

## MEDICARE DOCUMENTATION JOB AID FOR DOCTORS OF CHIROPRACTIC

Have you received a request for documentation from a Medicare contractor but not sure if your records comply? We understand the challenges Doctors of Chiropractic face when determining what to include in responding to a request for medical records. The A/B Medicare Administrative Contractors (MACs) partnered together to create this job aid to help you properly respond to these requests.

Documentation shall include, but is not limited to:

### Patient Information

- Name of beneficiary and date of service on all documentation

### Subluxation

- Subluxation demonstrated by X-ray, date of X-ray: \_\_\_\_\_
  - A CT scan and/or MRI is acceptable evidence if subluxation of spine is demonstrated
  - If diagnostic studies were taken in a hospital or outpatient facility, a written report, including interpretation and diagnosis by a physician, must be present in patient's medical record
  - Documentation of chiropractor's review of the X-ray/MRI/CT, noting level of subluxation
  - The X-ray must have been taken reasonably close to (within 12 months prior or 3 months following) the beginning of treatment. In certain cases of chronic subluxation (for example, scoliosis), an older X-ray may be accepted if the beneficiary's health record indicates the condition has existed longer than 12 months and there is a reasonable basis for concluding that the condition is permanent.
- or**
- Subluxation demonstrated by physical examination (Pain, Asymmetry/misalignment, Range of motion abnormality, Tissue tone changes [P.A.R.T.]; at least 2 elements, 1 of which must be A. or R.)
  - Include dated documentation of initial evaluation
  - Primary diagnosis of subluxation (including level of subluxation)
- Documentation of presence or absence of subluxation must be included for every visit
- Any documentation supporting medical necessity

## Initial Evaluation

- History
  - Date of initial treatment
  - Description of present illness
  - Symptoms bearing a direct relationship to level of subluxation causing patient to seek treatment
  - Family history (if relevant) (recommended)
  - Past health history (recommended)
  - Mechanism of trauma (recommended)
  - Quality and character of symptoms/problem (recommended)
  - Onset, duration, intensity, frequency, location and radiation of symptoms (recommended)
  - Aggravating or relieving factors (recommended)
  - Prior interventions, treatments, medication, and secondary complaints (recommended)
- Contraindications (e.g., risk of injury to patient from dynamic thrust, discussion of risk with patient) (recommended)
- Physical examination (P.A.R.T.)
  - Evaluation of musculoskeletal/nervous system through physical examination
- Documentation of presence or absence of subluxation must be included for every visit
- Treatment given on day of visit (if applicable)
  - Include specific areas/levels of spine where manipulation was performed
  - Manual devices that are hand-held with the thrust of the force of the device being controlled manually may be covered; however, no additional payment is made nor does Medicare recognize an extra charge for use of the device.

## Treatment Plan

- Frequency and duration of visits
- Specific treatment goals
- Objective measures to evaluate treatment effectiveness

## Subsequent Visit

- History
- Review of chief complaint
- Changes since last visit
- System (if relevant)
- Physical examination (P.A.R.T.)
  - Assessment of change in patient condition since last visit
  - Evaluation of treatment effectiveness (address objective measures included in treatment plan)
- Documentation of presence or absence of subluxation must be included for every visit
- Treatment given on day of visit (include specific areas/levels of spine where manipulation was performed)

## General Guidelines

- Ensure medical records submitted support the service is “corrective treatment,” rather than maintenance
  - For Medicare purposes, an AT modifier must be placed on a claim when providing active/corrective treatment to treat acute or chronic subluxation
    - Do not use Modifier AT when maintenance therapy has been performed
    - Modifier AT must only be used when chiropractic manipulation is “reasonable and necessary” as defined by national and local policy
    - NOTE:** Presence of the AT modifier may not in all instances indicate the service is reasonable and necessary. As always, contractors may deny if appropriate after medical review.
- Submit records for all dates of service on claim
- Documentation shall be legible and complete (including signatures)
- Legible signatures/credentials of professionals providing services
  - If signatures are missing or illegible, include a completed signature attestation statement
  - For illegible signatures, include a signature log
  - For electronic health records, include a copy of electronic signature policy and procedures describing how notes and orders are signed and dated. Validating electronic signatures depends on obtaining this information.
- Abbreviation key (if applicable)
- Any other documentation provider deems necessary to support medical necessity of services billed, as well as documentation specifically requested in the additional documentation request (ADR) letter
- Copy of Advance Beneficiary Notice of Noncoverage (if applicable)
