Policy Highlights

The following reflect updates since the previous FY2026 MPD.

End-Stage Renal Disease (ESRD) Facilities

Each year, CMS releases the ESRD Facility Outcomes List, which establishes the state's Tier 2 workload. CMS will release the annual Outcomes List at the start of FY2027. CMS and State Survey Agency (SA) users will need to log into <https://dialysisdata.org/> using their username and password to access the confidential file.

Deferment of a Tier 2 Survey: In the FY2025 MPD, CMS issued guidance for deferring certain Tier 2 surveys when the ESRD Facility is ranked in the bottom 5th percentile for performance across multiple consecutive years. CMS is clarifying two of the conditions (bolded) that must be met to allow deferral of a Tier 2 survey:

1. **The facility was identified in both the FY2026 and FY2027 Outcomes List.**
2. **The Tier 2 survey based on FY2026 results was performed in the last fiscal year.**
3. The prior survey resulted in no citations or standard-only citations with an accepted plan of correction.
4. There are no complaints against the facility triaged as immediate jeopardy (IJ) or non-IJ high since the last reapproval survey.
5. There is no other quality of care concerns. Information about quality of care concerns should be obtained from the ESRD Network that is assigned to the facility location.

Deemed Tier 2 ESRD Facilities: Tier 2 facilities that are deemed by a CMS-approved Accrediting Organization (AO) are not the responsibility of the SA. CMS-approved AOs will implement its procedures for performing Tier 2 surveys.

In May 2026, CMS released [QSO 26-09-ESRD](#), "Relocating and Revising CMS Surveyor Guidance for ESRD Facilities." This memo announced two key actions:

1. Relocation –The ESRD surveyor guidance has been moved to Appendix H of the SOM, consistent with how guidance is organized for other provider types. The placement of the ESRD interpretive guidance and survey protocol has been moved from the CMS ESRD Facility Provider website to Appendix H of the State Operations Manual (SOM). Users may access the guidance, survey protocol, and corresponding surveyor worksheets using this link and select Appendix Letter "H" for ESRD Facilities.
2. Revision- The guidance has been updated to incorporate regulatory, policy and technical updates.

Hospice Program

Special Focus Program (SFP): Effective February 14, 2025, implementation of the Hospice Special Focus Program for CY 2025 was paused to further evaluate the program. The Hospice SFP remains on hold as CMS focuses on broader fraud efforts. This includes intensified targeted investigations and accelerated removal of hospice providers from the Medicare program that are suspected of committing fraud. Until the SFP is resumed, survey procedures for all hospices will continue as established. CMS encourages appropriate use of enforcement remedies available for hospices, through the Consolidated Appropriations Act of 2021, to create an emphasis and incentive for hospices to improve their performance.

Hospices and Home Health Agencies (HHAs)

Effective May 13, 2026, CMS implemented six-month moratoria on new Medicare enrollment for **hospices** and **HHAs**. The moratoria may be extended in 6-month increments, if CMS deems it necessary.

- **Already submitted applications:** Applications (CMS-855A) received by Medicare contractors prior to May 13, 2026, will be processed and are exempt. Initial certification surveys for these providers may continue with an approved CMS-855A.
- **New enrollments and expansion:** No new initial enrollment applications, new hospice practice locations, or new HHA branches shall be accepted or approved during the moratorium. Initial certification surveys for these providers shall not continue for the duration of the nationwide moratorium.
- **Active Providers:** Existing, currently enrolled hospices and HHAs are not impacted; survey planning should continue as guided by statute, regulation, and policy.

Hospitals and Critical Access Hospitals (CAHs)

CMS continues to evaluate **Appendix A** and **Appendix W** of the State Operations Manual (SOM) based on new Obstetrical Services requirements. Effective July 1, 2025, hospitals are required to implement transfer protocols under discharge planning and emergency services readiness under the emergency services requirements. CAHs will also be required to implement emergency services readiness requirements within the same timeframe. Effective January 1, 2026, hospitals and CAHs are required to implement portions of the obstetrical services Condition of Participation related to organization, staffing, and delivery of services (**89 FR 93912**). CMS released the Interpretive Guidelines via policy memorandum **QSO-26-07** to assist surveyors in evaluating compliance with regulatory requirements for emergency patient care.

Deemed Providers

In March 2026, CMS revised policy memorandum **QSO-18-12- Deemed Providers/Suppliers** providing guidance to AOs to suspend or postpone any Medicare deeming recertification survey until the CMS Location restores deemed status, regardless of the provider's/supplier's deeming cycle. In addition to clarifications surrounding the temporary loss of deemed status, CMS provided additional guidance for complaint investigations and coordination among the SAs and AOs.

The policy included guidance instructing AOs to forward all IJ complaints to the SA. When an AO receives a complaint and triages it as IJ, the AO must notify the SA within two business days of receipt, and the SA will initiate the complaint investigation within two business days of CMS authorization. Additionally, this policy clarifies that when a deemed provider or supplier is under temporary SA jurisdiction, the AO is expected to send all complaints, regardless of triage level, to the SA and the respective CMS Location within two business days. The CMS Location and SA are responsible for investigating these complaints. If the complaint was triaged as non-IJ medium or below, the SA must communicate to the AO whether it investigated the complaint during the period of SA jurisdiction once deemed status is restored.

Long Term Care (LTC)

CMS continues to take actions to improve and protect the health and safety of nursing home residents. These include:

Implementing a Risk-Based Survey (RBS) process nationwide beginning September 8, 2026, in response to longstanding budgetary constraints and a growing backlog of required nursing home surveys. Because federal survey funding has not increased since 2015 — while complaint survey obligations have grown by over 20% — State Survey Agencies (SAs) have struggled to meet their statutory requirements. The RBS addresses this by allowing higher-performing nursing homes to undergo a more streamlined, focused survey that requires less onsite time and fewer surveyors (roughly half the time of a traditional survey).

The RBS is a modified version of the existing Long-Term Care Survey Process (LTCSP) and still ensures compliance with all required health and safety standards — just with a smaller scope than the traditional process. CMS will provide each SA with a quarterly list of RBS-qualified facilities and will display a “High Performing Facility” icon on the Nursing Home Care Compare website for qualifying facilities. Facilities remain eligible for the RBS for six months after the SA receives the qualified list, unless disqualifying criteria are subsequently met. SAs retain the discretion to conduct a full LTCSP survey in any RBS-qualifying facility if health and safety concerns arise. The RBS was piloted in 22 states and over 100 facilities, where it demonstrated findings comparable to the traditional survey process. Please see CMS memorandum [QSO-26-14-NH](#) for additional information.

Additionally, CMS announced a national campaign to support staffing in nursing homes to make it easier for individuals to enter careers in nursing home workforce, investing over \$75 million in financial incentives such as tuition reimbursement and stipends. States can partner with CMS to increase the number of financial incentives available, increase awareness of the program in their state, and improve their nurse aide training competency evaluation program (NATCEP) websites. In April 2026, memorandum [QSO-26-08-NH](#) was released to provide states with guidance on how they can structure their state-approved NATCEPs to increase capacity. CMS will also be working with states to invest civil money penalty (CMP) funds to provide incentives (loan repayment and stipends) for registered nurses and licensed practical nurses to work in qualifying nursing home (determined by CMS) and state agencies. We will coordinate activities with states, such as assisting with transferring CMP funds to CMS’ payment contractor and facilitating recruitment of their open positions with CMS’ partners. More information is available on the [CMS Nursing Home Staffing Campaign website](#), and states should email nursesfornursinghomes@cms.hhs.gov for questions.

Training and Education

The Surveyor Skills Review (SSR) Assessment is an annual assessment that measures the competency and knowledge required for successful surveys. Surveyors will take the SSR assessment after completing all the prerequisite and basic training courses listed on the training plan for their primary area of expertise and one year of experience surveying health facilities.

SSR competency assessments will be released by provider type and in a phased approach. The list below shows the SSRs available on the Quality, Safety, & Education Portal (QSEP):

- Ambulatory Surgical Center (ASC)
- Clinical Laboratory Improvement Amendments of 1988 (CLIA)
- Community Mental Health Center (CMHC)
- Emergency Medical Treatment and Labor Act (EMTALA)
- End-Stage Renal Disease (ESRD)
- Emergency Preparedness (EP)
- Home Health Agency (HHA)
- Hospice
- Hospital
- Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID)
- Life Safety Code
- Long Term Care (LTC)
- Psychiatric Hospital
- Psychiatric Residential Treatment Facilities (PRTFs)
- Rural Health Clinic (RHCs) and Federally Qualified Health Centers (FQHCs)
- Transplant

The SSR is available October 1st each year and closes September 30th the following year. Each surveyor will be notified when they are eligible to take the SSR.

Transplant Programs

Heart/Lung Transplant Programs

CMS is removing a duplicative process that requires Medicare-approved hospitals to have an approved heart/lung transplant program to perform combined heart/lung transplants. The national surveyor database will be updated to remove “heart/lung” as a selection for initial and reapproval surveys. Survey teams should confirm that any transplant program performing combined heart/lung transplants has a Medicare-approved heart-only and a Medicare-approved lung-only transplant program. Once confirmed, surveyors should not include the combined “heart/lung” program type in any initial or recertification survey kit.

General Information

Purpose and Overview

The MPD is an annual document updated to reflect several key areas: regulatory changes, adjustments in budget allocations, new initiatives, and new statutory requirements. It directs and prioritizes the work of QSOG, SOG, and the SA. The MPD covers survey and certification functions, as well as the Medicare funding allocation process for states to perform these activities. It also directs work prioritization and planning for the required state survey agency workload.

Regulations

The Unified Agenda of Regulatory and Deregulatory Actions reports on the regulations administrative agencies plan to issue in the near and long term. For upcoming regulatory actions undertaken by both QSOG and SOG, please visit the Office of Information and Regulatory Affairs (OIRA) Unified Agenda website: <https://www.reginfo.gov/public/do/eAgendaMain>.

Survey and Certification

CMS maintains oversight for compliance with the Medicare health and safety standards for laboratories, acute and continuing care providers, and long-term care facilities serving Medicare and Medicaid beneficiaries, and makes available to beneficiaries, providers/suppliers, and State surveyors, information about these activities. The survey (inspection) of these facilities is done on behalf of CMS by the individual State Survey Agencies. The functions the States perform for CMS under the agreements in Section 1864 of the Social Security Act (the Act) are referred to collectively as the certification process.

More information about the certification and compliance process, and a link to the State Operations Manual (SOM) 1 chapters and provider/supplier type appendices can be found [here](#).

CMS Quality Safety & Oversight (QSO) memoranda, guidance and clarification and instructions issued to SAs and CMS Locations can be found [here](#).

Surveyor Training

The mission of the Quality, Safety and Education Division (QSED), in Partnership with CMS Locations and SAs, ensures there's a knowledgeable and skilled survey workforce as mandated by the Social Security Act (the Act), as well as informed providers and suppliers throughout the United States.

¹ The SOM is a document issued by CMS containing survey and certification guidance and instructions to the SAs. The SOM includes 10 chapters covering certification, survey and enforcement processes as well as appendices for each provider/supplier type and CLIA containing sub-regulatory compliance guidance and survey procedures.

Before any state or federal surveyor may serve on a survey team (except as a trainee), they must complete the requirements outlined in the surveyor training plan on the Quality, Safety and Education Portal (QSEP). The majority of QSED surveyor training is now available online via QSEP.

Priority Tier Structure for Survey and Certification (S&C) Activities Overview

Survey activities must be scheduled and conducted in accordance with the priority tier structure provided in this document (See Appendix 2). The four priority tiers reflect statutory mandates and program emphases, with tier 1 being of the highest priority and tier 4 being lower priority. Planning for lower-tiered items presumes that the state will accomplish, or has a plan to accomplish, higher- tiered items first.

While states may begin lower-tier work before completing tier 1 or tier 2 activities—provided the multi-tier work is included in their approved budget submission outlining Survey and Certification program goals—they must prioritize tier 1 and 2 workloads along with initial certification surveys over the scheduling and completion of lower-tier surveys.

In addition to prioritizing work between tiers 1-4, we suggest states consult with their CMS Location in the prioritization process. States must track their tiered workload quarterly and report the results to the CMS Location 45 days after the close of the quarter. States must also report the full status of the FY completed workload 60 days after the close of the FY. As part of their oversight responsibilities, CMS Locations will monitor and work with states on completion of their tiered workload.

Note on Statistical Convention used throughout provider and supplier certification tier workloads: Whenever standards are expressed in months, 0.9 of the succeeding months is included to permit the completion of any survey in progress. Hence, a 12-month average is tracked as 12.9 months. Similarly, a 3-year interval is tracked as 36.9 months, and a 6-year interval is tracked at 72.9 months.

Safeguarding Immediate Threats to Life or Safety during Emergencies, Natural Disasters, or Funding Lapses

When a state agency is unable to continue normal operations due to a national or state public health emergency, a state of emergency declared by the state due to a natural disaster or emergency, or federal funding lapse, the primary workload priority will be safeguarding immediate threats to life and safety.

If these events occur, CMS may release guidance to states nationally, or states may individually request approval from CMS to operate under prioritized protocol described below based on the nature and scope of the emergency. The CMS-approved Prioritized Protocol would include the following activities:

1. **Complaint Investigations and Facility Reported Incidents Alleging Harm:** Complaints that are triaged as credible allegations of immediate jeopardy (IJ) or harm to an individual should continue to be assessed and investigated according to standard CMS Protocols. When operating under this protocol, it will generally not be necessary for State Agencies (SAs) to

obtain prior approval from the CMS Location to conduct a complaint investigation for a deemed provider or for an EMTALA survey, where such approval is normally required. This activity includes issuance of the Form CMS 2567 to the provider, any necessary communications, and revisits required to ensure deficiencies are addressed immediately, with no further harm to patients or residents.

2. **Certain Federal Enforcement Actions:** Enforcement actions that result from surveys noted in the above paragraph should continue to be imposed if the findings indicate immediate jeopardy or actual harm. States should continue to process enforcement and transfer cases that meet the Immediate Imposition of Federal Remedies requirements, as these represent resident harm. Any questions or requests related to Medicare enforcement actions should be directed to the CMS Location.
3. **Revisit Surveys Approved by Exception and Necessary to Prevent Termination:** SA's may request approval to conduct a revisit when:
 - (a) A provider or supplier has alleged compliance with CMS requirements (pursuant to a prior determination of noncompliance), and;
 - (b) The revisit survey is necessary to determine compliance and prevent the scheduled Medicare termination of a provider or supplier, or;
 - (c) Necessary to prevent a statutorily mandated (three-month) denial of payment for new admissions. If a discretionary denial of payment has been in effect, the revisit may occur provided it meets the same timeframe as allowed for a mandatory DPNA.Requests for any such exception shall be sent to the CMS Location.
4. **Voluntary Nursing Home Closure:** If a nursing home provider voluntarily closes, the routine monitoring and oversight by the SA to ensure the orderly and safe relocation of nursing home residents may continue.
5. **Training:** Online surveyor training, certification, and testing may continue to the extent it does not detract from the state's ability to perform the above activities.
6. **Other Immediate Threats to Life or Safety:** SAs must address any immediate threats to life or safety, even if they don't fall into the above-listed categories.

In addition to the activities outlined above, SAs may be required to provide health care facility emergency reporting, assist with waiver considerations, perform monitoring visits, and other activities deemed necessary to appropriately respond or recover from the disruptive event.

Whenever a state emergency, disaster or funding lapse limits a SA's ability to maintain normal operations, especially when that event is state-specific or regional in nature, **it is imperative that the SA immediately notify their CMS Location to seek approval to begin operating under the Prioritized Protocol and to develop a workplan within the context of this guidance.**

State Performance Standards System (SPSS)

States must maintain documentation and information systems to ensure accurate and timely provision of information on survey activities, findings, enforcement, and surveyor performance. Timely uploading is an important aspect of the legacy system. For the most recent SPSS information for the fiscal year, refer to the CMS Administrative Information Memos webpage [here](#).

Core Infrastructure

All of the following are considered tier 1 S&C activities of Core Infrastructure:

- Timely data entry of survey workload;
- Maintenance of the nurse aide registry and assessments of nurse aide training and competency evaluation programs;
- Review of the nurse aide registry to assure that it is being operated in compliance with the requirements;
- Maintenance of a home health and hospice hotline;
- Performance measurement activities;
- Implement and promote the fulfillment of CMS Government Performance and Results Act (GPRA) goals and quality initiatives as needed;
- Training of S&C staff, including transcript and qualifications maintenance; and
- Emergency preparedness essential functions.

OASIS Coordinators

Each State has designated OASIS Coordinators to provide guidance on the administration and submission of the OASIS instrument for home health. Please refer to the CMS QSOG [webpage](#) that contains a list of State Agency and CMS Office contacts for both OASIS Education and Automation Coordinators. While CMS no longer provides in person trainings specifically for OASIS Coordinators in reference to their duties, all trainings old and new, webinars and reference materials involving the OASIS are announced and posted on the Home Health Quality Reporting (QRP) [webpage](#).

Resident Assessment Instrument/Minimum Data Set (RAI/MDS)

All certified nursing homes and swing bed hospitals are required to encode and transmit MDS records to CMS in accordance with CMS established specifications and time frames. CMS expects the states to continue to provide staff to serve as RAI/MDS educational and technical resources to nursing homes and SA staff. As such, states must continue to adequately fund and staff the positions of a RAI coordinator and a RAI/MDS automation coordinator. The State RAI coordinator and the RAI/MDS automation coordinators will be responsible for:

- Maintaining up-to-date working knowledge of the RAI manual and MDS 3.0 assessment;
- Attending all mandatory training sessions and demonstrating competency and skills in the RAI process, including coding and transmitting the MDS 3.0;
- Participating in CMS-sponsored workgroups, meetings, and conferences;
- Conducting at least two structured provider training courses within the FY, and provide ongoing RAI/MDS education and technical support to SNF/NF and swing bed hospital providers, and SA staff (training courses shall be documented); and
- Educating providers and SA staff on reports from the data system, MDS outcome, or other reports.

For more information on RAI/MDS and a list of all the State RAI and Automation Coordinators, please visit the CMS website [here](#).

Clinical Laboratory Improvement Amendments of 1988 (CLIA)

CLIA regulates the quality and safety of clinical laboratory testing performed on humans located in the U.S. The program ensures the accuracy, reliability, and timeliness of patient test results regardless of where the test was performed.

CLIA is a user-fee funded program that requires surveys to be prioritized throughout the year as needed (See SOM 6102.1). State Agencies should refer to the most recent memo for the CLIA Annual Fiscal Year Budget Call Letter for guidance on developing projected workloads located on the CMS Administrative Information memos webpage [here](#).

Deeming options

For additional information on CMS-approved AOs, including links to each AO's website and the list of provider/supplier types for which they have an accreditation deeming option, please visit:

<https://www.cms.gov/medicare/health-safety-standards/quality-safety-oversight-general-information/accrediting-organizations-aos>

Contact Information for Program Areas:

In most cases, States will initially refer questions to their CMS Location; however, these mailboxes may be used for national policy questions or to gather policy feedback on a pending question between CMS and states.

Budget Formulation Guidelines

CMS is requiring the States to evaluate and justify planned Medicare survey workload and budgets, consistent with MPD requirements, at the provided funding level in attachment A. As part of the narrative, please provide information detailing the budgeted workload to be accomplished in each of the four MPD tiers at the funding level provided by your State. Further guidance on final funding allocations will be provided once the final FY 2027 appropriations are enacted.

Budget Plan for the Fiscal Year:

CMS requests that States carefully review their ongoing Medicare workload and submit an initial budget plan and limited justification materials for FY 2027 at the base funding level provided for each State in Attachment A. Within this detail, please provide information detailing the budgeted workload to be accomplished. To establish the State funding guidelines for FY27, CMS worked with the Location Budget contacts to review the historical spending of the States from the last several FY's and the reasons for those, whether over, under, or on track. The proposed base funding amounts shown in Attachment A are preliminary and may be subject to increase depending on the final FY 2027 funding level approved by Congress. States shall describe the funding level, critical workload, and tier-level completion in accordance with current MPD requirements at the funding level provided, as shown in the attachment, as well as their Hospice funding request. Each Location, in turn, will review and submit their recommendation to CMS for final disposition. CMS will finalize State allocations and request routine budget materials (CMS-435's, 434's, 1465's, etc.) when final appropriations have been enacted. CMS requests that States carefully review their ongoing Medicare workload and submit an initial budget plan and limited justification materials for FY 2027 at the base funding level. Within these details, please provide information detailing the budgeted workload to be accomplished at the flat-lined funding level.

CMS Locations complete review of the state's submissions and offer recommendations, by state, by the date listed above to the CMS leads:

Shaneka Thompson
Shaneka.Thompson@cms.hhs.gov

Meghan Ventura
Meghan.ventura@cms.hhs.gov

Jamil Macklin
Jamil.Macklin@cms.hhs.gov

Ayesha Sparks
Ayesha.Sparks@cms.hhs.gov

Consolidated Appropriations Act (CAA)

The FY 2021 appropriations bill provided additional funds for Hospice survey work, beginning in FY 2022. This funding will continue to be utilized to fully fund all Hospice survey work in FY 2027. All CAA funds should be reported separately on the mini-CMS 435 Hospice -CAA form.

However, CAA funding amounts should not be included on the main CMS 435. If a State sees any significant issues with its allocation, or has questions about the allocations or cost accounting, please communicate those promptly to your CMS Location staff. The CAA provides funds for Hospice-related work. Rough estimates for this activity should be included in your budget requests. Further details on this program will be provided by CMS QSOG/SOG program staff.

Continued guidelines from previous FYs

Title XVIII Budget Closeouts

With the passage of the Grants Oversight and New Efficiency Act (**GONE, P.L. 114- 117**), a focus has been placed on properly following and executing existing FY budgetary closeout processes. This focus is not intended to add existing work to SAs; in fact, this focus should help states close out their financial books sooner rather than sometimes waiting for five years after the close of the FY.

- **Budget Closeout Requirements:** The main goal is to establish a common grants closeout process in line with current Departmental regulations, statutes, and audit recommendations. With respect to the states, this will primarily be a change to the timeframes involved in closeout, the possibility for unilateral closeouts, as well as an increase in emphasis on closing awards in a timely manner. The actual work required to affect a proper closeout will remain substantially the same.
 - The timelines for this process are as follows:
 - Final financial reports, consistent with the terms of the award, are due 90 calendar days from a grant's completion date;
 - Full closeout, meaning that all applicable administrative actions and all required work of the federal award have been completed and take actions as described in 45 CFR 75.381, is due no later than 270 days from a grant's completion date;
 - If the closeout cannot be completed within the 270-day timeframe, CMS may elect to complete a unilateral closeout.

CMS will provide states sufficient notification of upcoming due dates for both report and closeout due dates via written memorandum and email notification and will work with states to meet the due dates noted. CMS will work with states on a case-by-case basis if there are reasons that they are unable to meet the guidelines noted above.

MDS and HHA mini-CMS-435 forms

The MDS mini-CMS-435 includes all MDS-related costs, while the HHA mini-CMS-435 should include all HHA and OASIS costs. This budgeting (and subsequent expenditure reporting) will show the subset of all MDS and HHA-related costs that are included in the full CMS-435 form.

HHA Cost Allocation

States should use a simplified 50% Medicare-50% Medicaid method to share the federal costs (after state licensure costs are accounted for) by:

1. Identifying the total cost of HHA surveys,
2. Subtracting the state-only amount that reflects the state licensure share,
3. Dividing in half the remainder (total federal share of HHA costs) and
4. Assigning one half to Medicare and the other half to Medicaid.

Please refer to [S&C Memo 13-31-HHA](#) for more detail.

State Licensure Shares

This information is required to be filled into columns G and H of the CMS-435 as part of the budget reporting package. This information is necessary to adequately review the use of proper cost accounting to ensure appropriate cost-sharing across all funding sources of the S&C program.

NAR/NATCEP Costs

States must continue requesting and reporting all Medicare NAR/NATCEP costs on the Miscellaneous line 19A of the form CMS-435. These expenses are not to be included in salaries/fringe benefits. State budget requests should be tied to the number of nurse aides and/or training programs. All budgets must include NAR/NATCEP expenses under line 19A (Miscellaneous) on the CMS-435 form (column B).

NAR/NATCEP and competency evaluation costs incurred for Title XIX-only facilities are considered administrative costs and are to be reported on the Quarterly Medicaid Statement of Expenditures for the Medical Assistance Program (form CMS-64). There are no provisions for covering these expenses in the Medicaid S&C budgets.

- Costs incurred in joint Titles XVIII/XIX facilities for NAR/NATCEP will be charged and reimbursed 50% by Medicare and 50% by Medicaid (50%-50% split). Expenses incurred for Title XVIII should be reported on the form CMS-435; expenses for Title XIX on the form CMS- 64.
- Guidance pertaining to allowable NAR/NATCEP expenditures can be found in Chapter 4 of the SOM.

Training Line on CMS-435

Under most circumstances, the costs reported in the training line on the form CMS-435 should not be zero. As discussed in the SOM, this line item includes any non-salary costs associated with training.

Final Budget Package

In summary, the final budget package should include:

1. Main CMS-435 Budget Request Form; Note: This form should capture all projected expenditures for the FY (including MDS and HHA but not including CAA Hospice costs) spread across the appropriate lines of the CMS-435.
2. Mini CMS-435s for MDS and HHA (subset reports of the main CMS-435);
3. CMS-435 CAA – Hospice (separate report), with projected expenditures spread across the appropriate line items;
4. CMS-434 Planned Workload Report;
5. CMS-1465A Budget List of Positions;
6. CMS-1466 Schedule for Equipment purchases;
7. Budget narrative with work plan and line by line justification.
8. with a template provided by CMS
9. Include a single, all-inclusive tier statement: indicate what tier workloads the state will and will not be able to accomplish. If circumstances allow for only partial completion of a particular tier workload, indicate in the tier statement which work will not be completed in the tier, by provider type, and the extent of the survey work that the state expects it will be unable to accomplish. Please recall that there is a triage level of complaint investigations in each tier, so mention those if they come into play.

Please make a tier statement as a clearly identified paragraph toward the top of the budget narrative. It can be as simple as “tiers 1, 2 and 3 will be done, but not initial surveys in tier 3 and tier 4.” Or the statement can be more detailed, especially if the state will complete part of a tier, and needs to specify what won’t be done in the tier;
10. Most recent Indirect Cost Agreement.

CMS Budget Analysis and Adjustment

CMS will review and agree upon final budget amounts for FY27 for each state once Congress has finalized a budget. The funding available to states will be allocated based on several factors that are considered such as:

- Historical Spending;
- Workload Requirements;
- State Hiring Challenges.

States should make the CMS Locations aware of expected funding shortfalls or overages as soon as possible in the FY to ensure that the most effective funding distribution can be made as soon as Congress passes a budget.

Additional Funding levels to be considered after Congress approves the Fiscal Year Budget.

Appendix 2: Priority Tier Structure for Survey and Certification Activities for Providers and Suppliers

Provider and Supplier Oversight

Note on statistical convention used throughout provider and supplier certification tier workloads: Whenever standards are expressed in months, 0.9 of the succeeding months is included to permit the completion of any survey in progress. Hence, a 12-month average is tracked as 12.9 months. Similarly, a 3-year interval is tracked as 36.9 months and a 6-year interval is tracked at 72.9 months.

For reference, Tiered Complaint Investigations listed within each program table, the timeframes for completion are found within Chapter 5 of the SOM (5075.9 - Maximum Time Frames Related to the Federal Onsite Investigation of Complaints/Incidents). This document provides the guiding prioritization of the aggregate workload.

Priority Tier Structure for Complaint Investigations of Acute and Continuing Care and Long-Term Care

Tier 1	Tier 2	Tier 3	Tier 4
Complaint investigations prioritized as IJ for acute and continuing care (ACC) providers/suppliers (deemed and non-deemed) and Long-Term Care (LTC) facilities. EMTALA Complaint Surveys: Only when authorized by the CMS Location. All EMTALA complaints surveys authorized are prioritized as IJs or Non-IJ High Full Surveys Pursuant to Complaints: Full surveys may be required by the CMS Location after a complaint investigation that finds condition level non-compliance for deemed providers/suppliers. Restraint/seclusion death incidents (hospitals, psychiatric hospitals, PRTFs or CAH DPUs), where the CMS Location authorizes investigation.	Complaint Investigations prioritized as Non-IJ High.	Complaint investigations of non-deemed ACC providers/suppliers and LTC facilities prioritized as Non-IJ Medium.	Complaints of non-deemed ACC providers/suppliers and LTC facilities triaged as Non-IJ Low.

Please refer to SOM Chapter 5 - Complaint Procedures for the maximum time frames related to the investigation of complaints/incidents.

Priority Tier Structure for Standard Survey Activities of Acute and Continuing Care and Long-Term Care:

Ambulatory Surgical Centers (ASCs)

Tier 1	Tier 2	Tier 3	Tier 4
	Initial certification Provider/Supplier with a CMS-determined access to care issue (the provider is responsible for providing the information) Targeted Surveys (25%): The state performs surveys totaling 25% of all non-deemed ASCs in the state (or at least 1, whichever is greater), focusing on ASCs not surveyed in more than 4 years or based on state judgment for those ASCs more at risk of quality problems. Some of the targeted surveys may qualify to count toward the Tier 3 priority. States with seven or fewer non-deemed ASCs must survey at least one ASC unless all non-deemed ASCs were surveyed within the prior two years.	6-Year Interval: Additional surveys are done to ensure that no more than six years elapse between surveys for any one particular non-deemed ASC. Initial certification: All others not listed under Tier 1 or 2 Initial certification – Provider/Supplier’s application to Medicare exceeds 150 days with a deeming option: If more than 150 days has passed since the MAC has recommended approval of the application and a deeming option exists, then the initial certification would be a Tier 2 priority.	

Community Mental Health Centers (CMHCs)

Tier 1	Tier 2	Tier 3	Tier 4
	5% Targeted Surveys: Each year, the state surveys 5% of the providers in the state (or at least one, whichever is greater), based on CMS Location judgment for those providers more at risk of quality problems. Some of the targeted surveys may qualify to count toward the tier 3 priorities. Targeted sample requirements do not apply to states with fewer than seven CMHCs. Initial certification - Provider/Supplier's application to Medicare exceeds 150 days with no deeming option or with a CMS-determined access to care issue (the provider is responsible for providing the information): If more than 150 days has passed since the MAC has recommended approval of the application and no deeming option exists, then the initial certification would be a Tier 1 priority. This would also include cases where CMS has determined an access to care issue.	5-Year Interval Initial certification- All others not listed under Tier 2.	

Comprehensive Outpatient Rehabilitation Facilities (CORFs)

Tier 1	Tier 2	Tier 3	Tier 4
	Initial certification - Provider/Supplier's application to Medicare exceeds 150 days with no deeming option or with a CMS-determined access to care issue (the provider is responsible for providing the information): If more than 150 days has passed since the MAC has recommended approval of the application and no deeming option exists, then the initial certification would be a Tier 2 priority. This would also include cases where CMS has determined an access to care issue. 5% Targeted Surveys: Each year, the state surveys 5% of the providers in the state (or at least one, whichever is greater), based on state judgment for those providers more at risk of quality problems. Some of the targeted surveys may qualify to count toward the tier 3 and 4 priorities. States with fewer than seven providers of this type are exempt from this requirement.	7-Year Interval: Additional surveys are done to ensure that no more than seven years elapse between surveys for any one particular provider. Initial certification- All others not listed under Tier 2.	

End-Stage Renal Dialysis (ESRD) Facilities

Tier 1	Tier 2	Tier 3	Tier 4
Initial surveys: States must conduct initial certification surveys within 90 days of the MAC approval of the CMS- 855, unless the supplier has elected a deeming option.	Outcomes List: 100% of the ESRD facilities on the state Outcomes List	3.5-Year Max Interval (42.9 months): Additional surveys are done to ensure that no more than 3.5 years elapses between surveys for any one particular ESRD facility. Relocations, expansion of service(s)*, and/or addition of station(s) requests, as needed.	

*Addition of home dialysis services may be processed in a higher Tier on a case-by-case basis. See “Policy Spotlight for the Fiscal Year” section for more information.

Federally Qualified Health Centers (FQHCs) and Rural Health Clinics (RHCs)

Tier 1	Tier 2	Tier 3	Tier 4
	Initial certification: Provider/Supplier’s application to Medicare exceeds 150 days with a deeming option-If more than 150 days has passed since the MAC has recommended approval of the application and a deeming option exists, then the initial certification would be a Tier 2 priority.	7-Year Interval: Additional surveys are done to ensure that no more than seven years elapse between surveys for any RHC. Initial certification: All others not listed under Tier 1 or 2	There is no certification or re-certification requirement for FQHCs. FQHCs are only subject to complaint surveys (partial or full, as needed.)

Home Health Agencies (HHAs)

Tier 1	Tier 2	Tier 3	Tier 4
36.9-Mo. Recertification Max. Interval: No more than 36.9 months elapse between completed surveys for any particular agency.	Initial certification: Provider/Supplier with a CMS-determined access to care issue (the provider is responsible for providing the information)	Initial certification Provider/Supplier's application to Medicare exceeds 150 days with a deeming option- If more than 150 days has passed since the MAC has recommended approval of the application and a deeming option exists, then the initial certification would be a Tier 3 priority. Initial certification- All others not listed under Tier 1 or 2	Surveys of HHAs de-activated (by the MAC) —for failure to bill Medicare for 12 consecutive months.

Hospice

Tier 1	Tier 2	Tier 3	Tier 4
36.9-Mo. Recertification Max. Interval: No more than 36.9 months elapsed between completed surveys for any particular agency.	Initial certification- Provider/Supplier with a CMS- determined access to care issue (the provider is responsible for providing the information)	Initial certification- All others not listed under Tier 1 or 2 Initial certification-Provider/Supplier's application to Medicare exceeds 150 days with a deeming option- If more than 150 days has passed since the MAC has recommended approval of the application and a deeming option exists, then the initial certification would be a Tier 3 priority.	

Hospitals, Psychiatric Hospitals, and Critical Access Hospitals (CAHs) - Deemed

Tier 1	Tier 2	Tier 3	Tier 4
			The conversion of a deemed hospital or CAH or the addition of swing beds as a new service in an existing deemed hospital or CAH is a tier 4 priority. Deemed CAHs are expected to be surveyed by their AOs for their conversion surveys.

Hospitals, Psychiatric Hospitals, and Critical Access Hospitals (CAHs) - Non-Deemed

Tier 1	Tier 2	Tier 3	Tier 4
5% Targeted Sample: States survey at least one, but not less than 5% of the non-deemed hospitals, 5% of the non-deemed psychiatric hospitals, and 5% of non-deemed CAHs in the state, selected by the state based on state judgment regarding those most at risk of providing poor care. Some targeted surveys may count toward the tier 3 and 4 priorities. Targeted sample requirements do not apply to states with fewer than seven non-deemed hospitals, psychiatric hospitals or CAHs.	5-Year Recertification Max. Interval: No more than five years elapse between surveys for any particular non-deemed hospital, psychiatric hospital, or CAH. Initial certification - Provider/Supplier's application to Medicare exceeds 150 days with a deeming option- If more than 150 days has passed since the MAC has recommended approval of the application and a deeming option exists, then the initial certification would be a Tier 2 priority.	4-Year Recertification Max. Interval: No more than four years elapse between surveys for any particular non-deemed hospital or CAH. Recertifications of Psych Hospitals: 3-year average recert surveys of non-accredited/non-deemed psychiatric hospitals only. New IPPS Exclusions: All new rehabilitation hospitals/units and new psychiatric units seeking exclusion from IPPS as well as existing providers newly seeking such exclusion. The SA does not need to conduct an on-site survey for verification of the exclusion requirements but instead, may process an attestation.	<i>Note:</i> Conversion of a non-deemed hospital to a CAH, or a non-deemed CAH back to a hospital is a conversion, not an initial certification and at state option may be done as tier 2, 3, or 4.

Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID)

Tier 1	Tier 2	Tier 3	Tier 4
15.9 Mo. Recertification Max. Interval: No more than 15.9 months elapse between completed surveys for any particular ICF/IID. 12.9-Mo. Recertification Avg: All ICF/IIDs in the state are surveyed on average, once per year. The Statewide average interval between consecutive standard surveys must be 12.9 months or less.		Initial certification- Surveyed at state priority	N/A

Outpatient Physical Therapy and (OPT) and Speech-Language Pathology (SLP) services

Tier 1	Tier 2	Tier 3	Tier 4
	Initial certification- Provider/Supplier with a CMS-determined access to care issue (the provider is responsible for providing the information) 5% Targeted Surveys: Each year, the state surveys 5% of the providers in the state (or at least one, whichever is greater), based on state judgment for those providers more at risk of quality problems. Some of the targeted surveys may qualify to count toward the tier 3 and 4 priorities. States with fewer than seven providers of this type are exempt from this requirement.	7-Year Interval: Additional surveys are done to ensure that no more than seven years elapse between surveys for any one particular provider. Initial certification- All others not listed under Tier 2 Initial certification- Provider/Supplier's application to Medicare exceeds 150 days with a deeming option - If more than 150 days has passed since the MAC has recommended approval of the application and a deeming option exists, then the initial certification would be a Tier 3 priority.	

Portable X-Ray (PXR) Suppliers

Tier 1	Tier 2	Tier 3	Tier 4
	5% Targeted Surveys: Each year, the state surveys 5% of the providers in the state (or at least one, whichever is greater), based on state judgment for those providers more at risk of quality problems. Some of the targeted surveys may count toward the tier 3 and 4 priorities. States with fewer than seven providers of this type are exempt from this requirement	7-Year Interval: Additional surveys are done to ensure that no more than seven years elapse between surveys for any particular provider. Initial certification- All others not listed under Tier 2. Initial certification- Provider/Supplier's application to Medicare exceeds 150 days with no deeming option or with a CMS- determined access to care issue (the provider is responsible for providing the information)- If more than 150 days has passed since the MAC has recommended approval of the application and no deeming option exists, then the initial certification would be a Tier 1 priority. This would also include cases where CMS has determined an access to care issue.	

Psychiatric Residential Treatment Facilities (PRTFs) - (Medicaid Psych < 21) Initial certification is achieved by the facility submitting attestation to the State Medicaid Agency (SMA).

Tier 1	Tier 2	Tier 3	Tier 4
	5-Year Recertification Interval: In States with five or more PRTFs, 20% of PRTFs must be surveyed at least annually to meet the 5-year interval (Complaint investigations do not count towards 20%).		

Rural Emergency Hospitals (REHs) - Non-Deemed

Tier 1	Tier 2	Tier 3	Tier 4
Targeted Sample: Because all REHs are a new non-deemed provider type, States should survey 100% of REHs within 12 months of the REH certification date. Initial certification - Provider/Supplier's application to Medicare exceeds 150 days - determined access to care issue (the provider is responsible for providing the information)- If more than 150 days has passed since the MAC has recommended approval of the application, then the initial certification would be a Tier 1 priority. This would also include cases where CMS has determined an access to care issue. Initial certification of eligible facilities that subsequently closed and require an initial on-site survey.	5-Year Recertification Max. Interval: No more than five years elapse between surveys for any non- deemed REH.		

Transplant Programs

Tier 1	Tier 2	Tier 3	Tier 4
Initial certification - Provider/Supplier's application to Medicare exceeds 150 days with no deeming option or with a CMS-determined access to care issue (the provider is responsible for providing the information)- If more than 150 days has passed since the MAC has recommended approval of the application and no deeming option exists, then the initial certification would be a Tier 1 priority. This would also include cases where CMS has determined an access to care issue.	All Transplant Programs- Performance-Based Reapproval Surveys Standard Reapproval Surveys (5-year interval)—applicable to transplant programs in states with fewer than two transplant programs identified in Performance-Based Reapproval Surveys. Reapproval surveys are for all organ transplant types.	Initial certification- All others not listed under Tier 1. Standard Reapproval Surveys (5-year interval)— applicable to transplant programs in states with two or more transplant programs identified in Performance-Based Reapproval Surveys. Reapproval surveys are for all organ transplant types.	

Long-Term Care (LTC) Facilities

Tier 1	Tier 2	Tier 3	Tier 4
15.9-Month Recertification Max. Interval: No more than 15.9 months elapsed between completed surveys for any particular nursing home. 12.9-Mo. Recertification Avg: All nursing homes in the state are surveyed on average, once per year. The statewide average interval between consecutive standard surveys should be 12.9 months or less “Off-Hours” Surveys: States are required to conduct at least 10% of the standard health surveys on the weekend or before 8:00 a.m. or after 6:00 p.m. (i.e., “off- hours). States shall conduct at least 50% of their required off- hours surveys on weekends using the list of facilities with potential staffing issues provided by CMS. Special Focus Facility Surveys: Each State Survey Agency shall conduct one standard recertification survey of each designated Special Focus Facility (SFF) at least once every 186 days. SFFs must have a standard health survey within 186 calendar days of selection. A complaint survey may allow for the extension of one 186-day interval between standard surveys, but in no case should more than 186 days elapse between surveys of any type. A complaint survey may be used to extend the timing of the next standard health survey only once during a nursing home’s term as an SFF.	Initial certification- Provider/Supplier’s application to Medicare exceeds 150 days with no deeming option or with a CMS- determined access to care issue (the provider is responsible for providing the information): If more than 150 days has passed since the MAC has recommended approval of the application and no deeming option exists, then the initial certification would be a Tier 2 priority. This would also include cases where CMS has determined an access to care issue.	Initial Surveys of Nursing Homes that are seeking Medicaid-only funding—funded only by Medicaid (not Medicare) and surveyed at state priority. Initial certification- All others not listed above or under Tier 1 or 2.	

**Note: Conversion of a Medicaid-only Nursing Facility (NF) to dual-certification (SNF/NF) does not require an initial Medicare certification survey provided all of the following are met: (a) the Medicaid survey has been completed within the prior six months, (b) the majority of beds in the facility will remain Medicaid-certified and (c) the procedures in SOM 7002 are followed for SNFs.*

**U.S. Department Of Health & Human Services
