crosswalk CSR-eligible enrollees for whom no QHPs from the same issuer are available, and who would otherwise be auto re-enrolled in a Bronze plan, to a Silver-level QHP within the same product, with the same provider network, and with a net premium lower than or equivalent to that of the Bronze-level QHP into which the Exchange would otherwise re-enroll the enrollee under the auto re-enrollment hierarchy above.

When the state regulatory authority conducts the cross issuer enrollment process, the FFE will defer to that state regulatory authority with regard to whether to incorporate the Bronze to Silver crosswalk policy into cross-issuer auto re-enrollment.

The Exchange sends this type of auto-reenrollment to the future-year issuer as initial enrollments, with an Electronic File Transfer (EFT) code of I834, and Additional Maintenance Reason Code (AMRC) of PASSIVE – NEW TO ISSUER, in contrast to other passive reenrollments, which are sent with an EFT code of I834AR. For enrollees who are being reenrolled from a Bronze to a Silver plan under 45 CFR 155.335(j)(4), the I834 sent to the issuer will contain an AMRC of PASSIVE – NEW TO ISSUER (B2S) to indicate that these enrollees were reenrolled under (j)(4). For a smoother enrollment experience, CMS encourages alternate enrollees who wish to change plans to select a plan by December 15, to have an effective date of January 1, though these enrollees are generally eligible for an accelerated SEP that permits plan changes for January 1 coverage until December 31.

3.2.5 Reenrollment Communications to Enrollees

In addition to the MOEN sent by the Exchange, issuers are also required to send notices of product renewal and discontinuation to current enrollees as specified in 45 CFR 147.106 and 156.1255. An issuer must provide written notice of renewal to each individual market policyholder before the first day of the next OEP. For more information on Federal standard notices of product discontinuation and renewal in connection with the OEP, issuers can review the latest CMS guidance under the Health Insurance Market Reforms heading, and the Guidance subheading, at Regulations and Guidance | CMS. Issuers should note that, as indicated in the standard notice, if future-year eligibility from the FFE is not available when the issuer sends the notice, the issuer may use current-year APTC as an express estimate and communicate to the consumer that APTC will change for the upcoming year. Issuers may indicate that plan change descriptions in their communications presume current-year CSR.

Enrollees who are moved to a different issuer will also receive a Cross Issuer Notice (CIN). CSR-eligible enrollees who will be moved from a Bronze to a Silver plan per 45 CFR 155.335(j)(4) will receive a notice explaining this transition from the Exchange.

Finally, if the enrollee has not returned to the Exchange to make an active selection for the next plan year by December 15, for an effective date of January 1, the Marketplace will send both an updated EDN and an Enrollment Confirmation Message to the enrollee. These notices inform the enrollee of their eligibility determination for the upcoming plan year and of their passive reenrollment status. The Enrollment Confirmation Message notes whether the enrollee(s) on the relevant application was successfully reenrolled. If the enrollee(s) was reenrolled, the confirmation message provides the plan name(s), plan ID(s), and information about any financial assistance that was applied. If the QI(s) was not reenrolled because the coverage was discontinued by the issuer or the enrollee(s) on the application is not eligible for passive reenrollment, the QI(s) does not receive an EDN but is notified in the Enrollment Confirmation Message of their failure to auto-renew and encouraged to complete an
FFE Enrollment

application and plan selection through the FFE. If BAR fails, the Exchange does not generate an EDN because the EDN is dependent on all QIs on the application enrolling in coverage.

3.2.6 BAR Failure Report to Issuers

There are some BAR transactions that cannot be processed due to technical issues, though this represents a very small portion of all applications. CMS sends the BAR Failure report to issuers who had BAR transactions that were unsuccessful due to technical issues; therefore, not all issuers receive the report. CMS generally sends the BAR Failure report to impacted issuers in late December or early January of the coverage year using the EFT IOUTRC function code.

This report contains enrollee contact information. Issuers are encouraged to use this file for voluntary outreach to enrollees; the goal is for the enrollees to actively reenroll through the FFE. Enrollees on the BAR Failure report are eligible for a 60-day SEP. The Marketplace Call Center flags these enrollments for an optional January 1 effective date if the enrollee actively returns to the FFE and makes a plan selection by March 1. The Exchange also conducts outreach to these enrollees. When these enrollees contact the Marketplace Call Center, they may enroll in coverage with either a prospective effective date or a retroactive effective date of January 1. In both of these scenarios, the 834 will have a prospective date. If the consumer elects a retroactive effective date of January 1, the Marketplace Call Center will open a Health Insurance Casework System (HICS) case.

3.3 Enrollment Transaction Types

Because the FFE auto-reenrolls the vast majority of members before the OEP begins, most active reenrollments are sent as Maintenance 834 (M834) transactions. CMS sends active reenrollments for the future plan year’s coverage to issuers in daily batches as 834 initial enrollments, in accordance with FFE procedures. Active reenrollment 834 transactions sent to issuers also include plan selection changes made for the new plan year, such as when an enrollee replaces future-year plan A with future-year plan B during the OEP. Plan selection changes are sent as cancellation/termination transactions to the first issuer and initial enrollment transactions to the gaining issuer. Plan selection changes are not sent as M834 transactions. CMS sends regular Change in Circumstance (CIC) transactions to issuers when enrollees report a change to their application information (e.g., updated income, new phone number, or new family member) for either the current or next year’s coverage.9

The FFE sends passive reenrollment transactions as part of the BAR process described in Section 3.2.2, Passive Reenrollment/BAR. There are two populations for which an issuer may receive updates after the initial auto-reenrollment. These updates are sent to issuers via M834 transactions in the second wave of BAR in December. The first population consists of enrollees reporting a current-year CIC after having been auto-reenrolled for the future year. For these cases, the associated M834 transaction updates the future-year plan to include the eligibility update made due to the current-year CIC. The second population is made up of auto-reenrolled who submitted an active future-year application but did not complete an active future-year plan selection. For these cases, the associated M834 transaction updates the future-year enrollment with the eligibility information reported in the active future-year enrollment.

---

9 For specific transactional information about CICs performed on current year policies, refer to Section 2.2 of the M834 Operations Manual on CMSzONE at https://zone.cms.gov/document/834-enrollment-0.
FFE Enrollment

CMS sends passive reenrollments, with the exception of alternate enrollments with new issuers, as initial enrollment transactions with a Maintenance Type Code (INS03) of 021 (Addition), a Maintenance Reason Code (INS04) of 41, and an AMRC that identifies that the auto-reenrollment is in either effectuated or initial status. All passive reenrollments have an effective date of January 1, and most are sent with the EFT function code I834AR; however, alternate enrollments are sent with the EFT function code I834. **Exhibit 9** provides a non-exhaustive list of passive reenrollment groupings and their corresponding maintenance codes, Origin Type, binder requirement, and function code.

</tbody>
</table>

Issuers should not continue an enrollment through the Exchange into the future plan year unless the issuer receives an 834 enrollment transaction from the FFE or finds the enrollment listed on a future-year Pre-Audit File or in the Get Enrollment real time Application Programming Interface (API). Because the FFE sends BAR transactions before the OEP, the FFE sends the majority of active reenrollments for QIs who keep their reenrollment plan as M834 transactions. If a reenrollee updates their future-year application and keeps the same 14-character plan ID, removing or changing the subscriber will send the update as a CANCELCIC cancellation. The FFE also sends CANCELCIC cancellations for any passive reenrollments when enrollees subsequently change plan IDs during active plan selections before December 15.

The FFE sends an initial enrollment to the issuer of the new plan the QI actively selected, which includes eligibility updates, if applicable. An issuer that receives a cancellation of a passive reenrollment should not renew the enrollment unless the enrollee has actively renewed coverage with the issuer, causing an active reenrollment transaction to be sent. In most situations where an enrollee has been passively reenrolled but then makes a plan selection change with an effective date after January 1, the FFE will terminate their passive reenrollment effective the day before the actively selected plan becomes effective. For example, an enrollee eligible for a Loss of Minimum Essential Coverage (MEC) SEP (ending March 1) because the current-year product is no longer available to them may make a plan selection change on January 2. The issuer of the auto-reenrolled policy would receive a termination transaction effective January 31, and the issuer of the newly selected plan would
FFE Enrollment

receive a February 1 enrollment transaction. In no case does a plan selection for the future plan year send a termination transaction to the current-year issuer for current-year coverage.

If an enrollee actively reenrolls for the next plan year before the FFE sends their auto-reenrollment transactions, the FFE will not send a passive reenrollment transaction. If an enrollee who has not been auto-reenrolled actively enrolls with a different issuer for the next plan year, the Exchange will list the subscriber on the Switch File, sent daily from the beginning of the OEP to mid-December, to the enrollee’s current issuer. The FFE provides this list of current-year subscribers who have actively switched issuers for the next plan year to inform current-year issuers to non-renew the listed subscribers’ enrollments. See Section 3.4.1, Enrollee Switch File, for additional information.

3.3.1 Identifiers on Enrollment Transactions

The identifiers on enrollment transactions are as follows:

- The FFE-assigned subscriber ID and member ID, also known as Exchange-Assigned Subscriber ID and Exchange-Assigned Member ID, respectively, remain the same for enrollees choosing the same issuer (i.e., five-digit Health Insurance Oversight System [HIOS] ID) for the next plan year.
- FFE application IDs and FFE policy numbers are new for all future-year plan selections, whether active or passive.
- The FFE aims to send issuer-assigned identifiers on reenrollments.
- The FFE does not send information for assisters who are not A/Bs on passive reenrollments.
- The FFE sends information for all types of assisters (e.g., Navigators and Certified Application Counselors [CACs]) on active reenrollments according to existing procedures.
- If recorded on the current plan year’s application, the FFE sends the A/B’s National Producer Number (NPN) on passive reenrollments. For an active reenrollment, the NPN from the current year is pre-populated on the future-year application if the NPN is already associated with the current-year application but can be removed or edited by the applicant. Exhibit 10 illustrates the rules governing how to send NPNs.

<tr>
<td>Active reenrollment by returning QI who removes A/B information on future-year application</td>
<td>789</td>
<td>N/A – A QI removed the A/B information on the future-year application.</td>
</tr>
</tbody>
</table>

*NOTE: NPNs received after the first BAR wave through Enrollment Data Reconciliation are relayed to issuers in the second BAR wave.

**NOTE: If the most recent version of the QI’s current-year application includes the NPN, the NPN will pre-populate on the future-year application. If the NPNs not included on the most recent version of the current-year application, the NPN will not pre-populate on the future-year application. This is particularly important for Direct Enrollment (DE) Entities using the DE QI Flow, who only submit the NPN via the Submit Enrollment Request but do not include the NPN on the application. NPNs submitted via the Submit Enrollment Request are only written to the QI’s policy, not the application. This highlights the importance of DE Entities assisting their clients with the reenrollment process.

Exhibit 11 illustrates reenrollment transaction scenarios and their associated Maintenance Reason Code, FFE subscriber IDs, and whether the issuer should send an effectuation transaction to the FFE.

### 3.3.2 CSR and APTC Calculations on Passive Reenrollments

For enrollees who do not contact the Exchange to obtain an updated eligibility determination and select a QHP by December 15, the Exchange will establish future-year eligibility as follows:

- First, where an enrollee was in the opt-out group, or repeat passive reenrollment group, the Exchange will discontinue APTC and income-based CSR.
- Second, where an enrollee with APTC or income-based CSR does not fall into the opt-out group, the repeat passive reenrollment group, or any other category precluding eligibility for financial assistance, the Exchange will use the current-year family size and the most recent household income and other eligibility information available, updated FPL tables, and updated benchmark plan premium information to calculate APTC and determine eligibility for income-based CSR for the next plan year.

Enrollees who actively return to the Exchange to submit updated eligibility information for future-year coverage will have their eligibility redetermined according to standard processes, with updated eligibility taking effect according to the effective dates described in 45 CFR 155.410(f).

### 3.4 Additional Files and Transactions to Support Issuers with Auto-Renewal

The FFE communicates the majority of renewals (both active and passive) and new enrollments to issuers via 834 enrollment transactions. Because of the unique data architecture of the Exchange, issuers also receive additional files and transactions informing the issuers of FFE enrollments. For example, the Switch File (Section 3.4.1) tells the current-year issuer to end coverage on December 31 and that no auto-reenrollment should be expected, while the Passive Cancel Job (Section 3.4.2)
FFE Enrollment eliminates duplicate coverage created in error. The Cancel Carry Forward job (Section 3.4.3) cancels auto-renewals in situations where eligibility for auto-renewal ended because the associated current-year policy terminated after BAR.

3.4.1 Enrollee Switch File

When an enrollee whose policy is in current (not cancelled or terminated) status completes an active reenrollment for future-year coverage in a plan offered by a different issuer from the current-year issuer, the FFE does not send the current-year issuer an 834 termination transaction. Rather, for enrollees for whom the FFE has already sent passive reenrollments, the current-year issuer receives a cancellation for the future-year passive enrollment, which is the signal to non-renew coverage unless another enrollment transaction is received. However, for enrollees who actively switch issuers for the new plan year and for whom no passive enrollment has been sent, there is no passive reenrollment to cancel.

To address this, the FFE produces an electronic file for each issuer offering plans through the FFE that identifies the issuer’s current subscribers who have actively reenrolled in future-year coverage offered by a different issuer. The FFE generates the file daily beginning shortly after the start of the OEP until around the cutoff for January coverage. Each Enrollee Switch File (sent with the EFT function code SWTFL) will be cumulative, identifying current enrollees who have switched issuers as of their most recent plan selection on the day before the file is generated. Only subscribers who have not been auto-reenrolled and actively switch issuers for the future plan year are candidates for the Switch File.

If an enrollee who has switched issuers for the future year subsequently switches back to a plan offered by their current-year issuer, that enrollee will be removed from the next Switch File. A QDP subscriber will appear on the Switch File if the current subscriber either actively enrolled in a QHP while declining QDP coverage for the future plan year or if the QDP subscriber actively switched to a different QDP issuer.

3.4.2 Passive Cancel Job

When enrollees or their assisters fail to access their existing pre-populated future-year application and instead create a new application for future-year coverage, a duplicate policy is created. The FFE cancels passive reenrollments that duplicate active enrollments for future-year coverage via the Passive Cancel job. This job runs periodically in November and December. Issuers receive these files in IPA layout via EFT function code BARCNX. These enrollments have already been cancelled by the FFE, and the issuers should similarly cancel the policies in their records. From January until the next OEP, the overlap cleanup job performs deduplication, which is visible on the Pre-Audit File.

For more information on these files, including recommended issuer actions, refer to the latest version of the Standard Issuer Enrollment Data Files document, available on CMSzONE at https://zone.cms.gov/document/enrollment-data-reconciliation.

3.4.3 Cancel Carry Forward Job

During the OEP, an enrollee or issuer may terminate (or cancel) current-year coverage after the FFE has sent the passive reenrollment for future-year coverage, (e.g., terminations for non-payment). The Cancel Carry Forward job cancels auto-reenrollments (policy origin of 11) that are linked to a prior-year enrollment that has been cancelled or terminated after auto-renewal. Because the passive reenrollments were created based on the prior year’s coverage, which subsequently ended, the Cancel
FFE Enrollment

Carry Forward job “carries forward” the termination (or cancellation) to cancel the future year’s enrollment.

The FFE sends I834 cancellations with an AMRC of CANCEL-CARRYFORWARD periodically from November through March to cancel future-year auto-renewals associated with prior-year policies that terminated or cancelled after BAR. Issuers should review the cancellations documented in the file and ensure the cancellations are applied to the appropriate passive reenrollments in their system, taking care to cancel using the FFE policy ID (not the subscriber ID). Issuers will see these cancellations reflected in the Enrollment Pre-Audit (AUD) Files.

3.4.4 BAR Progress Report

In the run up to and throughout the OEP, the FFE sends QHP and QDP issuers that are expecting renewals (i.e., issuers continuing to offer QHPs through the Exchange) a daily report that totals the auto-renewals as of midnight the night before the report’s generation using EFT function code BARPGx. The report compares the count of BAR-eligible policies (current-year policies in good standing as of that incremental run of BAR, updated periodically throughout the OEP) with the BAR enrollments sent by the FFE. Issuers can use the report to track progress and report problems. For example, the issuer may realize from a lower-than-expected BAR-eligible count that the issuer accidentally terminated enrollments and will need to seek reinstatements.

3.4.5 Effectuation at Reenrollment and CIC

Issuers do not need to send the FFE an effectuation transaction for any previously effectuated passive or active (with the same issuer as identified by the five-digit HIOS ID) reenrollment as long as the enrollment has the same FFE-assigned subscriber ID for both plan years. Similarly, issuers need not send effectuations when an enrollee selects a plan in the same product in an enrollment update reported through a CIC. However, effectuation confirmation transactions and binder payments are required for enrollments with a new subscriber, such as an adult child being reenrolled as a new subscriber in a passive reenrollment age-off scenario. Issuers must also send effectuation confirmation transactions and collect binder payments for active enrollments for new enrollees and for returning enrollees who did not have continuous coverage.

3.4.6 Life Changes During the OEP

An enrollee can report life changes triggering CIC transactions to issuers for both current-year and future-year coverage during the OEP. If reported to the FFE by December 15, changes to current-year coverage, such as the addition of a baby or spouse, are reflected on the passive reenrollment for future-year coverage. After December 15, the enrollee cannot initiate changes to current-year coverage in self-service mode on HealthCare.gov but must instead contact the Marketplace Call Center. Enrollees who actively selected future-year coverage by December 15 and subsequently want to update their current-year coverage based on a CIC should contact the Marketplace Call Center. The Marketplace Call Center can assist enrollees in updating their applications and coverage for both the current and future year, if necessary.

3.4.7 Tobacco Rating at Time of Reenrollment

For passive reenrollments, the FFE uses the tobacco status from the current year. In rare cases of technical error during passive enrollment, a policy may have an incorrect rating for tobacco status.
FFE Enrollment

Issuers can restore a tobacco status inadvertently changed during a passive reenrollment through the Enrollment Data Reconciliation process (see Section 3.2.2, Passive Reenrollment/BAR).

During the OEP or an SEP, enrollees can actively update their enrollment to change their last date of tobacco use such that an enrollee would be eligible to go from tobacco-rated to non-tobacco-rated and vice versa, with the change taking effect with a prospective effective date. Issuers should honor tobacco status changes made actively during an OEP or SEP.

3.4.8 Medicare Enrollment and Non-Renewals

Section 1882(d)(3)(A)(i)(I) of the Social Security Act (the Medicare anti-duplication provision) prohibits issuers, A/Bs, and web-brokers who know a QI is enrolled in or entitled to Medicare from selling or issuing individual health insurance coverage that duplicates the QI’s Medicare or Medicaid benefits. The Medicare anti-duplication provision applies even if the beneficiary has only Medicare Part A or only Medicare Part B and is intended to protect Medicare beneficiaries from fraudulent or abusive practices leading to the purchase of excessive or unnecessary coverage. Employer-sponsored coverage is explicitly exempt from the Medicare anti-duplication provision.

Sections 2703 and 2742 of the Public Health Service Act, and promulgated regulations at 45 CFR 147.106 and 148.122, generally require guaranteed renewability of coverage for employers and individuals in the group and individual health insurance markets. Until 2017, the guaranteed renewability regulations did not offer Medicare eligibility or entitlement as a basis for nonrenewal or termination of an individual’s health insurance coverage in the individual market. However, the Notice of Benefit and Payment Parameters for 2018 proposed and finalized a regulatory interpretation of Medicare anti-duplication and guaranteed renewability provisions, which prohibits issuers that have knowledge that an enrollee in individual health insurance coverage is entitled to Medicare Part A or enrolled in Medicare Part B from renewing the individual health insurance coverage if the coverage would duplicate Medicare or Medicaid benefits to which the enrollee is entitled, unless the renewal is effectuated under the same policy or contract of insurance. State insurance rules determine when a change in policy or contract of insurance has occurred.

QHP issuers that have knowledge that an enrollment covers a QHP enrollee who is entitled to Medicare Part A or enrolled in Medicare Part B must non-renew the entire policy if the QHP reenrollment plan is a different policy or contract of insurance and the new coverage duplicates Medicare or Medicaid benefits to which the enrollee is entitled. The issuer should send a termination transaction to the FFE ending coverage as of December 31 with an AMRC of TERM-ANTIDUPLICATION (CANCEL-ANTIDUPLICATION on the future-year policy is also acceptable) near the end of the plan year.

A QHP issuer should not presume that all individuals aged 65 or older are entitled to or enrolled in Medicare. QHP issuers must send a termination or cancellation notice, pursuant to 45 CFR 155.430(b)(2)(i) and 156.270(b)(1), to any enrollees whose coverage has not been renewed due to an enrollee in the enrollment group being a Medicare beneficiary. The termination notice should advise the non-Medicare enrollees on the non-renewed policy that they will be eligible for an SEP and to actively reenroll in another policy for continued coverage, making the Medicare enrollee a non-

---

11 See Section 1882(d)(3)(A)(iv) of the Social Security Act (SSA) for the definition of “duplicate.”
12 See Section 1882(d)(3)(C) of the SSA.
13 81 FR 94058
14 See Final HHS Notice of Benefit and Payment Parameters for 2018 (81 FR 94058).
FFE Enrollment

applicant. The Marketplace Call Center will have lists of enrollees eligible for the SEP, and enrollees will not be required to submit documentation, as the circumstances were already verified. Refer to Section 5. Special Enrollment Periods (Applicable to the Individual Market FFE, QHPs/QDPs), for information on SEPs.

Enrollees that become eligible for or enrolled in benefits under Medicare after enrolling in coverage through the Exchange may maintain coverage until the coverage is lawfully terminated in accordance with the Medicare anti-duplication provision, as described above, or otherwise. However, the QI loses eligibility for APTC and CSR when the enrollee becomes eligible for or enrolled in Medicare Part A or Medicare Part C (otherwise known as Medicare Advantage), as determined by IRS regulations. QHP issuers are encouraged to ask enrollees who are newly eligible for or enrolled in benefits under Medicare if they wish to maintain coverage in a QHP. Issuers are also encouraged to provide instructions about how such enrollees can report a change to the Marketplace to terminate coverage or stop receipt of APTC and CSR to reduce the burden of repaying some or all of the APTC received (during months of overlapping coverage) when filing their annual Federal income taxes.

For additional operational guidance regarding termination or nonrenewal transactions for Medicare beneficiaries, refer to the annually published OEP transaction summary guidance available on REGTAP. For additional policy and technical guidance regarding the Medicare anti-duplication process, refer to https://regtap.cms.gov/reg_library_openfile.php?id=3016&type=l.
4. **DIRECT ENROLLMENT (APPLICABLE TO THE INDIVIDUAL MARKET FFE, QHPs/QDPs)**

4.1 Introduction

Direct Enrollment (DE) is an enrollment process that allows new applicants and existing enrollees to enroll in a Qualified Health Plan (QHP), either directly with a QHP issuer or through a Federally-facilitated Exchange (FFE)-registered web-broker in a manner considered to be through the FFE, during an Open Enrollment Period (OEP) or Special Enrollment Period (SEP), when the process is originated through either a CMS-approved QHP issuer website or CMS-approved web-broker website (referred to as DE Entity websites). Enrollees also have the ability to report life changes through DE. Consumers may use DE with or without the assistance of an FFE-registered agent or broker (A/B).

Currently, the FFE offers two different options for QHP issuers and web-brokers (referred to as DE Entities) that wish to participate in DE. First, there is the classic DE pathway, which is also known as the double-redirect pathway. Second, there is the Enhanced DE (EDE) pathway. References to “DE” in this manual without specifying either classic DE or EDE, are inclusive of both the classic DE and EDE pathways.

The classic, or double-redirect, DE pathway utilizes Security Assertion Markup Language (SAML) to securely transfer a qualified individual (QI) or A/B from a DE Entity’s website to HealthCare.gov, where the QI completes the FFE’s eligibility application. Once the eligibility application has been completed, the QI or A/B is securely redirected back to the DE Entity’s website for plan selection and enrollment. DE Entities then use Extensible Markup Language (XML) Application Programming Interfaces (APIs) to obtain a QI’s eligibility results and submit the QI’s enrollment to the FFE. The APIs include the Fetch Eligibility service, which allows a DE Entity to obtain a QI’s eligibility results, and the Submit Enrollment service, which allows a DE Entity to submit a QI’s enrollment to the FFE.

Technical specifications for the SAML, Fetch Eligibility, and Submit Enrollment services are outlined in both the **FFE DE API for Web-Brokers/Issuers Technical Specifications** and the **Federal Data Services Hub (DSH) DE Business Service Definitions (BSDs)**, both of which can be found on CMSzONE at [https://zone.cms.gov/document/direct-enrollment-de-documents-and-materials](https://zone.cms.gov/document/direct-enrollment-de-documents-and-materials).

The EDE pathway, unlike the classic DE pathway, does not require a QI to be redirected to HealthCare.gov to complete the eligibility application. Instead, DE Entities that use the EDE pathway are able to provide a complete enrollment experience on their websites, including hosting the eligibility application. While DE Entities can host the eligibility application on their sites for EDE, eligibility determinations are still made by the FFE. DE Entities participating in EDE utilize a suite of JavaScript Object Notation (JSON) APIs that the FFE makes available to obtain eligibility results from the FFE, create and update QI eligibility applications, obtain QI notices, and submit verification documentation, among other things. The XML Submit Enrollment API used for classic DE is also used.

---

15 As detailed in the Patient Protection and Affordable Care Act; Establishment of Exchanges and Qualified Health Plans; Exchange Standards for Employers; Final Rule and Interim Final Rule (77 Fed. Reg. 18310, 18315) (March 27, 2012), with some limited exceptions, Qualified Dental Plans (QDPs) are considered a type of QHP. Unless indicated otherwise, references to QHPs in Section 4 include QDPs.
FFE Enrollment

The plan shopping experience for both DE pathways, including the display of available plans, selection of advance payments of the premium tax credit (APTC) amounts (for those who are eligible), and the submission of plan selections, is implemented by the DE Entity on its website and in accordance with applicable CMS requirements.

DE Entities that wish to access the above CMSzONE links can do so by creating a CMS Enterprise Portal account at https://portal.cms.gov (if one has not been created already). Once an account has been created, the user must request access to CMSzONE via their CMS Enterprise Portal account.

Once access to CMSzONE is approved, the user can access the above links by logging into https://zone.cms.gov with their CMS Enterprise Portal account login.

QHP issuers and web-brokers that are interested in participating in DE should send any questions to DirectEnrollment@cms.hhs.gov.

4.2 Guidelines for Specific QI Scenarios

The FFE provides eligibility results to DE Entities for those individuals seeking coverage through the DE Entity’s website. The FFE also provides information about whether each applicant using the DE Entity’s website is eligible for enrollment in a QHP through the FFE and, when the applicant has applied for financial assistance, the FFE makes a determination of eligibility for APTC and cost-sharing reduction (CSR) and performs an assessment or determination of eligibility for Medicaid and/or the Children’s Health Insurance Program (CHIP), depending on the state’s election.

4.2.1 Applicant Not Eligible for QHP Enrollment

If an applicant using DE is determined ineligible for enrollment in a QHP through the FFE, this information will be provided to the applicant and DE Entity, and the DE Entity will review the determination with the applicant. The applicant can then view and select a plan offered outside the FFE, if desired.

4.2.2 Applicant is Eligible for QHP Enrollment and APTC/CSR

If an applicant using DE is found eligible for enrollment in a QHP through the FFE and is determined eligible for APTC or CSR, this information will be provided to the applicant and DE Entity, and the DE Entity will review the information with the applicant. DE Entities must provide applicants who are eligible for APTC the option to select the amount of APTC they want to apply towards the reduction of their share of the premiums during the plan selection process. For applicants eligible for income-based CSR, a DE Entity should only display the CSR plan variant that an individual is eligible for when displaying any Silver QHP, or any metal level QHP for enrollees eligible for CSR due to their status as either a member of a federally recognized Indian tribe or Alaska Native Claims Settlement Act (ANCSA) Corporation Shareholder.

4.2.3 Applicant is Eligible for QHP Enrollment but Not for APTC/CSR

If an applicant using DE is found eligible for enrollment in a QHP through the FFE but is determined ineligible for APTC or CSR, this information will be provided to the applicant and DE Entity, and the DE Entity will review the information with the applicant. During subsequent plan selection, the DE
Entity should not include any APTC amount for an applicant who is not eligible for APTC or display CSR plan variations for an applicant who is not eligible for CSR.

### 4.2.4 Applicant is Eligible for Medicaid or CHIP

If an applicant using DE is assessed as potentially eligible or determined eligible for Medicaid or CHIP, the FFE sends the applicant’s information to the appropriate state Medicaid or CHIP agency. The state agency will subsequently follow up with the applicant, or the applicant may contact the relevant state agency regarding their status. The applicant and DE Entity will also be informed of the applicant’s Medicaid or CHIP eligibility, and the DE Entity will review the information with the applicant.

**Medicaid/CHIP Modified Adjusted Gross Income (MAGI) Eligibility Scenario:** If an applicant using DE is determined eligible or assessed as potentially eligible for Medicaid or CHIP based on MAGI, their account is transferred to the state Medicaid/CHIP agency. The applicant and DE Entity will be informed of the applicant’s Medicaid or CHIP eligibility, and the DE Entity will review the information with the applicant. Applicants eligible for MAGI-based Medicaid or CHIP will not be eligible for a QHP on a financial assistance application but can create a non-financial assistance application, to determine eligibility for a QHP without financial assistance. The DE Entity should not include those eligible for Medicaid or CHIP who are not also eligible for a QHP in an enrollment group on a financial assistance application because the DE Entity will receive an error during the enrollment submission, since the system can only accept a submitted enrollment for applicants who are marked as eligible for a QHP.

If an applicant assessed as potentially eligible for Medicaid or CHIP by the state agency, the state agency will transfer the applicant’s account back to the FFE, and the applicant will be sent a notice from the FFE with instructions on how they may update and submit their FFE application in order to receive a determination of eligibility for QHP coverage through the FFE and for APTC and CSR. Applicants can update and submit their FFE application either at the DE Entity or directly at the FFE.

**Medicaid/CHIP Non-MAGI Eligibility Scenario:** The FFE will also screen for eligibility for Medicaid based on factors other than MAGI (i.e., disability, long-term care needed, applicants aged 65 and older), and allow applicants to request an eligibility determination on one or more of these bases. If an applicant indicates on the application that they are age 65 or older, or that they are disabled or have a long-term care need, but they also have been determined eligible for enrollment in a QHP through the FFE, the applicant and DE Entity will be informed that the applicant is eligible to select a QHP through the FFE (if the applicant wants to select a QHP pending the outcome of the non-MAGI Medicaid eligibility determination). If the applicant is eligible for APTC or CSR, pending the outcome of the non-MAGI determination, the amount of APTC or CSR available will be provided to the applicant and DE Entity and should be used during the subsequent plan selection process.

### 4.2.5 Households that Include QIs Eligible for Different Coverage Programs

For households that include individuals eligible for different coverage programs (e.g., QHP with APTC, Medicaid), DE Entities should follow the guidelines outlined above for each applicant in the household. When an applicant is determined eligible or assessed as potentially eligible for Medicaid or CHIP based on MAGI or non-MAGI (e.g., disability, long-term care needed, applicants aged 65 and older) circumstances, the FFE will transfer application information to the state Medicaid or CHIP
agency, as applicable. DE Entities should not include any applicants in the QHP selection process who are not listed as eligible for enrollment in a QHP through the Exchange, since the DE Entity would receive an error during the enrollment submission due to the fact that the system can only accept an enrollment request for applicants that are marked as eligible for a QHP.

DE Entities have the ability to create their own shopping experience on their websites, subject to applicable CMS requirements. Nevertheless, if a household has applicants who are determined eligible for QHP enrollment through the FFE and others who are not eligible, the DE Entity website must first complete the plan selection process for applicants eligible for QHP enrollment through the FFE prior to completing the plan selection process for individuals who are not eligible for QHP enrollment through the FFE. While the DE Entity may not enroll applicants in Exchange coverage who are determined ineligible for QHPs, the DE Entity may enroll them in coverage outside the Exchange after completing the enrollment process for those applicants who are QHP-eligible.

4.3 Enrollment Groups

Due to system limitations, DE for applicants applying for financial assistance through the FFE is currently limited to enrollment groups consisting of a single-tax household (that is, when applying for financial assistance, only applicants who are included on the same tax return are able to enroll together in a QHP through the FFE using the DE process). However, DE does accommodate enrollment in QHPs through the FFE for enrollment groups that include multiple-tax households as long as all of the applicants are not seeking financial assistance.

If a group of applicants apply for financial assistance through the FFE using DE and the applicants are identified as having multiple-tax households, the FFE will relay this information to the applicant and DE Entity, and the DE Entity will review the information with the applicant. The DE Entity should advise the applicants that DE does not support enrollment of multi-tax households when financial assistance is sought. The DE Entity should also advise the applicants that if they want to continue using DE, they must complete separate applications for financial assistance (a separate application for each tax household), or they can complete a non-financial assistance application if they would like to enroll together using DE.

DE Entities must also use an issuer’s current subscriber-dependent rules when determining who can be insured under one policy. DE Entity websites that are capable of supporting multiple enrollment groups should give QIs the ability to regroup into different enrollment groups, either combining into fewer enrollment groups (if issuer relationship rules permit), or separating into different valid enrollment groups, if desired. The FFE DE API for Web-Brokers/Issuers Technical Specifications\(^{16}\) addresses how to allocate APTC when there are multiple enrollment groups. If a DE Entity offering a classic DE pathway is unable to support multiple enrollment groups, it must make the applicant aware that they can access this functionality at HealthCare.gov, as described in the disclaimers below. Note that EDE Entity websites must include functionality that allows QIs to group in any way that is acceptable based on the issuer’s current business rules, and EDE Entities are therefore not permitted to display the applicable portion of the disclaimer (see Section 4.4.1, QHP Issuer DE Entities) required under 45 CFR 156.1230(a)(1)(iv) in lieu of supporting multiple enrollment group functionality.

It is important to note that all QIs on a single application may only enroll using DE if doing so at the same time with a single DE Entity. A QI cannot go to DE Entity A’s website and enroll some of the

FFE Enrollment

tax household and then go to DE Entity B’s website to enroll the remaining QIs. The enrollment request must include all policies for the application, and the DE Entity should not send multiple individual enrollment requests for members of a tax household as this will cause an error.

Additionally, due to operational limitations, dental-only enrollment is not permitted via DE. Qualified Dental Plan (QDP) issuers who only offer dental coverage are therefore not permitted to participate in DE at this time. However, concurrent enrollment in both a QHP and a QDP is permitted via DE. Applicants who wish to enroll in a QDP via DE may do so after making a QHP selection. DE Entities that offer concurrent QHP and QDP enrollment must note, however, that any elected APTC must first be applied towards the essential health benefits (EHB) portion of the QHP, and then any remaining APTC can only be applied towards any pediatric (i.e., for those applicants under the age of 19) portion of the dental premium.

APTC cannot be applied towards any dental premium applicable to an adult enrollee. The FFE DE API for Web-Brokers/Issuers Technical Specifications addresses in greater detail how to allocate APTC. QHP issuer DE Entities that do not offer dental coverage must also provide a disclaimer to applicants, stating that dental coverage is available via HealthCare.gov.

4.4 QHP Display Guidance

QHP issuers and web-brokers that are seeking approval or that have obtained approval to use DE must adhere to the applicable CMS requirements with respect to the display of QHP information. Different regulatory requirements extend to the DE Entity websites depending on whether they are QHP issuer websites or web-broker websites. Details on each follow.

4.4.1 QHP Issuer DE Entities

The QHP issuer DE Entity website:

1. Must, in accordance with 45 CFR 156.1230(a)(1)(ii) and 155.205(b)(1)(i)–(viii), provide applicants the ability to view QHPs offered by the issuer and provide standardized comparative information on each available QHP, to the extent such information is required to be available, and that at a minimum includes:
   a. Premium and cost-sharing information (total and net premium based on APTC and/or CSR).
   b. Summary of Benefits and Coverage.
   c. Identification of whether the QHP is a Bronze, Silver, Gold, or Platinum level plan, or a catastrophic plan.
   d. The results of the enrollee satisfaction survey.
   e. Quality ratings.
   f. Medical loss ratio (MLR) information as reported to the Department of Health & Human Services (HHS).
   g. Transparency of coverage measures reported to the Exchange during certification.
   h. The provider directory made available to the Exchange.

---

17 See supra note 16.
18 45 CFR 156.1230(a)(1)(iv)
2. Must, in accordance with 45 CFR 155.221(b)(1), display and market QHPs offered through the Exchange, individual health insurance coverage as defined in 45 CFR 144.103 offered outside the Exchange (including QHPs and non-QHPs other than excepted benefits), and any other products, such as excepted benefits, on at least three separate website pages on its non-Exchange website, except as permitted by 45 CFR 155.221(c). This includes not offering non-QHP health plans (e.g., short-term, limited-duration insurance) or non-QHP ancillary products (e.g., vision or accident insurance) alongside QHPs. QHP issuer DE Entities must also provide applicants the ability to search for off-Exchange products in a separate section of the website other than the QHP webpages; such products may be marketed and displayed after the QHP selection process has been completed.

3. Should provide filters for searching through plan options on QHP issuer DE Entities’ QHP websites, which may include, but are not limited to:
   a. All plans.
   b. Premiums.
   c. Deductibles.
   d. Maximum out-of-pocket cost.
   e. Plan type (e.g., HMO, PPO).
   f. Dental coverage included.
   g. Health Savings Account eligible.

4. Must allow applicants to select and attest to their APTC amount, if applicable, up to the maximum for which they are eligible, as set forth in 45 CFR 156.1230(a)(1)(v), and subsequently update the net premium for the displayed QHPs. If an applicant is eligible for CSR, QHP issuer DE Entities should only display the CSR plan variant that an individual is found eligible for when displaying any Silver QHP, or American Indian/Alaskan Native CSR variations, at any metal level, as appropriate.

5. Should ensure that information on its QHP webpages is provided to applicants in plain language and in a manner that is timely and provides effective communication for individuals living with disabilities and provides meaningful access for individuals with limited English proficiency at no cost to applicants.

6. Must, in accordance with 45 CFR 155.221(b)(3), limit marketing of non-QHPs during the Exchange eligibility application (if applicable) and QHP plan selection process in a manner that minimizes the likelihood that consumers will be confused as to which products and plans are available through the Exchange and which products and plans are not, except as permitted by 45 CFR 155.221(c)(1). For example, the QHP issuer DE Entity website must clearly distinguish between QHPs for which the QI is eligible and other non-QHPs that the QHP issuer may offer and indicate that APTC and CSR apply only to QHPs offered through the FFE, as set forth in 45 CFR 156.1230(a)(1)(iii).

QHP issuer DE Entities must ensure that the premiums charged to an applicant using DE are the same as the amount the FFE would have calculated had the applicant selected a QHP via HealthCare.gov. It is important to note that the QHP issuer DE Entity is responsible for collecting information on the tobacco status of each applicant and should factor that in when calculating each enrollee’s premium. Currently, the FFE is only able to support changes in enrollees’ tobacco status during open enrollment or an SEP as part of the enrollment XML file provided from issuers to the FFE. QHP issuer DE Entities should refer to the other sections of this manual and the FFE DE API for Web-Brokers/Issuers.
FFE Enrollment

**Technical Specifications**\(^{19}\) to ensure that they are correctly rating and applying the correct financial amounts for an enrollee based on their situation (e.g., new vs. existing enrollee making a mid-year change, effective date first of the month vs. mid-month, etc.).

QHP issuer DE Entities must provide an HHS-provided universal disclaimer that informs all applicants of the availability of other QHP products offered through the FFE as set forth in 45 CFR 156.1230(a)(1)(iv). QHP issuer DE Entities must make this disclaimer available to all applicants regardless of how applicants communicate with the QHP issuer (e.g., through a website, by phone, in-person). The FFE expects that QHP issuer DE Entities will make the disclaimer available at the beginning of the plan comparison process, and if an applicant is using a QHP issuer’s website, the QHP issuer must prominently display this disclaimer when displaying plans to the applicant. The disclaimer must read:\(^{20}\)

“Attention: This website is operated by [Name of Company] and is not the Health Insurance Marketplace® website at HealthCare.gov. This website does not display all Qualified Health Plans (QHPs) available through HealthCare.gov. To see all available QHP options, go to the Health Insurance Marketplace® website at HealthCare.gov.

Also, you should visit the Health Insurance Marketplace®\(^{21}\) website at HealthCare.gov if:

1. You want to select a catastrophic health plan. (**This only needs to be included if the QHP issuer does not offer catastrophic plans.**)
2. You want to enroll members of your household in separate QHPs. (**This only needs to be included if the QHP issuer does not allow multiple enrollment groups for its classic DE pathway; note that EDE Entities are required to support multiple enrollment groups.**)
3. You want to enroll members of your household in dental coverage. [The plans offered here do not offer pediatric dental coverage and you want to choose a QHP offered by a different issuer that covers pediatric dental services or a separate dental plan with pediatric coverage.] (**This only needs to be included if the QHP issuer does not offer adult dental coverage or pediatric dental coverage.**)

The following guidelines apply to the prominent display of the disclaimer:

- The disclaimer must be prominently displayed on both the initial QI landing page and on the landing page displaying QHP options (QHP selection page) that appear before the applicant makes a decision to purchase coverage.
- The disclaimer must use the exact language provided by HHS.
- The disclaimer must include a functioning web link to the Health Insurance Marketplace® website (HealthCare.gov).
- The disclaimer must be viewable without requiring the user to select or click on an additional link.
- The disclaimer must be written in a font size no smaller than the majority of the text on the webpage.

\(^{19}\) See supra note 16.

\(^{20}\) The portion of the disclaimer related to pediatric dental coverage, indicated in brackets, is not required, but CMS encourages a QHP issuer that does not offer pediatric dental coverage to display this piece of the disclaimer. The portion of the disclaimer text in bold should not be displayed but rather is intended to indicate when the issuer should display the corresponding disclaimer text.

\(^{21}\) Health Insurance Marketplace® is a registered service mark of the U.S. Department of Health & Human Services.
FFE Enrollment

- The disclaimer must be displayed in the same non-English language as any language(s) the QHP issuer maintains screens for on its website.
- The disclaimer must be noticeable in the context of the website (e.g., use a font color that contrasts with the background of the webpage).

A QHP issuer DE Entity may change the font color, size, or graphic context of the information to ensure that it is noticeable to the QI in the context of its website or the other written material.

4.4.1.1 Standardized Plan Display Requirements for QHP Issuer DE Entities

Beginning with the Plan Year 2024 OEP, CMS will enforce the requirement that QHP issuer DE Entities differentially display all standardized plan options in a manner consistent with that adopted by HHS for display on the FFE website, unless HHS approves a deviation, as set forth in 45 CFR 156.265(b)(3)(iv). QHP issuer DE Entities must adhere to the following display requirements for all plan display pages (including plan compare and plan details pages, as applicable) on any approved consumer-facing or A/B-facing DE environments maintained:

- Display the label “Easy pricing” for all standardized plan options (“Precios fáciles” in Spanish)
- Display a price tag icon accompanying each “Easy pricing” label
- Provide a filter option for “Easy pricing” plans
- Display help text describing the plans
- Display a label and educational text in Spanish where applicable

QHP issuer DE Entities must display the following help text to describe standardized plan options:

**English Version:**

“Consider plans with easy pricing

Marketplace plans marked easy pricing:

- Include some benefits before you reach the deductible. As soon as coverage starts, you’ll pay only a copayment for:
  - Doctor and specialist visits, including mental health
  - Urgent care
  - Physical, speech, and occupational therapy
  - Generic and most preferred drugs
- Are easier to compare because they have the same out-of-pocket costs within their health plan category, like:
  - Deductibles
  - Out-of-pocket maximums
  - Copayments/coinsurance”

**Spanish Version:**

“Considere planes con precios fáciles

Los planes del Mercado marcados como precios fáciles:

---

22 87 FR 27208, 27310–27322
FFE Enrollment

- Incluyendo algunos beneficios antes de alcanzar el deducible. Tan pronto como comience la cobertura, solo pagará un copago por:
  - Visitas a médicos y especialistas, incluyendo la salud mental
  - Atención de urgencias
  - Terapia física, del habla y ocupacional
  - Medicamentos genéricos y preferidos
- Son más fáciles de comparar porque tienen los mismos gastos de bolsillo dentro de su categoría de plan de salud, como:
  - Deductibles
  - Gastos máximos de bolsillo
  - Copagos/coseguro

This help text must be prominently displayed on QHP issuer DE Entity websites. The following guidelines apply to the prominent display of this text:

- CMS considers the help text to be prominently displayed if the text dynamically appears when a user hovers over the “Easy pricing” label or iconography, or if it is displayed as a static or linked pop-up description in close proximity to where the “Easy pricing” label and icon appear.
- The help text must use the exact language provided by HHS.
- The help text must be written in a font size no smaller than the majority of the text on the webpage.
- The help text and corresponding “Easy pricing” label must be displayed in the same non-English language as any language(s) the web-broker or issuer maintains screens for on its website.
- The help text must be noticeable in the context of the website (e.g., use a font color that contrasts with the background of the webpage).

QHP issuer DE Entities may change the font color, size, or graphic context of the help text to ensure that it is noticeable to the applicant in the context of the website. However, the exact language of the standardized plan options help text must be used.

Information on standardized plan options is available through the Marketplace API (MAPI) or the public use files (PUF).

- Standardized plans can be identified in a MAPI response by the “design_type” field. A value of DESIGN1, DESIGN2, DESIGN3, DESIGN4, or DESIGN5 indicates a standardized plan. A value of “NOT_APPLICABLE” indicates a non-standard plan.
- Standardized plans can be identified in the Plan Attributes PUF by the “DesignType” field. A value of “Design Type 1”, “Design Type 2”, or “Design Type 3” indicates a standardized plan. A value of “Not Applicable” indicates a non-standard plan.

To request a deviation in the display of standardized plan options, QHP issuer DE Entities must email the DE Help Desk. CMS may request additional documentation to assess requested deviations.
4.4.2 Web-Broker DE Entities

Web-broker DE Entity websites must—in accordance with 45 CFR 155.220(c)(3)(i)(A)(1)–(6)—disclose and display all QHP information provided by the Exchange or directly by QHP issuers, consistent with the requirements of 45 CFR 155.205(c), for all QHPs, including QDPs,\footnote{See supra note 16. CMS expects all web-brokers to follow the same requirements for QDPs as for QHPs, including displaying on their websites all applicable QDPs offered through the Exchange and all available information specific to each QDP. However, because it is not possible to enroll in QDPs through DE unless also enrolling in medical QHPs (see Section 4.3, Enrollment Groups), web-brokers may modify their QHP displays accordingly (e.g., display QDPs after medical QHPs to ensure a consumer has first selected a medical QHP).} offered through the Exchange.

The standardized comparative information on each available QHP that must be displayed includes the following minimum information:
1. Premium and cost-sharing information (total and net premium based on APTC and CSR)
2. Summary of benefits and coverage
3. Identification of whether the QHP is a Bronze, Silver, Gold, or Platinum level plan, or a catastrophic plan
4. The results of the enrollee satisfaction survey
5. Quality ratings
6. The provider directory made available to the Exchange

In accordance with 45 CFR 155.220(c)(3)(i)(A), if a web-broker DE Entity website does not support enrollment for a QHP, it must prominently display the following standardized Enrollment Support Disclaimer for the specific QHP:

"[Name of Company] does not support enrollment in this Qualified Health Plan at this time. To enroll in this Qualified Health Plan, visit the Health Insurance Marketplace® website at HealthCare.gov."

The mandatory standardized Enrollment Support Disclaimer must:
- Be prominently displayed on any website page where plan information for QHPs is displayed if the web-broker does not support enrollment in any such QHPs, so it is noticeable to the QI or A/B assisting the QI.
- Be provided where the enrollment button (or other similar mechanism) would otherwise appear for a particular QHP, although we will consider a web-broker website in compliance if a visual cue is displayed where the enrollment button (or other similar mechanism) would otherwise appear for a particular QHP if the visual cue provides clear direction to the standardized disclaimer text on the same website page or otherwise displays the standardized disclaimer text (e.g., in a pop-up bubble that appears while hovering over the visual cue on the website).
- Use the exact language provided by HHS.
- Include an operational link to the Health Insurance Marketplace® website (HealthCare.gov).

The web-broker DE Entity website must:
1. Adhere to the website display standards specified in 45 CFR 155.220(c)(3)(i)(A)(1)–(6). Web-broker DE Entities must disclose and display all QHP information provided by the FFE or directly by QHP or QDP issuers.
2. Provide QIs and A/Bs assisting QIs the ability to view all QHPs offered through the Exchange, in accordance with 45 CFR 155.220(c)(3)(i)(B). Web-broker DE Entities must display all QHPs available through an Exchange, irrespective of compensation or appointment arrangements.

3. Provide no financial incentives, such as rebates or giveaways, in accordance with 45 CFR 155.220(c)(3)(i)(C).

4. Display all QHP data provided by the Exchange, in accordance with 45 CFR 155.220(c)(3)(i)(D). CMS makes detailed QHP data available to web-brokers registered with the FFE through the release of the QHP Landscape Files and the Health Insurance Exchange Public Use Files (PUFs). CMS recommends that web-brokers registered with the FFE use these files, in addition to information a web-broker registered with the FFE obtains through its relationships with QHP issuers, to display required QHP standardized comparative information. Alternatively, web-brokers can obtain a real-time feed of QHP information using the Marketplace API. If web-brokers are interested in integrating with the Marketplace API, the API key request form and related documentation can be found at https://developer.cms.gov/marketplace-api/.

5. Provide QIs with the ability to withdraw at any time from the process and instead use the Exchange website, in accordance with 45 CFR 155.220(c)(3)(i)(F).

6. Prominently display information provided by the Exchange pertaining to a consumer’s eligibility for APTC or CSR and allow the consumer to select an amount for APTC, if applicable, and make related attestations, in accordance with 45 CFR 155.220(c)(3)(i)(I) and (c)(3)(i)(J).

7. Not display QHP advertisements or recommendations, or otherwise provide favored or preferred placement in the display of QHPs, based on compensation the agent, broker, or web-broker receives from QHP issuers, in accordance with 45 CFR 155.220(c)(3)(i)(L).

8. Prominently display a clear explanation of the rationale for QHP recommendations and the methodology for its default display of QHPs, in accordance with 45 CFR 155.220(c)(3)(i)(M).

9. Display and market QHPs offered through the Exchange, individual health insurance coverage as defined in 45 CFR 144.103 offered outside the Exchange (including QHPs and non-QHPs other than excepted benefits), and any other products, such as excepted benefits, on at least three separate website pages on its website, in accordance with 45 CFR 155.221(b)(1), except as permitted by 45 CFR 155.221(b)(1). This includes not offering non-QHP health plans (e.g., short-term, limited-duration insurance) or non-QHP ancillary products (e.g., vision or accident insurance) alongside QHPs. Web-broker DE Entities must also provide applicants the ability to search for off-Exchange products in a separate section of the website other than the QHP webpages; such products may be marketed and displayed after the QHP selection process has been completed.

10. Limit marketing of non-QHPs during the Exchange eligibility application and QHP plan selection process in a manner that minimizes the likelihood that consumers will be confused as to which products and plans are available through the Exchange and which products and plans are not, in accordance with 45 CFR 155.221(b)(3), except as permitted by 45 CFR 155.221(c)(1). For example, the web-broker DE Entity website must clearly distinguish

---

between QHPs for which the QI is eligible and other non-QHPs that the web-broker DE Entity
may offer and indicate that APTC and CSR apply only to QHPs offered through the FFE.

Web-broker DE Entity websites must also prominently display the General non-FFE Disclaimer in
accordance with 45 CFR 155.220(c)(3)(i)(G). Please note that this disclaimer was revised by CMS in
October 2016\(^{26}\) to also address situations where web-brokers offer consumers assistance with other
coverage options (e.g., off-Marketplace plans). This disclaimer has been further revised to align with
updates to 45 CFR 155.220(c)(3)(i)(A).\(^{27}\) The disclaimer must read:\(^{28}\)

“Attention: This website is operated by [Name of Company] and is not the Health Insurance
Marketplace\(^{\circ}\) website. In offering this website, [Name of Company] is required to comply with all
applicable Federal law, including the standards established under 45 CFR 155.220(c) and (d) and
standards established under 45 CFR 155.260 to protect the privacy and security of personally
identifiable information. This website may not support enrollment in all Qualified Health Plans
(QHPs) being offered in your state through the Health Insurance Marketplace\(^{\circ}\) website. For enrollment
support in all available QHP options in your state, go to the Health Insurance Marketplace\(^{\circ}\) website at
HealthCare.gov.

Also, you should visit the Health Insurance Marketplace\(^{\circ}\) website at HealthCare.gov if:

- You want to select a catastrophic health plan. (This only needs to be included if the web-
broker does not offer catastrophic plans.)
- You want to enroll members of your household in separate QHPs. (This only needs to be
  included if the web-broker does not allow multiple enrollment groups for its classic DE
  pathway; note that EDE Entities are required to support multiple enrollment groups.)
- You want to enroll members of your household in dental coverage. [The plans offered here do
  not offer pediatric dental coverage and you want to choose a QHP offered by a different issuer
  that covers pediatric dental services or a separate dental plan with pediatric coverage.] (This
  only needs to be included if the web-broker does not offer assistance with enrollment in
  adult dental coverage or pediatric dental coverage.)

[Name of web-broker’s website] offers the opportunity to enroll in either QHPs or off-Marketplace
coverage. Please visit HealthCare.gov for information on the benefits of enrolling in a QHP. Off-
Marketplace coverage is not eligible for the cost savings offered for coverage through the
Marketplaces. (This final paragraph must be displayed if the web-broker offers consumers
assistance with off-Marketplace coverage options.)”

The web-broker DE Entity must observe the following requirements for displaying the General non-
FFE Disclaimer:

\(^{26}\) See https://www.cms.gov/CCIIO/Programs-and-Initiatives/Health-Insurance-Marketplaces/Downloads/Guidance-Web-
brokers-FFMs.pdf.
\(^{27}\) See 87 FR 27208 at 27258, 86 FR 24140 at 24208, and Web-broker Website Display Bulletin (August 17, 2021) available
\(^{28}\) The portion of the disclaimer related to pediatric dental coverage, indicated in brackets, is not required; CMS encourages a
web-broker that does not offer pediatric dental coverage to display this piece of the disclaimer. The portion of
the disclaimer text in bold should not be displayed but rather is intended to indicate when the web-broker should display the
corresponding disclaimer text.
FFE Enrollment

- The Disclaimer must be prominently displayed on both the initial QI landing page and on the landing page displaying QHP options that appear before the applicant makes a decision to purchase coverage (QHP selection page).
- The Disclaimer must use the exact language provided by HHS.
- The Disclaimer must include a functioning web link to the Health Insurance Marketplace® website (HealthCare.gov).

CMS requires all disclaimers and help text, including the web-broker General non-FFE and Enrollment Support Disclaimers, to be “prominently displayed.” CMS considers the disclaimers to be prominently displayed if they are displayed consistent with the guidelines outlined in Section 4.4.1, QHP Issuer DE Entities.

Web-broker DE Entities may change the font color, size, or graphic context of the disclaimer to ensure that it is noticeable to the applicant in the context of the website. However, the exact language of the General non-FFE Disclaimer and the Enrollment Support Disclaimers must be used.

CMS expects that web-broker DE Entities prominently display language explaining to QIs that the web-broker has entered into an Agreement(s) with the FFE and has agreed to conform to the website display and security standards in 45 CFR 155.220(c)(3) and 155.260. In addition, consistent with 45 CFR 155.220(j)(2)(i), web-brokers and other A/Bs may not use “Marketplace” or “Exchange” or other words in the name of their businesses or websites if doing so could mislead a QI into believing they are visiting HealthCare.gov. Consistent with the obligation to provide QIs with correct information under 45 CFR 155.220(j)(2)(i), web-brokers registered with the FFE must also advise QIs that APTC and CSR apply only to QHPs offered through the FFE.

CMS expects that web-broker DE Entities will clearly distinguish between QHPs for which the QI is eligible and QHPs for which the QI may not be eligible. For example, the display of child-only plans should be limited to QIs eligible for such coverage (e.g., individuals under the age of 21) to avoid confusion.

45 CFR 155.220(c)(3)(i)(L) prohibits web-broker DE Entity websites from displaying QHP advertisements or recommendations, or otherwise providing favored or preferred placement in the display of QHPs, based on compensation an agent, broker, or web-broker receives from QHP issuers. Web-broker DE Entities may offer filtering capabilities or decision support tools that the QI or A/B assisting the QI can use to navigate or refine the display of QHPs consistent with CMS guidance. If a web-broker DE Entity offers the QI or A/B assisting the QI the use of additional sort functionality to alter the order of the QHPs listed, regardless of how the QI or A/B assisting the QI chooses to sort the QHPs (e.g., lowest monthly premium, lowest deductible), the web-broker DE Entity website must still provide QIs or A/Bs assisting QIs the ability to view all QHPs offered through the FFE in compliance with 45 CFR 155.220(c)(3)(i)(B). A web-broker DE Entity may also allow the QI or A/B assisting the QI to apply filters to the QHPs listed (e.g., metal level, provider network, issuer). In this case, web-broker DE Entities must ensure that if the QI or A/B assisting the QI were to select all of the available options for a certain filter (e.g., all available metal levels), the total number of plans displayed would remain consistent with the number of QHPs offered through the FFE that satisfy the selection criteria. In addition, if a QI or A/B assisting a QI selects a certain filter (e.g., Bronze metal level), the web-

broker DE Entity website must display all QHPs offered through the FFE that satisfy that filter’s description.

CMS expects that the web-broker DE Entity will display language explaining to the QI the specific source and nature of web-broker compensation and that compensation does not affect the display of QHP options or premiums charged. Web-broker DE Entities must offer a QHP plan selection experience that is free from advertisements or information for other health insurance-related products and sponsored links advertising health insurance-related products (e.g., an advertisement for a QHP issuer or a QHP). Once a QI has completed the QHP selection and enrollment, the web-broker DE Entity may offer the QI or A/B assisting the QI the ability to search for additional products or services if desired. Such offers must be made in a section of the web-broker DE Entity website that is separate from the QHP display and plan selection.

CMS generally expects that QIs are not charged a separate transaction or service fee for shopping or enrolling in a QHP through a web-broker DE Entity website. CMS recognizes that web-broker DE Entities may have invested significant resources to develop special software to assist QIs with selection and enrollment in QHPs offered through the FFE, and some independent A/Bs may leverage those websites to facilitate QHP selection and enrollment. CMS believes that in these limited circumstances, where there is a bona fide service of value that goes beyond the traditional assistance provided by an A/B registered with the FFE, it may be appropriate to allow for the collection of an additional fee. However, any practice of collecting such fees from QIs for providing assistance with QHP selection and enrollment through the FFE would be subject to applicable state law. If permitted under state law, A/Bs and web-brokers that elect to pass on these types of costs to QIs for selecting and submitting QHP applications offered through the FFE through a non-FFE website should provide a disclaimer to QIs that: 1) clearly discloses the amount and reason for the fee, and 2) informs the QI that they can apply through the FFE website (HealthCare.gov) at no cost.

A web-broker DE Entity can allow other A/Bs to use its website to enroll QIs, employers, and employees in a QHP through the FFE by entering into a contractual or other arrangement. The A/B accessing the web-broker DE Entity website pursuant to the arrangement should be listed as the agent of record on the enrollment. The web-broker DE Entity must verify that any other A/B accessing its website is licensed by the applicable state(s) and completed FFE registration for the current plan year (including completion of applicable training and execution of applicable Agreements with the FFE). A web-broker DE Entity that allows another A/B registered with the FFE to use the web-broker’s website must, as mandated by 45 CFR 155.220(c)(4)(i)(C), ensure that the web-broker’s name and National Producer Number (NPN) are prominently displayed:

- On every page of the website, even if the A/B registered with the FFE accessing the web-broker DE Entity website is able to customize the appearance of the website.
- On the cover or first page of all written materials containing QHP information that can be printed directly from the website. This includes all files containing QHP information that can be downloaded directly from or viewed directly on the website. Documents linked to or from the site that a separate entity maintains are not included in this definition.

---

30 45 CFR 155.220(c)(3)(i)(M) and 155.221(b)(3)
31 45 CFR 155.221(b)(1)
32 45 CFR 155.220(c)(4)
33 45 CFR 155.220(c)(4)(i)(B)
CMS considers this information to be prominently displayed if it is displayed consistent with the guidelines outlined in Section 4.4.1, QHP Issuer DE Entities.

The web-broker DE Entity must terminate an A/B’s access to its website if CMS determines that the A/B is in violation of any applicable FFE requirements. In addition, web-broker DE Entities must report to HHS and applicable state regulators any potential material breach of the A/B FFE requirements, including the privacy and security standards under 45 CFR 155.260(b) by the A/B accessing its website, should the web-broker become aware of any such potential breach.

4.4.2.1 Standardized Plan Display Requirements for Web-Broker DE Entities

Beginning with the Plan Year 2024 OEP, CMS will enforce the requirement that web-broker DE Entities differentially display all standardized plan options in a manner consistent with that adopted by HHS for display on the FFE website and with standards defined by HHS, unless HHS approves a deviation, as set forth in 45 CFR 155.220(c)(3)(i)(H). Web-brokers DE Entity websites that are used to complete the QHP selection must adhere to the following display requirements for all plan display pages (including plan compare and plan details pages, as applicable) on any approved consumer-facing or A/B-facing DE environments maintained:

- Display the label “Easy pricing” for all standardized plan options (“Precios fáciles” in Spanish)
- Display a price tag icon accompanying each “Easy pricing” label
- Provide a filter option for “Easy pricing” plans
- Display help text describing the plans
- Display a label and educational text in Spanish where applicable

Web-broker DE Entities must adopt the same help text and follow the same guidance for display that applies to QHP Issuer DE Entities. Refer to Section 4.4.1.1, Standardized Plan Display Requirements for QHP Issuer DE Entities, for details on the standardized plan options help text that must be displayed and for information on how to identify standardized plan options through the MAPI or PUF.

To request a deviation in the display of standardized plan options, web-brokers DE Entities must email the DE Help Desk. CMS may request additional documentation to assess requested deviations.

4.5 Mandatory Display Language for Consumers that Attest to a Health Reimbursement Arrangement Offer

DE Entities assisting QIs with enrollment must be aware that some QIs may need to attest to a Health Reimbursement Arrangement (HRA) offer when completing the eligibility application. The Fetch Eligibility API and Standalone Eligibility Services (SES) API responses will indicate when a QI attests to an HRA offer and will indicate if the FFE has determined affordability for the offer. The HRA offer, and whether the offer is accepted, and the HRA’s affordability may impact an applicant’s eligibility for a QHP or a QI’s eligibility for APTC. Accordingly, DE Entities are required to display specific language to QIs with an HRA offer, depending on the type and affordability of the HRA offered to the QI. The FFE DE API for Web-Brokers/Issuers Technical Specifications available on CMSzONE at

35 45 CFR 155.220(c)(4)(ii)(E)
36 87 FR 27208, 27310–27322
FFE Enrollment

https://zone.cms.gov/document/direct-enrollment-de-documents-and-materials outlines the required language that DE Entities must display for various scenarios.

4.6 Mandatory Attestations

DE Entities using their own websites, and any A/Bs using a DE Entity website, to enroll individuals into QHPs in a manner considered to be through the FFE are required to collect attestations for those households receiving APTC as set forth in 45 CFR 156.1230(a)(1)(v) (applicable to QHP issuers’ websites) and 45 CFR 155.220(c)(3)(i)(J) (applicable to web-brokers’ websites and A/B users of a web-broker’s website). The FFE will identify the expected tax filers for the coverage year from each tax household and the DE Entity, or the A/B using the DE Entity’s website, must collect and retain an attestation from each tax filer. For each household identified as needing an attestation, the following language should be used:

- Advance payments of the premium tax credit (APTC) attestation.
- Review the statements below for [tax filer(s) – household 1] (in a DE Consumer flow, this attestation should be displayed to the consumer in the DE Entity’s User Interface (UI), whereas in an A/B flow, the A/B should verbally review the attestation with the consumer).
- I understand that because APTC will be paid on my behalf to reduce the cost of health insurance coverage for myself and/or my dependents.
- I must file a Federal income tax return in [coverage year +1] for the tax year [coverage year].
- If I am married at the end of [coverage year], I must file a joint income tax return with my spouse, unless an exception applies.
- I also expect that no one else will be able to claim me as a dependent on their [coverage year] Federal income tax return.
- I will claim a personal exemption deduction on my [coverage year] Federal income tax return for any individual listed on this application as a dependent who is enrolled in coverage through this Marketplace and whose premium for coverage is paid in whole or in part by APTC for which I am the applicable tax filer.
- If any of the above changes, I understand that it may impact my ability to get the premium tax credit (PTC).
- I also understand that when I file my [coverage year] Federal income tax return, the Internal Revenue Service (IRS) will compare eligibility information for [coverage year] to what I reported on my Marketplace application, including the household income on my tax return with the household income on my application. I understand changes in eligibility information could affect eligibility for the PTC. For example, if the household income on my tax return is lower than the amount of expected household income on my application, I may be eligible to get an additional PTC amount. On the other hand, if the income on my tax return is higher than the amount of income on my application, I may owe additional Federal income tax.

Click Agree or Disagree.

[Tax filer’s signature(s)]
[Name of Tax Filer(s)]

Upon sending the enrollment transaction to the FFE, DE Entities indicate the amount of APTC the household has selected and confirm that the tax filer has attested to the language above.
FFE Enrollment

Additionally, the DE Entity, or the A/B using the DE Entity’s website, must maintain attestations for a minimum of 10 years.37

37 45 CFR 155.220(c)(3)(i)(E) and 156.705(c)
FFE Enrollment

5. SPECIAL ENROLLMENT PERIODS (APPLICABLE TO THE INDIVIDUAL MARKET FFE, QHPS/QDPs)

5.1 Introduction

Pursuant to 45 CFR 155.410(a)(2), and 45 CFR 155.420, Special Enrollment Periods (SEPs) allow a qualified individual (QI) or enrollee who experiences certain qualifying events to enroll in, or change enrollment in, a Qualified Health Plan (QHP) through the Exchange outside of the annual Open Enrollment Periods (OEPs).

Exchanges must adhere to the parameters for SEPs defined at 45 CFR 155.420.

This section provides an overview of events that trigger SEPs and details about how the Federally-facilitated Exchange (FFE) administers them. Information on the applicability of binder payments rules is available in Section 6.1, Effectuation of Prospective Coverage Under Regular Coverage Effective Dates and Special Effective Dates.

5.2 SEP Pre-enrollment Verification

The FFE generally conducts pre-enrollment verification of newly enrolling individuals’ SEP eligibility. SEP verification is intended to promote program integrity and continuous coverage, protect the risk pool, and stabilize rates. The preamble of the 2017 Market Stabilization Rule provided State-based Exchanges (SBEs) with flexibility to determine whether and how to implement SEP pre-enrollment verification. 38

The 2023 Notice of Benefit and Payment Parameters scaled back pre-enrollment SEP verification in the FFE to include only the SEP for loss of minimum essential coverage (MEC)—the SEP type that comprises the majority of all SEP enrollments through the FFE. 39 It also clarified that SBEs maintain flexibility to verify eligibility for any SEP types and that Exchanges may provide an exception for SEP verification for special circumstances that impact consumers or the Marketplace, such as natural disasters or a public health emergency.

SEP verification does not impact the individual’s Exchange-generated effective date, which is typically determined by the SEP triggering event and the date the individual selects a QHP (see Section 5.6, SEP Triggering Events and Coverage Effective Dates, for more information on SEP triggering events and coverage effective dates). However, pursuant to 45 CFR 155.400(e)(1)(iii), as with other retroactive effective dates, if a consumer only pays a premium for one month of coverage, only prospective coverage should be effectuated, in accordance with regular effective dates.

Individuals subject to SEP verification have their enrollment pended until the FFE completes verification of SEP eligibility either through automated electronic means or based on documentation that the individual submits. The requirement to verify SEP eligibility is referred to as an SEP verification issue (SVI). 40 If the FFE cannot automatically verify an individual’s SEP eligibility, then the individual must submit documentation within 30 calendar days of plan selection in order to verify

39 Patient Protection and Affordable Care Act; HHS Notice of Benefit and Payment Parameters for 2023 (87 Fed. Reg. 27208, 27277) (May 6, 2022)
FFE Enrollment

eligibility. Once an individual’s SEP eligibility has been verified, the FFE will release their enrollment information to the relevant issuer. SEP verification only applies to the loss of MEC SEP type.

5.3 Plan Category Limitations for SEPs

Under some SEPs, consumers may be limited in their ability to change plans during the benefit year. This plan category limitations (PCL) policy is codified in regulation at 45 CFR 155.420(a)(3) and (4). It applies to enrollees in Exchange coverage, but not to those enrolled in individual market coverage off-Exchange. The FFE initially implemented PCL in February 2019; implementation timelines in SBEs may vary. Direct Enrollment (DE) partners that process enrollments through SEPs must implement functionality to ensure enrollees subject to PCL can only see plans for which they are eligible, and those requirements can be found in the DE Application Programming Interface (API) specifications at https://zone.cms.gov/document/direct-enrollment-de-documents-and-materials.

5.4 PCL Background

Health plans sold in the Exchange are divided into categories: Bronze, Silver, Gold, and Platinum. They range from Bronze plans, which have lower premiums and higher out-of-pocket costs, to Platinum plans, which have higher premiums and lower out-of-pocket costs. Catastrophic plans, which have lower monthly premiums and higher out-of-pocket costs, and which are not eligible for premium tax credit (PTC), may also be available to people under age 30 and people who qualify for hardship or affordability exemptions.

Under PCL, enrollees who qualify for most SEP types and want to change plans during the year will have a limited number of plan categories to choose from. This means if an enrollee wants to change plans during an SEP for which they qualify, they may need to select a new plan within the same plan category as their current plan or wait until the next OEP if they want to change to a plan in a different category. Exceptions to this rule include:

- If an enrollee or their dependent(s) becomes newly eligible for cost-sharing reduction (CSR) and is not already enrolled in a Silver plan, that enrollee and their dependents can choose a plan in the Silver category to use their CSR.
- If an enrollee or their dependent(s) becomes newly ineligible for CSR and is enrolled in a Silver-level QHP, that enrollee and their dependents can change to a QHP one metal level higher or lower, if they want to change their QHP enrollment.
- Beginning with the 2022 plan year, if an enrollee or their enrolled dependent(s) is advance payments of the premium tax credit (APTC)-eligible and has an attested household income at or below 150 percent of the Federal Poverty Level (FPL), they may change to any available Silver plan if they want to change their QHP enrollment. Alternatively, if a consumer is APTC-eligible and has an attested household income at or below 150 percent of the FPL, is not an enrollee, and has one or more household dependents who are QHP enrollees, the Exchange must allow the enrollee to add the newly enrolling household member to their current plan, enroll with their household member in any available Silver-level plan, or enroll the newly enrolling household member in a separate plan of any metal level.
- No later than January 2024, Exchanges must allow an enrollee or their dependent(s) who becomes newly ineligible for APTC to change to a plan of any category.
- If an enrollee gains a dependent due to marriage, birth, adoption, foster care, or court order or has a dependent who qualifies for an SEP for which the enrollee does not also qualify, they can
add the new dependent to their current plan or, if the QHP's business rules do not allow the dependent to enroll, the enrollee and their dependents can change to another QHP within the same level of coverage (or one metal level higher or lower, if no such QHP is available). Alternatively, they can enroll the new dependent in a plan of any plan category. To enroll the new dependent in a plan of any plan category, the enrollee must create a separate enrollment group for their dependent before proceeding to Plan Compare to view all plans available to the new dependent.

- If a QI who is not an enrollee qualifies for an SEP and has one or more dependents who are enrollees who do not also qualify for an SEP, the newly enrolling QI can be added to the dependent's current QHP; or, if the QHP's business rules do not allow the QI to enroll in the dependent's current QHP, to enroll with the dependent in another QHP within the same level of coverage (or one metal level higher or lower, if no such QHP is available). Alternatively, the QI can enroll in a separate QHP.

Finally, certain SEPs are exempted from PCL and permit qualifying enrollees to change to a plan of any plan category. For more details about PCL rules by SEP type, see Exhibit 13.

5.5 Availability and Length of SEPs

The FFE determines whether an individual is eligible for an SEP based on a qualifying event described in 45 CFR 155.420(d). Pursuant to 45 CFR 155.420(c), unless otherwise stated, SEPs in the FFE and other Exchange individual markets generally last 60 days from the date of the triggering event. Exceptions to the 60-day availability period include:

- Certain SEPs for which the FFE may define the length of the SEP based on the circumstances, such as SEPs related to enrollment errors, exceptional circumstances, and misrepresentation. The SEPs for these situations may last less than 60 days, depending on the specific situation, but will not last for longer than 60 days.

- Cases in which a QI did not receive timely notice of a triggering event and was otherwise reasonably unaware that a triggering event occurred, in which case the Exchange will provide the QI with 60 days from the date they knew, or reasonably should have known of the triggering event to enroll in a QHP.

- Beginning January 1, 2024, Exchanges will have the option to provide QIs or their dependent(s) losing Medicaid or CHIP coverage with 60 days before and 90 days after their loss of Medicaid or CHIP coverage to report a qualifying event and select a QHP. SBEs that operate their own eligibility and enrollment platforms have additional flexibility to implement this option before January 1, 2024, if they so choose, and may provide a longer SEP window for Medicaid or CHIP coverage losses, up to the number of days provided for the applicable Medicaid or CHIP reconsideration period.

In addition, the FFE offers advanced availability of the SEP for loss of MEC for QIs or their dependents, so these individuals have up to 60 days before and up to 60 days after the loss of coverage to report a qualifying event and select a QHP. The FFE also offers advanced availability of the SEP for QIs or their dependents who newly gain access to an individual coverage Health Reimbursement

41 See 45 CFR 155.420(c)(3). In the case of QIs/enrollees eligible for an SEP based on criteria in 45 CFR 155.420(d)(4), (d)(5), or (d)(9), the Exchange may define the length of the SEP “as appropriate based on the circumstances of the SEP, but in no event shall the length of the SEP exceed 60 days.”
FFE Enrollment

Arrangement (HRA) (sometimes referred to as an ICHRA) or are newly provided a qualified small employer Health Reimbursement Arrangement (QSEHRA). Individuals eligible for this individual coverage HRA/QSEHRA SEP have 60 days before the triggering event to select a QHP, unless the individual coverage HRA or QSEHRA was not required to provide the notice setting forth its terms to such enrollee at least 90 days before the beginning of the plan year, in which case the QI or their dependent has 60 days before or after the triggering event to select a QHP. A QI or their dependent who is enrolled in COBRA continuation coverage (including state “mini-COBRA” coverage) with employer contribution or government subsidies, and the contribution or subsidies completely cease, also can enroll in a QHP up to 60 days before the last day of the period for which COBRA continuation coverage is paid for or subsidized, in whole or in part, by an employer or government entity.

Exchanges have the option to offer advanced availability to QIs and enrollees who qualify for an SEP due to a permanent move, become newly eligible for premium tax credits (PTCs) as a result of a move or increase in income above 100 percent FPL after having been ineligible for Medicaid because they were living in a non-Medicaid expansion state, or become newly eligible for QHP coverage due to a change in immigration status or a release from incarceration; however, the FFE does not currently offer advanced availability for these SEPs.

5.6 SEP Triggering Events and Coverage Effective Dates

Individuals may qualify for an SEP under 45 CFR 155.420(d) based on certain triggering events. Certain SEPs are available to all QIs who experience a triggering event, while others are only available to current enrollees, or individuals who previously had MEC. Most triggering events apply to all individual (FFE and SBE) Exchanges; however, in some cases, triggering events are at the option of the Exchange, and therefore may not be operationalized outside of the FFE. See Exhibit 13 for a description of the applicability of each SEP.

In some circumstances, an individual may not be aware that an SEP triggering event has occurred until after it happens. Pursuant to 45 CFR 155.420(c)(5), the Exchange will provide such individuals 60 days from the date they knew, or reasonably should have known, of the triggering event to enroll in a QHP. In order to take advantage of this provision, the individual must have been reasonably unaware that a triggering event occurred.

Coverage effective dates for individuals who enroll through an SEP are established in 45 CFR 155.420(b) and apply to SEPs offered in individual Exchanges.

The FFE has established a deadline of March 31 each year for submission of new requests for an SEP that would enable consumers to enroll in a QHP with effective dates for the prior coverage year. After March 31 of each year, new FFE SEP requests eligible for a retroactive effective date will be given a coverage effective date no earlier than January 1 of the current year, with the exception of the SEPs described at 45 CFR 155.420(d)(4), (d)(9), and (d)(11). For example, if a consumer submits an SEP request on April 7 that would otherwise entitle the consumer to enroll in prior year coverage, the applicant will be granted an effective date of January 1. This guidance does not apply to eligibility appeals and does not impact a consumer’s right to request an appeal of their eligibility determination in accordance with 45 CFR 155.505(b).
FFE Enrollment

5.6.1 Coverage Effective Dates

Pursuant to 45 CFR 155.420(b)(2)(i), for a QI who gains a dependent or becomes a dependent through birth, adoption, placement for adoption, or placement in foster care, or through a child support order or other court order, an Exchange must offer coverage retroactive to the date of birth, adoption, placement for adoption or in foster care, or the date of the child support or other court order. QIs may also elect a later coverage effective date (the first of the month following plan selection in accordance with paragraph (b)(3)(i)) by calling the Marketplace Call Center.

Pursuant to 45 CFR 155.420(b)(2)(iii), for certain SEP triggering events, an Exchange may provide for a coverage effective date that is appropriate based on the circumstances of the SEP. For example, when individuals or enrollees have experienced an Exchange error that impacts their enrollment or non-enrollment in coverage (per 45 CFR 155.420(d)(4)), they will be given the option for a retroactive coverage effective date back to their initially intended coverage effective date, absent the error.

45 CFR 155.420(b)(2)(iv) provides that certain SEPs offer accelerated coverage effective dates, which is the date of the first day of the month following the triggering event, if the plan selection is made on or before the date of the triggering event, regardless of whether plan selection takes place in the first or second half of the month. If plan selection is made after the date of the triggering event, the Exchange has the option to provide regular effective dates per 45 CFR 155.420(b)(1) and (3)(i), or to provide that coverage take effect the first of the month following plan selection (see Exhibit 13 for more detail on which rule applies in the FFE based on triggering event). For example, individuals or enrollees who qualify for an SEP due to a loss of MEC (per 45 CFR 155.420(d)(1) or (d)(6)(iii)) or who are enrolled in COBRA continuation coverage to which an employer or government entity is contributing and the contributions completely cease (per 45 CFR 155.420(d)(15)) may be eligible to enroll in coverage with an accelerated coverage effective date. 45 CFR 155.420(b)(2)(vi) applies to the SEP for individuals who newly gain access to an individual coverage HRA or to a QSEHRA, and provides for a similar accelerated coverage effective date rule to what is provided at (b)(2)(iv), but specifies that if the plan selection is made before the day of the triggering event, coverage is effective on the first day of the month following the date of the triggering event or, if the triggering event is on the first day of a month, on the date of the triggering event. If the plan selection is made on or after the day of the triggering event, coverage is effective on the first day of the month following plan selection. Unless otherwise noted, consistent with 45 CFR 155.420(b)(3)(i), all SEPs within the FFE follow accelerated coverage effective dates for enrollment so that QHP coverage is effective on the first of the month immediately following plan selection.

As finalized in the 2024 Notice of Benefits and Payment Parameters final rule,42 in addition to the current coverage effective date rules at 45 CFR 155.420(b)(2)(iv), Exchanges also have the option to offer earlier coverage effective dates for consumers attesting to a future loss of MEC. Specifically, for future coverage losses at 45 CFR 155.420(d)(1), (d)(6)(iii), or (d)(15), if a consumer selects a plan on or before the last day of the month preceding their loss of coverage, an Exchange must ensure that the coverage effective date is the first of the month in which the triggering event occurs.

Pursuant to 45 CFR 155.420(b)(5), in circumstances in which a QI was reasonably unaware that an SEP triggering event occurred (see Section 5.6, SEP Triggering Events and Coverage Effective Dates), the Exchange will provide the individual 60 days from the date they knew, or reasonably

---

42 88 FR 25740
FFE Enrollment

should have known, about the SEP triggering event to enroll in a QHP and will provide them with the earliest effective date that would have otherwise been available to them.

Exhibit 13 summarizes the six categories of SEP triggering events from 45 CFR 155.420(d) as well as coverage effective dates for each SEP. It also includes information on:

- Whether the SEP is subject to pre-enrollment verification (SEP-V),
- Whether the SEP is subject to PCL, and if so, what the specific limitation for the existing enrollee is,
- The applicability of the SEP to other Exchanges,
- How QIs can access the SEP (i.e., through the FFE application or through the Marketplace Call Center), and
- SEP enrollment codes.
### Exhibit 13: SEP Triggering Events and Coverage Effective Dates Summary

| Loss of qualifying health coverage | (d)(1)(i-iv) – Loss of MEC  *
** New Enrollees Subject to SEP-V  **(d)(1)(ii) – The end of the plan year for any non-calendar year group health coverage  *** Existing enrollees will generally be limited to plan options within their current plan category. | A QI or their dependent loses MEC, including but not limited to Medicaid, Children’s Health Insurance Program (CHIP), or qualifying employer sponsored coverage. For purposes of qualifying for this SEP, this includes:  ● The end of the plan year for any non-calendar year group health plan or individual health insurance coverage, including a non-calendar year individual coverage HRA or a QSEHRA.  ● Losing pregnancy-related coverage described under Section 1902(a)(10)(A)(i)(IV) and (a)(10)(A)(ii)(IX) of the Social Security Act or access to healthcare services through coverage provided to a pregnant woman’s unborn child.  ● Losing medically needy coverage described under Section 1902(a)(10)(C) of the Social Security Act only once per calendar year.  
**NOTE:** This does not include QIs who have lost their coverage due to nonpayment of premiums, voluntary termination, or as a result of an act of fraud by the QI (or other acts that would qualify for rescission) (per 45 CFR 155.420(e)). | 07 | Application |

**Coverage Effective Dates:**

- Plan selection after Loss of MEC: First of the month after plan selection
- Plan selection prior to or on the date of the Loss of MEC: First of the month following the loss of MEC
- Plan selection on or before last day of the month before Loss of MEC: First of the month in which loss of MEC occurs

**NOTE:** This is at the option of an Exchange and only for consumers reporting a future loss of MEC.

<td>Other qualifying changes</td>
<td>(d)(9) – Experience an exceptional circumstance</td>
<td>A QI’s, enrollee’s, or their dependent’s enrollment or non-enrollment in a QHP is the result of an exceptional circumstance, as determined by the Secretary of HHS, including being incapacitated or experiencing a natural disaster. The enrollment or non-enrollment of a QI, enrollee, or their dependent in a QHP is the result of an unforeseen event or reflects a first-time requirement for Exchange enrollees. The enrollment or non-enrollment of a QI, enrollee, or their dependent in a QHP is the result of a significant life event resulting in lack of access to their application or account and the individual, enrollee, or dependent has experienced a change in situation or status that now requires that the individual obtain MEC. This also includes AmeriCorps servicemembers who are starting or ending their service. In rare cases, CMS may consider and provide an SEP on a case-by-case basis when the enrollment in a QHP in which an unintentional network error or network correction may have occurred and the consumers made a plan selection based on information that was grossly inaccurate. <strong>Coverage Effective Dates:</strong> Vary based on circumstances.</td>
<td>EX</td>

◊ Per 45 CFR 155.420(c)(2), an Exchange has the option of offering the Permanent Move SEP to eligible consumers 60 days before the trigger event. This option is not available through the FFE at this time.

*Per 45 CFR 155.420(b)(2)(i), the Exchange is required to ensure that coverage is effective for a QI or enrollee on the date of birth, adoption, placement for adoption, placement in foster care, or effective date of the child support order or other court order. However, QIs may also call the Marketplace Call Center to alternatively elect a coverage effective date for the first of the month following plan selection following accelerated coverage effective rules.

†Per 45 CFR 155.420(c)(2), QIs eligible for loss of coverage SEPs have up to 60 days before or up to 60 days after the triggering event to select a QHP.
**This SEP applies to individuals who applied for coverage during the OEP or due to a qualifying event and then were determined ineligible for Medicaid or CHIP outside of the enrollment period during which they applied.**

**NOTE:** For individuals who are eligible for this SEP, the Exchange must ensure that coverage is effective on an appropriate date based on the circumstances of the SEP. These individuals generally can request a retroactive coverage effective date back to the coverage effective date they would have received if the FFE had originally determined them eligible for QHP coverage.

**NOTE:** In the FFE, SEPs currently following regular effective date rules are now effective on the first of the month following plan selection.

### 5.7 SEPs Accessed Outside of the Application Process

The Exchange grants most SEPs through application questions or internal logic on the application. However, there are certain SEPs that eligible individuals generally must access through the Marketplace Call Center and, in some cases, by then having their information reviewed by a CMS Caseworker. These include:

- Error of the Exchange or Misrepresentation in Enrollment Process SEP (granted under 45 CFR 155.420(d)(4))
- Experience a Plan or Contract Violation (granted under 45 CFR 155.420(d)(5))
- Material error related to plan benefits, service area, or premium (granted under 45 CFR 155.420(d)(12))
- Exceptional circumstance SEPs (granted under 45 CFR 155.420(d)(9))
- Victim of domestic abuse or spousal abandonment (granted under 45 CFR 155.420(d)(10))

Some of these SEPs, such as the Error of the Exchange and Exceptional Circumstance SEPs, can be granted when QIs have not yet enrolled in a QHP, while others, such as material errors or some misrepresentation SEPs, may be granted after an enrollment has been effectuated.

Individuals seeking one of these SEPs will need to call the Marketplace Call Center and explain their situation. Call center representatives may be able to determine whether an individual is eligible for an SEP, but in many situations, they forward cases to CMS Caseworkers to determine the individual’s eligibility for an SEP. If the SEP is granted and a new enrollment is processed, a record is assigned to the issuer through the Health Insurance Casework System (HICS) directing the issuer to change the coverage effective date, if applicable.

To terminate prior coverage on a date that will align with the new coverage effective date, the issuer will need to honor an enrollee’s request to terminate their prior coverage the day before the new QHP’s coverage effective date, pursuant to 45 CFR 155.430(d)(6).

### 5.8 Exceptional Circumstances SEPs

Exceptional circumstances SEPs authorized by 45 CFR 155.420(d)(9) are generally reviewed on a case-by-case basis. However, CMS identified some specific cases and parameters for which an Exceptional Circumstances SEP is available.

**NOTE:** Typically, CMS does not consider provider network changes to fall under current SEP authority at 45 CFR 155.420(d)(4) for Errors of the Exchange or SEP authority for plan display errors...
FFE Enrollment

at 45 CFR 155.420(d)(12). However, in certain extreme cases in which an unintentional network error or network correction occurred and consumers made a plan selection based on information that was grossly inaccurate (e.g., multiple providers and/or hospitals erroneously listed as in-network), CMS may consider that the affected consumers experienced an exceptional circumstance authorized by 45 CFR 155.420(d)(9) and provide an SEP on a case-by-case basis.

5.8.1 SEP for QIs Affected by Emergencies and Major Disasters

Typically, individuals have 60 days from the date of an SEP qualifying event to enroll in a QHP. However, if an individual or their dependents are affected by an emergency or major disaster that is recognized with a formal declaration from the Federal Emergency Management Agency (FEMA) and that emergency or major disaster prevents the individual or their dependents from enrolling within 60 days of the qualifying event, or from enrolling during the OEP, the individual and their dependents will be eligible for an Exceptional Circumstances SEP under 45 CFR 155.420(d)(9) that allows them to complete their Exchange enrollment.

Individuals will be considered “affected by a FEMA-declared emergency or major disaster” and eligible for an Exceptional Circumstances SEP under 45 CFR 155.420(d)(9) if they were unable to enroll during an enrollment period for which they were eligible for, that is, either the OEP or an SEP, due to a FEMA-declared emergency or disaster. To demonstrate this, individuals are required to attest that they meet the following eligibility requirements: 1) they resided in any of the counties eligible to apply for individual assistance or public assistance by FEMA either during the FEMA-designated incident period of the emergency or major disaster or at the time of application for enrollment, and 2) they were affected by the emergency or disaster and that it prevented them from completing enrollment.

FEMA-emergency affected individuals have up to 60 days from the end of the FEMA-designated incident period to select a new QHP through the FFE or make changes to their existing QHP enrollment. FEMA-emergency affected individuals can choose to have their coverage start prospectively, pursuant to accelerated effective date rules under 45 CFR 155.420(b)(3)(i), or can request an effective date that would have been applied if they had selected a plan during their original enrollment opportunity. Finally, coverage effective date rules vary based on the date of plan selection and the qualifying event for the enrollment opportunity.

For example, Mary Smith’s employer-sponsored health insurance coverage ended on June 1. Because Mary lost MEC, Mary qualifies for an SEP under 45 CFR 155.420(d)(1)(i) and has 60 days from the loss of MEC, through July 31, to select a QHP. However, Mary was unable to complete an FFE application and QHP selection by July 31 because a severe tropical storm flooded the ground floor of Mary’s home in Mobile County, Alabama (AL). Mary stayed with relatives in nearby Clark County for several days until the flood waters receded, and then spent the next several weeks cleaning up the damage.

On July 7, FEMA announced a Major Disaster Declaration related to the storm and flooding, with an incident period of June 20–22. FEMA designated several AL counties, including Mobile, as eligible to apply for public assistance. As such, even though Mary’s SEP for loss of MEC has expired, Mary is now eligible for an Exceptional Circumstances SEP under 45 CFR 155.420(d)(9) and may apply for

and select FFE coverage through August 21 (60 days from June 22). If Mary selects a QHP between August 1 and August 15, Mary will be eligible to start coverage prospectively (on September 1, per accelerated effective date rules) or in the past (on July 1 or August 1—effective dates that would have been available if Mary had chosen a plan during the loss of MEC SEP window but after June 20, the FEMA incident start date). Additionally, if Mary selects a plan under this Exceptional Circumstances SEP between August 16 and August 21, Mary will be eligible to start retroactive coverage on July 1 or August 1 (effective dates that would have been available if Mary had chosen a plan during the loss of MEC SEP window, but after June 20, the FEMA incident start date), or choose to start coverage in the future, on September 1, per accelerated effective date rules.

Exhibit 15 provides additional samples of qualifying events and coverage dates for FEMA-emergency affected individuals.

*NOTE: Per 45 CFR 155.420(b)(2)(i), the Exchange is required to ensure that coverage is effective for a QI on the date of birth, adoption, placement for adoption, placement in foster care, or effective date of the child support order or other court order. However, QI may also call the Marketplace Call Center to alternatively elect a coverage effective date for the first of the month following plan selection or following regular coverage effective rules.

**NOTE: In the FFE, SEPs currently following regular effective date rules are now effective on the first of the month following plan selection.

To apply for an Exceptional Circumstances SEP, FEMA-emergency affected individuals must contact the Marketplace Call Center at 1-800-318-2596 (TTY:1-855-889-4325) and indicate they were eligible for another enrollment window but were unable to complete their enrollment due to a FEMA-designated emergency or disaster. To expedite this process, FEMA-emergency affected individuals can complete an application on HealthCare.gov directly or with the assistance of a Navigator, agent or
FFE Enrollment

broker (A/B), Certified Application Counselor (CAC), or DE Partner, before calling the Marketplace
Call Center.

5.8.2 SEP for AmeriCorps/VISTA/National Civilian Community Corps Members

The Corporation for National and Community Service (CNCS), which is a Federal agency, manages
and provides grants for the AmeriCorps State and National, VISTA, and National Civilian Community
Corps (NCCC) programs. These programs provide funding and other support for individuals engaged
in national service, and CNCS is required to ensure that the members in these programs have health
coverage.

CNCS and its AmeriCorps programs do not provide group health plan coverage to members because
members do not have an employment relationship with either CNCS or its grantees. Therefore, CNCS
encourages AmeriCorps members to consider seeking coverage through the FFE or an SBE.45

However, many members begin and end their terms of service outside of the OEP, and other who
members receive short-term, limited-duration coverage or self-funded coverage as part of their
AmeriCorps service are not able to access QHP coverage in the FFE outside of OEP upon completion
of their service as this coverage is not MEC and does not qualify members for the loss of MEC SEP.

In accordance with 45 CFR 155.420(d)(9), and in light of the statutory obligation for health coverage
to be provided to the participants in the AmeriCorps State and National, CMS determined that
participants and their dependents in the AmeriCorps State and National, VISTA, and NCCC programs
are eligible for the Exceptional Circumstances SEP. This SEP applies for individuals who are 1)
beginning service in the AmeriCorps State and National, VISTA, or NCCC programs; or 2) individuals
who are concluding their service in the AmeriCorps State and National, VISTA, or NCCC programs
and are losing access to their short-term, limited-duration coverage or self-funded coverage.

Affected AmeriCorps State and National, VISTA, and NCCC members have 60 days from their
triggering event, defined as either the date they begin service or the date they lose access to short-term,
limited-duration coverage or self-funded coverage from these programs, to select a QHP through the
FFE. Coverage effective dates will be prospective based on the date of plan selection and these
individuals should contact the Marketplace Call Center to request this SEP. They should inform the
Marketplace Call Center that they are beginning or concluding service with AmeriCorps State and
National, VISTA, or NCCC.

5.9 Plan Display Errors

Plan display errors occur when an issuer or Exchange error or change causes HealthCare.gov to
display incorrect and potentially disadvantageous plan data to QIs. As finalized in the 2024 Notice of
Benefits and Payment Parameters,46 this can include, but is not limited to, service area, premium, plan
benefits, and/or cost-sharing errors or changes that display directly on HealthCare.gov. CMS reviews
and investigates plan display errors to determine if the consumer’s enrollment in a QHP through the
Exchange was influenced by a material error. CMS will work with the issuer and applicable state’s
regulatory authority to arrive at a solution that has minimal impact on consumers and affirms, to the
extent possible, that the consumers are not negatively affected by the error. The consumer remediation

45 For example, see https://www.nationalservice.gov/programs/americorps/current-members/health-care-options.
46 88 FR 25740 and 45 CFR 155.420(d)(12)
approach for corrected plan data that either reduces a benefit or increases costs or rates to QIs is to honor the displayed benefit or grant an SEP.

QIs affected by plan display errors or changes on HealthCare.gov may be eligible for an SEP under 45 CFR 155.420(d)(12) to return to the Exchange and select another QHP. QIs eligible for a plan display error SEP under 45 CFR 155.420(d)(12) are typically already enrolled in a QHP, which requires the SEP process to accommodate the additional complexity of terminating enrollment in the original QHP if a QI enrolls in a different QHP during the SEP. Additionally, QIs generally need to be notified of their eligibility for this SEP within 30 calendar days after being notified by an Exchange that the error has been fixed under 45 CFR 156.1256.

As stated in the HHS Notice of Benefit and Payment Parameters for 2018 Final Rule,47 this SEP only applies to material plan or benefit display errors or changes made through the Exchange and does not include plan or benefit display errors or changes made outside of the Exchange. This SEP is intended for consumers who made the decision to purchase health coverage through the Exchange and their enrollment with a QHP was impacted by a material plan or benefit display error. Through existing data correction processes, the Exchange will typically be made aware of these errors and any corrections that are needed. For other plan errors that may exist outside of the Exchange, CMS will consider whether the error constitutes a material contract violation that would be eligible for an SEP pursuant to 45 CFR 155.420(d)(5).

Provider directory and drug formulary errors and changes will not be considered triggering events for plan display error SEPs, regardless of whether they display on external websites or documents linked on HealthCare.gov. In these cases, other consumer protections might apply. For instance, if a drug is no longer on the plan’s formulary, the plan is still required to have processes in place that allow the enrollee, the enrollee’s designee, or the enrollee’s prescribing physician (or other prescriber, as appropriate) to request and gain access to clinically appropriate drugs not otherwise covered by a health plan (a request for exception) in accordance with 45 CFR 156.122(c). As stated previously, in certain rare cases in which an unintentional network error or network correction has occurred and the consumers made a plan selection based on information that is grossly inaccurate, CMS may consider an Exceptional Circumstance SEP, authorized by 45 CFR 155.420(d)(9). For this reason, these cases do not qualify a consumer for the plan display error SEP.

### 5.9.1 Identifying and Resolving Plan Errors

Plan display errors or potential display discrepancies on HealthCare.gov can be identified by issuers, state regulators, QIs, or CMS. Exchange plan display errors include situations where coding on HealthCare.gov causes benefits to display incorrectly and where an incorrect QHP data submission or discrepancy between an issuer’s QHP data and its state-approved form filings are displayed to the QI. If a coding error is identified, CMS determines whether other QHPs are affected by the same error and reaches out to other affected issuers. Issuers and state regulators can also notify CMS of discrepancies that were submitted and displayed on the Exchange.

When a plan display error is identified on HealthCare.gov, CMS works with the issuer and states to correct the error as quickly as possible to ensure enrollments moving forward are based on accurate plan data. These errors are often corrected during data correction windows (DCWs). Once corrected, the data on HealthCare.gov is updated to reflect the correct data and CMS works with the issuer to ...

---

FFE Enrollment

notify impacted QIs. As discussed above, errors or changes made on external websites and documents linked on HealthCare.gov will not be considered triggering events for plan display error SEPs. CMS encourages issuers to work closely with applicable state authorities on the content included in their plan marketing names—including dollar amounts, cost-sharing, and network information—to avoid potential plan display error SEPs for consumers who may find these plan marketing names misleading. CMS will consider the impact of the change on QIs who enrolled in the affected plan before an SEP is granted. If the corrected plan data is a benefit or cost that displays on HealthCare.gov and the corrected plan data indicates a reduction in benefits, increase in cost-sharing for current enrollees in the plan(s), or a rate increase from what was displayed to consumers, CMS will work with the issuer and applicable states to arrive at a resolution or remediation approach for the QIs.

One plan display resolution or consumer remediation approach is for issuers to honor the benefit as it was displayed incorrectly for affected enrollees, if permitted by the applicable state regulatory authority. If the issuer honors the benefit and administers the plan as it was incorrectly displayed for the affected enrollees, CMS will not typically provide enrollees with an SEP. If the state authority expresses concerns or does not permit issuers to honor the benefit as it was displayed at the time of plan selection, then CMS will grant affected enrollees an SEP as the other consumer remediation approach.

5.9.1.1 Issuers that Do Not Honor the Plan Information that Displayed Incorrectly

Depending on the significance of the plan display error, there are several options to mitigate the impact on the QI. A plan display error is considered a material error if it is reasonable to expect that it has affected a QI’s enrollment decision to purchase a QHP through the Exchange. For any such material plan display error, QIs are notified of the error and offered a plan display error SEP. The SEP will provide QIs with the option to select another plan, either from the same issuer or another issuer available to the QI, but does not require the QI to do so if they wish to stay enrolled in their existing plan with the correct benefits.

Exhibit 16 outlines the steps issuers take to identify and correct plan display errors and the process by which CMS reviews these changes for potential plan display error SEPs.
5.9.2 Processing Plan Display Error Consumer Remediation

Under 45 CFR 156.1256, issuers must notify their enrollees of material plan or benefit display errors and the enrollees’ eligibility for an SEP within 30 calendar days after being notified by the FFE that the error has been fixed, if directed to do so by the FFE. See Appendix D – Sample Plan Display Error Notice for a sample notice an issuer may send to impacted individuals with language indicating that an SEP is being offered due to a plan display error.

CMS allows an SEP-qualified individual already enrolled in a QHP to select a new QHP by calling the Marketplace Call Center. The Marketplace Call Center will help the QI update their information as needed and complete the process of selecting a QHP. QIs generally have 60 days from when they are notified by their issuer of the plan display error to select a new plan.

Under 45 CFR 155.420(b)(2)(iii), an Exchange may provide for a coverage effective date that is appropriate date based on the circumstances, which will generally be either: 1) based on the date of the SEP-triggering event, which provides the enrollee their initially intended coverage effective date; or 2) based on the date of the plan selection during the SEP window, which provides the enrollee accelerated effective dates under 45 CFR 155.420(b)(3)(i).

In the case of a retroactive coverage date or retroactive termination date, the former issuer repays premiums and reverses claims payments. The gaining issuer collects premiums for all months of coverage and adjudicates the claims from previous months. With prospective coverage with different issuers, QIs’ deductibles and accumulations towards the maximum out-of-pocket limit are reset starting with the new date of coverage.

The coverage effective date for the new QHP may be communicated to the gaining issuer through HICS if it is different from what the system automatically assigns. The former issuer must terminate the coverage when the QI has selected another QHP during an SEP.
**Exhibit 17 outlines action steps and the timeline that CMS and issuers follow to resolve plan display errors through the consumer remediation process.**

</table>
6. **PREMIUMS (APPLICABLE TO THE INDIVIDUAL MARKET FFE, QHPS/QDPs)**

6.1 Effectuation of Prospective Coverage Under Regular Coverage Effective Dates and Special Effective Dates

The Federally-facilitated Exchange (FFE) has established guidelines regarding binder payments (typically the first month’s payment) and issuer deadlines for payment of the binder payment. For prospective coverage to be effectuated under regular coverage effective dates, as provided for in 45 CFR 155.410(f) and 155.420(b)(3)(i), the binder payment must consist of the first month’s premium, and the deadline for making the binder payment must be no earlier than the coverage effective date, and no later than 30 calendar days from the coverage effective date.

In instances where issuers are processing enrollments with prospective coverage to be effectuated under special effective dates, as provided for in 45 CFR 155.420(b)(2), such as in connection with gaining access to new Qualified Health Plans (QHPs) as a result of a permanent move, getting married, or losing coverage, the binder payment must consist of the first month’s premium, and the deadline for making the binder payment must be no earlier than the coverage effective date, and no later than 30 calendar days from the date the issuer receives the enrollment transaction or the coverage effective date, whichever is later.

For the purpose of enrollment in a QHP, issuers can set reasonable standards for determining when a payment is received, such as by considering payment received when an Electronic Fund Transfer (EFT) is completed, a credit or debit card transaction is processed, or a paper check or money order is in the issuer’s possession (i.e., received and logged in the issuer’s mailroom). If a binder payment made by an enrollee is returned due to insufficient funds, the issuer should cancel the enrollee’s coverage (if it has already been effectuated), following the process outlined in Section 2.4.3, Cancellations in the Individual Market FFE.

NOTE: Issuers should ensure that the electronic payment information they have on file for an enrollee is current. If an enrollee was previously enrolled with an issuer and chooses to enroll with the issuer again (after not being enrolled for a period of time), issuers should not automatically use the electronic payment information from the previous period of enrollment to collect the binder payment. Instead, the enrollee should be allowed to submit updated payment information or confirm with the issuer that the payment information on file is still current.48

6.1.1 Effectuation of Coverage with a Retroactive Effective Date Associated with an SEP

For coverage to be effectuated under retroactive effective dates as provided for in 45 CFR 155.420(b)(2), such as error of the Exchange under 45 CFR 155.420(d)(4), the binder payment must consist of the premium due for all months of retroactive coverage through the first prospective month of coverage, and the deadline for making the binder payment must be no earlier than 30 calendar days from the date the issuer receives the enrollment transaction or Health Insurance Casework System (HICS) case establishing the retroactive start date. If the enrollee pays only the premium for one month

---

48 See 45 CFR 156.265, which requires that issuers must accept enrollment transactions sent by the Exchange, and 45 CFR 155.400(f), which specifies that the Exchange may provide requirements to issuers regarding the processing of electronic transactions for enrollment.
FFE Enrollment

of coverage by the deadline, only prospective coverage should be effectuated, in accordance with regular effective dates. The issuer must receive full payment (or payment within the premium payment threshold in accordance with 45 CFR 155.400(g) and Section 6.2, Premium Payment Threshold, if the issuer utilizes such a threshold) from the enrollee for any applicable binder payment by the applicable premium payment deadline. Issuers may not grant grace periods for payment of the binder payment.

When a qualified individual (QI) enrolls with a retroactive effective date, a prospective coverage effective date may be conveyed to the issuer via an 834 transaction due to technical constraints, and the retroactive coverage date identified via HICS. Based on timing of the receipt and processing of the associated HICS case, the issuer may have already billed the QI for the first month’s premium for prospective coverage in accordance with but should adjust the binder billing to reflect retroactive binder rules. If by the due date the QI pays at least the first month’s premium but less than all outstanding premium due, subject to the issuer’s payment threshold policy, if applicable, the QI’s enrollment would be effectuated for prospective coverage. Once the issuer processes the HICS case and receives premiums due, the retroactive coverage can be effectuated, with the correct effective dates reported to the FFE by the issuer via Enrollment Data Alignment (EDA).

When issuers add retroactive coverage to an already effectuated enrollment, the enrollee must pay all outstanding retroactive premium by the later of 1) the time period mandated by state rules, or 2) the issuer’s stated due date. In the absence of more generous state regulations, CMS encourages issuers to allow at least one full billing cycle for enrollees to make such a payment of retroactive premium. Failure to pay outstanding premium on an effectuated enrollment that is not already in delinquency by the applicable due date would trigger the applicable grace period.

6.1.1.1 Examples of Binder for Non-Verified Retroactive Enrollments (155.400(e)(1)(iii))

**Example 6A:** On June 10, the enrollee contacts the Marketplace Call Center to request an SEP pursuant to 45 CFR 155.420(d)(4). The enrollee informs the Marketplace Call Center that although they were enrolled in QHP B with a coverage effective date of January 1, they should have been enrolled in QHP A instead. The Marketplace Call Center sends their case to a member of the FFE casework team, who finds that the enrollee was enrolled in the wrong QHP. On July 2, the FFE sends the QHP B issuer a retroactive cancellation transaction. The QHP B issuer reverses the enrollee’s submitted claims and refunds the premiums they paid for that year’s coverage. Also, on July 2, the Exchange sends the QHP A issuer an 834 transaction enrolling the enrollee with a coverage effective date retroactive to January 1. The enrollee’s share of premium after applying their advance payments of the premium tax credit (APTC) is $100 per month. The QHP A issuer receives the 834 transaction on July 2, and, pursuant to 45 CFR 155.400(e)(1)(iii), bills the enrollee for all outstanding prospective and retroactive premiums ($700 of premiums for retroactive coverage and $100 of premiums for August, which will also be due before the binder due date), with a payment due date 30 calendar days from the date the issuer received the 834 transaction. Before the payment due date, the issuer receives payment of $800 from the enrollee, and effectuates their coverage with a retroactive effective date of January 1.

**Example 6B:** A QI is eligible for retroactive enrollment in QHP A with the same dates as Example 6A. A prospective coverage effective date is conveyed to the issuer via an 834 transaction, but the retroactive coverage start date of January 1 is conveyed in an associated HICS case. Before the due date, the enrollee pays the QHP A issuer $100 and makes no further payment. Since the QHP A issuer
FFE Enrollment

received the 834 enrollment transaction on July 1, the issuer effectuates the enrollment effective August 1, not January 1.

Example 6C: On July 14, a QI receives a final eligibility appeals decision finding that the QI should be granted an SEP to enroll in coverage based on a qualifying life event that occurred in February of that year. Upon receipt of the appeal decision, the QI enrolls in a QHP with a requested coverage effective date of March 1. Because this request for coverage with a retroactive effective date does not arise from an SEP subject to verification, the QI must pay premium in accordance with 45 CFR 155.400(e)(1)(iii), which states that the QI must pay a binder payment of premium due for all months of retroactive coverage, plus the first prospective month of coverage, or an amount sufficient to satisfy any applicable premium payment threshold, consistent with 45 CFR 155.400(g). The monthly member-responsible portion of premium is $100. In order to effectuate coverage with an effective date of March 1, the QI must pay $600, or an amount sufficient to satisfy any applicable premium payment threshold, consistent with 45 CFR 155.400(g), which would satisfy premium amounts for March through July and for the prospective month of August. By the binder payment deadline, the QI paid the QHP issuer only $100. Under the rule at 45 CFR 155.400(e)(1)(iii), the QHP issuer should effectuate prospective coverage only, with a coverage effective date of August 1, in accordance with regular effective date rules.

6.1.2 Payment for Reenrollments

For renewals of effectuated coverage, a binder payment is not required as the renewal is a continuation of effectuated coverage, and no new effectuation is required. The FFE also does not require a binder payment for passive reenrollments that continue effectuated coverage in another plan within the same product (or to a different plan in a different product offered by the same issuer, if the current product will no longer be available to the enrollee, consistent with the hierarchy for reenrollment specified at 45 CFR 155.335(j)(2)) for the same subscriber. This means that no binder payment is required when subscribers in already effectuated policies are auto-reenrolled into coverage offered by the same issuer. Active reenrollments of effectuated subscribers only require a binder payment if the enrollee selects a plan outside the product that includes the reenrollment plan identified by the issuer in its Plan ID Crosswalk Template, consistent with 45 CFR 155.335(j). For instance, an issuer offers Products 1, 2, and 3, each with Silver (“S”) and Gold (“G”) plans. If an enrollee is enrolled in 1S, which remains available, and wants to actively select 1G during an annual Open Enrollment Period (OEP), that individual can do so without being required to make a binder payment. However, if the enrollee actively selects 2S, 2G, 3S, or 3G, a binder payment is required.

Thus, for continuing effectuated coverage, either due to renewal or certain reenrollments, as described above, issuers may continue to bill the enrollee via their existing billing cycle, and a binder payment of the first month’s premium is not required by the FFE. In such cases, non-payment of the January premium by the due date set by the issuer will trigger the applicable grace period. Where enrollees have effectuated coverage as a dependent on another subscriber’s coverage, and are enrolling as subscribers into the same plan, most typically due to adult children aging off their parent’s policy and enrolling into their own policies, such enrollments are new enrollments that require binder payments to effectuate.

Alternate enrollments, for QHP enrollees whose current year coverage is no longer available through the Exchange, and for whom a plan offered by a different issuer is selected, are new enrollments, not renewals, and thus require a binder payment to effectuate. Alternate enrollments are indicated by the
transaction’s Additional Maintenance Reason Code (AMRC) of PASSIVE REENROLL – NEW TO ISSUER.

Payments drawn by the issuer or mistakenly provided by the enrollee for January coverage for enrollees who have selected a different issuer for coverage for the upcoming plan year or for whom an alternative plan selection with a different issuer is made by the FFE as part of the Batch Auto-Reenrollment (BAR) process should be promptly refunded.

6.1.3 Binder and Premium Payment Extensions Directed by the Exchange or State Authority

The FFE will allow issuers experiencing billing or enrollment problems due to high volume or technical errors to implement a reasonable extension of the binder payment deadlines, pursuant to 45 CFR 155.400(e)(2), as well as the deadline for payment of premiums under grace periods, including for individuals receiving APTC.

If issuers comply with a state regulatory authority’s request, in reaction to a natural disaster or other emergency disruption within a state, to extend premium payment deadlines and delay cancellations for non-payment of premium, CMS may exercise enforcement discretion with regard to regulatory requirements such as the deadline for payment to effectuate coverage and the deadline for payment of premiums under grace periods, including for individuals receiving APTC. For future APTC audits, CMS expects issuers to maintain applicable documentation of the state regulatory flexibility for at least ten years, and Standard Operating Procedures (SOPs) demonstrating this flexibility was applied uniformly. Information about policy-based payment (PBP) audits can be found in Section 18, Policy-Based Payment (PBP) Two-Phase Audit Approach Overview.

6.2 Premium Payment Threshold

In accordance with 45 CFR 155.400(g), QHP and Qualified Dental Plan (QDP) issuers may implement a premium payment threshold policy for their plans offered through the FFE. QHP and QDP issuers that elect to establish such a policy generally may consider a payment to have been made in full once the enrollee pays an amount equal to or greater than the threshold amount established by the issuer, even if this is less than the total amount owed by the enrollee. Issuers who choose to implement such a policy are required by regulation to select a reasonable threshold level. We interpret a reasonable threshold to be one based on a percentage of the enrollee-responsible portion of the overall premium. CMS recommends a percentage equal to or greater than 95 percent.

In accordance with the premium payment threshold regulation, QHP and QDP issuers that choose to apply a payment threshold policy must apply the policy in a uniform manner to all enrollees.

Issuers that adopt a payment threshold policy are expected to utilize such a threshold policy for the entire plan year. Additionally, if the issuer adopts such a policy, it is expected to apply the policy uniformly to the initial premium payment and/or any subsequent premium payments, and to any amount outstanding at the end of a grace period for non-payment of premium. Thus, adoption of such a premium payment threshold allows issuers flexibility to effectuate an enrollment, not to place an enrollee in a grace period for failure to pay 100 percent of the total member-responsible amount of premium due, and not to terminate enrollments after exhaustion of the applicable grace period for

49 The enrollee-responsible portion is equal to the total premium minus APTC.
enrollees who have made payment(s) totaling an amount within the tolerance of the issuer’s adopted threshold.

Under this type of policy, when an enrollee has paid within the premium threshold but has not paid the full enrollee-responsible portion of the premium, the enrollee still owes the balance. If the enrollee has paid the initial premium within the threshold’s tolerance percentage but has not paid the full amount, the QHP or QDP issuer can still effectuate the enrollment.

If the enrollee makes subsequent premium payments within the threshold’s tolerance, but has not paid the full amount due, the QHP or QDP issuer may consider the enrollee to be current on all payments due for the purpose of determining whether to place the enrollee into an applicable non-payment grace period. If the enrollee continues paying an amount less than the owed amount including past due premiums, the owed amount will accumulate and may increase beyond the threshold amount. If that is the case, the enrollee’s account has become past-due and the enrollee will be subject to the grace period for failure to pay premiums.

If an enrollee fails to make payment within the threshold tolerance, they will be placed in the applicable grace period. If, at the end the applicable grace period, the enrollee has made payment(s) sufficient to bring their total enrollee-responsible portion of premium paid within the tolerance of the premium payment threshold adopted by the issuer, the issuer may consider the enrollee to be “in good standing” and decline to terminate for non-payment of premium. Exhibit 18 illustrates an example of the premium payment threshold policy in action.

<tr>
<td>April 30</td>
<td>Enrollee makes no additional payment</td>
<td>No additional payment is received by April 30. However, because the enrollee had made payments of more than 95 percent of the total enrollee-responsible portion of premium before the end of the grace period, the grace period was not exhausted without the enrollee paying all outstanding premiums, subject to the applicable premium payment threshold, so the issuer may not terminate the enrollee’s coverage for non-payment of premium.</td>
</tr>
</tbody>
</table>

### 6.3 Terminations for Non-Payment of Premiums

In accordance with 45 CFR 155.430(b)(2)(ii) and 45 CFR 156.270, a QHP/QDP may terminate an enrollee’s coverage for non-payment of premiums. Additionally, 45 CFR 156.270 requires issuers to establish and administer a standard policy for the termination of coverage for enrollees who fail to make full payment (or payment within the premium payment threshold if the issuer utilizes such a threshold) of their portion of the monthly premium. However, an issuer’s standard policy must follow certain requirements. 45 CFR 156.270(d) requires issuers to observe a three-consecutive-month grace period before terminating coverage for those enrollees who are eligible for and have elected to receive APTC and who upon failing to timely pay their premiums, are receiving APTC. An enrollee who is
eligible for APTC, but elects not to receive any APTC, is not eligible for the three-consecutive-month grace period but is eligible for the grace period the issuer normally provides to individuals who become delinquent in paying their premiums, in accordance with state rules.

In the case where an enrollee receiving APTC is enrolled in both a QHP and a QDP, if the APTC are applied and paid for both a QHP and QDP, the enrollee is eligible for the three-consecutive-month grace period for both the QHP and QDP. The enrollee is not eligible for the three-consecutive-month grace period for the QDP if the enrollee’s APTC are applied and paid only for the QHP.

To avoid termination, an enrollee must pay all outstanding premiums in full, or within the tolerance of any applicable premium payment threshold, prior to the end of the applicable grace period. A grace period does not “reset” when a partial payment is made, and “rolling” grace periods, where payment of one month’s premium when more than one month’s premium is outstanding during the grace period would restart the three-consecutive-month grace period, are not permitted.

When an enrollee’s coverage is terminated for non-payment of premiums, per 45 CFR 155.420(e), the individual does not qualify for an SEP for the resulting loss of coverage. However, if the individual becomes eligible for an SEP based on other circumstances, the individual may enroll in a QHP or QDP, including the QHP or QDP from which their coverage was terminated for non-payment.

Additionally, during the annual OEP, enrollees whose coverage was terminated for non-payment of premiums before the end of the plan year will be able to apply for an eligibility determination, and, if determined eligible, will be permitted to select a QHP for coverage for the upcoming plan year. The QI is required to pay the first month’s premium in accordance with 45 CFR 155.400(e) to have coverage effectuated, and the QHP or QDP must return either an 834 confirmation/effectuation or a cancellation transaction to the Exchange, as applicable.

Appendix B – Sample Non-Payment Notice for the Individual Market includes an example of the content an issuer might consider in a letter providing notice of non-payment of premiums. The specific wording and messages included in the appendix are not required but are offered as recommendations for elements in the plan’s notice of non-payment when an enrollee receives APTC.

6.3.1 Timeliness Requirement for Delinquency Notices

In the 2024 Notice of Benefit and Payment Parameters, CMS finalized a requirement in 45 CFR 156.270(ff) that, beginning on June 18, 2023, issuers are required to send notices of payment delinquency promptly and without undue delay. CMS defines promptly and without undue delay as within 10 days of the date an issuer should reasonably have discovered the delinquency.

6.3.2 Examples

Example 6D: An enrollee is eligible for, but has elected not to receive, APTC. The enrollee’s monthly premium is $200, and the issuer does not make use of a premium payment threshold. The enrollee, whose coverage was effectuated for May, has not paid the June premium, which was due on June 1. The QHP issuer’s standard policy, in accordance with applicable state law, is to allow a one-month grace period for enrollees not receiving APTC, but the coverage will end at the end of the month for which the last full payment is made. On June 10, the enrollee pays $50 but does not make any further payment by the end of June. Therefore, the QHP sends an 834 termination transaction to the FFE containing a termination effective date of May 31. The issuer should refund the $50 premium for June.
in accordance with applicable state law, as no coverage was provided for June once the coverage was retroactively terminated to May 31.

**Example 6E:** An enrollee receiving APTC is responsible for a $150 monthly premium payment and the issuer does not make use of a premium payment threshold. The enrollee’s coverage is effectuated, and the enrollee pays the premiums through May, but fails to make payment for the June premium, therefore entering the three-consecutive-month grace period that runs through August 31. The enrollee fails to make any payment for the July premium, and now owes the QHP issuer $300. On July 10, the enrollee pays $200. Since the enrollee has not paid the entire outstanding premium for which they are responsible, the enrollee remains in the three-consecutive-month grace period that started June 1. The enrollee fails to make any further payments, and on August 31, the QHP issuer sends an 834 termination transaction to the FFE containing a termination effective date of June 30. The QHP issuer can keep $150 of the $200 payment to cover June premium but should refund the remaining $50 in accordance with applicable state law, as no coverage was provided for July once the coverage was retroactively terminated to June 30.

**Example 6F:** Circumstances are the same as Example 6E except that on July 10, the enrollee pays $300 instead of $200. Since the enrollee has paid the entire outstanding premium balance for which they are responsible, the enrollee is no longer in the grace period. However, if the enrollee fails to make full payment for August by the payment due date, the enrollee will enter into a new three-consecutive-month grace period beginning August 1.

**Example 6G:** Circumstances are the same as Example 6E except that the issuer utilizes a 95 percent premium payment threshold. The enrollee pays no premium in June or July. The issuer bills the enrollee for August premium ($150), which raises the total premium owed by the enrollee to $450. The enrollee pays $430 on August 20 and makes no further payments before August 31. Because the enrollee made a payment within the 95 percent tolerance of the issuer’s premium payment threshold, the issuer declines to terminate for non-payment of premium at the end of the three-consecutive-month grace period. The enrollee still owes the $20 outstanding and will enter the applicable grace period if they do not pay $170 ($150 for September premium and $20 outstanding from the grace period), or an amount within the premium payment threshold tolerance, for September coverage.

### 6.3.3 Prohibition of Option to Condition New Enrollment on Payment of Past-Due Premium

Previously, issuers had the option to condition new enrollments on payment of past due premiums under the 2017 Market Stabilization Rule, which introduced CMS’s modified interpretation of the guaranteed availability rules with respect to non-payment of premiums. Under that interpretation, a QHP issuer would not be considered to violate the guaranteed availability requirements if the QHP issuer attributes a premium payment for coverage under the same or a different product to premiums due to the same QHP issuer within the prior 12 months and refuses to effectuate new coverage for failure to pay premiums. QHP issuers who adopted this premium payment policy, as well as any QHP issuers who did not adopt the policy but were within an adopting issuer's controlled group, were required to clearly describe the consequences of non-payment on future enrollment, prior to the non-payment of premiums, for that non-payment to be considered past-due premiums subject to this new interpretation. That description was required in any enrollment application materials, and in any notice that was provided regarding non-payment of premiums, in paper or electronic form.

---

FFE Enrollment

However, in the 2023 Notice of Benefit and Payment Parameters, which appeared in the May 6, 2022, Federal Register, CMS reinterpreted the guaranteed availability requirements. Effective July 1, 2022, issuers may no longer condition new enrollments on payment of past due premiums, or attribute premium payments for new coverage to past due premiums owed to the issuer (or another issuer in the same controlled group). If an enrollee’s coverage is terminated by an issuer for non-payment of premiums and the former enrollee subsequently reenrolls with that same issuer (either through an SEP or the annual OEP), the issuer must effectuate the former enrollee’s coverage and may not attribute any payments made by the former enrollee toward the new coverage to the outstanding premium owed. The outstanding premium owed by the enrollee is not forgiven, however, and issuers may attempt to collect the premium owed by enrollees whose coverage has been terminated due to non-payment of premiums.

6.3.4 Enrollment Transactions Received for a Subscriber Whose Coverage Is Being Terminated

From time to time issuers may receive from the FFE Maintenance 834 (M834) transactions to update enrollments on policies that the issuer had terminated in its records, because the FFE has not yet recorded the termination. This can occur because of timing issues in EDA and is complicated by the retroactive termination dates of expired APTC grace periods. For example, an issuer with an enrollee who enters an APTC grace period in February that expires at the end of April can only send a non-payment termination transaction effective February 28 to the FFE after the grace period ends, in early May at the earliest. It is not uncommon for an enrollee to report life changes during the grace period months, which are sent as M834 transactions because during that time the FFE records current coverage. The FFE may continue to receive and send updates even later if the issuer delays sending the termination or the FFE does not immediately process it.

The analysis of whether an issuer must enroll (subject to binder) an applicant for whom it receives an M834 on a policy it has terminated or is terminating generally hinges on whether the transaction indicates a new policy issuance subject to guaranteed availability rules, which must be effectuated subject to binder; or is merely an update to a continuous original enrollment that is in the process of terminating. The following rules apply on a general basis, but issuers must assess each enrollment on a case-by-case basis to ensure that they are not improperly rejecting enrollments that should be effectuated.

6.3.4.1 Determining Whether an Enrollment Transaction is an Update to a Continuous Enrollment or Potential New Enrollment

An issuer must first determine whether the M834 is an update to a continuous enrollment or is a potentially new enrollment subject to binder. In the context of M834 transactions, to determine whether the change to an enrollment reflects a new enrollment, or an update to a continuous enrollment, issuers should look to see 1) whether the effective date is before or after the end of the delinquent policy’s grace period (either the APTC or state grace period, as applicable), and 2) whether the effective date occurs during an SEP or OEP. Potential new enrollments, where the effective date on the M834 transaction occurs after the end of the applicable grace period, will generally have the effect of creating a gap in coverage between the termination of the current coverage (meaning the date the APTC grace period ends, if applicable) and the effective date of the change requested by the M834.

52 87 FR 27208
FFE Enrollment

transaction. However, as noted above, this is merely a guideline, and determinations should be made on a case-by-case basis.

6.3.4.2 Examples

Example 6H: An issuer in early May terminated coverage for an enrollee receiving the benefit of APTC for nonpayment of premiums, effective February 28. Before the FFE processed the termination, the enrollee reported a life change, triggering the FFE to send an M834 transaction to the issuer with an effective date of April 1. Because April 1 is before the grace period expired, the M834 is an update to a continuous enrollment, and even if the M834 reflects that the enrollee was eligible for an SEP, the issuer should not effectuate the change to the enrollment and should maintain the February 28 termination date.

Exhibit 19 illustrates the sequence of events described in Example 6H.

Accept or Reject M834? Reject.

Why? The M834 effective date of 4/1 is before the grace period expired; therefore, the M834 is an update to a continuous enrollment. Even if the M834 includes a SEP Reason Code, the issuer should not effectuate the change and the consumer’s end date should remain February 28th.

Example 6I: Same facts as above, except that the M834 transaction has an SEP with an effective date of June 1. June 1 is after the expiration of the APTC grace period, so the M834 transaction is not an update to a continuous policy but rather a potentially new enrollment subject to a binder payment requirement, if additional criteria discussed below are met.

Exhibit 20 illustrates the sequence of events described in Example 6I.

</tr>
</tbody>
</table>

Accept or Reject M834? Accept.

Why? The SEP M834 effective date of 6/1 is after the grace period expired; therefore, the M834 transaction is not an update to a continuous enrollment, but potentially a new enrollment subject to binder payment.

- **Is there an SEP or is it during the OEP?** An issuer must also determine whether the M834 transaction indicates eligibility for an SEP. In general, outside of Open Enrollment, an M834 transaction without an SEP on a policy the issuer has already validly terminated in its records should not be effectuated. Instead, the issuer should take the non-SEP transaction as a reminder
to finish aligning its record with the FFE by using Inbound 834 (IC834), Enrollment Data Reconciliation, or Enrollment Resolution and Reconciliation (ER&R) to ensure that the FFE records the appropriate termination date.

- M834 active transactions (policy transaction is not 11) with or without indication of an SEP during the OEP are considered potential new enrollments if the effective date of the change requested by the M834 transaction is after the end of the applicable grace period. When this happens, an issuer must effectuate an enrollment under an M834 transaction, subject to a binder payment requirement if it receives an active (policy origin not equal to 11) non-SEP M834 with a January 1 effective date for an enrollee whose coverage was passively renewed, and who entered an APTC grace period in September that expired at the end of November (with a September 30 termination date). This is because January 1 falls after November 30, the end of the grace period. Should the enrollee pay binder for the January 1 coverage by the due date, there is a gap in coverage spanning November and December (between the termination of the original policy effective September 30, and the start of the new policy on January 1), and thus the transaction reflects a new policy issuance subject to guaranteed availability.

- As discussed above, if the M834 active transaction for an already issuer-terminated policy indicates eligibility for an SEP, then the analysis on whether to effectuate the transaction depends on whether the transaction is updating a continuous enrollment (do not effectuate) or is a new issuance (effectuate, subject to binder payment requirement). Note that if the enrollee in an APTC grace period selects a new product during their SEP or OEP, the enrollment should be considered a new issuance subject to effectuation if binder is paid without regard to whether the start date falls after the end of grace because active product changes are not considered continuous enrollments (see Example 6K).

- If an issuer that has previously terminated an enrollment must later enroll the same QIs because the FFE sent a M834 SEP or active OEP transaction with an effective date after the end of the applicable grace period and the QI pays the applicable binder payment by the due date, the issuer will need to establish a gap in the FFE’s policy record in EDA. If the new coverage begins on a date other than January 1, the issuer will need to use ER&R to acquire a new FFE Policy ID for the new coverage and may use EDA to apply the applicable rates for the newly enrolled enrollees based on their age as of the new enrollment rather than the original start date. The process for using a dispute to create a gap in coverage and assign a new FFE Policy ID to the new policy is described in Section 6.3.4.3, Using ER&R Disputes to Establish a New Exchange Assigned Policy ID for New Policies Effectuated Following a Gap in Coverage.

- Active OEP enrollments with January 1 start dates that fall after the end of the pervious policy’s grace period do not need a new FFE Policy ID, since the FFE already automatically assigns new FFE Policy IDs to coverage continuing into the new plan year; however, the issuer will need to use any channel of EDA to terminate the original policy.

### 6.3.4.3 Using ER&R Disputes to Establish a New Exchange Assigned Policy ID for New Policies Effectuated Following a Gap in Coverage

When an issuer must effectuate a new policy while terminating the original policy, it must submit an ER&R dispute to create a gap in coverage and trigger the creation of a new Exchange Assigned Policy ID. To accomplish this, issuers should follow the steps outlined below.

For policies terminated by the issuer using IC834 after the M834 (with an SEP) was processed by the FFE:
• Since the IC834 was submitted by the issuer after the M834 was processed, the new segment created from the SEP will be cancelled.

• The issuer must submit an ER&R dispute requesting a reinstatement of the cancelled segment using the Enrollment Dispute Form.

  NOTE: The issuer must confirm the latest RCNI submitted to CMS shows both coverage spans; otherwise, the dispute will be rejected.

• Using the Discrepancy Dispute tab, the issuer will populate the “Issuer End Date is Later than FFE” field with the new end date. The issuer should use the FFE Inventory Number associated with the coverage period needing reinstatement.

• Once the correction is applied, the previously cancelled segment will be reinstated into a new policy.

• CMS will generate a new Exchange Assigned Policy ID for the reinstated policy.

• The terminated policy will maintain the original coverage start and end dates submitted by the issuer.

• The issuer will need to update RCNI with the new Exchange Assigned Policy ID once provided by the ER&R contractor.

For policies not terminated by the issuer using IC834 after the M834 (with an SEP) was processed by the FFE:

• The issuer must submit an ER&R dispute using the Enrollment Dispute Form to process the termination for non-payment on the first segment.

  NOTE: The issuer must confirm the latest RCNI submitted to CMS shows the appropriate coverage dates for each segment of the policy; otherwise, the dispute will be rejected.

• Using the Discrepancy Dispute tab, the issuer will populate the “Issuer End Date is Earlier than FFE” field with the new end date. Issuers should ensure the proper term or cancel code is included if the end date is earlier than December 31. To populate the “FFM Internal Record Inventory Number” field, the issuer should use the inventory number associated with the coverage period needing the earlier termination date applied.

• Once the correction is applied, the ER&R contractor will accept the termination of the initial segment allowing for a gap in coverage.

• CMS will generate a new Exchange Assigned Policy ID for the second segment created by the SEP.

• The first segment will maintain the original Exchange Assigned Policy ID and be updated with the correct end date submitted by the issuer on the Enrollment Dispute Form.

• Issuers should monitor the Pre-Audit File to ensure the correct Exchange Assigned Policy ID is being used for an Enrollment Group.

Issuers can find additional information on submitting changes impacting the Exchange Assigned Policy ID on their RCNI by reviewing the Enrollment Reconciliation Education Suite located at https://zone.cms.gov/document/enrollment-data-reconciliation.

Example 6J: An issuer effectuates an enrollee’s coverage for January 1 in a QHP and is applying APTC. The enrollee’s full premium amount is $400, but after the application of $300 in APTC, the enrollee’s member-responsible portion of premium is $100. The enrollee makes all payments fully until they fail to pay the July premium, due July 1. The enrollee enters into the three-consecutive-
FFE Enrollment

month grace period on July 1, and the grace period expires September 30. On July 15, the enrollee loses the benefit of APTC (effective on August 1), due to the expiration of a data matching inconsistency (DMI) period; however, consistent with regulation, since the enrollee’s delinquency began while receiving the benefit of APTC, the enrollee’s original three-month grace period continues. On August 10, the enrollee is determined eligible for an SEP but does not utilize the SEP until October 1. On that date, the former enrollee selects the same QHP under which the former enrollee’s coverage was terminated effective July 31 and is provided an effective date of November 1. The former enrollee makes a timely and sufficient binder payment. The QHP issuer must effectuate the new coverage because the SEP effective date, November 1, is after September 30, when the grace period ended. The issuer should follow the instructions for submitting an ER&R dispute to establish a new Exchange Assigned Policy ID for policies eligible for a gap in coverage.

Example 6K: Same facts as above, but here the enrollee is determined newly eligible for APTC (Financial Change SEP) on August 10 and utilizes the SEP to enroll in a plan in a different product, but with the same issuer (this is sent TERMCIC rather than M834 because the QHP ID has changed). The active selection of a QHP in a different product makes this a new issuance subject to a binder payment requirement. The enrollee makes a timely and sufficient binder payment on August 25. The QHP issuer must effectuate the new coverage because the enrollee actively selected a plan in a new product, which is not considered by the FFE to be a continuous enrollment and thus the issuer must collect a binder payment to effectuate the enrollment.

6.4 Grace Periods for Enrollees Receiving the Benefit of APTC

The regulation at 45 CFR 156.270(d) requires issuers to provide a grace period of three consecutive months for an enrollee who, when failing to timely pay premiums, is receiving the benefit of APTC. During the grace period, the QHP issuer must 1) pay all appropriate claims for services rendered to the enrollee during the first month of the grace period and may pend claims for services rendered to the enrollee in the second and third months of the grace period; 2) notify the Department of Health & Human Services (HHS) of such non-payment; and 3) notify providers of the possibility for denied claims when an enrollee is in the second and third months of the grace period.

6.4.1 Claims Pended by an Issuer During a Three-Consecutive-Month Grace Period for Enrollees Receiving the Benefit of APTC

Under 45 CFR 156.270(d)(1), issuers may pend claims for services rendered, if permitted by state law, for enrollees receiving the benefit of APTC who are within the second or third months of the three-consecutive-month grace period. If the enrollee is enrolled in both a QHP and a QDP, is receiving APTC for both plans, and is in the second or third months of the three-consecutive-month grace period for both forms of coverage, both the QHP and QDP issuers may pend claims, if permitted by state law. If the issuer terminates the enrollee’s coverage for non-payment of premiums retroactively to the last day of the first month of grace, the issuer may deny any claims that were pended for services received during the second and third months of the three-consecutive-month grace period. However, the issuer cannot retroactively deny claims from the first month of the three-consecutive-month grace period based on the termination of coverage. Any premium collected by the issuer for coverage beyond the designated retroactive termination date should be refunded to the enrollee whose coverage was terminated, in accordance with applicable state law.

---

53 Issuers notify HHS of nonpayment through the EDA process.
FFE Enrollment

In accordance with 45 CFR 156.270(d)(3), QHP and QDP issuers must notify providers of the possibility of denied claims for services incurred during months two and three of the three-consecutive-month grace period for enrollees receiving APTC. CMS expects issuers will provide this notice within the first month of the grace period and throughout months two and three. Issuers can opt to provide this notice by several means; however, issuers are encouraged to provide this notice whenever responding to an eligibility verification request from a health or dental care provider.

6.4.2 Grace Periods Ending After the End of the Annual Open Enrollment Period

The grace period for non-payment of premiums could extend past the end of the annual OEP if enrollees who are receiving the benefit of APTC fail to timely pay their premium in full or in an amount necessary to satisfy a payment threshold, if applicable, for October, November, December, or January coverage.

If the enrollees’ coverage is still in effect at the time of auto-renewal (typically October) and the enrollees have not taken action to actively select a QHP for future year coverage, the FFE generally automatically sends the 834 renewal transaction to the enrollees’ QHPs. If the FFE sends an auto-reenrollment transaction (even if the reenrollment plan is offered under a different product), or if enrollees actively complete a plan selection to renew enrollment through the Exchange in a plan offered under the same product as their reenrollment plan (where the product under which the QHP in which they are enrolled is not available through the individual market Exchange for renewal, this includes a plan under a different product offered by the same QHP issuer, to the extent permitted by applicable state law), the QHP issuer must accept the enrollment, because enrollees are still in a grace period, meaning that the issuer may not discontinue enrollees’ coverage based on failure to pay their premiums. For both auto-renewals and active plan selections that are continuations of the same coverage, as previously described in Section 6.3.3, Prohibition of Option to Condition New Enrollment on Payment of Past-Due Premium, the issuer may attribute enrollee payments to the oldest outstanding debt in the existing grace period for the current coverage.

However, consistent with 45 CFR 156.270 and 155.430, if the enrollee does not pay all outstanding premiums, or an amount within the tolerance of any applicable premium payment threshold, by the end of the three-consecutive-month grace period, the issuer must terminate the enrollee’s coverage retroactively to the last day of the first month of the grace period. If the coverage in the new plan year resulted from a renewal of the terminated coverage and is considered a continuation of the current coverage, renewal coverage that is still in passive status (enrollments sent through auto-reenrollment that still have a policy status of 11) will be cancelled by the FFE (typically within a month of receiving the prior year termination from the issuer) because nonpayment of premium is an exception to guaranteed renewal; the enrollee will be unable to enroll in coverage for the new plan year outside the OEP unless the enrollee is eligible for an SEP. Active enrollments during OEP that result in coverage

---

54 Pursuant to the Patient Protection and Affordable Care Act; Annual Eligibility Redeterminations for Exchange Participation and Insurance Affordability Programs; Health Insurance Issuer Standards Under the Affordable Care Act, Including Standards Related to Exchanges, 79 FR 52994 (September 5, 2014), when a product that included QHPs no longer offers QHPs through a Marketplace (for example, if the issuer does not apply for recertification of any plans within the product, but continues to offer the product in the market), and enrollees in that product are reenrolled in a QHP under a different product pursuant to 45 CFR 155.335(j)(2), that reenrollment would be considered a renewal, consistent with 45 CFR 147.106, and would be considered a renewal for purposes of determining whether the issuer could attribute any payment from the individual toward any outstanding debt that may exist between the individual and that issuer and then refuse to enroll the applicant or terminate the applicant’s enrollment based on failure to pay premiums.
that is not considered a continuation of the same coverage are governed by guaranteed availability rules, and so some active reenrollments that would otherwise be cancelled if they were passive reenrollments must be effectuated by the issuer, subject to payment of the required binder payment.

6.4.2.1 Examples

Example 6L: An enrollee receiving the benefit of APTC entered a grace period in September and did not pay all outstanding premium due by November 30, and coverage is terminated effective September 30. During the OEP the enrollee actively selects the same plan effective January 1, which the issuer receives as an M834 transaction because the active reenrollment is an update to the auto-reenrollment sent to the issuer in October. The issuer must accept the January 1 enrollment subject to the requirement to pay a binder payment.

Example 6M: Similar facts as above except that the enrollee entered the APTC grace period in November and did not pay all outstanding premium by January 31, and thus the coverage is terminated November 30 by the issuer for nonpayment of premiums. During the OEP, the enrollee actively selects the renewal plan effective January 1. While the FFE will not automatically cancel the enrollment because it is in active (not passive) status, the issuer may send a separate cancel transaction for the January 1 coverage because the renewal was an update to a continuous enrollment being terminated (January 1 is not more than one day later than the grace period end of January 31).

Example 6N: An enrollee, who receives APTC, is enrolled in a QHP. The QHP issuer does not utilize a premium payment threshold policy. The enrollee has paid premiums in full throughout the year but fails to pay the December premium by the December 1 due date and enters a three-consecutive-month grace period that would end on the last day of February. The enrollee does not actively select a plan for the new plan year, and the FFE sends an auto-renewal transaction. The QHP issuer must accept the enrollment. The renewed coverage continues into the new plan year, subject to the existing grace period. The enrollee does not pay all outstanding premiums by February, and the QHP issuer retroactively terminates the enrollee’s coverage, effective December 31 of the prior year. The individual is no longer covered for the new plan year, which the FFE’s record will reflect once the Exchange has cancelled the auto-renewal. Since the annual OEP has ended, the individual cannot enroll through the Exchange until the next annual OEP, unless the individual qualifies for an SEP.

Example 6O: Same facts as above, except the enrollee fails to pay the November premium by the November 1 due date and enters a three-consecutive-month grace period that would end on the last day of January. During the OEP, on December 4, the enrollee logs into HealthCare.gov, updates their application for the upcoming plan year, and is determined eligible for coverage. The enrollee actively renews the same coverage for January 1 and pays the first month’s premium by the due date. Because the enrollee decided to renew their coverage in the same product, which is considered a renewal, the QHP may apply the January premium payment to the November non-payment. Because the enrollee is still within the three-consecutive-month grace period, the issuer may not refuse to renew the enrollment. However, if the enrollee does not pay all outstanding premiums by January 31, the QHP must retroactively terminate the enrollee’s coverage, effective November 30. The enrollee would no longer be covered for the new plan year and the QHP issuer must send the FFE a termination transaction for the prior year plan, effective November 30. The FFE will cancel the new plan year auto-renewal within weeks if it is still in passive status, or alternatively, the issuer may send a cancellation transaction for the enrollment.
Example 6P: An enrollee receiving the benefit of APTC entered a grace period in October and did not pay all outstanding premium due by December 31, and coverage is terminated effective October 31. On January 2 (during the OEP) the enrollee actively selects the same plan for a February 1 effective date, which the issuer receives as an M834 transaction because the active reenrollment is an update to the auto-reenrollment sent to the issuer in October. The issuer must accept the February 1 enrollment subject to the requirement to pay a binder payment, and if the issuer effectuates the new enrollment will need to submit a dispute to establish the gap in coverage and receive a new FFE Policy ID for the February 1 policy.

Example 6Q: An enrollee receiving the benefit of APTC entered a grace period in December and did not pay all outstanding premium due by February 28, and coverage is terminated effective December 31. On January 1 (during the OEP) the enrollee actively selects the same plan for a February 1 effective date. While the FFE will not automatically cancel the enrollment because it is in active status, the issuer may send a separate cancel transaction for the February 1 coverage because the selection of the same plan was an update to a continuous enrollment being terminated (February 1 is not later than the grace period end of February 28).

6.4.3 Grace Periods Ending on or Before December 31

When an enrollee with a grace period expiring on or before December 31 actively reselects coverage offered by the same issuer during an OEP with a January 1 effective date, the issuer will generally need to treat the active reenrollment under guaranteed availability rules, effectuating the new coverage, subject to the requirement to pay a binder payment. This is because the new coverage’s start date is after the end of the grace period for the previous coverage, making it a new issuance rather than an update to a terminated policy that can be disregarded. Reenrollments still in passive status (policy origin = 11), however, may be cancelled since eligibility for auto-renewal ends if the associated prior year enrollment subsequently terminates.

6.4.3.1 Examples

Example 6R: An enrollee enters APTC grace in September for failing to pay the $50 premium. The FFE sends the issuer an auto-renewal in October, which the issuer must process as the enrollee’s coverage is still in a grace period. The enrollee makes no more payment on the current year coverage by the November 30 end of the grace period, so the issuer sends the FFE a termination effective September 30 in early December on the current year coverage. However, on November 15, the enrollee actively reenrolled in coverage offered by the issuer under the same product, indicated on a M834 transaction updating the auto-reenrollment, making it an active reenrollment (policy origin ≠ 11) subject to guaranteed availability requirements.

The binder on the new coverage is $100. The enrollee pays the issuer $100 by the new coverage binder due date, which the issuer has set as January 1. Although the enrollee has not paid the past due premium owed to the issuer, the issuer must still effectuate the coverage.

Example 6S: Same facts as above, except the enrollee never actively reenrolls, leaving the reenrollment in passive (policy origin = 11) status. The issuer terminates the current year policy effective September 30 and may cancel the passive reenrollment or wait for the FFE to carry the current year termination forward to cancel the future year enrollment.
FFE Enrollment

6.4.4 Termination Occurring During a Grace Period

45 CFR 155.430 allows an enrollee to voluntarily terminate their coverage by notifying the Exchange. If an enrollee seeks to voluntarily terminate coverage while they are in a grace period due to non-payment of premiums, the effective date of termination is the earlier of: 1) the enrollee’s voluntary termination date, or 2) the date the enrollee’s coverage is terminated for non-payment of premiums (involuntary termination date) if the enrollee fails to pay all outstanding premiums, or an amount within the tolerance of any applicable premium payment threshold, before the end of the applicable grace period.

6.4.4.1 Examples

Example 6T: An enrollee, who is enrolled in a QHP with an issuer that does not utilize a premium payment threshold, is receiving APTC and enters a grace period on August 1, due to their non-payment of premiums. The grace period extends until October 31, and if the enrollee does not pay their outstanding premiums in full by that date, their coverage will terminate effective August 31, the last day of the first month of the grace period for enrollees receiving APTC. In September, the enrollee contacts the FFE to voluntarily terminate their coverage September 30 because the enrollee will enroll in employer coverage effective October 1. The FFE sends an 834 transaction to the issuer with a termination effective date of September 30. The enrollee makes no further payments to the issuer. By the end of their grace period (October 31), they have not paid all outstanding premiums to the issuer. On November 1, the issuer uses EDA to change the enrollee’s effective date of termination to the date of involuntary termination for non-payment of premiums, August 31. The issuer can reject any claims arising from medical service provided after August 31 and must return any APTC paid on the enrollee’s behalf for the period after August 31 in accordance with applicable state law.

Example 6U: An enrollee, who does not receive APTC, enters a grace period for non-payment of premium on August 1. The law in the enrollee’s state allows a one-month grace period to pay all outstanding premiums. If the enrollee does not pay all outstanding premiums, or an amount within the tolerance of any applicable premium payment threshold, during that one-month grace period, the issuer may terminate their coverage effective July 31, the last day the enrollee’s account was in good standing. In August, the enrollee accesses the FFE to voluntarily terminate their coverage, effective August 24 and the FFE sends an 834 transaction to the issuer with a termination date of August 24. On the last day the enrollee’s grace period, August 31, they have not paid the outstanding premium owed to the issuer. On September 1, the issuer uses the Enrollment Data Reconciliation process to change the enrollee’s termination date to July 31.

6.4.5 Involuntary Termination Due to a Citizenship/Immigration Status Inconsistency Expiration During a Grace Period

An enrollee who receives coverage during a citizenship/immigration status inconsistency period, and who does not pay monthly premiums timely, will enter the applicable grace period pursuant to 45 CFR 155.430 and 45 CFR 156.270. If the inconsistency expires during the grace period, the enrollee’s Exchange coverage or enrollment termination date will be the earlier of 1) the date of the inconsistency expiration or 2) the termination date associated with the applicable grace period. Note that lack of lawful presence is not an exception to guaranteed renewal, and the terminated enrollee may be eligible to continue coverage outside the Exchange.
6.4.5.1 Examples

Example 6V: An enrollee, who receives APTC, is in a citizenship/immigration status inconsistency period that expires June 30, unless it is resolved earlier. The enrollee is also in a grace period ending on June 30, because they did not pay their April premium in full. As of June 30, the enrollee’s inconsistency has not been resolved. Additionally, as of June 30, the enrollee has not paid the outstanding premium, and their coverage terminates effective April 30, per 45 CFR 155.430 and 45 CFR 156.270. The termination for non-payment retroactive to April 30 applies.

6.4.6 Removal of APTC During a Grace Period

If an enrollee receives the benefit of APTC and is delinquent on premium payments, the enrollee will receive a three-consecutive-month grace period, pursuant to 45 CFR 156.270(d). If such an enrollee becomes ineligible for the benefit of APTC during the three-consecutive-month grace period, the APTC will terminate according to normal Exchange operations, but the enrollee will have until the end of the three-consecutive-month grace period to pay all outstanding premium, or an amount within the tolerance of any applicable premium payment threshold. If the enrollee does not make sufficient payment to avoid termination for non-payment, the enrollee’s termination date would adhere to the rules for an APTC grace period stated in 45 CFR 155.430(d)(4).

6.4.6.1 Examples

Example 6W: An enrollee, who is receiving the benefit of APTC and is subject to an annual household income inconsistency, enters a grace period on August 1, due to their non-payment of premium. The grace period extends until October 31. On August 31, the enrollee’s income inconsistency expires and the APTC are adjusted to $0 by the FFE. Although the FFE will end the enrollee’s APTC effective September 1, the enrollee will have until October 31 to make full payment of all outstanding premium to avoid their coverage being terminated effective August 31, the last day of the first month of the grace period.

Example 6X: An issuer effectuates an enrollee’s coverage for January 1 in a QHP and is applying APTC. The enrollee’s full premium amount is $400, but after the application of $300 in APTC, the enrollee’s member-responsible portion of premium is $100. The enrollee makes all payments fully until they fail to pay the July premium, due July 1. The enrollee enters into the three-consecutive-month grace period on July 1, and the grace period expires September 30. On July 15, the enrollee loses the benefit of APTC (effective on August 1), due to the expiration of a DMI period; however, consistent with regulation, since the enrollee’s delinquency began while receiving the benefit of APTC, the enrollee’s original three-month grace period continues. After receiving a bill for August coverage ($400), which reflects the change in APTC, the enrollee returns to the FFE on August 10, is determined newly eligible for APTC (effective on September 1), and utilizes the SEP under 45 CFR 155.420(d)(6) to maintain enrollment in the same plan. The enrollee pays the QHP issuer $100 on August 15 but makes no further premium payment. The enrollee’s coverage is terminated by the QHP after the APTC grace period expires, with a termination effective date of July 31. Since the Financial Change SEP M834 transaction restarting APTC for the enrollee effective September 1 updated the original coverage effective date during the applicable grace period without a gap between the current coverage and the effectiveness of the change, the M834 transaction effective September 1 is considered to be part of one continuous enrollment, extending from January 1 through July 31, rather than one enrollment starting on January 1 through July 31 and a second, new enrollment starting on September 1 (there was no gap in coverage before the September 1 effective date of the M834...
transaction because the policy was still in the grace period on September 1). Therefore, the QHP issuer must terminate the enrollee’s coverage on July 31 for non-payment of premium.

6.4.7 Processing Fees and Premium Payments

Any contract between an issuer and a third party under which the third party collects premium payments from enrollees and routes them to issuers is governed by applicable state law. When the third-party payment vendor charges fees for its service, such as processing fees, in addition to the premium amount collected, issuers may not consider such fees to be part of the premium and may not consider an enrollee’s failure to pay the fees to be a non-payment of premium.

Accordingly, if an enrollee’s premium payment is routed to the issuer, the issuer cannot trigger applicable grace periods or terminate the enrollee’s coverage for non-payment of fees. Rather, relationships between issuers and third parties should be designed much like relationships in other commercial arenas where individuals may make in-person payments to vendors who will deliver their payment to a utility or other creditor and require the individual to pay any processing or transaction fee directly to the third party before the third party transmits the payment to the ultimate recipient. CMS encourages issuers to require that processing fees be delineated separately from the premium payment on any receipt or other evidence of the transaction.

6.5 Over-Billed Premiums

QHP and QDP issuers may correct any over-billed premium amount, which is when an issuer bills an enrollee or enrollees for an erroneously high premium amount, according to their own policies and consistent with applicable state law. Issuers should, within a reasonable time of the discovery of the over-billing, credit the over-billed premium to the enrollees’ accounts, refund the over-billed amount to the enrollees, or use a combination of both solutions.

QHP and QDP issuers must reduce the APTC amount in their systems if the total amount of APTC applied to an enrollee’s account exceeds total plan premium. Any resulting APTC discrepancies would be addressed during the Enrollment Data Reconciliation process.

6.6 Under-Billed Premiums

The term “under-billed premium” refers to a circumstance where an issuer bills an enrollee an erroneously low premium amount (or does not bill the enrollee at all). Issuers of QHPs in the FFE, as well as issuers in states where CMS directly enforces the Patient Protection and Affordable Care Act (ACA) market reforms that discover an under-billing error should consult CMS by informing their CMS Account Manager. In a state where CMS directly enforces the ACA market reforms, in collaboration with the appropriate state regulator, CMS will consider exercising enforcement discretion to allow issuers to forego collection of under-billed premium on a case-by-case basis. In a state that has retained primary enforcement authority of the ACA market reforms, CMS generally defers to the relevant state authority. Therefore, the relevant state authority may direct or permit an issuer to forego the collection of any under-billed portions of premiums. Such action alone does not constitute a failure to substantially enforce premium-related requirements, as long as state policies are applied consistently and in a non-discriminatory fashion. Should any issuer forego collection of any under-billed premium, either under an exercise of CMS enforcement discretion or at the direction of the applicable state authority, the issuer must characterize the uncollected premiums as realized/earned premium for purposes of medical loss ratio (MLR) and risk adjustment (RA) data submission.
6.6.1 Examples

Example 6Y: On December 5, Enrollee A completes an application for enrollment through the FFE, makes a plan selection, and enrolls in a QHP with an effective date of January 1. Enrollee A pays their first month’s premium on time, and the enrollee’s coverage is effectuated for January 1. Enrollee B (who lives in the same state as Enrollee A) completes an application for enrollment through the same FFE, makes a plan selection, and enrolls in the same QHP as Enrollee A with an effective date of January 1. Enrollee B pays their first month’s premium on time, and the enrollee’s coverage is effectuated for January 1. The issuer bills Enrollee A and Enrollee B for premiums in February and March. Enrollee A and Enrollee B pay in full. While generating the April billing invoices, the issuer’s billing system malfunctions, causing the issuer to bill Enrollee A for April’s premium while failing to bill Enrollee B. Enrollee A pays their premium for April coverage, but Enrollee B does not, since they did not receive a bill. The next month, the same malfunction occurs; Enrollee A pays the May premium and Enrollee B does not. The issuer realizes the billing problem while generating invoices for June. Both Enrollee A and Enrollee B reside in State Z, which has retained primary enforcement authority. The State Z Department of Insurance instructs the issuer to forego collection of Enrollee B’s under-billed premium. As long as this policy is applied consistently and in a non-discriminatory manner, the issuer can forego collection of the under-billed premium related to Enrollee B’s account, but it must report such uncollected premium to CMS as being earned/realized income for purposes of MLR and RA.

6.6.2 Collections and Grace Periods for Non-Payment of Under-Billed Premium

When an issuer identifies an amount of premium that has been under-billed, and attempts to collect such amounts, issuers are highly encouraged to allow affected enrollees a reasonable amount of time in which to pay such premium amounts and should take steps to ensure that the time for repayment is adequate in light of the enrollee’s regularly billed monthly premium amounts. QHP and QDP issuers are permitted to allow enrollees to pay under-billed premium in equal installments, in accordance with applicable state law. If a QHP or QDP issuer chooses to allow an enrollee to pay under-billed premium in equal installments, the issuer should provide the enrollee with documentation that clearly defines the amount of under-billed premium that the issuer will add to the regularly-billed monthly premium, as well as guidance informing the enrollee that if they do not pay all under-billed premium installments (as well as all regularly-billed monthly premiums) by the prescribed due dates, they will enter the applicable grace period. Issuers are expected to maintain evidence of this payment plan for under-billed premiums for 10 years (45 CFR 156.705). CMS expects issuers to maintain applicable documentation of the state’s decision, and SOPs demonstrating that payment plans were applied uniformly.

The non-payment of under-billed premium amounts due is treated the same as the non-payment of regular monthly premium amounts with regard to grace periods and premium payment thresholds. Therefore, if an enrollee fails to pay any outstanding under-billed premiums to the QHP or QDP issuer by the date such amounts are due, they enter into the applicable grace period specified by 45 CFR 155.430 and 45 CFR 156.270. Upon triggering the grace period, the entire amount of outstanding under-billed premium can become due, if permitted by state law.

6.6.2.1 Examples

Example 6Z: Enrollee A lives in State Y, which has retained primary enforcement authority of the ACA market reforms. On December 5, Enrollee A completes an application for enrollment through the
FFE Enrollment

FFE, makes a plan selection, and enrolls and effectuates coverage in a QHP with an effective date of January 1 and a premium of $400. The enrollee is eligible for, and elects to receive the benefit of, APTC, applying $300 APTC to premium, leaving them responsible for $100/month. The issuer’s premium due date is the first of each month. Enrollee A reports a change in income that makes them ineligible to receive APTC beginning in April. While generating the April premium bill, the issuer’s billing system malfunctions, causing the issuer to fail to correct Enrollee A’s bill to reflect the full premium due, without APTC. The same malfunction occurs during the generation of the May and June premium invoices, meaning the enrollee was under-billed $900 ($300 each for April, May, and June). The issuer discovers the under-billing error in time to correct the July bill and properly informs its applicable state authority and consults CMS by contacting its CMS Account Manager.

State Y directs the issuer to recoup the enrollee’s under-billed premiums, starting with the April payment. The issuer allows the enrollee six months to repay the under-billed premiums, billing the enrollee an extra $150 for July – December, meaning the enrollee must pay $550 each month to maintain good standing ($400 regular premium, plus $150 under-billed premium installment). Enrollee A pays only $400 of their $550 July premium, and thus becomes delinquent. Because they are no longer receiving APTC, their grace period is determined by State Y, which has a one-month grace period that begins on July 1, the date they entered delinquency. If they fail to pay all their premium due (within the payment threshold, if applicable) by July 31, the issuer must terminate their coverage due to non-payment back to June 30, the last day of good standing pursuant to State Y’s grace period policy, which is the last day of the month before the enrollee’s grace period started.

Example 6AA: Same facts as above, except the enrollee is not eligible for APTC as of July 1. Without APTC, the enrollee’s monthly premium is $200. The enrollee pays $280 for July coverage but pays only $200 for August coverage. Pursuant to State X’s rules, because the enrollee underpaid by $80 for August, they enter into a one-month grace period and termination of their coverage for non-payment of premiums would be retroactive to the last day their account was in good standing (July 31 in this example). To avoid termination of their coverage, the enrollee must pay the entire outstanding amount of under-billed premium ($320) before the end of State X’s grace period. The enrollee pays the issuer $320 on August 28, and the issuer begins normal monthly premium billing for September.

Example 6BB: On December 5, an enrollee completes an application for enrollment through the FFE, makes a plan selection, and enrolls in a QHP, whose issuer does not utilize a premium payment threshold, with an effective date of January 1. The enrollee is eligible for, and elects to receive the benefit of, APTC, and their portion of the monthly premium for which they are responsible is $100. The enrollee pays the first month’s premium, and coverage is effectuated for January 1. The issuer bills the enrollee normally for coverage in February. The enrollee pays their $100 monthly premium in full. While generating the invoices for March, the issuer realizes that the enrollee’s premium has been rated incorrectly and that the proper monthly premium is $120. The enrollee’s new premium goes into effect with QHP A’s March billing cycle. The enrollee resides in State Y, which directs the issuer to recoup the under-billed premium. The issuer informs the enrollee of the discrepancy and, beginning with the March billing, allows the enrollee to pay two monthly installments of $20 in addition to the corrected premium payments of $120 to pay the under-billed premium and bring the account into good standing.

While the enrollee may be eligible for an SEP based on the error, they decide to remain enrolled in the same QHP. The enrollee sends the issuer $120 for March coverage but does not include a $20 under-billed premium installment. Although the enrollee paid the new regular monthly premium for March
FFE Enrollment

($120), the enrollee did not pay the first under-billed premium installment. They enter into a three-
consecutive-month grace period on March 1 and must pay all additional regular monthly premium
billed during the grace period ($120 for April and $120 for May), and the outstanding under-billed
premium amount ($40) by the expiration of the grace period to avoid termination for non-payment of
premium. During the grace period, the enrollee pays the issuer a total of $240. At the end of the three-
consecutive-month grace period, the enrollee still owes the issuer $40, since although they made
sufficient payments to satisfy all regular monthly premiums billed during the grace period ($360), the
enrollee did not remit the under-billed premium amount ($40). The issuer terminates the enrollee’s
coverage, retroactive to the last day of the first month of the grace period (March 31), for non-payment
of premiums. The issuer will receive the enrollee’s APTC for March, and it may retain the premium
the enrollee paid for March, but it must return the APTC paid on their behalf for April and May and
refund the enrollee the premium they paid for April and May ($240).

Example 6CC: Same facts as above, except the enrollee is not eligible for APTC as of March 1. Here,
the enrollee’s monthly premium is $200. If the enrollee pays only $200 for May coverage, failing to
include $20 for the under-billed premium installment, the enrollee enters a one-month grace period,
starting on March 1, as determined by the rules of the enrollee’s state. They must pay the amount of
outstanding under-billed premium ($40) before the expiration of the grace period to avoid termina-
tion of their coverage. During the grace period, the enrollee makes no further payments. Although the
enrollee paid the regular monthly premium of $200 for March, the enrollee failed to pay the under-
billed premium in full by the expiration of the grace period. As a result, the issuer may terminate their
coverage, retroactive to February 28, the last date that the enrollee was in good standing.

6.6.3 Voluntary Termination of Coverage During Repayment of Under-Billed Premium

If an enrollee voluntarily terminates their coverage during the time they are paying under-billed
premium installment payments, the enrollee’s current QHP and/or QDP issuer can, if permitted by
state law, accelerate payment by converting remaining installments, if any, into a lump sum payment
due no earlier than the date the voluntary termination will take effect.

6.6.3.1 Examples

Example 6DD: On December 5, an enrollee completes an application for enrollment through the FFE,
makes a plan selection, and enrolls in a QHP with an effective date of January 1. The enrollee is
eligible for, and elects to receive the benefit of, APTC, and the portion of the monthly premiums for
which they are responsible is $100. The enrollee pays their first month’s premium, and coverage is
effectuated for January 1. While generating the March billing invoices, the issuer’s billing system
malfunctions, causing the issuer to fail to bill the enrollee for that month. The enrollee does not pay the
March premium, since they did not receive a bill. The same malfunction occurs in April, May, June,
July, and August; the enrollee does not pay the monthly premiums for any of those months. The issuer
uncovers the billing problem while generating invoices for September. The enrollee, who is a resident
of State W, owes the issuer $600 of under-billed premiums in addition to their normal monthly
premium payments of $100. State W instructs the issuer to recoup the under-billed premiums,
beginning with the September billing cycle. The issuer allows the enrollee three consecutive months to
repay the under-billed premiums. The issuer informs the enrollee that it will bill the enrollee $300
(normal monthly premium of $100 plus an under-billed premium installment payment of $200) for
September, October, and November coverage. The enrollee pays the issuer $300 for coverage in
September. On September 14, the enrollee informs the issuer that they wish to terminate coverage
FFE Enrollment

effective September 30. The issuer, in accordance with its billing policies and with the rules of State W, immediately bills for the remaining under-billed premiums ($400) in one lump sum, due on September 30, the date the voluntary termination will take effect. The enrollee receives the accelerated repayment schedule and pays the outstanding under-billed premiums.

Example 6EE: Same facts as above but when the issuer bills the enrollee $400 for the under-billed premiums, due on September 30, the date the voluntary termination will take effect, the enrollee sends payment of $200 and makes no further payments. Since the enrollee’s payment is insufficient to satisfy the outstanding amount of under-billed premiums, the issuer can pursue all options allowed under State W’s laws to collect the remaining $200 from the enrollee.

6.7 Payment Redirect

For the initial enrollment with an issuer, once a QI confirms plan selection at HealthCare.gov, the FFE enables redirection of the QI from HealthCare.gov to the issuer’s payment site only if the QI is eligible for payment redirect. For a QI to be eligible for payment redirect, the following criteria must be met:

- The issuer has submitted a valid payment site in its QHP application to Health Insurance Oversight System (HIOS) SSM.
- The QI’s policy is active and has not already been effectuated.
  NOTE: If the consumer receives a Pended Plan Selection (PPS) due to an SEP Verification Issue (SVI), the consumer will not be eligible for payment redirect until the SVI has been resolved and the PPS has been released to the issuer.
- The consumer’s coverage effective date is in the future.
  NOTE: After the effective date of the policy, the consumer will not be eligible for payment redirect. For example, if a new policy is created with a newborn SEP, and the effective date is retroactive, the consumer will not be eligible for payment redirect.
- For dental plans only, a consumer will only be able to complete the payment redirect if the dental policy has a guaranteed premium.
  NOTE: If a dental policy has an estimated premium, the consumer will not be eligible for payment redirect.

If the QI selects plans from more than one issuer, the FFE enables multiple payment redirects, with each redirect occurring in a separate window. Payment redirect typically occurs before the FFE generates the 834 enrollment transaction to the QHP issuer. Therefore, at the time of payment redirect, the QHP issuer often does not have any information on file regarding a QI’s plan selection and, if eligible, the APTC amount selected. To address this, the FFE electronically securely transfers basic information in the redirection to the issuer’s payment portal so the QHP issuer can accept payment. Information sent in the payment redirect generally includes subscriber information, plan selection, the QI’s portion of premium due, and the amount of APTC applied to the premium.\(^5\)

QHP issuers may, but are not required to, accept payment online. Enrollees similarly are not required to make online payments. CMS considers it a best practice for plans to accept payment immediately to expedite effectuation of enrollments. If a QHP issuer is not capable of accepting online payment at the time of redirect, or elects not to do so, CMS provides standard language to QIs that the issuer will bill them for premium payment.

FFE Enrollment

If a QI completes plan selection via the Marketplace Call Center, or in any case when the QI is not redirected online to the QHP issuer to make an initial premium payment (including where payment is made after the plan effective date but before the premium payment deadline established by issuer), the QI may contact the selected QHP issuer to arrange payment (typically by phone). Since QIs may contact issuers by phone for premium payment or other premium issues, CMS expects QHP issuers’ customer service staff to be equipped with telephonic scripts to handle such calls.

Once a QI has paid their portion of the premium and the issuer has sent a confirmation file to the FFE, the issuer must send the enrollee an enrollment information package consistent with 45 CFR 156.265(e). Appendix A – Sample Welcome Letter includes an example of the content an issuer might consider including in the cover letter as part of the enrollment package.

6.8 Premium Payment Methods

QHP issuers are required to accept paper checks, cashier’s checks, money orders, EFTs, and all general-purpose prepaid debit cards as methods of payment. Further, according to 45 CFR 156.1240(a)(2), the QHP issuer must present all payment method options equally for a QI to select the preferred payment method.

In accordance with 45 CFR 156.1240(a)(3), issuers must also accept premium payments made by or on behalf of an enrollee from an individual coverage Health Reimbursement Arrangement (HRA) (sometimes referred to as an ICHRA) or qualified small employer Health Reimbursement Arrangement (QSEHRA) in which the enrollee is enrolled.

QHP issuers may accept payment of the initial premium by a method that is exclusive to the initial premium. For example, payment redirect may allow payment of the initial month’s premium by credit card, even though the issuer does not accept credit cards as a method of payment for regular, monthly premiums.

Application of premium payment methods must not improperly discriminate against any QI or group of QIs. Issuers may not offer a discount on premiums to QIs who elect a specific type of premium payment method (e.g., EFT). Additionally, issuers may not apply additional fees to QIs based on their choice of valid payment method. For example, an issuer may not pass on administrative fees for processing a premium payment via credit card.

6.9 Payment of Premium by a Third Party

Under 45 CFR 156.1250, issuers offering individual market QHPs, including QDPs, and their downstream entities, must accept premium and cost-sharing payments on behalf of plan enrollees from the following third-party entities (in the case of a downstream entity, to the extent the entity routinely collects premiums or cost-sharing):

1. A Ryan White HIV/AIDS Program under title XXVI of the Public Health Service Act
2. An Indian tribe, tribal organization, or urban Indian organization
3. A local, state, or Federal government program, including a grantee directed by a government program to make payments on its behalf

56 General-purpose prepaid debit cards include those issued by state agencies for the purpose of paying for benefits, including healthcare.
FFE Enrollment

If an enrollee or third-party entity notifies the QHP issuer of coordinated premium payment with one of the third-party entities described in 45 CFR 156.1250, issuers should allow for timely premium payment to prevent termination of enrollments for non-payment. If a third-party entity provides notification, the issuer should continue to allow for timely premium payment to prevent termination of enrollments for non-payment.

6.10 Enforcement Discretion Regarding FEMA-Designated Natural Disasters

If issuers comply with any state regulatory authority’s request to extend payment deadlines and delay cancellations for non-payment of premium in reaction to a natural disaster or other emergency disruption within a state, CMS may exercise enforcement discretion with regard to regulatory requirements such as the deadline for payment to effectuate coverage and the deadline for payment of premiums under grace periods, including for individuals receiving APTC. For future APTC audits, CMS expects issuers to maintain applicable documentation of the state regulatory flexibility for at least ten years, and SOPs demonstrating this flexibility was applied uniformly. Information about PBP audits can be found in Section 18, Policy-Based Payment (PBP) Two-Phase Audit Approach Overview.
FFE Enrollment

7. TERMINATIONS (APPLICABLE TO THE INDIVIDUAL MARKET FFE, SBE-FPS, QHPs/QDPs)

7.1 Introduction

A termination is the end of an enrollee’s coverage or enrollment in a Qualified Health Plan (QHP) or Qualified Dental Plan (QDP) through an Exchange occurring after their coverage effective date. A termination may be either voluntary (i.e., initiated by the enrollee or the employer) or involuntary (i.e., initiated by the QHP/QDP or the Federally-facilitated Exchange (FFE). Issuers must notify the Exchange of involuntary terminations. If an enrollee’s coverage or enrollment through an Exchange is terminated, the QHP or QDP must provide coverage from the coverage effective date through the termination date.

The QHP/QDP issuer, or the FFE, can initiate an involuntary termination of an enrollee’s coverage or enrollment through the FFE. A termination can be effective in the future (e.g., for a termination requested by the enrollee), or retroactively (e.g., if the enrollee died, or failed to pay premiums due by the end of a grace period). When an enrollee changes QHPs/QDPs, the termination of the enrollment through the Exchange in the initial QHP/QDP is effective the day before coverage in a different QHP/QDP becomes effective, even in cases of retroactive enrollment.

An Exchange may establish operational standards for QHP and QDP issuers for implementing terminations, cancellations, and reinstatements. See 45 CFR 155.430 regarding terminations of enrollment through an individual market Exchange. The following are operational standards for the FFE.

Pursuant to 45 CFR 156.270(b)(1), issuers must send termination notices, including the termination effective date and reason for termination, to enrollees for all termination events.

7.2 Enrollee Requested Terminations

In accordance with 45 CFR 155.430(b)(1), enrollees have the right to terminate their coverage or enrollment in a QHP/QDP through an Exchange. Enrollees in a QHP must request a voluntary termination of their coverage or enrollment through the FFE. Enrollees in a QDP, however, may contact the QDP issuer directly to request a voluntary termination of their coverage; the QDP issuer then notifies the FFE of the termination using Enrollment Data Alignment (EDA). According to 45 CFR 155.430(d)(2), an enrollee who voluntarily terminates coverage or enrollment through the Exchanges, at the option of the Exchange, will be granted same-day or prospective coverage termination dates based on the date of their request. QHP issuers are encouraged to remind enrollees to report voluntary termination requests to the Exchange.

In accordance with 45 CFR 155.430(b)(1)(iv), CMS must provide approval for an enrollee to retroactively terminate or cancel their coverage or enrollment in a QHP/QDP if they experienced an Exchange error or a technical error that did not allow the enrollee to terminate their coverage or enrollment through the Exchange at the time of their request. The requests will be sent to issuers via a Health Insurance Casework System (HICS) case. External comments will be added by a CMS caseworker denoting the approval of the enrollee’s request, or if denied consideration for retroactive termination based on polices issuer have pursview over (i.e., non-payment of premiums, and free look
provisions). Issuers must initiate a plan request for CMS review if the HICS case in this scenario was misrouted to the issuer initially, prior to CMS reviewing the case.

Refer to Section 6.4.4, Termination Occurring During a Grace Period, for guidance regarding terminations during a grace period.

7.3 Termination of an Enrollee’s Coverage in the FFE Due to Report of Death

Enrollees who are enrolled through the FFE or who are application filers should report the death of an enrollee through their HealthCare.gov account or by calling the Marketplace Call Center. This is important because the FFE conducts redeterminations of eligibility consistent with 45 CFR 155.330 for the remaining members of the household. If a qualified individual (QI) or representative contacts the issuer directly, the issuer should provide the following directions57:

- The termination of an enrollee’s coverage due to death may be reported by an application filer. If the person taking action to terminate the deceased’s coverage is the person who filed the application, they can do so online through HealthCare.gov and then contact the Marketplace Call Center at 1-800-318-2596 (TTY: 1-855-889-4325) to report the date of death (otherwise the termination will be prospective only). Alternatively, an application filer can contact the Marketplace Call Center to both initiate the termination and report the date of death simultaneously. If the application filer does not have access to the online account, the termination of the deceased’s coverage can only be initiated through the Marketplace Call Center. A QI who meets the definition of an application filer, as described in 45 CFR 155.20, is allowed to update the application for the remaining members of the household if the deceased filed the application.

- If the individual reporting the death is not an application filer, they must submit documentation of death to the FFE. Individuals in this circumstance should submit documentation directly to the FFE. Documentation may include a death certificate, obituary, power of attorney, proof of executor, or proof of estate. The documentation, or an attached cover note, should provide the following information:
  - Full name of the deceased
  - Date of birth of the deceased
  - FFE application ID (if known) of the deceased
  - SSN (if known) of the deceased
  - Contact information for the person submitting the documentation, including the following:
    - Full name
    - Address
    - Phone number

- All documentation should be mailed to:
  Health Insurance Exchange ATTN: Coverage Removal
  Dept. of Health and Human Services
  465 Industrial Blvd.
  London, KY 40750-0001

57 Please note that issuers cannot contact the Marketplace Call Center directly to report an enrollee’s death; if an issuer has reason to believe an enrollee is deceased, they should reach out to the estate and encourage them to report the death to the FFE following the process outlined in this section.
FFE Enrollment

The Marketplace Call Center will attempt to contact the QI who submits documentation of death regarding the termination of the deceased and reenrollment of any remaining enrollment group members. The remaining QIs or enrollees may need to update tax filing status, financial information, or other information on their FFE applications. These additional changes may qualify the remaining enrollees for a Special Enrollment Period (SEP).

When an enrollee’s coverage is being terminated due to death, the issuer receives the appropriate 834 enrollment transaction. The effective date generated by the FFE system will be prospective. The Marketplace Call Center will open a case in the HICS and assign the case to the issuer for retroactive enrollment of the remaining QI so there is no lapse in coverage.

The individual who reports the death should contact the issuer regarding any applicable premium refunds or adjustments. Issuers should process premium refunds or adjustments in accordance with applicable law and existing industry practice.

Example 7A: An enrollee, who is the subscriber in the enrollment group, contacts the FFE on August 7, to report that their spouse died three weeks earlier on July 14. As a result of their spouse’s death, the FFE representative informs the QI that they now qualify for an SEP. The FFE confirms the date of death and assigns the issuer a Category 2 (Plan and Issuer Concerns) HICS case requesting a retroactive termination date of July 14 for the coverage of the spouse.

Additional information about terminations due to death is included in Section 11.6, Deceased Enrollee Periodic Data Matching.

7.4 Aging-off Terminations

Section 2714 of the Public Health Service Act, implemented at 45 CFR 147.120, states that a group health plan or a health insurance issuer offering group or individual health insurance coverage that makes available dependent coverage of children must make such coverage available for children until the attainment of 26 years of age. A state may not have a rule that conflicts with this standard. Examples of prohibited eligibility criteria for child dependents include standards related to place of residence, student status, disabled veteran status, marital status, or financial dependence. Some states have more generous rules that allow certain individuals to remain covered as child dependents beyond age 26 if additional criteria are met. Additionally, many FFE issuers set maximum child dependent ages above their state minimums. Information on specific states that extend the age limit beyond 26 is not included in this manual and must be obtained directly from the state’s regulatory authority.

The FFE applies the issuers’ maximum child dependent age rules, which issuers submit during QHP certification, during annual auto-reenrollment, to determine whether a dependent is eligible to enroll in a parent’s coverage when a family actively reenrolls during the Open Enrollment Period (OEP) or an SEP. However, nothing prevents an adult child dependent who has aged out of dependent coverage under their parent’s coverage from being eligible for enrollment in a QHP or for advance payments of the premium tax credit (APTC) eligibility, and thus the FFE will send to the issuer during auto-reenrollment, or when a family actively enrolls during an SEP or OEP, a separate enrollment for the adult children dependents to enroll separately in the same coverage with their allocation of the family’s APTC, subject to the requirement for the new adult child subscriber to make a binder payment (or the applicant may elect to end coverage). If an enrollee who has attained the maximum applicable age returns to the Marketplace and updates their application to reflect this change, they will have the opportunity to enroll in a separate plan or end coverage. However, FFE issuers may not terminate
coverage during the plan year for an adult child dependent who turns 26 or the maximum applicable age under state law or the plan’s business rules. At the end of the plan year, the issuer may renew the coverage but exclude from the coverage the adult child dependent who is over age 26 or the maximum applicable age under state law or the plan’s business rules, and the adult child dependent, if eligible, will be enrolled into their own plan, with APTC if applicable, during the annual Batch Auto-Reenrollment (BAR) process.

7.5 Issuer Termination Notice Requirements

In the 2021 Notice of Benefit and Payment Parameters, CMS finalized a proposal to amend 45 CFR 156.270(b)(1) to require issuers to send termination notices for all termination events described in 45 CFR 155.430(b).

This requirement includes the following scenarios (non-exhaustive):

- Enrollee-initiated terminations
- Issuer-initiated terminations
- Cancellations
- Enrollee fails to pay binder
- Enrollee changes plans within the same issuer
- Enrollee is auto-reenrolled, but changes issuers during Open Enrollment
- Termination sent by the FFE

Practically, this means that issuers should generally send a termination notice whenever the policy ends or there is a change in the FFE-assigned policy ID in the case of Exchange coverage that continues for some family members albeit with a new subscriber. Termination notices do NOT need to be sent when issuers use the CMS standard renewal or discontinuation notices to explain future coverage at the end of the plan year.

In accordance with 45 CFR 156.270(b)(1), the termination notice must include the effective date and reason for the termination and must be sent “promptly and without undue delay.” The termination reason may be brief, and issuers can refer to the MRC or AMRC on the 834 transaction or HICS directive for information on the termination reason. If there is no reason for termination listed, the issuer may simply state that the FFE has terminated coverage. CMS does not provide model termination notices for every scenario, but see Appendix C – Sample Termination Letter for a sample termination letter.

7.5.1 Examples

Example 7B: During Open Enrollment, a consumer selects a QHP with Issuer A on HealthCare.gov. However, they fail to make the binder payment by the deadline established by the issuer, and as a result their coverage is never effectuated. Issuer A must send the enrollee a termination notice

---

58 See 45 CFR 155.430(b)(3).
59 An exception is situations in which the tobacco rate changes, since X12 rules require a new FFE-assigned policy ID even if a new policy was not issued.
60 Issuers can review the latest version of the notices under the Health Insurance Market Reforms heading, and the Guidance subheading, at Regulations and Guidance | CMS.
informing the enrollee that their coverage was terminated effective January 1 due to failure to pay binder.

**Example 7C:** An enrollee who is enrolled in a policy with Issuer C is auto-reenrolled into a different product effective January 1 through the Batch Auto-Reenrollment (BAR) process and does not return to HealthCare.gov during the OEP to select a different plan. Issuer C sends the required standard reenrollment notice, which satisfies the obligation at 45 CFR 156.270 to notify the enrollee of the termination of their prior coverage and notifies them of their reenrollment in new coverage. Issuer C is not required to send the enrollee a separate termination notice at the end of the plan year.

**Example 7D:** Same scenario as in Example 7C, except that the enrollee does return to HealthCare.gov in November during the OEP and selects a different plan with Issuer D. Issuer C must send the enrollee a termination notice informing the enrollee that their coverage was terminated effective December 31 because they chose to end it.

61 Ibid, see Attachment 4.
FFE Enrollment

8. REINSTATEMENTS (APPLICABLE TO INDIVIDUAL MARKET FFE, QHPs/QDPs)

8.1 Introduction

A reinstatement is the undoing of a termination or cancellation to correct an issuer or Exchange error, or reflect an Exchange Appeals decision, and results in restoration of an enrollment to the original coverage effective date with no break in coverage. Issuers cannot reinstate policies cancelled or terminated by the enrollee or at the enrollee’s direction without a Health Insurance Casework System (HICS) case.

Similarly, the reinstatement process requires a HICS case for policies terminated because the Exchange determined the enrollee was no longer eligible for Exchange coverage. Some common permitted reasons for reinstatements are:

- Erroneous Termination/Cancellation of an Enrollment by an issuer.
- Erroneous Termination/Cancellation of an Enrollment Initiated by an agent or broker (A/B).
- Erroneous Termination/Cancellation of an Enrollment by an enrollee (Dental only).
- Erroneous Death Notification.
- Exchange Error/System Limitations.
- Assister Error.

8.2 Reinstatements in the FFE

To reinstate an enrollment record, the issuer must submit the reinstatement using an Inbound 834 (IC834) transaction, through the monthly Enrollment Data Reconciliation process via the RCNI, or through the dispute process to the Enrollment Resolution and Reconciliation (ER&R) contractor. Although issuers still have the option to utilize the monthly Enrollment Data Reconciliation and ER&R channels to reinstate a policy, CMS policy is for issuers to use the IC834 reinstatement method whenever possible, as it provides a streamlined and more efficient method for issuers to update the Federally-facilitated Exchange’s (FFE’s) enrollment data with the issuer’s enrollment data. In order for a policy to be eligible for an Inbound reinstatement, the policy must have been previously cancelled or terminated by the issuer with an end date prior to the current date (dental policies voluntarily terminated or cancelled by the enrollee may however be reinstated using the IC834 reinstatement method), be from the current or immediately prior plan year (prior year reinstatements will be accepted until May 1), and still be in a terminated or cancelled state in the FFE. The issuer reactivates the enrollment as if it were never terminated or cancelled, and provides coverage based on the original effective date, maintaining all out-of-pocket accumulators. Regardless of channel (IC834 reinstatement vs. Monthly Recon vs. ER&R), the issuer should submit the reinstatement as soon as possible after they determine that the member was erroneously terminated (see Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes), for more information on submitting through ER&R).

Issuers reinstating a policy via IC834 should not send an IC834 termination/cancellation and an IC834 reinstatement within the same 24-hour time window. This will prevent the possibility of processing both of these transactions in the undesired processing order (i.e., reinstatement processed before
FFE Enrollment

termination, when desired outcome was termination processed before reinstatement). Additionally, IC834 reinstatements for health policies will only be accepted for policies that have been terminated or cancelled by issuers for reasons of:

- Non-payment
- HICS Directive
- Fraud
- Free Look
- Anti-Duplication
- Out-of-Area
- Other (Additional Maintenance Reason Code [AMRC] of CANCEL-OTH or TERM-OTH)

Dental policies seeking reinstatement will also be accepted for the reasons listed above, but will also be accepted for additional reasons of:

- Voluntary withdrawal.
- Policy that ended as a result of a Change in Circumstance (CIC) (AMRC of CANCELCIC), such as an assister who helped an existing Qualified Health Plan (QHP) and Qualified Dental Plan (QDP) enrollee with a QHP plan selection and skipped the QDP selection step.

The monthly Enrollment Data Reconciliation process also only allows issuers to reinstate policies that were terminated or cancelled by the issuer. However, the monthly Enrollment Data Reconciliation process has a little more flexibility in allowing reinstatements to be processed when there are multiple segments that have coverage dates that overlap. The monthly Enrollment Data Reconciliation process has logic to clean up overlaps. QDPs can reinstate policies terminated or cancelled by the consumer, call center, or A/B erroneously through the monthly reconciliation process.

The Enrollment Dispute process via ER&R will allow issuers to reinstate policies that were terminated by the enrollee, the FFE, or the issuer. The Enrollment Dispute process is the only process that can allow reinstatements to be processed when the termination or cancellation is not caused by the issuer, with the exception of QDPs. This process is used when issuers cannot reinstate using IC834 or monthly Enrollment Data Reconciliation process. Issuers can submit two types of Enrollment Disputes: HICS Direct Dispute or ER&R Enrollment Dispute Form.

Some common examples of when issuers may use this Enrollment Dispute process are:

- If an enrollee’s QHP or QDP is erroneously terminated by the Marketplace Call Center, the Marketplace Call Center will generate a HICS case to reinstate the terminated policy due to Marketplace Call Center error.
- If an enrollee’s QHP or QDP coverage is erroneously terminated by themselves or someone acting on their behalf with a future termination date (e.g., consumer’s coverage has a termination/end date set for the end of month), but a HICS case was entered before the termination date to reinstate coverage as if never terminated.
- There are also some circumstances where an Appeals determination will ask an issuer to reinstate an Exchange enrollment that was terminated for no longer being eligible (NLE) for Exchange coverage. Issuers must use the HICS Direct Dispute process to request the reinstatement. These processes are explained more in Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes).
FFE Enrollment

Finally, the Enrollment Dispute process can process some reinstatements that need to be processed before the updated RCNI is submitted.

- These reinstatements require using the reinstatement tab on the Enrollment Dispute Form.
- These reinstatements require an end date of December 31.
- This process is only for when the IC834 reinstatement process will not work (multiple overlapping segments).
- These reinstatements do not require the RCNI to reflect the correct enrollment date and effectuation status.

The Operational Analytics and ER&R contractors provide the Marketplace Call Center with reports flagging individuals for whom issuers have submitted reinstatement disputes. The Marketplace Call Center representative advises an impacted enrollee that they are still enrolled in the plan and that CMS is working to correct the status in HealthCare.gov. If the impacted member has had a CIC and is seeking to update their information with the FFE, the Marketplace Call Center representative will process as follows, depending on whether the CIC triggers a Special Enrollment Period (SEP):

- If the CIC triggers an SEP, the Marketplace Call Center representative processes the CIC via an 834 enrollment with a prospective date, by updating the application. Routine overlap cleanup runs eliminate the duplicate coverage, providing the original eligibility for the segment of the enrollment starting January or later, and the post-CIC eligibility for the policy segment going forward.
- If the CIC does not trigger an SEP, the Marketplace Call Center representative may initiate a HICS case for the issuer for review. The FFE regularly sends reinstatement requests from individuals to issuers via HICS. CMS expects issuers to review these matters and determine if issuer error occurred warranting a reinstatement.
- If there is a claim of Exchange error or misrepresentation that led to the reinstatement request, the case should be reviewed by a CMS caseworker. If no external notes are present from a CMS caseworker in this scenario (approving or denying the request), issuers must initiate a HICS plan request requesting CMS caseworker review.
**9. ENROLLMENT DATA ALIGNMENT (APPLICABLE TO INDIVIDUAL MARKET FFE, QHPs/QDPs)**

### 9.1 Introduction

Enrollment Data Alignment (EDA) ensures that Qualified Health Plan (QHP) issuers, Qualified Dental Plan (QDP) issuers, and the Exchange have equivalent enrollment information. Accurate enrollment information allows CMS to make correct payments for advance payments of the premium tax credit (APTC), and to assess Federally-facilitated Exchange (FFE) user fees. It also prevents multiple enrollments by one individual and ensures that Marketplace enrollees receive an accurate Form 1095-A.

The intent of this section is to provide issuers with an overview of the processes necessary to align enrollment data with CMS on a monthly basis. Participation in EDA is essential for data consistency and to support correct policy-based payments, user fee calculations, consumer Form 1095-A generation, batch auto-renewal, and follow-on actions by enrollees on the FFE. FFE EDA between CMS and issuers is ensured by Inbound 834 (IC834) transactions, the Enrollment Data Reconciliation process, and the dispute resolution process.

**IC834** should always be used whenever possible to make basic updates to the status of an enrollment. Although certain data may be updated by both IC834 and monthly Enrollment Data Reconciliation, IC834 provides a much faster update to the policy and is the preferred method of EDA. These transactions must pass stringent data quality checks and do not allow issuers the flexibility to change certain data elements, such as the Benefit Start Date. The following data elements may be updated using IC834 with the respective transaction type:

- Effectuation Status (Confirmation Indicator): Effectuation, Cancellation
- Issuer-Assigned Subscriber, Member, and Policy ID: Effectuation, Maintenance (ICM834)
- Benefit End Date and Financial End Dates: Cancellation, Termination
- Do Not BAR (Batch Auto-Reenrollment) Indicator: Termination
- Last Premium Paid Date: Effectuation
- Superseded Indicator: Termination
- Reactivate Coverage: Reinstatement

**NOTE:** In order for an IC834 reinstatement to be accepted, the policy the issuer wishes to reinstate must have been previously terminated or cancelled by the issuer and remain in an issuer-initiated cancelled or terminated status in the FFE system. An exception is for dental policies which were voluntarily terminated or cancelled by an enrollee or agent or broker (A/B). The FFE will accept Inbound reinstatements for dental policies ended for these reasons as well as issuer-initiated action.

**Monthly Enrollment Data Reconciliation** allows issuers and CMS to compare enrollment data before each payment cycle. While IC834s offer haste and disputes a policy-level look at the data, monthly Enrollment Data Reconciliation has greater flexibility to match enrollees between the FFE and issuers and then clean up records using an algorithm. Enrollment Data Reconciliation also has the capability to update more fields on each enrollment record. The FFE creates an enrollment snapshot (Enrollment Pre-Audit File) monthly, providing issuers with a comprehensive view of a single year of FFE enrollment data to use as the basis of reconciliation. This snapshot data is distributed to issuers in
FFE Enrollment

a monthly file. Issuers submit a snapshot of their enrollment system in an inbound enrollment reconciliation (RCNI) file each month. The FFE compares FFE and issuer data field-by-field and flags updates for issuers and the FFE based on a set of business rules regarding enrollment and data ownership. Certain data elements such as APTC and QHP ID are considered “FFE-owned” and other elements such as effectuation status and issuer-assigned IDs are considered “issuer-owned.” The result of this comparison is shared with issuers on the outbound enrollment reconciliation (RCNO) file, and updates FFE data.

While issuers can update the same data elements through Enrollment Resolution and Reconciliation (ER&R) disputes, the monthly Enrollment Data Reconciliation process should be leveraged in all available instances that cannot be handled through IC834 before attempting to update through ER&R disputes. Files must pass basic formatting checks and meet requirements based on enrollment policy and technical business rules before updates are made to the FFE. Refer to Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes).

Issuers should primarily use the monthly Enrollment Data Reconciliation process to update the following fields:

- Benefit Coverage and Financial Dates
- Tobacco Use Status
- Total Premium Amount
- Enrollee Mailing Address
- Agent/Broker Information (only if issuer has received Agent of Record or Broker of Record to document qualified individual [QI] consent)

Resolution of Enrollment and Payment Discrepancies (Disputes) corrections may involve manual inspection of a policy by the ER&R contractor, and direct contact with the issuer, and should represent the smallest contingent of enrollment updates. Refer to Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes).

Though issuers can provide updates to the FFE through any of these processes, issuers should prioritize the IC834 process to make data updates. IC834 transactions are processed on a daily basis and are the best way to ensure the FFE is updated timely. The monthly Enrollment Data Reconciliation process should only be used to update the FFE in situations where the IC834 process is unable to make the necessary updates. The dispute process should be utilized for prior year disputes when the Enrollment Data Reconciliation and IC834 processes have ended and for data scenarios that cannot be resolved via the IC834 or Enrollment Data Reconciliation processes.

Exhibit 21 represents the volume of policy updates performed by each component of EDA in the FFE.
Additional information can be found in the private issuer community on CMSzONE using the following links:

https://zone.cms.gov/document/834-enrollment-0

NOTE: Issuers will need to log in to CMSzONE to access these links.

9.2 IC834

ASC X12 834 transactions between the FFE and issuers are conducted in two ways: outbound 834 (FFE to issuer) and IC834 (issuer to FFE). IC834 processing represents issuer responses to enrollment activity in the Exchange and should be used by the issuer community whenever possible as the first and best means of updating and aligning the enrollment data stored in the FFE, with the issuer’s current enrollment data. An issuer’s submission of an IC834 to the FFE communicates payment/non-payment in the issuer’s system, as well as other updates, by using one of five possible Inbound enrollment transactions:

1. Effectuation-typically generated after the issuer has received initial enrollment information from the FFE in the form of an Initial 834 (I834), the issuer has received a binder payment from a new subscriber, and the policy has been made active in the issuer’s system/records.
2. Cancellation-typically generated when the enrollment is ended with no actual coverage for enrollee(s) due to non-payment, fraudulent activity, directive from a Health Insurance Casework Systems (HICS) case, or other reasons. CMS expects that the issuer will send the appropriate transaction type, (i.e., non-payment vs. other for terminations or cancellations associated with the cancellation).
FFE Enrollment

3. Termination-typically generated following an effectuation when the enrollment is ended after some period of coverage for enrollee(s) due to non-payment, fraudulent activity, directive from a HICS case, or other reasons. CMS expects that the issuer will send the appropriate transaction type, (i.e., non-payment vs. other for terminations or cancellations associated with the termination).

4. Inbound Maintenance-typically generated following an effectuation to update the Issuer-Assigned IDs on file for the FFE policy (Issuer-Assigned Policy ID, Issuer-Assigned Subscriber ID, and Issuer-Assigned Member ID).

5. Reinstatement-typically generated following an inadvertent or erroneous issuer-driven termination or cancellation to re-activate coverage for the FFE policy.

The intended result of IC834 transaction processing is a policy being updated in the FFE, and in order to ensure timely updates are made, IC834s are processed continuously throughout the day. However, IC834 submissions must pass stringent data quality checks and do not allow issuers the flexibility to change certain data elements, such as the Benefit Start Date. The first validations occur at Electronic Data Interchange (EDI) level. EDI platform performs standard Workgroup for Electronic Data Interchange (WEDI) Strategic National Implementation Process Group (SNIP) Levels 1–7 validation on the EDI formatted data elements. If the IC834 passes EDI validation, the issuer will receive positive Interchange (TA1) and Functional Group Level (999) acceptance acknowledgement, and the X12 IC834 will be converted to an XML file and sent to the FFE for further processing. If the IC834 fails EDI validation, issuers will receive a negative TA1, and the file will not be passed to the FFE for further processing.

Once the XML has been generated, the transactions are sent to the FFE. At this point, the second level of validation occurs, and includes checks for matching elements (e.g., benefit start date, policy numbers, and policy status in the FFE). If the IC834 contains errors, issuers will receive a rejected Business Application Acknowledgement (BAA) XML file with error codes, which correspond to a specific error(s) found within the IC834. The BAA will assist issuers in determining what data is incorrect for their IC834 submission, and aid in correctly modifying that data so the rejected IC834 can be resubmitted. If no rejected BAAs are generated, the IC834 will successfully update the FFE database. BAAs are aggregated and sent daily to issuers around 2:00 p.m. ET. Issuers can expect to receive BAAs for submissions made the previous day. Issuers should be aware that positive BAAs are not sent to issuers. If an issuer does not receive negative BAAs for their IC834 submissions and has received positive TA1 and 999 acknowledgements, the submissions can be considered successfully received and processed by the FFE. Additionally, issuers are able to review their IC834 submission metrics through receipt of a weekly Production Operation Summary Report (PO Report). This report contains transactional details, such as total accepted and rejected IC834 submissions, and granular data on the reason for rejected BAAs. PO Reports are sent weekly to issuers (typically on Wednesday) and contain IC834 submission data from the previous week (Tuesday to Monday). The Electronic File Transfer (EFT) function code for the PO Reports is OP834T.

The FFE delivers monthly Enrollment Alignment Performance Summary (EAPS) Reports that establish the expected acceptance and reliance rates for 834 submissions. Issuers are expected to make their best effort to achieve and maintain the metrics established by CMS. Issuers are also expected to respond to inquiries from the FFE or Account Managers to explain the reason(s) for not meeting the established rates and provide plans to meet the goals within a reasonable time frame.
FFE Enrollment

As previously mentioned, IC834 should be used by issuers to perform updates to enrollment data in the FFE whenever possible. However, there are instances when certain data cannot be updated via IC834, or certain scenarios prohibit the use of IC834. In these cases, issuers should utilize the Enrollment Data Reconciliation or ER&R channels in order to make the necessary enrollment data updates.

For more information on IC834s, refer to the following guidance, located on CMSzONE at https://zone.cms.gov/document/834-enrollment-0:

- IC834 CMSzONE Page
- M834 Operations Manual
- CMS ASC X12 834 Companion Guide
- ASC X12 TR3 005010 | 834 Benefit Enrollment and Maintenance Implementation Guide

NOTE: Due to copyright laws, this guide must be purchased directly from X12.

For questions or inquiries about IC834, contact Inbound834@cms.hhs.gov.

9.3 Enrollment Data Reconciliation and Pre-Audit Files

FFE Enrollment Data Reconciliation is a monthly process, starting each month with a comprehensive extract of the FFE’s enrollment data that is typically pulled at 6:00 p.m. ET on the 15 of the month. This extract provides a snapshot of enrollment data in the FFE for enrollment and payment purposes. It is then formatted and distributed to each QHP and QDP issuer as an Enrollment Pre-Audit File. The Enrollment Pre-Audit File is not in EDI 834 format; it is a pipe-delimited flat file that issuers may choose to process directly or convert into a readable format such as Excel.

Each Enrollment Pre-Audit File refers to a distinct plan year, is aggregated by Trading Partner ID, and then transmitted to issuers via EFT. These files are delivered to the same location an issuer receives daily EDI 834 traffic. Enrollment Pre-Audit Files can be identified by the function code AUDYY (where YY is the final two digits of the plan year referenced by the file) for plan years 2017 and earlier, or AUDY (where Y is the final digit of the plan year referenced by the file) for plan years 2018 or later.

Upon receipt of an Enrollment Pre-Audit File, the issuer should compare the file to the enrollment data in the issuer’s system and process any enrollments or updates from the Pre-Audit File that are missing or incorrect in the issuer’s system. If the issuer feels there is incorrect policy or member data reflected on the Pre-Audit File, the issuer should use the appropriate EDA channel (IC834, monthly Enrollment Data Reconciliation, or ER&R disputes) to update the FFE. If CMS has determined that a specific enrollment action failed to convey to the issuer via standard EDI 834 transaction, the corresponding enrollment record(s) in the Enrollment Pre-Audit File will be flagged in the Missing Outbound 834 Indicator field. Issuers should closely review these records and apply the necessary updates to their system each month.

Likewise, if an EDI 834 transaction failed but was later successfully retransmitted to the issuer via I834RT File, the corresponding enrollment record(s) on the Enrollment Pre-Audit File will be flagged as such. Issuers should ensure the enrollment updates have been made in their system either via the I834RT file, or the Enrollment Pre-Audit File.

Also, as part of monthly Pre-Audit processing, CMS identifies instances of overlapping or duplicate coverage for the same individual across the FFE. In cases of duplicate or overlapping coverage, CMS will align the enrollment records (with deference to the latest action taken by the enrollee) to eliminate
the overlap or duplicate record. This may result in adjustment of benefit coverage dates or cancellation of an enrollment span on the FFE. Enrollment records that have been adjusted by the overlap process are flagged accordingly on the Enrollment Pre-Audit File with an indicator that informs the issuer as to whether the overlap was within the same Health Insurance Oversight System (HIOS) ID, or with a different HIOS ID. **Issuers must act upon the cancellations and terminations flagged on the Pre-Audit File as this information will not be sent via EDI 834.** Records impacted by the overlap cleanup are only flagged in the month where the overlap was corrected; as such, issuers must address the records flagged by the cleanup on every Pre-Audit File received from the FFE.

CMS also conducts a monthly date of birth (DOB) cleanup process. When a DOB change is entered in the FFE, the DOB and premium are adjusted as needed going forward, but no update is made to the historical records for that plan year. The DOB cleanup process rolls back the changes to prior policies and policy segments on the same application. If the DOB change on the historical update would cause a change in premium, the premium adjustment and DOB will be applied to historical records. If the premium on the historical record had been previously updated through the Enrollment Data Reconciliation process, a DOB change will be made but no update to the premium will be applied. Issuers should note that APTC will only be adjusted by this cleanup if the new Total EHB (essential health benefits) Premium would be lower than the Applied APTC Amount; in that case the Applied APTC Amount would be lowered to match the new Total EHB Premium.

As with the overlap cleanup process, issuers will only receive notification of adjustments made by the DOB cleanup on the monthly Pre-Audit File. **Issuers must act upon the DOB and any financial changes flagged on the Pre-Audit File as this information will not be sent via EDI 834.** Records impacted by the DOB cleanup are only flagged in the month where the historical records were corrected; as such, issuers must address the records flagged by the cleanup on every Pre-Audit File received from the FFE.

Specifications for Standard Issuer Enrollment Data Files may be found at the above link.

In order to identify discrepancies and reconcile enrollment data with the FFE, each month issuers are required to similarly extract their enrollment data by plan year and submit an Inbound Enrollment Reconciliation (RCNI) File to the FFE. Issuers must submit the RCNI File by the deadline outlined on the Pre-Audit and Reconciliation Calendar located at [https://zone.cms.gov/document/enrollment-data-reconciliation](https://zone.cms.gov/document/enrollment-data-reconciliation). Submittal or non-submittal of your RCNI will be reflected in your “Reconciliation Submission” Enrollment Alignment Performance Summary (EAPS) metric score.

As with the Enrollment Pre-Audit File, the RCNI File is a pipe-delimited flat file that will be submitted to the FFE via EFT. The RCNI File is a snapshot of the issuer’s enrollment data for a specific plan year and must include information about current enrollees, cancelled enrollment records, and terminated enrollments. The RCNI Files include both enrollment and financial data elements. The enrollment data submitted by the issuer on the RCNI File should be aligned to transactions received from the FFE through the date of that month’s FFE Pre-Audit Extract (typically the 15 of the month) to reduce timing issues when compared to the FFE data. For additional guidance and technical documentation on the RCNI, refer to the Enrollment Data Reconciliation section in the private issuer community.
FFE Enrollment

The Reconciliation Quality metric in the EAPS Report will reflect the issuer’s RCNI success rate.

CMS compares the data extracted from the FFE Extract to each issuer’s RCNI Files through an automated process. The automated process matches records based on a unique collection of field information and identifies discrepancies between issuer and FFE data. This process uses current enrollment policy rules to determine if the discrepancy needs to be resolved in the FFE or by the issuer (or in some cases both the FFE and the issuer must update a value). The results of the record-matching and data comparison are distributed to issuers in a file called the Outbound Enrollment Reconciliation (RCNO) File. The RCNO File provides record-level flags on each record to show the results of matching and highlight records on which the FFE or issuer are expected to take action; field-level flags are also provided on matched records in the file to show the results of field-level data comparison and, if necessary, which system is expected to update to the other’s value. The “E” and “P” Flags metric in the EAPS Report may reflect the results of the record-level matching. If the FFE is unable to find a match for an FFE policy in the issuer data, the UFEs metric in the EAPS Report may reflect these results.

As with the Enrollment Pre-Audit File, each RCNO File is aggregated by Trading Partner ID and transmitted to issuers via EFT. These files are delivered to the same location an issuer receives daily EDI 834 traffic. RCNO Files can be identified by the function code RCNOYY (where YY is the final two digits of the plan year referenced by the file) for plan years 2017 and earlier, or RCNOY (where Y is the final digit of the plan year referenced by the file) for plan years 2018 or later.

For additional information on the business rules used in automated Enrollment Data Reconciliation and the record and field-level flags on the RCNO File, refer to the Enrollment Reconciliation Education Suite located in the private issuer community on CMSzONE at https://zone.cms.gov/document/enrollment-data-reconciliation.

It is expected that issuers will correct the enrollment data in their systems based on the updates specified for the issuer in the RCNO File. If the issuer disagrees with a discrepancy resolution flag set by the automated process or needs to resolve a discrepancy in a way that cannot be done through automated Enrollment Data Reconciliation, they may submit a dispute to the ER&R contractor for resolution.

9.4 Resolution of Enrollment and Payment Discrepancies (Disputes)

As described in Section 9.3, Enrollment Data Reconciliation and Pre-Audit Files, CMS regulations and guidance require issuers that participate in the FFE to reconcile their records monthly. The monthly Enrollment Data Reconciliation process is an automated process to compare the FFE data to the issuer enrollment records to determine any discrepancies. This process uses current CMS enrollment policies and technical business rules to determine when the FFE’s records may be updated and when the issuer should update their system to match the FFE. If an issuer disagrees with a decision made in the automated monthly Enrollment Data Reconciliation process, they can file a dispute to the ER&R contractor. The ER&R contractor is responsible for resolving issuer-initiated enrollment and payment discrepancies that cannot be resolved through the automated Enrollment Data Reconciliation process or the IC834 process.

ER&R applies automated and manual rules to ensure disputes are resolved in accordance with approved enrollment and payment guidelines. Following the resolution of any discrepancies, the
ER&R contractor submits changes to the FFE or notifies issuers to update their respective data. Issuers see updates to the FFE reflected on the Pre-Audit File within 1–2 payment cycles.

Although disputes will be processed for three years after the initial coverage year, issuers are strongly encouraged to submit disputes as soon as possible upon identification of a discrepancy to help ensure the FFE issues an accurate Form 1095-A to individuals in advance of the tax filing deadline as well as ensure proper and timely payments. To help ensure payment and Enrollment Disputes are processed in the same cycle (when possible), issuers should submit disputes by the deadline identified on the Pre-Audit and Reconciliation Calendar located at https://zone.cms.gov/document/enrollment-data-reconciliation.

9.4.1 Disputes Timeline

It is important that issuers resolve policy data alignment inaccuracies during the plan year as quickly as possible. By eliminating data inaccuracies, issuers can avoid inaccurate APTC and user fees, incorrect BAR enrollments, and inaccurate Forms 1095-A. CMS has established timelines issuers must follow for submitting disputes.

9.4.2 90-Day Requirements

Per 45 CFR 156.1210(a), issuers have 90 calendar days from receiving the payment and collections report to review discrepancies and submit disputes. Issuers should pay attention to their 90-Day Inaccuracies metric on the EAPS Reports, as this metric will indicate that the issuer has disputes over 90 days that they need to submit. Starting in 2023, CMS included a dispute timeliness metric in the EAPS Reports, Average Dispute Age, that will serve as notification to issuers if they are not submitting disputes in a timely manner.

9.4.3 Disputes Over 90 Calendar Days; 15-Day Requirement

It should be rare, but in a circumstance where the issuer identifies a discrepancy that is outside of the initial 90-day period, the issuer must notify CMS within 15 calendar days of identification of a dispute per 45 CFR 156.1210(b).

9.4.4 Post-Deadline Inaccuracies (PDIs)

Starting January 1, 2024, per 45 CFR 156.1210(c), issuers may only dispute inaccuracies identified after the initial 90-day period up to three years after the end of the plan year to which the post-deadline inaccuracy (PDI) relates. After this time frame, if an issuer discovers a discrepancy that, at the HIOS level, results in a net payment owed to the Department of Health & Human Services (HHS), the issuer must notify the FFE, State-based Exchange on the Federal Platform (SBE-FP), or State-based Exchange (SBE) (as applicable) and repay any such overpayment. PDI-related overpayments will not result in an update to the FFE data and subsequently will not generate consumer Forms 1095-A. In addition, HHS will not pay an issuer after the three-year reporting deadline for any underpayments discovered.

To start the PDI repayment to HHS, an issuer must fill out the PDI request form located on CMSzONE at https://zone.cms.gov/document/enrollment-resolution-and-reconciliation and email the completed form to their Account Manager.

---

62 See 45 CFR 156.1210.

### 9.4.5 Audits and Disputes

An issuer who completes an audit before the three years or end of the audit reporting deadline dispute cutoff date, may still dispute policies that were not a part of the audit until the policy ages to the three-year deadline. A policy that was part of an audit is not able to be re-disputed and may only be adjusted due to a consumer-initiated appeal.

### 9.4.6 Payment Dispute Process

**Exhibit 22: PPR-820 Payment Dispute Process**

Issuers can submit disputes through three different avenues: 1) Payment Disputes, 2) Enrollment Disputes, or 3) HICS Direct Disputes. The Payment Dispute (PPR/820 disputes) process allows the issuer to submit unexpected or missing payments identified in the PPR or HIX 820.

To submit a Payment Dispute, the issuer should submit the Financial Transfers (FT) PPR-820 Dispute Form (Payment Dispute Form) to the ER&R contractor in an Excel or Pipe Separated Value (PSV) format. Issuers must submit the PPR/820 Dispute Forms via EFT, which uses the same EFT setup as the 834/820 file transfer process, or through the SEED (System of Exchange Enrollment Data) Dispute Upload tab. Issuers must complete the dispute form using data from either the PPR or the HIX 820. For additional information on how to submit Payment Disputes to the ER&R contractor, including the naming conventions, file specifications and additional guidance, refer to the *Combined Enrollment and Payment Disputes TRG* located on CMSzONE at [https://zone.cms.gov/document/enrollment-resolution-and-reconciliation](https://zone.cms.gov/document/enrollment-resolution-and-reconciliation).
When an issuer submits the Payment Dispute Form, they will receive a PPR/820 Dispute Response File within 1–2 business days. The response file provides the results for each dispute submitted. If a dispute is flagged with an In Process/In Analysis disposition code, the issuer will need to monitor the Semi-Monthly Detailed Reports for updates. These reports provide dispositions for Enrollment, Payment and HICS Direct Disputes and are provided bi-monthly on the 1 or the 16 (or the first business day thereafter). For additional guidance on the Response File and the Semi-Monthly Detailed Reports, including the disposition codes and descriptions, refer to the *FFE Payment Dispute Disposition and Detail Code List* located at [https://zone.cms.gov/document/enrollment-resolution-and-reconciliation](https://zone.cms.gov/document/enrollment-resolution-and-reconciliation).

### 9.4.7 Enrollment Dispute Process

*Exhibit 23: Enrollment Dispute Process*

The Enrollment Dispute process allows issuers to submit disputes based on enrollment data found on the Pre-Audit or RCNO. As of May 1, 2019, issuers must first receive approval from their Account Manager before any prior year disputes can be submitted to ER&R. Each subsequent coverage year will require Account Manager approval as of May 1 of the following year. Disputes caused by a HICS case do not require Account Manager approval. The issuer will need to submit the HICS case, if applicable, directly to the ER&R contractor or provide the HICS case number on the dispute form.

To submit an Enrollment Dispute, issuers should submit the Enrollment Dispute Form in an Excel or PSV format similar to the Payment Dispute Form. Issuers must also submit the Enrollment Dispute Form through EFT or the SEED Dispute Upload tab.

There are 10 tabs on the dispute form. The first three are guidance and instructions. The other seven tabs on the Enrollment Dispute Form are for issuers to fill out to submit corrections. These tabs are:

1. Discrepancy Dispute Tab – Allows issuers to dispute discrepancies identified on the RCNO.
2. Rejected Enrollments Tab – Allows issuers to reject FFE enrollments, including BAR enrollments.
3. Reinstatement End Date 12.31 Tab – Allows issuers to reinstate policies to a December 31 end date.
4. Newborn Premium Updates – Allows the issuer to report a newborn member who qualifies for a free premium coverage period in accordance with applicable state laws.

5. Enrollment Blocker Tab – Allows issuers to update financial information or other enrollment information when an error occurs in the FFE.

6. Mailing Address Change – Allows issuers to update mailing addresses.

7. Agent Broker Information – Allows issuers to add, change or remove A/B information if presented with an Agent of Record or Broker of Record documenting consumer consent. **NOTE**: Although issuers have the capability to change A/B data through ER&R Enrollment Dispute, issuers may not make changes to a consumer’s application data, including A/B NPN, without the express consent of the applicant or enrollee. A/B information should always stay on the policy or application unless the consumer directs the issuer to remove or change it to someone else based on receipt of an updated Agent of Record or Broker of Record. Compensation decisions by the issuer based on A/B status is independent of the FFE records and should not generally initiate a change to the consumer record. Issuers should never submit dummy NPNs.

It is important to note that the data submitted on the RCNI must match the data the issuer submits on the Enrollment Dispute Form. However, policies submitted on the Rejected Enrollment, Reinstatement End Date 12.31, and Enrollment Blocker Tab do not require the data to match on the RCNI prior to submission. For additional information on how to submit Enrollment Disputes to the ER&R contractor, including the naming conventions, file specifications and additional guidance, refer to the *Combined Enrollment and Payment Disputes TRG* located on CMSzONE at [https://zone.cms.gov/document/enrollment-resolution-and-reconciliation](https://zone.cms.gov/document/enrollment-resolution-and-reconciliation).

Enrollment Disputes do not get a response file within 1–2 business days. The status of an Enrollment Dispute is reported on the Semi-Monthly Detailed Reports. As mentioned previously, these reports provide dispositions for each disputed record for Enrollment, Payment and HICS Direct Disputes and are provided bi-monthly on 1 or the 16 (or the first business day thereafter). For additional guidance on the semi-monthly detailed reports, including the disposition codes and descriptions, refer to the *FFE Payment Dispute Disposition and Detail Code List* located at [https://zone.cms.gov/document/enrollment-resolution-and-reconciliation](https://zone.cms.gov/document/enrollment-resolution-and-reconciliation).
The HICS Direct Dispute process allows issuers to submit a HICS case they receive directly to the ER&R contractor. This process allows issuers to reassign HICS cases to the ER&R contractor. The HICS case will remain open while it is pending with the ER&R contractor, and the time while the case is pending with ER&R does not count toward the HICS resolution time frames (72 hours for Level 1 and 15 days for Level 2). Time begins to run again once ER&R returns the HICS case to the issuer. This allows the issuer time to complete the necessary actions on the HICS case before closing it.

Most updates can be made through the monthly Enrollment Data Reconciliation process. There are limited situations that require HICS cases to be directly disputed to the ER&R contractor for manual review and processing. HICS Direct Disputes are, as of publication of this manual, limited to the following updates:

- Financial updates due to an Enrollment Blocker
- Changing Subscriber Dispute
- Date of Birth Dispute
- Applied APTC Amount
- Total Premium Amount

**NOTE:** Total Premium Amounts that do not require a HICS case are not eligible for Direct Dispute processing. For additional information on which updates require HICS cases, access the Combined Enrollment and Payment Disputes TRG located at https://zone.cms.gov/document/enrollment-resolution-and-reconciliation.

- Term NLE Appeals
FFE Enrollment

- QHP ID/Variant ID
- Removal of a Member

For additional information on how to submit HICS Direct Disputes to the ER&R contractor, including steps on transferring HICS files additional guidance on what can be submitted through this process, refer to the Combined Enrollment and Payment Disputes TRG located on CMSzONE at https://zone.cms.gov/document/enrollment-resolution-and-reconciliation.

HICS Direct Dispute responses are included in the comments of the HICS case when it is returned to the issuer. ER&R also applies a disposition code to each HICS Direct Dispute case in the comments section of the HICS case as well as on the Semi-Monthly Detailed Report. As mentioned previously, these reports provide dispositions for each disputed record for Enrollment, Payment, and HICS Direct Disputes and are provided bi-monthly on the 1 or the 16 (or the first business day thereafter). For additional guidance on the semi-monthly detailed reports, including the disposition codes and descriptions, refer to the CCIIO Enrollment Disposition Code List located at https://zone.cms.gov/document/enrollment-resolution-and-reconciliation.

### 9.5 Unmatched “I” Record

An unmatched “I” record (UIR) is an issuer record assigned an overall record flag of “I” because the monthly Enrollment Data Reconciliation process is unable to directly match to the FFE record. The ER&R contractor analyzes all UIRs on the RCNO to identify possible matches and assigns each record a category to assist issuers with aligning these UIRs.

There are two types of UIRs:

- Unaffiliated Issuer Enrollment (UIE): A UIR in which the ER&R contractor was unable to identify a current FFE record for the consumer
  
  NOTE: Certain UIEs may be eligible for CMS manual payment.

- Misaligned Issuer Enrollment (MIE): A UIR that the ER&R contractor matched to a current FFE record through additional analysis

The ER&R contractor will send a detailed UIR Report monthly (on the third Friday after RCNO delivery) to impacted issuers only to assist these issuers with resolving UIRs before submission of the next monthly RCNI. The UIR Report categorizes the UIE and MIE records to assist the issuers with aligning these records. CMS has provided guidance on how to resolve each UIR category. Issuers are expected to review each UIR Report and take action, when warranted, to reconcile the discrepant records.

Annually, CMS will make manual payments of APTC for any remaining eligible UIEs for coverage through May 31 but not for coverage after that date. By April 1, issuers are expected to notify their consumers enrolled in UIE policies that their enrollment through the Exchange will end on May 31 and terminate FFE enrollment for any remaining UIEs. Issuers should conduct outreach to inform their consumers enrolled in UIE policies that the consumers may be entitled to an SEP for 60 days and, if applicable, offer the option to continue their coverage outside the FFE after the May 31 termination date.

For more information on resolving UIRs, issuers should refer to the ER&R page on CMSzONE, located at https://zone.cms.gov/document/enrollment-resolution-and-reconciliation.
9.6 SEED

SEED is a web application that provides issuers and TPAs with a secure way to access real-time FFE data in a single location while adhering to CMS’s privacy and security standards. This resource is used to assist with casework and EDA, and the real-time nature of the data presented allows users to quickly and accurately resolve enrollment and payment issues. Issuers should update their internal procedures to reflect the use of the SEED application for casework and data alignment resolution.

There are four search categories available in SEED: Application ID, Exchange Policy ID, Exchange Member ID, and Exchange Subscriber ID. Users can filter searches by HIOS ID, which is limited to the HIOS IDs the user is authorized to view. Searches for Exchange Member ID and Exchange Subscriber ID can also be filtered by year. Users can sort the search results and can display additional enrollment details by clicking the Details button. Detailed descriptions of all the fields displayed in SEED are located in the Data Dictionary section of the SEED Companion Guide.

SEED users can also upload completed payment and enrollment dispute forms within SEED, using the Dispute Upload tab. SEED users can either browse to the desired file or drag and drop it into the Dispute Upload screen. After uploading the file, SEED users receive an email notification of the submission, and the ER&R team will complete processing the file in exactly the same manner as dispute files submitted through EFT.

9.6.1 SEED Resources

Issuers are strongly encouraged to access SEED resources available on CMSzONE at https://zone.cms.gov/document/system-exchange-enrollment-data-seed. The resources are as follows:

- **SEED Companion Guide:** This includes comprehensive instructions for gaining access and using SEED functionality.
- **SEED Data Dictionary:** This includes definitions and descriptions of every data element found in SEED.
- **SEED Approver Access and User Access Forms:** These are used by prospective Issuer Approvers and SEED users to request access to the SEED application.
- **SEED EDA Guidance:** This includes guidance on ways for issuers to use SEED while working through their casework.
10. **FORMS 1095-A GENERATION AND CORRECTIONS**

### 10.1 Form 1095-A Initial Generation Process

Throughout January each year, the Federally-facilitated Exchange (FFE) generate and send initial Forms 1095-A to tax filers who enrolled in a Qualified Health Plan (QHP) through the FFE during the prior year. The Form 1095-A provides enrollees with information about their health coverage so that application tax filers can:

- File their taxes,
- Reconcile advance payments of the premium tax credit (APTC), and
- Claim the premium tax credit (PTC).

The information provided on a Form 1095-A is used to complete Form 8962 with the Internal Revenue Service (IRS). Application tax filers must complete and file a Form 8962, regardless of whether they are required to file a tax return, to claim PTC, or be eligible for APTC in future years.

As part of this program, the FFE sends IRS monthly and yearly data regarding all individual enrollment and APTC payments made to QHP issuers on behalf of enrollees, which the IRS uses to validate individuals’ Federal income tax returns (e.g., to reconcile APTC, process PTC claims, and grant exemptions). Monthly and annual reports are submitted to the IRS following completion of the coverage year, identifying tax filers or other relevant adults who received APTC (or whose tax dependent(s) received APTC) related to an individual market policy purchased through the Exchange. The IRS uses the information in the monthly and annual reports to verify information included on individual-submitted Form 8962.

The FFE processes bi-monthly Form 1095-A Correction Cycles from February through December to provide individuals with corrected Forms 1095-A when FFE data has been updated. The Form 1095-A Corrections Cycles capture FFE data updates initiated by consumers engaging with our Form 1095-A casework process and issuer data updates made through all EDA channels: Inbound 834s (IC834s), the Enrollment Data Reconciliation process, and Enrollment Resolution and Reconciliation (ER&R) disputes. Issuer-initiated data updates generate Corrected Forms 1095-A and individuals may be required to file an amended Federal income tax return. Approximately 70 percent of corrections are driven by issuer-initiated data changes.

Form 1095-A data is populated from the FFE enrollment data submitted to the IRS, and initial generation occurs in early January, which leads to:

- Forms 1095-A being generated electronically and posted to enrollees’ online accounts.
- Hard copies being printed and mailed to all consumers enrolled in Marketplace QHPs.
- Forms 1095-A data is reported to the IRS.

**Exhibit 25: Form 1095-A Generation Process Overview**
FFE Enrollment

Issuer participation in all EDA processes (discussed in Section 9, Enrollment Data Alignment (Applicable to Individual Market FFE, QHPs/QDPs)) is an essential part of ensuring accuracy of Form 1095-A data. CMS performs EDA with issuers to ensure FFE records match QHP issuers’ records. If the data is not correct, there are important tax implications, such as enrollees receiving Forms 1095-A with incorrect coverage data that can impact their APTC/PTC reconciliation. Please note that the FFE does not send Forms 1095-A to enrollees only enrolled in dental or catastrophic coverage.

**Timeliness of issuer reconciliation is critical.** The initial Form 1095-A generation process begins in early January each year and leverages the data captured in the FFE up through the current month when Forms 1095-A are generated. As such, all issuer data should be reconciled each year by the end of November of the current plan year to ensure the data is accurate on an individual’s initial Form 1095-A.

If Form 1095-A data is updated in the FFE database after initial Forms 1095-A generation, Corrected and/or Voided Forms 1095-A are automatically generated and mailed to enrollees in the next bi-monthly Form 1095-A Correction Cycle. This leads to enrollee confusion since enrollees are likely not expecting to receive a new Form 1095-A. CMS provides the following guidance to avoid enrollee confusion:

**CMS strongly recommends that issuers reconcile enrollment data by November to avoid their enrollees receiving Forms 1095-A with incorrect coverage data that can impact their APTC/PTC reconciliation.**

Issuers are strongly encouraged to submit disputes as soon as possible upon identification of a discrepancy to allow the FFE to issue accurate Forms 1095-A to enrollees in advance of the tax filing deadline.

**10.2 Examples**

**Example 10A:** CMS or an issuer identifies an enrollment data error that affects a high volume of policies for a particular Health Insurance Oversight System (HIOS) ID after the coverage year ends but while prior year Enrollment Data Reconciliation cycles are still active.

**Recommended issuer action:** While the prior year Enrollment Data Reconciliation cycle is still active (through March of the benefit year following the end of the enrollee’s coverage period), updates can be made via automated Enrollment Data Reconciliation or, if appropriate, dispute resolution. Once the Enrollment Data Reconciliation cycle is complete, Corrected or Voided Forms 1095-A will be automatically generated during the next Form 1095-A Correction Cycle and sent to affected enrollees. In this scenario, it will take approximately 1–2 months for enrollees to receive their corrected Form 1095-A.

**NOTE:** If this scenario occurs after the prior year Enrollment Data Reconciliation cycle is complete, issuers are strongly encouraged to contact each affected enrollee so they know to expect a Corrected or Voided Form 1095-A. CMS has developed the Form 1095-A Toolkit for Issuer Outreach to Individuals to assist issuers in conducting Form 1095-A related enrollee outreach. This toolkit is available on CMSzONE at https://zone.cms.gov/system/files/documents/toolkit_for_issuers_form_1095-a_final_clean.pdf.

**Example 10B:** CMS or an issuer identifies a single policy that requires coverage date changes.
FFE Enrollment

Recommended issuer action: The issuer can submit this type of enrollment through the ER&R dispute process (see Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes)). Up to five weeks after dispute resolution, issuers receive a past year Pre-Audit file reflecting the changes accepted by the FFE.

10.3 Anatomy of a Form 1095-A

*Exhibit 26: Form 1095-A Elements*

| Information about a tax filer or other relevant adult, and his or her tax household, who were enrolled in a Marketplace QHP |
| Information that is used to complete a federal income tax return (e.g., monthly premium amount) |
| The amount of APTC that was paid to an issuer on a consumer’s behalf |

10.3.1 Form 1095-A Part 1: Recipient Information

Part I, lines 1–15, reports information about:
- The tax filer or other relevant adult.
- The insurance company that issued the policy.
- The Marketplace where they enrolled in coverage.

*Exhibit 27: Recipient Information Section*

<table>

10.3.2 Form 1095-A Part II: Covered Individuals

Part II, lines 16–20, reports information about each individual who is covered under the tax filer’s or other relevant adult’s policy, including:

- Covered individual name, Social Security number (SSN), and date of birth.
- Coverage start and end date.

Exhibit 28: Covered Individuals Section

10.3.3 Form 1095-A Part III: Coverage Information

Part III, lines 21–33, reports information about the tax filer’s insurance coverage that they will need to complete Form 8962 to claim the PTC and reconcile APTC, including monthly:

- Enrollment premiums.
- Second lowest cost Silver plan (SLCSP) premium.
- APTC.

Exhibit 29: Coverage Information Section

</tr>
</tbody>
</table>

Individuals may not recognize the monthly premium amount (included in Part III, Column A) listed on Form 1095-A because:

- The monthly premium amount is reduced for premiums allocated to benefits exceeding essential health benefits (EHB).
- If individuals were also enrolled in a Qualified Dental Plan (QDP), the monthly premium amount also includes the pediatric, EHB portion of QDP monthly premium amounts.
- Issuers prorate the monthly premium for enrollees in cases such as mid-month additions (e.g., birth/adoptions) or mid-month terminations (e.g., death, voluntary termination).
- The monthly APTC amount (included in Part III Column C) is the monthly amount of payments that were made to the insurance company to pay for all or part of the premiums for
the tax filer’s coverage. The FFE will enter “0” in this column if no APTC payments were made.

10.4 How Issuers Should Answer Enrollee Questions About Forms 1095-A

Issuers may hear from enrollees who have concerns about their Form 1095-A; since the Form 1095-A is a record of the prior year’s enrollment with the issuer, CMS expects that issuers should be able to answer most questions their enrollees may have. This includes verifying enrollment dates, APTC amounts applied, non-EHB portions of premiums, etc. Enrollees may call with basic questions about the Form, tax filing, or concerns about the data on the Form 1095-A. Responses to basic enrollee questions will depend on the type of issue, and may include:

- Addressing the enrollee’s question directly.
- Directing enrollee to call the IRS.
- Directing the enrollee to call the appropriate FFE or State-based Exchanges (SBEs).

10.4.1 Basic Form 1095-A Questions Issuers May Answer

- What is this form I received?
- What is Form 1095-A?
- Where can I find more information or instructions?
- Why didn’t I receive my Form for catastrophic plans, non-Exchange plans, and dental plans?
- Where can I find my Form 1095-A online?

10.4.2 Enrollee Questions to Be Directed to the IRS or the Tax Filer’s Tax Preparer

- Do I qualify for the PTC?
- What are the requirements for the individual shared responsibility provision through 2018?
- How do I report healthcare coverage on my income tax return?
- Will IRS verify that enrollees had minimum essential coverage (MEC)?
- I received a Form 1095-A. How should I report this on my income tax return?
- Can you help me complete my income tax return?
- How do I use the Form 1095-A to fill out my Form 8962?
- Can I get a copy of the Form 8965 or 8962?
- What happens if I don’t file my income tax return?
- I can’t file/can’t pay my tax liabilities by the tax deadline (generally April 15). What should I do?
- Why did I receive a 12C letter from the IRS?

10.4.3 Enrollee Questions to Be Directed to the Exchange

- Why did I receive a Form 1095-A?
- I never received a Form 1095-A. How can I get the Form or the information I need?
- Where can I find my Form 1095-A on my Marketplace account?
- What do I need to do with this Form 1095-A?
- What does this information on the Form 1095-A mean?
FFE Enrollment

- I think my Form 1095-A may have gone to the wrong address. What should I do?
- Why did I get more than one Form 1095-A?
- The information on my Form 1095-A does not look correct. How can I change it?

In addition to the background provided in the section above, issuers can direct enrollees to find answers to tax questions about Form 1095-A on HealthCare.gov/taxes and/or IRS.gov. If they do not find answers, enrollees should contact the Marketplace Call Center at 1-800-318-2596 (TTY: 1-855-889-4325).

10.5 Form 1095-A Basics for Assisting QHP Enrollees

The following background information can be used when addressing and triaging basic enrollee Form 1095-A questions.

Tax filers receive Forms 1095-A if they or a member of their household were enrolled in a QHP through the Exchange for any months in the coverage year, with or without receiving APTC. Forms 1095-A will not be generated for enrollees:

- Enrolled in only a dental or catastrophic plan (since APTC may not be applied to these types of policies, taxpayers are not eligible to receive APTC, nor can they claim the PTC on their tax return).
- Enrolled in a plan outside of the Exchange.

Each Form 1095-A is specific to a plan year and is not necessarily comprehensive. Just as some tax households receive multiple W-2s if individuals have multiple jobs, some tax filers will get multiple Forms 1095-A if they were covered under different plans or made changes to their tax household during the year. There are several reasons why a tax filer may receive more than one Form 1095-A:

- If members of the household were enrolled in more than one health plan through the Exchange
- If an Exchange Policy ID changed because an enrollee reported a change to the Exchange that caused a new policy to be issued such as removing the original subscriber
- If enrollees chose a new plan during the year, (e.g., because of a Special Enrollment Period (SEP) associated with marriage, adoption, birth, change in Indian status)
- If there are more than five individuals covered by a policy

**NOTE:** The additional Forms 1095-A will continue Part II information. Parts I and III will be left blank. The extra pages will come together in the same envelope.

Enrollees need the information on Form 1095-A to complete IRS Form 8962, which they must file with their tax return if they want to claim PTC or if they received premium assistance through APTC. Form 1095-A lists the individuals who were enrolled in a QHP, the QHP premium, and any APTC that was paid on the enrollee’s behalf to the issuer. It is important to note that premium amounts reported on Forms 1095-A are not the amount that enrollees are used to seeing on their monthly insurance bill, because they are:

- Reduced for premiums allocated to benefits exceeding EHB.
- Increased by premiums for a stand-alone dental plan (QDP) allocated to pediatric dental benefits.
- Not reduced for applied APTC.
10.5.1 Form 1095-A Reprints and Corrections

If enrollees want another copy of their Form 1095-A, issuers should direct them to log into their online Exchange account and print their form in the “Tax Forms” section. If enrollees do not have online accounts, they can create one to view and print their Form 1095-A. Alternatively, reprint requests can be made to the Marketplace Call Center and enrollees should expect to receive a hard copy of their Form 1095-A in the mail within one to two weeks.

Despite CMS’s Enrollment Data Alignment (EDA) efforts, in some cases, FFE information about enrollees may be incorrect. Enrollees can request corrections be made to their Form 1095-A information by phone or in writing but are strongly encouraged to make requests by calling the Marketplace Call Center at 1-800-318-2596 (TTY: 1-855-889-4325).

When enrollees request a change of address or a change in coverage information via the Marketplace Call Center, a Health Insurance Casework System (HICS) case is opened and placed in the Form 1095-A corrections casework queue. Form 1095-A Consumer Disputes caseworkers then research the change request using all available CMS resources, i.e., the FFE Extract, issuer data in RCNO, and Form 1095-A. to determine if a data discrepancy exists. If the data discrepancy is validated, Form 1095-A correction caseworkers process the change, update the FFE database, and close the HICS case. Finally, the FFE sends issuers IPA’s and 834 transactions for all updates processed by the Form 1095-A corrections caseworker. Non-demographic Form 1095-A casework research includes issuer outreach to validate the consumer Form 1095-A dispute.

Enrollee Assistance: If enrollees reach out to their issuers first, and have questions about policy start or end date, covered individual start or end date, or APTC or premium amount, issuers should check issuer records against the Form 1095-A (as reported by the enrollee) and the enrollee’s understanding of the correct data. If issuer records match information on Form 1095-A (as reported by the enrollee) but not the enrollee’s records of coverage, direct the enrollee to the Marketplace Call Center if they have additional questions.

As outlined in more detail below, the FFE evaluates enrollees’ assertions that information on Forms 1095-A is incorrect, updates incorrect data, and generates Initial, Corrected, or Voided Forms 1095-A accordingly.

CMS leverages a recurring bi-monthly corrections process to update the FFE database and generate Forms 1095-A and notices. At the conclusion of each cycle, Initial, Corrected and Voided Forms 1095-A are generated and mailed to tax filers, and the data is sent to the IRS to ensure all parties have accurate information.

Enrollees who want to request updates to their Forms 1095-A should call the Marketplace Call Center by early March to maximize the likelihood that they get an update before the tax filing deadline.

10.5.2 Form 1095-A Corrections Process: Additional Information

The CMS Marketplace Call Center representatives will leverage available resources (e.g., standard operating procedures [SOPs], frequently asked questions [FAQs], scripts) to try and address enrollees’ Form 1095-A concerns.

Research: If enrollees’ concerns are not resolved, Marketplace Call Center representatives will triage the case accordingly and CMS will conduct research to evaluate the information in question. All Form
FFE Enrollment

1095-A Consumer Disputes caseworkers follow CMS-approved processes when conducting research. CMS research process includes:

- Review of FFE data.
- Review of issuer data in RCNO.
- Review of the enrollee’s Form 1095-A data.
- Outreach to issuers email/phone to confirm if issuers’ records match data on Form 1095-A, as needed.
- Outreach to enrollees to obtain additional information, as needed.

**Enrollee Outreach:** If research concludes that an enrollee’s Form 1095-A is derived from incorrect data (i.e., data on Form 1095-A does not match what the enrollment record should be, and the enrollee request for a corrected form is approved), Form 1095-A Consumer Disputes caseworkers call enrollees to tell them their request was approved and close the HICS case. The updated data is submitted to the next Form 1095-A Corrections cycle, and Forms 1095-A are generated, posted to the Marketplace account, and mailed to enrollees.

If research concludes that data on an enrollee’s Form 1095-A is correct (i.e., data on Form 1095-A matches FFE data sources, and enrollees’ requests are denied), Form 1095-A Consumer Disputes caseworkers call enrollees to tell them their request was denied. If the enrollee is satisfied with the CMS decision, the HICS case is closed, and a denial letter is sent to the enrollee for their records. The enrollee should file their taxes with their existing Form 1095-A.

If an enrollee is not satisfied with the decision, they may request the case to be reconsidered. In such cases, CMS Regional Office caseworkers review the Form 1095-A Consumer Disputes caseworker’s decision, including collection of additional input from the enrollee and/or issuer as needed, and make a recommendation to the corrections caseworker to either approve the enrollees’ request or uphold the denial. The Form 1095-A Consumer Disputes caseworker will again follow up with the enrollee by phone regarding approval or denial of the reevaluated decision and will close the HICS case.

**Issuer Outreach:** In instances where missing or conflicting information is provided in the Form 1095-A HICS case narrative or when discrepancies exist among FFM, RCNO, and FFM Extract data, the Form 1095-A Consumer Disputes caseworker will utilize a CMS Decision Matrix to determine if issuer outreach is necessary to resolve the case. Situations that may warrant issuer outreach include (this list is not all inclusive):

- The enrollee’s claim does not align with the issuer’s RCNO data.
- FFE enrollment data shows the consumer enrolled in overlapping policies.
- The consumer received a grace period due to non-payment of monthly premiums.
- The case involves retroactive termination of a policy.
- The case involves an Unaffiliated Issuer Enrollment (UIE).
- The case is linked to a separate, open Category 2 (Plan and Issuer Concerns) HICS case.

Additionally, issuers may be contacted by a Form 1095-A Consumer Disputes caseworker to:

- Accurately resolve a consumer’s 1095-A dispute when internal data sources are unable to provide a determination.
Collect additional enrollment information directly from the issuer (i.e., policy start and end dates, premium amounts, and APTC) when a decision cannot be made using the information collected from CMS sources, including FFM Extract, RCNO, Forms 1095-A, etc.

Use the additional information and issuer’s input to facilitate Form 1095-A correction decisions.

The Form 1095-A Consumer Disputes casework team performs issuer outreach through email communication (1095aissueroutreach@cms.hhs.gov), file transmission using CMS Electronic File Transfer (EFT), and by telephone (701-264-3017).

- The Form 1095-A Consumer Disputes caseworker generates an encrypted Excel file containing the HICS cases for each affected issuer. Each consumer dispute will have its own tab within the Excel workbook.
- Each tab will contain the consumer’s personal information, reason for dispute, and specific questions about the policy, such as start and end dates, APTC, monthly premium, claims, reason for termination,.
- Issuers are responsible for populating all requested fields within each tab and resubmitting the encrypted Excel file to the Form 1095-A corrections caseworker using the same password.

To minimize email traffic, the Form 1095-A Consumer Disputes casework team bundles and transmits Excel files between 5:00 and 6:00 p.m. ET Monday through Friday. Issuers are expected to respond to the standard outreach requests within three business days from receipt of the initial file. An exception to the three-business day requirement is expedited VIP issuer outreach request, which have a one business day requirement. VIP requests will be identified as “Urgent” in the subject line of the email.

Form 1095-A Consumer Disputes caseworkers function as case managers and manage outreach efforts for assigned issuers. This approach promotes a single point of contact between the issuer and the Form 1095-A Consumer Disputes casework team and ensures a quicker response time. If a response is not received from the issuer within the appropriate time frame, the Form 1095-A Consumer Disputes caseworker will escalate the case to CMS for additional assistance.

Most non-demographic Form 1095-A consumer dispute cases go through issuer outreach. To mitigate consumer confusion, CMS does not accept issuer-initiated changes through any EDA method (IC834, Enrollment Data Reconciliation, or disputes) when a correction has been processed for the same policy. When an issuer contests that additional changes or updates are necessary to resolve the 1095-A discrepancy, the issuer should instruct the consumer to initiate a new request using the 1095-A process.

**Correction Cycle Fallout**: In rare cases, Form 1095-A files fail to generate successfully (i.e., “fallout”) due to errors. CMS conducts research to resolve errors and resubmits the Form 1095-A file back into the next Correction Cycle or manually generates the form (if automatic generation is not possible). This process adds 2–4 weeks to the average case resolution time. Some Form 1095-A fallout will lead to scenarios where the Forms 1095-A are not available in enrollees’ online account.

**Summary**: After requesting a correction, enrollees can expect to receive:

- A phone call from a corrections caseworker within two weeks.
- A hard copy of their Form 1095-A in the mail within approximately 2–4 weeks (add an additional 2–4 weeks for fallout when applicable).
- A denial notice in the mail within:
FFE Enrollment

- Approximately 2–3 weeks for cases denied without escalation.
- Approximately five weeks for cases denied and escalated for a second review.

CMS is required to carry out this process and furnish accurate Forms 1095-A for enrollees for seven years after the coverage year.

10.6 Impact of Prior Year Appeals

Prior year eligibility appeal decisions from the Exchange Appeals Center present a specific challenge to producing an accurate Form 1095-A for enrollees (or appellants) who receive an appeal decision in their favor and choose to have their decision implemented retroactively.

Appeal decisions implemented after March of the subsequent year (once data Enrollment Data Reconciliation and IC834 transactions have concluded for prior year coverage) require additional handling and care to ensure that individuals receive an accurate Form 1095-A.

The following information is updated from a previously released Section 8.1 of Bulletin #17 – Effectuation Eligibility Appeal Decisions and Related Enrollments in the FFE.

10.6.1 Steps to Follow for Prior Year Appeal Adjudications

1. Upon receipt of a HICS case instructing an issuer to implement a prior year appeal decision, the issuer should follow the directions in the HICS case narrative.

2. Once an issuer has followed the directions in the HICS case narrative related to a retroactive appeals decision, it should submit these enrollment changes via the ER&R Enrollment Dispute process (see Section 7.5, Issuer Termination Notice Requirements). These updates will also be noted on the next Pre-Audit file released for the year that the update was made in the FFE. Refer to the Pre-Audit and Reconciliation Calendar for delivery dates of each Pre-Audit file, located at https://zone.cms.gov/document/enrollment-data-reconciliation.

FFE updates accepted via the ER&R dispute process will automatically trigger Corrected or Voided Forms 1095-A for retroactive Appeals determinations.
11. ELIGIBILITY CHANGES FOR THE DUALLY ENROLLED OR DECEASED

11.1 Introduction

Exchange enrollees aren’t eligible for financial assistance such as advance payments of the premium tax credit (APTC) and cost-sharing reduction (CSR) if they are eligible for or enrolled in other minimum essential coverage (MEC), such as coverage provided by Medicare Part A or Part C (Medicare Advantage), certain qualifying Medicaid or Children’s Health Insurance Program (CHIP) coverage, or certain coverage provided by an employer plan. Enrollees who do not report eligibility for or enrollment in other coverage to the Exchange are at risk of having to repay APTC when they file their annual Federal income tax return and reconcile APTC. While an issuer should not end financial assistance if it believes the enrollee is eligible for or enrolled in other MEC, the issuer is encouraged to reach out to the enrollee suspected of being eligible for MEC to urge the enrollee to report their eligibility or enrollment in other coverage to the Exchange so that the enrollee’s eligibility can be redetermined, and financial assistance removed prospectively, if appropriate.

Similarly, if an issuer receives information that an enrollee is deceased, the issuer should direct the qualified individual (QI) or representative to report the enrollee’s death through their HealthCare.gov account or by calling the Marketplace Call Center and following the steps in Section 7.3, Termination of an Enrollee’s Coverage in the FFE Due to Report of Death.

A QI is only eligible for financial assistance on one Exchange enrollment. When an enrollee changes from one Qualified Health Plan (QHP) enrollment to another QHP on the Exchange, such as during a Special Enrollment Period (SEP), the Exchange automatically terminates the enrollee’s coverage under the first QHP, if the enrollee uses their existing Exchange account. If an enrollee, an assister, or an Agent or Broker (A/B) creates a new enrollment without using the existing account, a dual Exchange enrollment can be created. Other dual enrollments are created inadvertently when a dependent on one application/enrollment creates a new application and enrollment without the original application contact ending coverage for the enrollee on the initial policy, or when parents in separate households enroll the same child on each parent’s policy. Because these dual Exchange enrollments are inadvertent and financial assistance may only be applied to one policy, the Exchange conducts monthly overlap cleanups that end the overlapping or dual coverage. Issuers can find enrollments cancelled for duplicating other Exchange enrollments by checking to see if the policy is flagged for overlaps on the regularly scheduled monthly pre-audit file.

Issuers should review records flagged with the overlaps indicator on the Pre-Audit file to ensure proper alignment of enrollment records based on the enrollment transactions initiated by the enrollee, which may necessitate termination or cancellation of impacted policies. The flag will be set only on the records cancelled or terminated on the Federally-facilitated Exchange (FFE) as part of the overlapping enrollment cleanup—the subsequent records that led to the overlap are not flagged in the file. The overlapping or duplicate coverage may be with a different issuer, which will be conveyed by the overlap’s indicator value.

Issuers who observe dual Exchange enrollment because they are the issuers of both policies may use the Enrollment Data Reconciliation process to eliminate the overlap or encourage the enrollee to contact the Exchange.
11.2 Periodic Data Matching

Enrollees who are eligible for or are enrolled in MEC Medicaid, CHIP, or Medicare are ineligible for APTC/CSR to help pay for their Exchange plan premium and covered services.

The FFE proactively checks trusted data sources to redetermine eligibility for financial assistance for those found dually enrolled in Exchange coverage and other MEC and to determine if an enrollee has become deceased during a plan year. As described at 45 CFR 155.330(d), Periodic Data Matching (PDM) includes the process by which the Exchange periodically examines available data sources to determine whether enrollees who are enrolled in Exchange coverage with APTC/CSR are concurrently enrolled in MEC Medicaid or CHIP or Medicare Part A or Part C, otherwise known as Medicare Advantage. State-based Exchanges (SBEs) that have implemented a fully integrated eligibility system with their respective state Medicaid programs, that have a single eligibility rules engine that uses Modified Adjusted Gross Income (MAGI) to determine eligibility for APTC, CSR, Medicaid, CHIP, and the Basic Health Program (BHP), if a BHP is operating in the service area of the Exchange, are deemed in compliance with the Medicaid/CHIP PDM requirements and, if applicable, BHP PDM requirements.

11.3 Medicaid/CHIP Periodic Data Matching

After conducting data matching to identify QHP enrollees who also appear to be enrolled in Medicaid or CHIP, the Exchange sends an initial warning notice to the application contact of the affected enrollees. The application household contact and/or affected enrollees have 30 days from the date of the notice to respond. The notice instructs them to return to the Exchange by the date listed in the notice to either a) update their application by indicating they are not enrolled in Medicaid or CHIP, if applicable; or b) end Exchange coverage with APTC/CSR if they are enrolled in Medicaid or CHIP.

At least 30 days after sending the initial notice, the Exchange sends a second, final notice to the application household contact of affected enrollees who did not take appropriate action by the deadline, informing them that the Exchange will be ending any financial assistance. Exchange coverage for affected enrollees will continue without financial help and they will need to end their Exchange coverage if they no longer wish to be enrolled in that coverage at full cost. If they choose to remain in full-cost Exchange coverage, they should notify their state Medicaid or CHIP agency of their Exchange enrollment; they may no longer be eligible for CHIP. For unaffected household members, Exchange coverage may continue, and the Exchange will redetermine their eligibility for APTC/CSR, if applicable. The issuer will receive notice of these changes through an enrollment transaction, typically sent as a Maintenance 834 (M834) transaction that removes financial assistance for the dually enrolled member.

Both notices are mailed and/or posted to the Exchange account of the household contact for the affected individual(s) (depending on communication preference). A sample of the PDM notices can be found at https://marketplace.cms.gov/applications-and-forms/notices.html.

---

63 This includes the FFE and State-based Exchanges using the Federal eligibility and enrollment platform.
64 Most Medicaid is considered MEC; some forms of Medicaid that cover limited benefits, like Medicaid that only covers emergency care, family planning, or pregnancy-related services, are not considered MEC. For more information on what Medicaid programs are considered MEC, visit https://www.healthcare.gov/medicaid-limited-benefits/. Most CHIP is considered MEC.
FFE Enrollment

11.4 Medicare Periodic Data Matching

The Exchange also periodically examines data sources to determine whether individuals receiving Federal financial assistance have been determined eligible for or enrolled in MEC Medicare. Individuals dually enrolled in MEC Medicare and Exchange coverage are ineligible for financial assistance. When filing their Federal income tax return, enrollees may have to pay back all or a portion of the APTC paid on their behalf for months they had both Exchange coverage and MEC Medicare.

Individuals found to be dually enrolled must be notified of the determination pursuant to 45 CFR 155.330(d) and (e), and if the enrollee does not respond within 30 days of the date of the notice, the Exchange must take action to end APTC and CSR or Exchange coverage, depending on the consumer(s)’ preference. Medicare PDM notices include the names of individuals who were found to be dually enrolled in MEC Medicare and Exchange coverage, a recommendation and instructions to end Exchange coverage with APTC/CSR to those dually enrolled individuals, and where to find contact information to confirm Medicare enrollment or if they have any questions about Medicare. Consumers are asked on their Exchange application if they would prefer to have their coverage ended if they are found dually enrolled in coverage, as opposed to just having their APTC ended.

Currently, if the FFE identifies QHP enrollees as dually enrolled during the PDM process and the enrollees agreed upon enrollment to allow the FFE to terminate their coverage if they are found to be enrolled in other qualifying coverage, such as MEC Medicaid/CHIP or MEC Medicare (via the FFE termination attestation application question), they will have their Exchange coverage terminated. For enrollees who do not provide consent for their Exchange coverage to be terminated, the FFE instead ends their APTC/CSR. As outlined in 45 CFR 155.330, the FFE sends out a notice and enrollees have 30 days to respond before the FFE takes any action. Also, the FFE does not redetermine eligibility for APTC/CSR for enrollees who voluntarily permit the FFE to end their Exchange coverage if later found to be enrolled in Medicare. Issuers will be informed of necessary changes to enrollee(s)’ coverage via the current 834 transaction process and guidance.

11.5 Medicare Anti-Duplication

Under Section 1882(d)(3)(A)(i)(I) of the Social Security Act, it is illegal to knowingly sell or issue an Individual Market Exchange QHP (or an individual market policy outside the Exchange) that duplicates Medicare or Medicaid benefits a beneficiary is entitled to. This prohibition does not apply to a renewal of coverage under the same policy or contract of insurance. This prohibition also does not apply to employer coverage.

An issuer that receives a new Exchange enrollment for a QHP that duplicates coverage for an individual that it has knowledge is entitled to Medicare Part A or enrolled in Medicare Part B should cancel the coverage with the Additional Maintenance Resource Code (AMRC) “CANCEL-
FFE Enrollment

ANTIDUPLICATION™ before it is effectuated (binder paid, and coverage has started). QIs not enrolled in Medicare but whose QHP coverage is cancelled by the issuer because they share a policy with a Medicare enrollee will generally be eligible for an SEP. An issuer may not terminate a Medicare beneficiary’s QHP policy during the plan year if it gains knowledge of the duplication of coverage after effectuation, but must non-renew the QHP coverage effective December 31, if the reenrollment plan is a different policy or contract of insurance and the new coverage duplicates Medicare or Medicaid benefits to which the enrollee is entitled (see also Section 3.4.8, Medicare Enrollment and Non-Renewals).

11.6 Deceased Enrollee Periodic Data Matching

The FFE takes action to end coverage for consumers who are both 1) identified as deceased via a periodic data match through the Exchange’s trusted data source, and 2) enrolled in a QHP through the Exchange in accordance with 45 CFR 155.330. For these consumers, the FFE terminates their Exchange coverage retroactively, effective as of the date of the consumer’s death if it occurred during the coverage year or effective on the start date of their current year coverage if date of death occurred before current coverage started.

Since 2019, the Exchange has ended Exchange QHP coverage for consumers who are enrolled in Exchange QHP coverage and who have been identified as deceased through periodic data checks. This is accomplished by matching Exchange enrollment data against the Social Security Administration’s (SSA) Death Master File (DMF), which the SSA provides to CMS on a weekly basis.

After a consumer is identified as both deceased and enrolled in QHP coverage, the Exchange generates a Death PDM initial estate warning notice, addressed to the decedent’s estate (i.e., “to the estate of...”), with instructions for affected consumers. Due to the sensitivity of death information and to protect the Exchange from potentially fraudulent activity, notices are only mailed via United States Postal Mail at this time, even if the consumer’s stated preference was electronic delivery only. Notices will not be posted to the My Account section of the consumer’s online Exchange account.

After receiving the Death PDM initial warning notice, consumers are instructed that no action on their part is required if the reported information is correct. However, consumers have 30 days to report that they are not deceased if the Exchange erroneously identified them as deceased due to a data error in the DMF. To report they are not deceased, consumers can call a special outreach hotline established by CMS and leave their contact information. These consumers receive special notice outreach from CMS in order to 1) confirm that they are not in fact deceased, and 2) provide guidance on how to correct their information with SSA.

After the 30-day window expires, the Exchange acts to end QHP coverage for Exchange enrollees who were identified as deceased and have not reported otherwise. QHP coverage is terminated retroactively to the reported date of death as received from SSA’s DMF. The Exchange will ensure that appropriate actions are taken to make necessary adjustments to APTC, CSR, premiums, claims, and user fees, including by instructing Exchange issuers to refund premium payments to the deceased’s estate for QHP coverage retroactively terminated due to death.

Due to functionality limitations, the Exchange only undertakes this process for deceased enrollees in single-member applications. CMS is currently exploring IT functionality developments to allow the Exchange to remove deceased enrollees from applications in which multiple members are enrolled.
FFE Enrollment

Issuers will be informed of necessary changes to enrollees’ coverage via the current 834 transaction process and guidance. Issuers may receive either a TERM-PDM or a CANCEL-PDM code. Consumers who had an active enrollment in coverage will be designated with the TERM-PDM code, with the termination date being the date of the member’s death. Consumers who had a policy in the initial status will be designated with the CANCEL-PDM code, where the cancel date will be the policy effective date.
12. ADDRESSING INDIVIDUAL-REPORTED UNAUTHORIZED ENROLLMENTS AND ISSUER-REPORTED FRAUDULENT ENROLLMENTS

12.1 Introduction
The Federally-facilitated Exchange (FFE) receives complaints alleging fraud and/or misrepresentations from both individuals and issuers regarding suspect enrollments into Qualified Health Plans (QHPs) offered through the FFE or State-based Exchanges on the Federal Platform (SBE-FPs). CMS, as administrator of the FFE and of the Federal Platform for the SBE-FPs, takes each complaint seriously, and the Center for Consumer Information & Insurance Oversight (CCIIO) works closely with the Center for Program Integrity (CPI) to review and respond to these complaints through two distinct processes. The first process (see Section 12.2, Individual Complaints Alleging Unauthorized Enrollments) deals with complaints from individuals who call the Marketplace Call Center to report alleged fraud or misconduct by an individual other than the enrollee, resulting in unauthorized enrollments. The second process (see Section 12.5, Reporting Fraudulent Enrollments: Examples of Elements Demonstrating an Appropriate Rescission of QHPs in the Exchanges) focuses on information submitted to CMS by issuers whose internal analyses or investigations revealed possible enrollment fraud or the intentional misrepresentation of material facts during the application and enrollment process. Each of these processes is described below.

12.2 Individual Complaints Alleging Unauthorized Enrollments
The Marketplace Call Center receives calls from individuals reporting that they are enrolled in Exchange plans they did not know about or authorize. In many cases, the individuals stated that they only learned they were enrolled in a QHP through the FFE when they received a communication from the Exchange, an issuer, or the Internal Revenue Service (IRS), which requires that advance payments of the premium tax credit (APTC) be reconciled with annual Federal income taxes before refunds can be processed. In some cases, the individuals indicated that they already had other health insurance and did not need or want an Exchange plan.

Regulations at 45 CFR 155.430(b)(1)(iv)(B) and (C) specify that an Exchange issuer may cancel a policy if “[t]he enrollee demonstrates to the Exchange that their enrollment in a QHP through the Exchange was unintentional, inadvertent, or erroneous and was the result of the error or misconduct of an officer, employee, or agent of the Exchange or the Department of Health & Human Services (HHS), its instrumentalities, or a non-Exchange entity providing enrollment assistance or conducting enrollment activities. Such enrollee must request cancellation within 60 days of discovering the unintentional, inadvertent, or erroneous enrollment. For purposes of this paragraph (b)(1)(iv)(B), misconduct includes the failure to comply with applicable standards under this part, part 156 of this subchapter or other applicable Federal or state requirements as determined by the Exchange,” or if “[t]he enrollee demonstrates to the Exchange that he or she was enrolled in a QHP without their knowledge or consent by any third party, including third parties who have no connection with the Exchange, and requests cancellation within 60 days of discovering of the enrollment.”
12.2.1 Operational Process for Cancelling Unauthorized Enrollments

The operational process described below has been used by all FFE issuers to cancel confirmed unauthorized enrollments since June 2019. CMS may update the operational process from time to time for the efficiency of the Exchange and issuers. Changes to the operational policy would be discussed through regular FFE/issuer communication channels.

All complaints that are classified as possible Unauthorized Enrollments are sent to issuers through the Health Insurance Casework System (HICS). The complaints are categorized as Category 2 (Plan and Issuer Concerns) with the Subcategory Cancellation/Termination Request or Alleged Unauthorized Enrollment. Issuers should examine the case to determine if CMS’s three unauthorized enrollment criteria are met. If all are true, it would indicate the enrollee might not know about the enrollment. The criteria are:

1. The individual’s premium is covered 100 percent by APTC or, if not 100 percent, any portion of the premium that is the responsibility of the enrollee was NOT paid.
2. No claims have been filed for any of the enrollees on the policy. (If the issuer believes the policy was unauthorized by the enrollee, but claims have been submitted, issuers should have their program integrity team or SIU follow the process for submitting a rescission request to CMS as outlined below. This is especially important if the providers are out-of-network substance abuse facilities, sober homes, or laboratories billing for drug testing as these may indicate an enrollment scheme.)
3. The issuer has had no contact from the enrollee about their policy or benefits, including emails and calls to customer service, or the enrollee only contacted the issuer within the 60 days prior to contacting the Exchange to cancel coverage or report they did not know about or consent to the enrollment.

If an issuer finds that all three of the criteria are true, the FFE will consider this corroboration that the individual was unaware of or did not consent to the enrollment, and a cancellation is appropriate.

If one or more of the criteria are not verified, the policy should not be cancelled, absent further information from the enrollee that demonstrates the elements necessary to support cancellation under the regulations.

All HICS cases must be thoroughly documented per 45 CFR 156.1010(g)(2). Once the issuer has determined whether or not the policy will be cancelled, that information must be documented in HICS by using the Outcome of Resolution dropdown. The Outcome of Resolution choices should be used as follows:

- **Approved cancellation** – The issuer should select the dropdown choice *Issuer has adjusted its record, in whole or in part, in accord with the request/directive.*
- **Denied cancellation** – Issuers who are not able to cancel the policy should choose one of the following dropdown choices that indicates why the policy cannot be cancelled:
  - The consumer had paid claims
  - The consumer paid premiums
  - The consumer contacted the plans for reasons other than to cancel their policy

---

12.3 Issuer Reports of Suspected Unauthorized Enrollments

Issuers may become aware of unauthorized enrollments that are not reported to the Marketplace Call Center, such as consumer complaints alleging an enrollment was unauthorized that are made directly to the issuer or through their own investigations or data analyses. To facilitate reports of unauthorized enrollments, CMS has set up a process for issuers to report suspected unauthorized enrollments directly. Issuers who believe they have identified unauthorized enrollments should first check to see whether the policies meet the three criteria described in Section 12.2.1, Operational Process for Cancelling Unauthorized Enrollments; as with individual reports of unauthorized enrollments, if any of the criteria are met, the policies cannot be cancelled. In addition, if the suspected unauthorized enrollments did not originate with a complaint from a consumer, the issuer must attempt to contact each enrollee (using either the phone, email address, or mailing address listed on the enrollee’s application) 69 and provide the enrollee at least 30 days to respond and verify whether the enrollment was unauthorized.

Once the above steps have been completed, the issuer should compile a spreadsheet with the following information for each suspected unauthorized enrollment: Exchange policy and application ID, plan year, and state. The issuer should email this spreadsheet to their Account Manager and the Marketplace program integrity mailbox (MarketplaceIntegrity@cms.hhs.gov) with an indication that the issuer suspects these enrollments were unauthorized and an explanation of how the issuer identified the suspected unauthorized enrollments. CMS staff will review the submission, and the Account Manager will let the issuer know whether the policies can be cancelled. Upon receiving approval, the issuer can cancel the approved policies using the process outlined in Section 12.4, Implementing Cancellations for Unauthorized Enrollments.

NOTE: Issuers sometimes receive complaints from enrollees alleging that they enrolled with the issuer but were switched to a plan with a different issuer without their authorization by an agent or broker (A/B) or other third party. These cases are distinct from unauthorized enrollments because the enrollee did intend to enroll in Exchange coverage and wants to remain enrolled. In such cases, issuers must direct enrollees to call the Marketplace Call Center, where these complaints will be assigned to caseworkers for resolution. These kinds of cases cannot be submitted to CMS using the issuer-reported unauthorized enrollment process described above.

12.4 Implementing Cancellations for Unauthorized Enrollments

Issuers are asked to cancel policies that meet all three criteria by submitting an Inbound 834 (IC834) with a CANCEL-FRD Additional Maintenance Reason Code (AMRC) (or another Enrollment Data Alignment [EDA] channel using the same cancel code). Once the policy is cancelled in the FFE, the FFE recoups any APTC and makes adjustments for user fees. For policies in the immediately preceding plan year or earlier that are being cancelled after May 1, issuers must cancel the policy via a HICS Direct Dispute.

---

69 Even if the contact information for the enrollee is invalid (e.g., returned mail or an email bounces back), the issuer must still attempt to contact the enrollee and must provide at least 30 days for the enrollee to respond. If no response is received from the enrollee within that time, the issuer can proceed with reporting the suspected unauthorized enrollment to CMS.
FFE Enrollment

It is important to submit a CANCEL-FRD AMRC even if the policy is already terminated for non-payment because many of the individuals had APTC that covered all or some of their premium payments, resulting in Forms 1095-A being generated and shared with the IRS showing subsidy amounts for any month(s) of the year in which APTC payments were made. To relieve individuals of tax liabilities for unauthorized enrollments a corrected 1095-A must be created, which can only happen once the policy is cancelled back to the effectuation date.

Finally, as with any HICS case, regulation requires that the issuer contact the consumer to report the resolution of the case whether the policy is cancelled or remains in effect.

If issuers have questions about this process, they should email the Marketplace program integrity mailbox at MarketplaceIntegrity@cms.hhs.gov.

12.5 Reporting Fraudulent Enrollments: Examples of Elements Demonstrating an Appropriate Rescission of QHPs in the Exchanges

Issuers of individual health insurance coverage, including QHPs offered through an Exchange, may only rescind such coverage when the individual (or a person seeking coverage on behalf of the individual) performs an act, practice, or omission that constitutes fraud, or makes an intentional misrepresentation of a material fact, as prohibited by the terms of the plan or coverage.

Regulation at 45 CFR 155.430(b)(2)(iii) provides Exchanges the option to require that QHP issuers demonstrate, to the reasonable satisfaction of the Exchange, that the basis for a rescission is appropriate. The FFE requires that QHP issuers demonstrate that a rescission is appropriate, using the procedures described below, before rescinding coverage.

QHP issuers wishing to send CMS a rescission request should ask their CMS Account Manager for the most recent version of the Rescission Request Template or find the form at https://regtap.cms.gov/reg_library_openfile.php?id=2568&type=l. The form should be filled out as completely as possible, encrypted to protect personally identifying information, and sent to the Account Manager with a copy to the CPI mailbox at MarketplaceIntegrity@cms.hhs.gov. The CMS Account Manager will review the request for completeness, may request additional information from the issuer, if necessary, to review the submission, and may reject requests that are incomplete or do not meet the bases for a rescission. Once satisfied with the issuer’s submission, the Account Manager will add the date of their approval to the request form and notify CPI of the approval. Complete requests receive additional review from CMS, which aims to respond with a written communication from CPI sent electronically within 30 days. Issuers with pending submissions may contact their CMS Account Managers for a brief update of status. Any A/B associated with fraudulent schemes may be investigated by CPI and, if warranted, may have their FFE agreements suspended or terminated.

Issuers with policies approved for rescission must provide 30 days’ advance written notice to the subscriber whose policy is being rescinded as required in 45 CFR 147.128(a). Notices may be sent to the subscriber’s FFE mailing address, although issuers may use residential addresses and/or email in addition.

---

70 The prohibition on rescissions also applies to group health plans, health insurance issuers offering group health insurance coverage, and health insurance issuers offering individual market coverage outside the Exchange. See 45 CFR 147.128. However, this document is addressed to individual market QHPs offered through an FFE about what the FFE may rely on to determine whether a rescission is appropriate.
FFE Enrollment

For current plan year policies approved by CMS for rescission, the issuer should submit an IC834 with Maintenance Type Code (MTC)=024, Maintenance Reason Code (MRC)=07, and AMRC=CANCEL-RESCIND. Issuers can utilize the IC834 process until late March of the following benefit year. Issuers must submit the rescinded policy during monthly Enrollment Data Reconciliation as well, using Cancel Reason 14 (CANCEL-RESCIND).

For prior year policies approved by CMS for rescission, the issuer must submit an Enrollment Dispute through the Enrollment Resolution and Reconciliation (ER&R) contractor, setting “Prior Year – End Date” to equal the start date of the policy and choosing “Initial Premium Paid Status” as the dispute type on the Discrepancy Dispute tab of the form. Account Manager approval is required for all prior year disputes submitted on May 1 or later of the following year.

Once properly rescinded, the issuer may reverse claims and refuse additional claims filed for the same rescinded policy. CMS recoups any APTC paid for that period through policy-based payment just as in any other retroactively cancelled policy.

Stakeholders have asked for examples of what information the FFE would consider in determining whether it is appropriate for an issuer to rescind coverage under a QHP offered through the FFE.

Although the FFE is unable to give an exact formula for an approved rescission, the elements listed below are meant to be a guide to QHP issuers in gathering evidence to be submitted to the FFE to support the appropriateness of any rescission request.

The examples below can serve the purpose of demonstrating to the FFE under 45 CFR 155.430(b)(2)(iii) indicia of fraud or intentional misrepresentation of material facts. However, comprehensive review of all relevant facts and circumstances will be necessary. Note that these examples do not automatically meet the criteria necessary to permit a rescission, and an issuer will need to provide evidence to substantiate compliance with applicable rules regarding rescissions.

The examples below are not exhaustive and are not a substitute for any regulations or other interpretive guidance.

Demonstrating fraud or intentional misrepresentation of a material fact generally requires showing that the information was false, and intent by the individual (or a person seeking coverage on behalf of the individual) to use false information to obtain coverage.

12.5.1 Falsity of Information

The issuer must demonstrate that the enrollee (or a person seeking coverage on behalf of the enrollee) intentionally provided information that was false. The following are examples of information that could be presented to demonstrate the falsity of information presented to the issuer. One of these examples of false information alone may not be sufficient to show intentional wrongdoing, but multiple examples of false information may indicate an intention to defraud:

- **False residency address:** Evidence that an enrollee’s residency address in the service area may not be valid or may not comply with FFE residency rules could include:
  - An address at which the enrollee could not have lived.
  - A single address listed for an unreasonable number of enrollees.
  - An address associated with known fraud in the past.
FFE Enrollment

- Enrollment pursuant to a “permanent move” Special Enrollment Period (SEP) where the residency address is that of the facility at which the enrollee is receiving treatment on a temporary basis.
- A statement from the property owner or resident that the enrollee is unknown to the owner or resident and did not live at the address at the time of enrollment nor during the benefit year.
- A record, made in the normal course of business, which supports the property owner’s or resident’s claim by showing that the enrollee did not live at the reported address at the time of enrollment nor during the benefit year.
- A statement from the enrollee that they did not live at the address at the time of enrollment nor during the benefit year.

- **False enrollment**: Evidence indicating that an enrollment may have been submitted without the enrollee’s knowledge or consent could include:
  - Suspicious patterns of enrollment involving licensed or unlicensed brokers.
  - Suspicious third-party premium payments, such as:
    - Payments from an A/B.
    - Payments for an unreasonable number of enrollees from a source unrelated to the enrollees.
    - Payments that are made with gift cards.
  - Deceased enrollee – The QHP issuer can demonstrate that the enrollee was deceased at the time of enrollment by matching the member name and SSN against the SSA Death Master File (to prevent improper cancellation for enrollees with mistyped SSNs and surviving family members who have inherited the deceased’s SSN during a Change in Circumstance [CIC], aka “subscriber inheritance”) and that the enrollment was not effectuated retroactively after the enrollee’s death.

- **Suspicious claims**: Evidence that an enrollee is receiving or has received treatment that corresponds to a known pattern of fraud:
  - Since evidence of a specific type of treatment, by itself, seldom (if ever) would be evidence of fraud, an issuer would need to provide evidence (to the satisfaction of the FFE) that the enrollee was not receiving the billed treatment or was not entitled to the healthcare policy. An example is sober-home schemes in which enrollees are enrolled in plans they are not eligible for by intentionally falsifying material information on the applications in order to gain access to policies with generous out-of-network benefits and low out-of-pocket costs.

### 12.5.2 Intent

The issuer must demonstrate that the enrollee (or a person seeking coverage on behalf of the enrollee) intended to provide information that was false. The following are examples of facts that could be presented to demonstrate the intention of the enrollee (or someone acting on the enrollee’s behalf) to enroll using false information. One of these examples alone may not be sufficient to show intentional wrongdoing, but multiple examples may indicate an intention to defraud. Examples include:

- **Enrollee corroboration**. The issuer communicates with the enrollee in person, by phone or by mail, and the enrollee either:
  - Corroborates enough indicia of fraud to prove, to the satisfaction of the FFE, that a rescission would be appropriate.
FFE Enrollment

- States that a third party entered into the enrollment without the enrollee’s knowledge and the enrollee does not want the coverage the issuer is seeking to rescind.

- **Inability to contact enrollee:** The QHP issuer has made a good faith, but unsuccessful, effort to communicate with the enrollee and:
  - The unsuccessful efforts to communicate with the enrollee are documented.
  - The QHP issuer attempted to communicate with the enrollee using every method of contact (mail, email, phone number) on file for the enrollee more than one time.

Note on Falsity of Information: If, within the 30-day notice period prior to the rescission becoming effective, the enrollee states to the QHP issuer that they want the coverage that would be rescinded and demonstrates to the issuer or attests to the FFE the validity of the information that supposedly was false, forming the basis of the rescission, the QHP issuer must not rescind the coverage.
13. IMPLEMENTATION OF ELIGIBILITY APPEAL DECISIONS AND RELATED ENROLLMENTS IN THE FFE

13.1 Background

Under 45 CFR Part 155, Subpart F, individuals have the right to appeal Federally-facilitated Exchange (FFE) eligibility determinations, including but not limited to:

- Eligibility for advance payments of the premium tax credit (APTC), cost-sharing reduction (CSR), and enrollment in a Qualified Health Plan (QHP) through the Exchange.
- Eligibility for Medicaid and the Children’s Health Insurance Program (CHIP) where a state has delegated to the FFE the authority to make determinations of eligibility for Medicaid and, if applicable, CHIP, and delegated authority to the Department of Health & Human Services (HHS) appeals entity to adjudicate appeals of any denial of Medicaid or CHIP eligibility pursuant to 42 CFR 431.10 and 42 CFR 457.1120.
- Eligibility for an enrollment period, including Special Enrollment Periods (SEPs) and plan category limitations (PCL).
- Eligibility for enrollment in a catastrophic plan.
- Failure by the Exchange to provide timely notice of an eligibility determination.
- Eligibility for an exemption from the individual responsibility requirement.

The FFE provides written notification to applicants and enrollees advising them of their right to appeal when they receive an eligibility determination, including an explanation that an appeal must be requested within 90 days of the date of the notice of the FFE’s eligibility determination.71 In addition, when applicants and enrollees appeal eligibility redeterminations made by the FFE, they have the right, pursuant to 45 CFR 155.525, to request eligibility pending appeal.

In adjudicating an appeal, the appeals entity for the FFE (the HHS appeals entity) reviews the case anew, considering all the information initially used to determine the individual’s eligibility, as well as all relevant facts and evidence gathered through the appeals process, and establishes whether the contested eligibility determination was correct at the time it was made. If, on appeal, the eligibility determination is found to be incorrect, the individual has the option under 45 CFR 155.545(c) to have the Exchange implement the appeal decision prospectively, on the first day of the month following the date of the appeal decision notice or, retroactively with an effective date the individual would have received based on the date the original, incorrect eligibility determination was made, consistent with 45 CFR 155.330(f)(2), (3), (4), or (5), as applicable. In addition, the individual may be granted a 60-day SEP under 45 CFR 155.420, to preserve the enrollment opportunities that the individual would have had, if the eligibility determination had been correct at the time it was made. This SEP begins on the date of the appeal decision and may permit the individual either to enroll in a QHP/Qualified Dental Plan (QDP), or switch QHPs/QDPs, including, at the individual’s option, on a retroactive basis.

---

13.2 CMS Role

13.2.1 Notify Issuer to Implement an Appeal Decision

When the contested eligibility determination is found to be incorrect and the appeal decision results in a new eligibility determination, an individual can choose to have the appeal decision implemented prospectively or retroactively. The issuer will receive an 834 transaction from the Exchange that communicates the individual’s eligibility from the appeal decision, including enrollment effective dates and APTC/CSR eligibility. If an 834 transaction cannot be generated, the issuer will receive a Health Insurance Casework (HICS) case from the HHS appeals entity. The issuer will receive both an 834 transaction and a HICS case when the APTC/CSR eligibility in the 834 transaction needs to be adjusted. All HICS cases will have the subcategory “Eligibility Appeals Related (OHI Use Only).” Refer to the scenarios below for additional information.

If the contested eligibility determination is found to be correct and the appeal decision upholds the Exchange’s eligibility determination, the issuer will not receive any communication from the Exchange unless the individual requested eligibility pending appeal. Refer to Section 13.2.2, Notify Issuer to Implement a Request for Eligibility Pending Appeal, for more information.

13.2.2 Notify Issuer to Implement a Request for Eligibility Pending Appeal

The HHS appeals entity will create a HICS case to notify the issuer when an individual elects to keep their level of eligibility prior to the contested eligibility determination while the appeal is pending. The HICS case will include instructions to the issuer about the level of eligibility to maintain for the particular individual or individuals. All such cases will be recorded in Category 2 (Plan and Issuer Concerns) and the Eligibility Appeals Related (OHI Use Only) subcategory. The case narrative field in the HICS case will begin with “[Consumer name(s)] was granted pended eligibility during their appeal. The issuer is to update its internal systems to reflect the eligibility and date(s) listed below. Once updates are completed, the issuer is to confirm these actions in the HICS Case “Resolution” tab. The issuer should also use Enrollment Data Alignment (EDA) to have the pended eligibility and/or appeal eligibility outlined in this HICS case reflected in the FFE enrollment record.”

In certain cases, individuals who requested eligibility pending appeal may only require a continuation of eligibility for a segment of time, because, after a reduction in or loss of APTC/CSR eligibility, they were able to reinstate their eligibility. For example, an individual received APTC/CSR in the prior year and loses their APTC/CSR eligibility effective January 1; then the individual updates their application on January 15 and receives APTC/CSR eligibility effective February 1. Such an individual may request eligibility pending appeal for the month of January only. When this situation occurs, the HICS case for eligibility pending appeal will include a start date and an end date so the individual’s subsequent application update (which was effective February 1) is not superseded.

13.2.3 Notify Issuer to Discontinue Eligibility Pending Appeal and Implement the Appeal Decision

At the end of the appeal, which results in either dismissal or an appeal decision, the issuer will receive instructions via a HICS case to discontinue eligibility pending appeal. The exceptions are if the individual did not request eligibility pending appeal and the appeal is dismissed, or the HICS case instructing the issuer to implement eligibility pending appeal includes an end date.
the effective date to end the eligibility that the individual received while the appeal was pending, and, if applicable, the coverage effective date to apply the eligibility awarded in the appeal decision. The HICS case will include the HICS case ID number for the previous HICS case that communicated the instructions for eligibility pending appeal. The Case Narrative field in the HICS case will begin with “[Consumer name(s)]’s appeal concluded. The issuer is to update its internal systems to reflect the eligibility/enrollment and date(s) listed in the action below. Once updates are completed, the issuer is to confirm these actions in the HICS Case “Resolution” tab. The issuer should also use EDA to have the pended eligibility and/or appeal eligibility outlined in this HICS case reflected in the FFE enrollment record.” The issuer is to update its internal systems to reflect changes to the enrollment and to any APTC/CSR eligibility, as applicable.

Sometimes, an enrollee may independently update their enrollment during the pendency of the appeal. Should that occur, the HICS case containing instructions to discontinue eligibility pending appeal will include further language instructing the issuer to stop eligibility pending appeal the day before the independent enrollment and leave the subsequent, established enrollment unchanged. The HICS case will include the following additional language “The enrollment record reflects that the consumer updated their eligibility and enrollment. The consumer’s eligibility and enrollment from the independent update was transmitted to the issuer via 834 and should continue unchanged.”

In limited circumstances, an individual receiving eligibility pending appeal may be permitted to revert to a lower level of coverage if the appeal decision upholds the contested eligibility determination. For example, an individual was eligible for APTC/CSR in the prior year, but their eligibility was redetermined and they were found ineligible for APTC/CSR during the Open Enrollment Period (OEP). The individual enrolls in a Bronze plan because they are ineligible for CSR. They appeal the redetermination and request eligibility pending appeal. They are granted eligibility pending appeal and enroll in a Silver plan with APTC/CSR. Their appeal decision upholds the Exchange’s eligibility determination. They are eligible for an SEP under 45 CFR 155.420(d)(6)(i) and permitted to enroll in any plan.

13.3 Issuer Role

13.3.1 Enrollment Requirements

Issuers play a critical role in implementing an individual’s appeal decision and, if applicable, the individual’s request for eligibility pending appeal.

- Once an individual is determined eligible for an SEP as a result of the appeal decision, an issuer is responsible for enrolling any individual who selects a plan offered by that issuer through the Exchange and applying any APTC/CSR for which the individual is found eligible upon appeal, as instructed by the FFE.

- Where the individual is found eligible for and chose a retroactive effective date based on the appeal decision, the issuer is responsible for processing or re-processing the individual’s claims incurred during the period of retroactive coverage, collecting premiums from the individual for months of retroactive coverage, and providing the applicable period of time to make payment consistent with Section 6, Premiums (Applicable to the Individual Market FFE, QHPs/QDPs).

- In the case of retroactive changes to eligibility for APTC/CSR, the issuer is responsible for refunding or crediting any excess cost-sharing or premiums paid to the enrollee consistent with
Section 6, Premiums (Applicable to the Individual Market FFE, QHPs/QDPs), and applicable state law.

- In the case of an individual’s request for eligibility pending appeal, upon notification from the HHS appeals entity, the issuer must maintain the individual’s enrollment and APTC and, if applicable, CSR eligibility level that were in effect prior to the redetermination being appealed. Similarly, at the conclusion of the appeal, upon notification from the HHS appeals entity, the issuer must implement the individual’s corrected eligibility specified in the appeal decision and, if applicable, discontinue eligibility pending appeal.

- In the case of retroactive changes, the issuer may need to submit the correction to the Enrollment Resolution and Reconciliation (ER&R) contractor in order to ensure the FFE is updated and proper payment from CMS.

13.3.2 HICS Case Resolution Requirements

Upon receipt of a HICS case instructing an issuer to update its enrollment records based on an appeal decision or eligibility pending appeal, the issuer must complete the following actions:

- Update its enrollment records.
- Contact the individual to provide the resolution in accordance with the directions in the HICS narrative.
- Close the HICS case with resolution notes acknowledging that its records have been updated and that it contacted the individual to provide the resolution in accordance with the HICS case narrative directions.
- Meet the timeliness and notification requirements outlined in 45 CFR 156.1010(d) for all appeals-related HICS cases, whereby an issuer must take action to implement the directions in the HICS case narrative for an appeal-related case no later than 15 days after receipt of the HICS case, and, in cases of expedited appeals (which will be coded as expedited cases in HICS), within 72 hours after receipt of the HICS case.
- Use EDA processes, including the ER&R dispute process (which includes HICS Direct Disputes), to ensure that the FFE policy record reflects the APTC and CSR amounts granted to the individual and implemented by the issuer pursuant to eligibility pending appeal and, as applicable, the appeal decision that was communicated via HICS. This is necessary for the accuracy of the taxpayer’s Form 1095-A as well as issuer policy-based payment.
  - If the update requires a retroactive adjustment or adjustment to financials, the issuer must update their next RCNI File and submit the HICS case to the ER&R contractor using the HICS Direct Dispute process to ensure the FFE policy is updated correctly.

Issuers must follow regulatory guidelines for communication with individuals and are encouraged to adopt the HICS case best practices. Recommended language to include in the issuer resolution notes is provided below:

“We updated our internal systems on [date of the update] to reflect changes to [Consumer Name]’s enrollment and to any APTC/CSR eligibility.”

74 The EDA process is the process that FFE uses to ensure the accuracy and completeness of the information transmitted and to maintain consistent information between issuers and the FFE. More information about this process is available in Section 9, Enrollment Data Alignment (Applicable to Individual Market FFE, QHPs/QDPs).
FFE Enrollment

Include the following, as applicable to the case:

- Enrollment effective date: [effective date].
- Monthly amount of APTC and effective date: [APTC amount and effective date].
- CSR level and effective date: [CSR level and effective date].
- Enrollment termination date: [effective date of disenrollment].
- Monthly amount of APTC and end date: [APTC amount and end date].
- CSR level and end date: [CSR level and end date].

13.4 Appeal Decision Scenarios

| **Scenario #1.** The individual is not enrolled in a QHP. The individual receives an appeal decision finding that the contested determination of ineligibility for APTC/CSR is incorrect, and the individual is eligible for APTC/CSR. The individual opts to have the decision implemented prospectively. | • The issuer receives an 834 enrollment transaction and/or HICS case with the individual’s plan selection, APTC/CSR eligibility, and prospective effective date.  
• The issuer must apply the eligibility submitted by the HHS appeals entity for the remainder of the plan year unless otherwise directed by the Exchange.  
• The issuer must submit these enrollment changes via the EDA process. More information about this process is available in Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes). |
| **Scenario #2.** The individual is not enrolled in a QHP. The individual receives an appeal decision finding that the contested determination of ineligibility for APTC/CSR is incorrect, and the individual is eligible for APTC/CSR. The individual opts to have the decision implemented retroactively. | • The issuer receives an 834 enrollment transaction and/or HICS case with the individual’s plan selection, APTC/CSR eligibility, and retroactive effective date.  
• The issuer processes the individual’s enrollment, collects payment necessary to effectuate coverage retroactively, and processes claims submitted by the enrollee or the enrollee’s care providers for services furnished on or after the retroactive enrollment effective date.  
• The issuer must apply the eligibility submitted by the HHS appeals entity for the remainder of the plan year unless otherwise directed by the Exchange.  
• The issuer must submit these enrollment changes via the EDA process. More information about this process is available in Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes). |
### FFE Enrollment

| **Scenario #3.** The individual was enrolled in a QHP with APTC/CSR, but their coverage was terminated due to non-payment because they lost APTC/CSR eligibility and did not make full payments. The individual receives an appeal decision finding that the contested determination of ineligibility for APTC/CSR is incorrect, and the individual is eligible for APTC/CSR. The individual opts to have the decision implemented retroactively, and where the individual wants to reenroll in the same coverage that was terminated, the prior termination for non-payment is considered erroneous and the issuer is directed to reinstate enrollment into the prior plan. | • The issuer receives an 834 enrollment transaction and/or HICS case with the individual’s plan selection, APTC/CSR eligibility, and retroactive effective date.  
• The issuer collects premiums in accordance with 45 CFR 155.400(e), and reenrolls the individual, refunds or credits to the enrollee any excess premiums paid, reprocesses claims to account for the application of the higher level of CSR (if applicable), and refunds to the enrollee any excess cost-sharing paid in accordance with applicable state law.  
• The issuer must apply the eligibility submitted by the HHS appeals entity for the remainder of the plan year unless otherwise directed by the Exchange.  
• The issuer must submit these enrollment changes via the EDA process. More information about this process is available in Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes). |
| **Scenario #4.** The individual is enrolled in a QHP with APTC/CSR. The individual receives an appeal decision finding that the contested determination of the amount of APTC/CSR for which the individual is eligible is incorrect, and that the individual should have been determined eligible for a different amount of APTC/CSR. The individual opts to have the decision applied retroactively in the same QHP. | • The issuer receives an 834 enrollment transaction and/or HICS case with the enrollee’s plan selection, APTC/CSR eligibility, and retroactive effective date.  
• The issuer processes the adjustments to the enrollee’s enrollment, refunds or credits to the enrollee any excess premiums paid, reprocesses claims to account for the application of the higher level of CSR (if applicable), and refunds to the enrollee any excess cost-sharing paid in accordance with applicable state law.  
• The issuer must apply the eligibility submitted by the HHS appeals entity for the remainder of the plan year unless otherwise directed by the Exchange.  
• The issuer must submit these enrollment changes via the EDA process. More information about this process is available in Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes). |

### Scenario #11

The individual is enrolled in a QHP with APTC/CSR. The individual reports a life change and is found ineligible for APTC/CSR. The individual is contesting the redetermination that they are not eligible for APTC/CSR and chooses to continue receiving APTC/CSR during their appeal. Then, the individual receives an appeal decision finding that the contested eligibility determination was correct upholding the Exchange’s eligibility determination.

#### Appeals Outcome

Members on the application should remain covered. The individual receives an appeal decision finding that the contested eligibility determination was incorrect. The individual opts to reinstate coverage for all members on the application except for themselves and retroactively terminate their QHP on the date initially requested.

#### Enrollment Actions

- The remaining members with the plan selection, APTC/CSR eligibility, and effective date.
  - The issuer processes the adjustments to the enrollee’s enrollment, refunds or credits to the enrollee any excess premiums paid, reprocesses claims to account for the application of the higher level of CSR, and refunds to the enrollee any excess cost-sharing paid in accordance with applicable state law.
  - The issuer must apply the eligibility submitted by the HHS appeals entity for the remainder of the plan year unless otherwise directed by the Exchange.
  - The issuer must submit these enrollment changes via the EDA process. More information about this process is available in **Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes)**.

- The issuer receives a HICS case for eligibility pending appeal with the effective date and APTC/CSR eligibility. The issuer must apply this eligibility while the appeal is pending.
- The issuer processes the APTC/CSR eligibility and effective date to the enrollee’s enrollment, refunds or credits to the enrollee any excess premiums paid, reprocesses claims to account for the application of CSR, and refunds to the enrollee any excess cost-sharing paid in accordance with applicable state law.
- The issuer must submit these enrollment changes via the EDA process. More information about this process is available in **Section 9.4.8, HICS Direct Dispute Process**.
- Once the appeal is decided, the issuer receives a HICS case with an effective date that ceases the provision of APTC/CSR.
- The issuer must apply the eligibility submitted by the HHS appeals entity for the remainder of the plan year unless otherwise directed by the Exchange.
- The issuer must submit these enrollment changes via the EDA process. More information about this process is available in **Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes)**.

### Impact of Appeals on Enrollment Data Reconciliation

The HHS appeals entity communicates appeal decisions that yield policy level updates to issuers via HICS. Enrollment changes due to appeal decisions implemented before March of the subsequent year should be updated utilizing the Inbound 834 (IC834) process where possible. This includes effectuating, cancelling, or terminating policies. The IC834 process can also reinstate most policies or coverage spans.

If the IC834 process cannot resolve the HICS case, the issuer should submit the updates on the next RCNI. If the update requires a retroactive adjustment or adjustment to financials, the issuer must submit the HICS case to the ER&R contractor using the HICS Direct Dispute process in addition to the RCNI update to ensure the FFE policy is updated correctly. Refer to Section 9, Enrollment Data Alignment (Applicable to Individual Market FFE, QHPs/QDPs), for additional guidance on submitting updates through the monthly Enrollment Data Reconciliation process.

There are some situations where current year appeals must be submitted to the ER&R contractor through the dispute process because the monthly Enrollment Data Reconciliation process is unable to update the FFE. Refer to Section 9, Enrollment Data Alignment (Applicable to Individual Market FFE, QHPs/QDPs), for guidance on how to submit disputes to update the FFE’s records.

Enrollment changes due to appeal decisions implemented after March of the subsequent year (once Enrollment Data Reconciliation and IC834 transactions have concluded for prior year coverage) must be submitted via the ER&R Enrollment Dispute process (see Section 9.4, Resolution of Enrollment and Payment Discrepancies (Disputes)). These updates will also be noted on the next Pre-Audit file released for the year that the update was made in the FFE. Refer to the Pre-Audit and Reconciliation Calendar for delivery dates of each Pre-Audit file. It can be located at [https://zone.cms.gov/document/enrollment-data-reconciliation](https://zone.cms.gov/document/enrollment-data-reconciliation).
14. HEALTH INSURANCE CASEWORK SYSTEM

14.1 Introduction

The Health Insurance Casework System (HICS) is the official tracking system for Exchange casework and is used by issuers that participate in the Federally-facilitated Exchange (FFE) and State-based Exchanges on the Federal Platform (SBE-FPs). The HICS system is the means by which the Marketplace Call Center routes cases to issuers that require investigation and resolution.

HICS is also used to direct an issuer to make changes to enrollment effective and end dates, changes to advance payments of the premium tax credit (APTC) and cost-sharing reduction (CSR) resulting from appeal decisions and other corrections, when the change via 834 transactions or Pre-Audit Files is not possible.

CMS Caseworkers and Account Managers provide technical assistance through the HICS case to issuers or other CMS staff when needed. In addition, the Office of Hearings and Inquiries (OHI) and Eligibility Appeals Support Contractors (EASC) utilize HICS to communicate appeals decisions to issuers.

14.2 HICS Access

HICS is accessible to approved users via https://idm.cms.gov/. Users are required to comply with all applicable laws and regulations associated with the use of this U.S. Government computer system. Issuers that need HICS access will now be required to complete and submit applications through IDM. The system enhancements offer new electronic receipt and processing of applications for HICS access that eliminates the burden of completing and retaining paper records and physically moving paper applications through multiple steps of the HICS application process. Issuers should download the updated guidance on how to access HICS from the Qualified Health Plan (QHP) website (information found on the bottom of the page) at https://www.qhpcertification.cms.gov/s/Published%20Guidance%20and%20Regulations. After logging on to the system, users can access the Issuer User Manual by selecting Documentation on the Casework Tracking Start Page menu.

Staff requesting HICS access from an issuer should select the Issuer role in IDM. Currently this is the only role for issuer HICS access. For additional questions about HICS access, issuers can contact the HICS Access Resource Mailbox at HICS_Access@cms.hhs.gov. HICS users must comply with the annual recertification requirement when notified and complete annual Computer Based Training.

Issuers are expected to acquire and maintain sufficient access to HICS for their staff and train them to use the system. Having sufficient staff access to HICS will aid with issuer responsiveness, potentially avoiding the generation of additional and unnecessary HICS cases. Because HICS contains personally identifiable information and personal health information, issuer compliance with all applicable CMS privacy and security certification and training is required.

14.3 HICS Category Use

For simplicity and administrative ease, issues in HICS are grouped into one of five categories identified below. Every case recorded in HICS must be assigned a category and subcategory. Category 2, designated as Plan and Issuer Concerns, has been established to record cases related to access to
FFE Enrollment

benefits, premiums, and services provided by a QHP only. The term “QHP” includes Consumer Operated and Oriented Plans (CO-OPs), Qualified Dental Plans (QDPs), and Multi-State Plans (MSPs).

Marketplace Call Center cases are concurrently assigned to an issuer and the CMS Lead Caseworker associated with that issuer in the daily casework load. Category 2 cases where QHPs are not identified are placed in an unassigned grouping for CMS review based on the consumer’s state.

Per 45 CFR 156.1010, resolution and consumer notification all have separate regulatory timeliness requirements. Issuers are to resolve Level 1 (urgent) cases within 72 hours of receiving the case and Level 2 (non-urgent) cases within 15 calendar days of receiving the case. Issuers must notify complainants regarding the disposition of the case as soon as possible upon resolution of the case but in no event later than three business days after the case is resolved. Notification may initially be performed verbally, but all cases must be responded to in writing. The verbal notification of the resolution of the cases will satisfy the timely notification requirement. Issuers should check HICS daily and monitor adherence to required resolution time frames. To avoid delays, issuer staff should have appropriate access to enrollment files without the need for escalation to other internal issuer departments. If a case narrative is unclear, the issuer is expected to contact the individual for additional information prior to referring the case back to CMS.

CMS routinely monitors issuer compliance with casework handle times described in 45 CFR 156.1010. CMS measures the handle time of HICS cases based on the issuer assignment date/timestamp and resolution date/timestamp. The handle time calculation is performed down to the minute for both issue level 1 and 2 cases. Issuers who fail to resolve HICS cases (issue level 1 or 2) timely 95 percent of the time may be subject to progressive compliance actions. This includes but is not limited to technical assistance, corrective action plan, and notice of non-compliance.

Exhibit 31 identifies the expected issuer resolution time for each issue level and the case type.
### Exhibit 31: Issuer HICS Resolution Times

<table>
<thead>
<tr>
<th>Type of Case</th>
<th>Issuer HICS Resolution Time</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 1</td>
<td>Within 72 hours of the issuer assignment date*</td>
<td>Resolution summary of the case added no later than seven days after resolution</td>
</tr>
<tr>
<td>Level 2</td>
<td>Within 15 calendar days of the issuer assignment date</td>
<td>Resolution summary of the case added no later than seven days after resolution</td>

<tr>
<td>Plan Request</td>
<td>-</td>
<td>The issuer assignment date will update if the plan request is accepted by the CMS Caseworker and subsequently returned to the issuer. If the plan request is rejected, the issuer assignment date will remain the same.</td>
</tr>
</tbody>
</table>

*NOTE*: Turnaround times are driven by the Assignment Date field in HICS, which correlates to when the case is assigned to the issuer.

When reviewing HICS cases, issuers should distinguish between directive cases that require them to act and non-directive individual requests that require review prior to action and/or resolution. For example, an appeal decision sent via HICS from “Case Source: CMS Appeals Contractor” will include a case narrative (see case narrative guidance) and changes that the issuer must effectuate as directed. The issuer must update the Exchange through the Enrollment Data Alignment (EDA) process (see Section 9, Enrollment Data Alignment (Applicable to Individual Market FFE, QHPs/QDPs)). Similarly, if an issuer receives a Special Enrollment Period (SEP) enrollment with an EX code and a corresponding HICS case stating that a specific retroactive coverage effective date should be applied, the issuer should treat that as a CMS directive. In contrast, a case narrative such as “Individual believes that they were terminated in error and desires reinstatement,” is a non-directive narrative that requires the issuer to investigate first. The issuer should take action to update the individual’s record in accordance with applicable laws and policies and only if supported by evidence the individual provides or the issuer develops. In all cases, the issuer must contact the individual with the resolution of the HICS case.

Infrequently, a HICS case narrative may include directive instructions from CMS that the issuer believes to be inconsistent with law or policy. In this situation, the issuer should work with CMS to resolve the matter, starting with the assigned CMS Caseworker and/or Account Manager. Issuers should not effectuate requests inconsistent with CMS policy and guidance.

In general, issuers are not able to reassign HICS cases. With a recent implementation of the HICS Plan Request functionality, specific cases may now be routed directly to a CMS Caseworker for review, technical assistance, and reassignment to a different issuer; the Enrollment Resolution and Reconciliation (ER&R) contractor to work for Direct Disputes; and the Office of Hearings and Inquiries (OHI) and Eligibility Appeals Support Contractors (EASC) for appeals clarification. These plan requests may include (but are not limited to) cases that require CMS approval for retroactivity or eligibility determination, enrollment blockers (new error code “enrollment blocker”), changes to APTC, changes to total premium amount that cannot be resolved through automated Enrollment Data Reconciliation, and term no longer eligible (NLE) appeals.

If the plan request is accepted, the case will generally be removed from the issuer’s view, and the case will no longer be subject to issuer timeliness requirements. If the case is returned to the issuer after
FFE Enrollment

review, the issuer assignment date will reset. This should prevent cases reassigned to issuers from being counted as untimely. However, issuers are expected to resolve the case within the allotted time allowed per 45 CFR 156.1010. The time the ER&R contractor is allowed to resolve a HICS Direct Dispute will be similar to disputes submitted via an Enrollment Dispute Form and therefore not counted against the issuer’s resolution timeline.

Issuers must continue to review and resolve individual issues after leaving a service area. Issuers entirely exiting Exchange operations should contact their Account Manager about continued casework expectations.

14.5 HICS Casework Best Practices

CMS expects issuers to always annotate cases with comprehensive notes. As a best practice, issuers should immediately annotate actions taken in HICS. Notes at each stage should include the following:

**Initial Issuer Notes:**
- Acknowledge receipt.
- Enter a brief issue description, including clarifying details not present in the CMS case narrative.
- Find related cases and prevent duplicative work by utilizing the Find Repeat Case feature, and record related cases found.

**Interim Issuer Notes:**
- Clearly and concisely summarize each step taken, especially if approaching timeliness deadline. Include: actions taken; internal referrals; and/or contact with CMS staff.
- Contact Information:
  - Who: Identity verified, names and relationships/titles
  - When: Dates and times
  - How: Method of contact (Including phone numbers and email addresses)
  - What: Summary of the information received and conveyed

**Resolution Issuer Notes and Documentation:**
- Resolution notes should be more extensive than brief one-liners like: Contact Made, Issue Resolved, and Unable to Contact
- Pertinent case facts, for example:
  - Issuer records updated and/or external referrals to ER&R or the Marketplace Service Desk (MSD)
  - Enrollment or termination information received electronically from CMS
  - Effective date and termination dates, including prior year effective dates and information as it relates to prior year eligibility appeals effectuation
  - Payment and billing history
  - Summary of resolution (how the case was resolved)
  - Information about how and when the complainant was notified of the resolution
  - How and when Complainant Was Notified of Outcome (Verbal and Written or Written Only)
  - Uploaded Copies of Correspondence Sent to Individuals and Other Entities
FFE Enrollment

If the issuer requires assistance, the issuer should contact their CMS Caseworker and/or Account Manager prior to resolving the case. Issuers may choose to establish a critical inquiry unit to resolve difficult cases. In some situations, HICS case notes may be released to requestors under the Freedom of Information Act (FOIA). Therefore, case notes’ content and comments should be clear, neutral, and factual.

For additional resources when working HICS cases, CMS has released the following guidance through REGTAP and frequently publish updated or additional guidance:

15. DATA MATCHING ISSUES MONTHLY PROCESSES

15.1 What Are Data Matching Issues or Inconsistencies?

When individuals apply for coverage through the Exchanges, including through HealthCare.gov, the applicable Exchange verifies information that is provided by the individual on their application. Most applicants’ information is immediately verified by the Exchange, however, in some cases, the information the applicant provided does not match up immediately with existing records or the applicant may not have provided enough information to match with the Exchange trusted data sources. These types of situations are called data matching issues (DMIs) or inconsistencies.

Examples of DMIs include the following:
- Citizenship
- Immigration status
- Annual Household Income
- Access to or enrollment in employer-sponsored minimum essential coverage (MEC) or health coverage from another public entity
- American Indian/Alaska Native status

15.2 How Does an Enrollee Know if They Have an Income DMI?

Enrollees are informed of DMIs in their initial Eligibility Determination Notice (EDN). The notice will let them know that they need to verify information on their application. At that time, the 90-day time frame for providing acceptable documentation is started.

NOTE: For citizenship and immigration DMIs, individuals have a 95-day time frame.

Enrollees are also able to view whether they have a DMI in logging into their online Marketplace account under the Eligibility Results page at HealthCare.gov.

Additionally, enrollees receive a series of Warning Notices: (separate 30-day, 60-day and 90-day notices), updating them on how much time they have left to resolve their DMI. They also receive a phone call after submitting insufficient documentation and/or 28 days after DMI generation if no document is submitted.

NOTE: Enrollees may also receive emails or texts from the Marketplace if an individual selected email or text as their preferred form of communication.

15.3 Exchange DMIs Issuer Outreach Files Delivery Processes and Impact to Enrollees

Enrollees must resolve their DMIs by providing additional information to the Exchange within 90 days (95 days for citizenship or immigration status DMIs). Enrollees with DMIs who are otherwise eligible are able to enroll in coverage through the Exchange during their inconsistency period.

If sufficient documentation is received during the inconsistency period to resolve a DMI, the Exchange finalizes the eligibility determination. If they do not resolve the DMIs, individuals with citizenship or immigration status DMIs may lose eligibility for coverage through the Exchange and enrollees with
other DMIs may undergo a loss or adjustment of their advance payments of the premium tax credit (APTC) and/or cost-sharing reduction (CSR) that could impact their monthly healthcare expenses.

In most situations where one member of an enrollment group is determined not to be a qualified individual (QI), the members of the enrollment group who remain eligible for enrollment through the Exchange would constitute an enrollment group that can be accommodated by the existing Exchange coverage. For example, if two parents and two children are in an enrollment group and one parent loses eligibility for enrollment through the Exchange, the remaining three family members could still constitute a valid enrollment group. If the remaining members of the enrollment group are still eligible for enrollment through the Exchange, and for APTC or CSR, if applicable, they may be able to continue their enrollment through the Exchange, along with their APTC or CSR.

Where the individual who is determined not to be a QI is also the subscriber of the Qualified Health Plan (QHP) and has their coverage terminated, and the remaining members of the enrollment group reenroll in coverage with the same issuer through the Exchange, the issuer is expected to apply any amounts previously paid toward deductibles and out-of-pocket limits toward the coverage of the remaining members of the enrollment group. Where the enrollee who is determined not to be a QI is not the subscriber of the QHP, and the QHP allows for removal of that dependent as an amendment to the policy, the issuer must apply any amounts previously paid toward deductibles and out-of-pocket limits toward the continuing coverage of the remaining members of the enrollment group.

In some situations, the removal of one or more members from an enrollment group results in a remaining group of enrollees that does not constitute a valid enrollment group based on the issuer’s business rules. For example, some issuers may not cover two children without an adult on a single-family policy. If the removal of the individual who was determined ineligible for enrollment through the Exchange results in the remaining eligible members of the enrollment group being unable to continue their enrollment in their same QHP, they will receive a Special Enrollment Period (SEP) to enroll in a QHP through the Exchange.

15.3.1 DMIs Outreach Schedule and Process

During the inconsistency period, issuers are encouraged to conduct outreach to enrollees who have unresolved DMIs. The Exchange will process outreach file transaction data that identifies enrollees with unresolved DMIs. The outreach file represents enrollments for individuals who may experience a change in eligibility for financial assistance or Exchange enrollment unless they successfully resolve their DMI. The Exchange sends the outreach files to issuers via Electronic File Transfer (EFT) code DATAM to give issuers an opportunity to conduct optional outreach to these enrollees. Enrollees who experience an adjustment in eligibility to be enrolled in a QHP or for financial assistance; loss or adjustment of APTC and CSR, due to an unresolved DMI, will be indicated on the 834 transaction files to the issuer. As such, issuers will be able to identify if a policy is being modified by the origin code populated on the M834 transaction.

An enrollee who loses eligibility for enrollment through the Exchange due to a DMI will be directed to the issuer to pursue coverage outside the Exchange, if desired by the enrollee. The enrollee will not receive any APTC or CSR for any coverage outside the Exchange, however; the enrollee in these scenarios will generally be eligible for an SEP based on a loss of coverage, if applicable, or change in eligibility for APTC and/or CSR. The issuer is expected to work with the enrollee to avoid gaps in coverage and is encouraged to apply any amounts paid toward deductibles and out-of-pocket limits toward the enrollee’s coverage outside the Exchange if such coverage is under a different policy. To
the extent the coverage continues uninterrupted outside the Exchange, any amounts paid toward
deductibles and out-of-pocket limits would continue uninterrupted as well.

15.3.2 Exchange DMI File Delivery Schedule

As shown in Exhibit 32, DMI Outreach files are delivered to issuers approximately the fourth Tuesday
each month. The related 834 transaction information within the DMI Outreach files identifies
consumers with unresolved DMIs approximately 3–7 weeks away from the file date, allowing issuers
this window of time to conduct optional consumer outreach.

Exhibit 32: Example Delivery and Transaction Schedule

Issuers are advised not to update their systems with the information contained in the DMI outreach file
(sent via EFT DATAM). 834 transactions from the Exchange will be sent to issuers to adjust the
coverage of enrollment groups impacted. When the Federally-facilitated Exchange (FFE) cannot
resolve a type of DMI that results in an enrollee being determined not eligible for coverage through the
Exchange, an 834 termination transaction is sent from the FFE notifying the issuer of the termination
of the enrollee’s enrollment through the Exchange and termination of eligibility for APTC and CSR, if
applicable.

15.4 Late Submission of Documentation for DMIs

Enrollees whose Marketplace enrollment status and eligibility for APTC and/or CSR, if applicable, are
adjusted or terminated due to their failure to submit sufficient data matching documentation, are
provided with an opportunity to reenroll in individual market coverage through the FFE outside of the
Open Enrollment Period (OEP) by producing sufficient documentation to resolve the DMI. In
accordance with 45 CFR 155.420(d)(13), the FFE provides a 60-day SEP for an enrollee described
above: 1) who submits the requested supporting documentation to the FFE; 2) for whom the
verification sources are able to establish information based on the trusted external data sources (EDSs)
or using the sufficient documentation submitted, to resolve the DMI; and 3) who is determined eligible
for enrollment in a QHP through the Exchange.

Under the SEP, the individual is able to select new individual coverage through the Exchange. The
individual described above, who submits sufficient documentation to resolve their DMI, may request a
retroactive effective date to avoid potential gaps in coverage. The retroactive effective date of
Exchange enrollment, and APTC and CSR, if applicable, is the day after the effective date of the
termination from previous coverage. Alternatively, under 45 CFR 155.420(b)(2)(iii), the individual
may also request a prospective effective date of enrollment in the Exchange, for the first of the month
following plan selection. The appropriate retroactive effective date of coverage will be appropriately
communicated to issuers through Health Insurance Casework System (HICS), if necessary. For
FFE Enrollment

example, an enrollee who had their Citizenship DMI expire who later resolves it is eligible for an SEP to reenroll in coverage and, if requested, retroactive coverage to close the gap in coverage due to the DMI expiration. The enrollee then contacts the Marketplace Call Center to select a plan under this SEP and request closing the coverage gap. A HICS case is created and directed to the issuer to manually adjust the consumer’s coverage effective date due to the resolution of the Citizenship DMI. Issuers should review their records to determine if a prospective enrollment exists before honoring a retroactive enrollment request.

Enrollees who have their eligibility updated due to certain DMIs (for example, annual household income) may experience an adjustment to their eligibility for insurance affordability programs but will remain eligible. The enrollees will continue to be enrolled in coverage through the Marketplace with their updated eligibility determination applied. Such enrollees may return to the Marketplace and log into their online account to report a change in information that will update their eligibility. The reported changes may result in an updated eligibility determination and may qualify the enrollee for an SEP to make coverage changes.
16. **HEALTH REIMBURSEMENT ARRANGEMENTS**

16.1 Introduction

Health Reimbursement Arrangements (HRAs) are a type of account-based group health plan that employers can provide to reimburse employees for their medical care expenses. HRAs do not by themselves comply with certain Patient Protection and Affordable Care Act (ACA) requirements, such as the prohibition on applying an annual dollar limit to essential health benefits (EHB) and providing coverage for preventative services without cost-sharing for these services. Therefore, after enactment of the ACA, employers could only offer an HRA to individuals who were also enrolled in another group health plan that did comply with these requirements, provided the HRA met other criteria.

However, in 2019, the Departments of the Treasury, Labor, and Health & Human Services (HHS) jointly published a final rule to permit employers to offer a new type of HRA as of January 1, 2020, called an individual coverage HRA (sometimes referred to as an ICHRA), instead of offering a traditional group health plan (hereafter referred to as “the final HRA rule”). Employees who accept an individual coverage HRA offer, and any covered dependents, must be enrolled in individual health insurance coverage; or Medicare Parts A and B, or Part C. Among other qualified medical care expenses, individual coverage HRAs can be used to reimburse premiums for individual health insurance coverage chosen by the employee, promoting employee and employer flexibility, while also maintaining the same tax-favored status as employer contributions towards a traditional group health plan. Employers have the flexibility to pay their portion of payments directly to issuers, or they may reimburse the employee for premiums paid by the employee.

Additionally, the 21st Century Cures Act permits small employers who do not offer group health plan coverage to any of their employees, including an individual coverage HRA, to provide a qualified small employer HRA (QSEHRA) to their eligible employees to help employees pay for medical care expenses. Small employers could provide QSEHRAs for plan years beginning on or after January 1, 2017. An eligible employee can use a QSEHRA to reimburse medical care expenses for themselves, as well as any covered dependents (if permitted by the employer). To receive reimbursements from a QSEHRA, an employee and any covered dependents must be enrolled in minimum essential coverage (MEC).

16.2 Individual Coverage HRA and QSEHRA Employer Notice Requirements

The final HRA rule generally requires employers to provide employees who are offered an individual coverage HRA with a written notice at least 90 days before the beginning of the individual coverage HRA plan year. However, for employees who become eligible during the plan year, or later than 90 days before the start of the plan year (such as newly hired employees), employers are required to provide this notice no later than the date on which the employees’ coverage under the individual coverage HRA can begin.

This employer notice must include key information about the individual coverage HRA, such as:

- The dollar amount of the HRA offer, including the maximum dollar amount available for each participant including the self-only HRA amount available for the plan year (or the maximum

---

75 See 84 FR 28888.
FFE Enrollment

dollar amount available for the plan year if the HRA provides for reimbursements up to a single dollar amount regardless of whether a participant has self-only or other than self-only coverage).

- The date that coverage under the individual coverage HRA may begin.
- Whether the offer extends to dependents.
- Contact information (including a phone number) for an individual or group that employees may contact for additional information regarding the individual coverage HRA.
- A statement of the participant’s right to opt out of and waive future reimbursements from the HRA.
- A statement that the HRA requires the employee and any covered dependents to be enrolled in individual health insurance coverage (or Medicare Part A and B, or Medicare Part C, if applicable), and a statement that the coverage in which the participant and any covered dependents must be enrolled cannot be short-term, limited-duration insurance or consist solely of excepted benefits.
- A statement that if the employee accepts the HRA, they cannot claim a premium tax credit (PTC) for their Exchange coverage or for the Exchange coverage of any dependents who are also covered by the HRA.
- A statement of availability of a Special Enrollment Period (SEP) to enroll in or change individual health insurance coverage, through or outside of an Exchange, for the participant and any dependents who newly gain access to the individual coverage HRA and are not already covered by the individual coverage HRA.
- A statement that there are different kinds of HRAs (including a QSEHRA) and the HRA being offered is an individual coverage HRA.77

Employers that provide QSEHRAs also must provide a notice. Section 9831(d)(4) of the Code requires an eligible employer who provides a QSEHRA to its eligible employees to provide a written notice to each eligible employee at least 90 days before the beginning of each plan year, or for an employee who is not eligible to participate at the beginning of the plan year, the date on which the employee is first eligible to participate in the QSEHRA. This employer notice must include key information about the QSEHRA, such as:

- The dollar amount of the HRA provided.
- The date that coverage under the QSEHRA may begin.
- Whether the provided QSEHRA extends to dependents.
- A statement that the eligible employee must inform any Marketplace to which the employee applies for advance payments of the premium tax credit (APTC) of the amount of the provided QSEHRA.
- A statement that if the eligible employee does not have MEC for any month, the employee may be liable for an individual shared responsibility payment under Section 5000A for that month,

77 For more information on this required notice, see the Individual Coverage HRA Model Notice at https://www.cms.gov/files/document/hra-model-noticepdf, and/or 45 CFR 146.123(c)(6), 26 CFR 54.9802-4(c)(6), and 29 CFR 2590.702-2(c)(6) or Section 9831(d)(4) of the Code.
and reimbursements under the QSEHRA for expenses incurred in the month will be includible in gross income.78

16.3 Individual Coverage HRA/QSEHRA SEP

As of January 1, 2020, employees and their dependents who newly gain access to an individual coverage HRA or who are newly provided a QSEHRA may qualify for an SEP to enroll in individual health insurance coverage through or outside of the Marketplace. The triggering event for this SEP is the first day on which coverage for the qualified individual (QI), enrollee, or dependent under the individual coverage HRA can take effect, or the first day on which coverage under the QSEHRA takes effect.

Generally, QIs will need to apply for and enroll in individual health insurance coverage in time for the coverage to take effect by the date that their individual coverage HRA or QSEHRA starts, and the Marketplace requires individuals who receive their employer notice at least 90 days before the first day of their HRA plan year to apply for coverage and select a Qualified Health Plan (QHP) before their HRA start date in order to qualify for an SEP. For example, an individual whose individual coverage HRA or QSEHRA starts on July 1 and who received their individual coverage HRA or QSEHRA notice at least 90 days ahead of time will need to apply for coverage and select a QHP on or before June 30. Individuals who did not receive their individual coverage HRA or QSEHRA notice at least 90 days ahead of time will be permitted to select a plan up to 60 days before or after their HRA start date but should check with their employer in case they need to enroll sooner to meet their HRA’s requirements.

If the individual selects a QHP before the SEP triggering event (the first day on which coverage under the individual coverage HRA can take effect), or the first day on which coverage under the QSEHRA takes effect, then their coverage will take effect on the first day of the month following the date of the SEP triggering event. If the SEP triggering event is on the first day of a month, then coverage takes effect on the date of the SEP triggering event. If the plan selection is made on or after the day of the SEP triggering event, coverage will take effect on the first day of the month following plan selection. For more information on the individual coverage HRA/QSEHRA SEP, including relevant 834 codes, see Section 5, Special Enrollment Periods (Applicable to the Individual Market FFE, QHPs/QDPs).

Finally, the final HRA rule preamble clarified that HHS will treat individuals with an individual coverage HRA or QSEHRA with a non-calendar year plan year—that is, with a plan year that starts on a day other than January 1—as qualifying for an SEP pursuant to existing rules at 45 CFR 155.420(d)(1)(ii) (the non-calendar year plan year SEP). This SEP applies to QIs and dependents enrolled in a group health plan or individual health insurance coverage with a non-calendar year plan year, even if the QI or their dependent has the option to renew the coverage. In addition, while the 21st Century Cures Act Section 18001(c) amends the PHS Act definition of the term “group health plan” to exclude a QSEHRA (except for purpose of Part C Title XI of the Social Security Act), the 2021 HHS Notice of Benefit and Payment Parameters final rule amended 45 CFR 155.420(d)(1)(ii) to codify that

78 For more information on this required notice, see Section E of IRS Notice 2017-67: https://www.irs.gov/pub/irs-drop/n-17-67.pdf.
FFE Enrollment

individuals and dependents who are provided a QSEHRA with a non-calendar year plan year may qualify for this SEP.79

16.4 Individual Coverage HRA/QSEHRA Affordability

Employees and their dependents who are offered an individual coverage HRA are not eligible to receive APTC or PTC if the individual coverage HRA offer is considered affordable. For plan years beginning in 2020, an individual coverage HRA is considered affordable for an employee (and dependents, if applicable) if the monthly premium of the self-only lowest-cost Silver plan available to the employee through the Exchange for the rating area in which the employee resides, minus the monthly self-only amount made available to the employee under the individual coverage HRA, does not exceed the applicable percentage of 1/12 of the employee’s household income.

For employees and their dependents for whom an individual coverage HRA is not affordable, APTC or PTC is allowed if the employee offered the coverage opts out of and waive future reimbursements on behalf of themselves and all dependents eligible for the individual coverage HRA once each plan year, generally in advance of the first day of the individual coverage HRA’s plan year. Participants who become eligible to participate in the individual coverage HRA on a date other than the first day of the plan year or who become eligible fewer than 90 days prior to the plan year, and dependents who newly become eligible during the plan year, must also have an opportunity to opt out of the individual coverage HRA during the applicable HRA enrollment period established by the HRA for these individuals.

Employees and their dependents who are provided a QSEHRA are not eligible for APTC or PTC for months in which their QSEHRA is affordable. For plan years beginning in 2020, a QSEHRA is considered affordable for an employee (and dependents, if applicable) if the monthly premium of the self-only Second Lowest-Cost Silver Plan (SLCSP) available to the employee through the Exchange for the rating area in which the employee resides, minus the monthly self-only amount made available to the employee under the QSEHRA, does not exceed the applicable percentage of 1/12 of the employee’s household income.

If the QSEHRA is not affordable, the employee (and dependents, if applicable) are eligible for the APTC or PTC otherwise allowable for the month reduced by 1/12 of the employee’s permitted benefit under the QSEHRA for the year. Therefore, if the employee (and dependents, if applicable) is determined eligible for APTC, they should consider either foregoing APTC or choosing an amount not more than the APTC for which they are eligible minus the QSEHRA amount provided to them. Consumers with a QSEHRA who use more APTC than they are eligible for will likely have to pay some or all of the APTC back when they file their Federal income tax return.

17. **ENROLLMENT COMMUNITY FOR CONTACT MANAGEMENT AND INQUIRIES**

### 17.1 Introduction

Marketplace communications between the Federally-facilitated Exchange (FFE) and issuers occur on an online platform called the Enrollment Community, which manages issuer email contacts and inquiries.

- Contact management for at least 14 different enrollment related subscriptions are managed in the new online Enrollment Community.
- FFE issuers, web-brokers, and third-party administrators (TPAs) who wish to continue receiving these emails must subscribe their contacts in the Enrollment Community.

### 17.2 Organizations in the Enrollment Community

There are three types of organizations in the Enrollment Community: issuers, TPAs, and web-brokers. Job aids for each of these organization types can be found at [https://regtap.cms.gov/reg_library.php](https://regtap.cms.gov/reg_library.php) (log-in required).

**Exhibit 33** lists the two user types that each organization (issuer, TPA, and web-broker) may have. **Exhibit 34** outlines the subscription lists and the reasons an issuer, TPA, or web-broker organization may want to subscribe to each.

#### Exhibit 33: User Types

FFE Enrollment

18. POLICY-BASED PAYMENT (PBP) TWO-PHASE AUDIT APPROACH
OVERVIEW

18.1 2017–2019 Benefit Year PBP Issuer Audits

Over the last several years, CMS has conducted audits of 2017–2019 benefit year data supporting the advance payments of the premium tax credit (APTC) and Federally-facilitated Exchange (FFE) user fees (UF) calculated under CMS’s automated payment system, policy-based payments (PBPs). This program built off the initial 2014 and 2015 APTC/UF audits. For the 2017–2019 benefit year PBP issuer audits, CMS performed payment validations consisting of Reconciliation Outbound (RCNO) file reviews of on FFE and issuer data mismatches to identify any CMS overpayments and underpayments made to issuers resulting from issuer or CMS reporting errors. Concurrently, CMS also performed CMS enrollment policy sampling reviews to identify cases in which issuers failed to comply with CMS enrollment policy outlined in the CMS regulations notably 45 CFR 155.400(e) and 45 CFR 156.270(g).

18.2 2020 and Future Benefit Year PBP Issuer Audits

CMS is currently planning to roll out PBP issuer audit programs for 2020 and future benefit years using an enhanced audit approach based on lessons learned from the prior benefit year PBP issuer audits. Beginning in the summer of 2023, CMS plans to implement a new two-phase audit approach for 2021 and all future benefit year PBP issuer audits. The approach will consist of: (1) the execution of enrollment policy sampling reviews in which CMS will examine issuer compliance with regulations such as 45 CFR 155.400(e) and 45 CFR 156.270(g). These policy reviews will take place during the three-year dispute window set forth in 45 CFR 156.1210 (“Phase 1”) to provide more real-time compliance insights and improvement. Following the end of the three-year dispute window, CMS will begin the execution of payment validations (“Phase 2”) consisting of Reconciliation Outbound (RCNO) file reviews. The separation of audit phases is necessary to avoid potential disputes during Phase 2 while providing issuer compliance feedback during Phase 1 closer to the benefit year in question. The execution of Phase 1 audits will occur separately and during a different year from the execution of Phase 2 audits, which will occur after the end of the three-year dispute window. Issuers selected for a Phase 1 audit may also be selected for a Phase 2 audit of the same benefit year. Beginning in 2024, CMS plans to execute combined Phase 1 and Phase 2 audits for the 2020 benefit year, given the amount of time that has lapsed since the end of the benefit year and therefore the decreased value in executing a two-phase audit approach. CMS will address the APTC/UF audit schedule for 2023 and 2024 in the future.

For prior benefit year PBP issuer audits, CMS did not penalize issuers for non-compliance, provided the issuer acted in good faith. However, as noted in the Payment Policy and Financial Management Group External Audit Communication letter dated July 19, 2019, consistent with the expiration of the good faith policy at 45 CFR 156.800(c), CMS may begin imposing civil money penalties for findings identified beginning with 2020 benefit year audits.

80 2014 CMS Issuer Audits of APTC
81 45 CFR 156.800 (Available remedies; Scope.)
18.3 Other Audits

CMS also audits FFE issuers on other topics, including the following kinds of audits:

- Medical Loss Ratio (MLR) Examinations
- Federal Market Conduct Examinations – Market-wide requirements
- CO-OP Compliance Reviews

Selection and scheduling of PBP and other audits is coordinated within CMS to minimize issuer burden, and CMS also works with state regulatory agencies to coordinate oversight activities. For more information on these CMS audits, refer to the following website:
https://www.cms.gov/CCIIO/Resources/Forms-Reports-and-Other-Resources/Exams_Audits_Reviews_Issuer_Resources-
Dear [Insert name],

Welcome to Birchwood Health Plan! This letter and package contain important information about your new health insurance coverage.

What’s in this package?

1. **Summary of Benefits and Coverage/Member Handbook** – A summary of your plan’s coverage. It also includes information about your monthly premium and any out-of-pocket costs, like copayments, coinsurance, and deductibles.

2. **Prescription Drug Benefits Formulary** – Provides information about medications we cover. You must use network pharmacies to obtain benefits, except under non-routine situations when you cannot reasonably use a network pharmacy.

3. **Provider Directory** – Provides information on which providers are in our network. If you use a provider that is not in our network, your costs may be higher than if you use an in-network provider.

4. **Information about other coverage (If applicable)** – Provides information about additional coverage such as dental or vision coverage, and health club membership discounts.

5. **Member ID Card** – You will be asked to present this each time you get care (Included if card is not mailed separately).

When does my coverage start?

The table below shows who is covered under the Birchwood Health Plan and the start date of coverage. Other members of your household not listed in this table are not covered under this policy.

Benefits may change from year to year. You will be notified of these changes before the Open Enrollment Period. You can change plans during the Open Enrollment Period or if you qualify for a Special Enrollment Period.
FFE Enrollment

If Birchwood Health Plan stops offering coverage through the Marketplace for any reason in future years, you will receive a letter before the annual Open Enrollment Period informing you that the plan is no longer available for renewal.

Where can I find additional resources?

You can contact us by phone at the numbers listed below, or you can visit our website at www.birchwoodhealthplan.com. Our website has many tools and resources available to you, including:

- Online account to view an explanation of benefits (EOBs) or make your premium payment.
- Electronic copy of prescription drug benefits formulary
- Electronic provider directory.
- Quick reference guide.
- Notice of privacy policy.

You may request paper copies of these documents by calling the Birchwood Health Plan help desk number listed below.

How can I contact Birchwood Health Plan?

If you have any questions or think this letter contains inaccurate information, you can call the Birchwood Health Plan help desk at 1-xxx-xxx-xxxx Monday through Friday from 8:00 a.m. to 8:00 p.m. ET or Saturday and Sunday from 9:00 a.m. to 5:00 p.m. ET.

If you need advice about where and when to get care, you can call our nurse advice line 24 hours a day at 1-xxx-xxx-xxxx.

If you need help finding mental health or substance use disorder care, please call 1-xxx-xxx-xxxx Monday through Friday from 8:00 a.m. to 8:00 p.m. ET or Saturday and Sunday from 9:00 a.m. to 5:00 p.m. ET.

If you need information in another language, please call our language line at 1-xxx-xxx-xxxx.

Sincerely,

Birchwood Health Plan
23 West Drive, Suite 300
Jacksonville, FL 32202

APPENDIX B – SAMPLE NON-PAYMENT NOTICE FOR THE INDIVIDUAL MARKET

Dear [Insert name]:

**Important information about your health coverage**

This letter includes important information about your family’s health insurance from Birchwood Health Plan. You may lose your health insurance coverage because you did not pay your monthly health insurance premium for [month] in the amount of $[amount] by [due date].

Since you are getting advance payments of the premium tax credit to help pay for your insurance, you have a three-month grace period to pay your outstanding premium and any new premiums that accrue during this period before your insurance coverage will end. Please be aware that your provider may pend claims for any services you receive during the second and third months of the grace period because your provider may seek to bill you for the services directly if your coverage is terminated for failure to pay your premiums. Your grace period starts on [date] and will end on [date].

**What happens if I do not pay my premium?**

If you do not pay your [month] premium by the end of the grace period (as well as any additional premiums that become due between now and when you pay), your Birchwood Health Plan coverage will be terminated back to [date]. If you wait until the final day to make any payment, the total amount will be due on that day.

**What happens if my coverage ends?**

If your coverage ends, you may be responsible for the cost of health services received after your last day of coverage, [date], and, if you are not eligible for a Special Enrollment Period, you may not be able to enroll in another health insurance plan through the Marketplace until the next annual Open Enrollment Period.

**When will I be able to enroll in another health insurance plan if my coverage ends?**

You can select a Qualified Health Plan for enrollment through the Marketplace during the next annual Open Enrollment Period.

If your circumstances change during the year, like your family size or circumstances (for example, if you marry, divorce, or have a child), your income, or if you move, among other things, you may be eligible for a Special Enrollment Period to enroll in coverage before the annual Open Enrollment Period. You will need to tell the Marketplace if you experience any changes, and they will tell you if...
FFE Enrollment

You are eligible for a Special Enrollment Period because of the changes. To do this, log into your Marketplace account on HealthCare.gov/marketplace or call 1-800-318-2596 (TTY: 1-855-889-4325). Other events can qualify you for a Special Enrollment Period, too. For more information, visit www.HealthCare.gov.

How do I make a payment?

To make a payment, visit Birchwood Health Plan’s website at www.birchwoodhealthplan.com, call member services and select option 2 to make a payment, or send a check with your account number written on it to:

Birchwood Health Plan
23 West Drive, Suite 300
Jacksonville, FL 32202

If you already mailed your payment for the amount you owe, please disregard this notice.

What if I think this is a mistake?

If you think this information in this letter is a mistake, you need to tell Birchwood Insurance as soon as possible by calling the Birchwood Health Plan help desk at 1-xxx-xxx-xxxx Monday through Friday from 8:00 a.m. to 8:00 p.m. ET or Saturday and Sunday from 9:00 a.m. to 5:00 p.m. ET.

Sincerely,

Birchwood Health Plan
23 West Drive, Suite 300
Jacksonville, FL 32202

[Insert privacy disclosure and nondiscrimination notice language consistent with 45 CFR 156.250]
Birchwood Health Plan

[Date]

[Insert name]
[Insert address]

Dear [Insert name],

**Important: Your health insurance coverage is ending.**

This letter includes important information about your family’s health insurance from Birchwood Health Plan. [insert name] and [insert name] will no longer have health insurance coverage from Birchwood Health Plan on [insert termination effective date], because you requested that Birchwood terminate your insurance. You requested to terminate your insurance by [insert description—e.g., calling our help desk on July 20, 2023].

The table below shows whose health insurance coverage will be terminated, the last day of coverage, and why the insurance is ending. Any other members of your household not listed in this letter will not be affected.

<table>
<thead>
<tr>
<th>Enrollee</th>
<th>Plan Name</th>
<th>Last Day of Coverage</th>
<th>Reason for Disenrollment</th>
</tr>
</thead>
<tbody>
<tr>
<td>[insert name]</td>

<tr>
<td>[insert name]</td>
<td>Birchwood Health Plan</td>
<td>[insert termination effective date]</td>
<td>[insert reason—e.g., Requested to terminate coverage]</td>
</tr>
</tbody>
</table>

**What happens when my coverage ends?**

If you terminate your coverage and do not get other health coverage, you may be fully responsible for the cost of health services that you receive after your coverage ends. If you are not eligible for a Special Enrollment Period, you may not be able to enroll in another health insurance plan through the Marketplace until the next annual Open Enrollment Period.

**When will I be able to enroll in another health insurance plan?**

You can select a Qualified Health Plan through the Health Insurance Marketplace® website at [www.HealthCare.gov](http://www.HealthCare.gov) during the next annual Open Enrollment Period.

If your circumstances change during the year, like your family size (for example, if you marry, divorce, or have a child), your income, or if you move, among other things, you may be eligible for a
FFE Enrollment

Special Enrollment Period to enroll in coverage before the annual enrollment period. You need to tell the Marketplace if you experience any changes, and they will tell you if you are eligible for a Special Enrollment Period because of the changes. To do this, log into your Marketplace account on HealthCare.gov/marketplace or call 1-800-318-2596 (TTY: 1-855-889-4325. For more information, visit www.HealthCare.gov.

What if I think there’s a mistake?

If you think the information included in this letter is a mistake and you did not request termination of coverage, you need to tell Birchwood Insurance right away by calling the Birchwood Health Plan help desk at 1-xxx-xxx-xxxx Monday through Friday from 8:00 a.m. to 8:00 p.m. ET or Saturday and Sunday from 9:00 a.m. to 5:00 p.m. ET.

Sincerely,

Birchwood Health Plan
23 West Drive, Suite 300
Jacksonville, FL 32202

[Insert privacy disclosure and nondiscrimination notice language consistent with 45 CFR 156.250]

Health Insurance Marketplace® is a registered service mark of the U.S. Department of Health & Human Services
Dear [Insert name],

**Important information about your [plan year] health plan**

Thank you for enrolling in Birchwood Health Plan for your [plan year] health coverage. You’re getting this letter because we made an error in your plan information displayed on HealthCare.gov at the time you enrolled in our plan. This means you may pay more when you get certain services than you expected.

The chart below clarifies the costs for these services:

<table>
<thead>
<tr>
<th>Benefit, Item, or Field</th>
<th>Information Displayed when You Enrolled in Our Plan</th>
<th>Correct Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>e.g., Copay for Specialist Visit</td>
<td>e.g., $50/Visit</td>
<td>e.g., $50 for first two visits and $125 for each additional visit</td>
</tr>
</tbody>
</table>

**You can change to another plan.**

Because of this error, you qualify for a Special Enrollment Period (SEP) to enroll in another plan if you choose. The opportunity to change plans ends 60 days from the date on this letter.

You have options for your coverage:

1. **Do nothing to stay in your plan.**
   
   If you’re happy with your plan, you don’t have to leave.

2. **Pick another plan with the same insurance company.**
   
   Select the new plan through the Health Insurance Marketplace® and start paying premiums for your new coverage.

3. **Pick a different plan through the Health Insurance Marketplace®.**
   
   Select the new plan through the Health Insurance Marketplace® and start paying premiums for your new coverage.

You can choose to have your coverage start either the first of the month after you choose a new plan or back to when your coverage in Birchwood Health Plan started.

- **Coverage starts the first of the next month** – You won’t get a refund for premiums you already paid to your current plan.
FFE Enrollment

- If you pick a plan with the same insurance company, any costs you paid towards your deductible and annual maximum out-of-pocket limit will transfer to your new plan. This means you won’t have to pay them again.
- If you pick a plan with a new insurance company, any costs you paid towards your deductible and annual maximum out-of-pocket limit won’t transfer to your new plan. You’ll start paying premiums for your new coverage, and you’ll also have to restart any payments you made towards the plan’s deductible and annual maximum out-of-pocket limit.

- **Coverage starts back to when your current plan coverage started** – We’ll reverse all claims we’ve processed for services you got while in Birchwood Health Plan. We’ll refund any premiums you paid. If you pick a new plan with the same insurance company, we will apply your refunded premium to the premium for your new plan, and we will reprocess all claims we’ve processed for services you got while in Birchwood Health Plan under your new plan.
- **You’ll start paying premiums for your new coverage** – This includes premiums for the past months to your new plan. If you got services while in our plan, you can work with your new plan and your providers to submit claims for payment. Any costs you paid towards your deductible and annual maximum out-of-pocket limit will be recalculated under your new plan.

**How to change plans:**

Call the Marketplace Call Center at 1-800-318-2596. TTY users can call 1-855-889-4325. They can help you with your coverage options.

**Important notes about changing plans:**

- Check that your health care providers are listed in your new plan’s network before enrolling in that new plan. The services may be more or less expensive, even with the same providers, depending on which new plan you choose.
- If you choose a new plan with a different insurance company, you must pay the first month’s premium in your new plan for your new coverage to begin. You’ll have to pay any copays, coinsurance, or deductibles for services you get while in your current plan until your new plan coverage starts.

We apologize for any inconvenience.

Health Insurance Marketplace® is a registered service mark of the U.S. Department of Health & Human Services
