# CMS Interoperability and Patient Access Final Rule

Alexandra Mugge, MPH
Director, Health Informatics and Interoperability Group (HIIG)
Deputy Chief Health Informatics Officer
Office of Burden Reduction and Health Informatics (OBRHI)

Denise St. Clair, PhD Senior Policy Expert, HIIG

Scott J. Cooper, MMSc, PA-C Senior Technical Advisor, CCSQ

#### **PATIENT ACCESS**

Empowering patients by giving them access to their health information so they can make the best informed decisions about their care, all while keeping that information safe and secure.

## **CONNECTING HEALTHCARE** THROUGH DATA EXCHANGE

Driving to value-based care by promoting seamless data exchange across the care continuum.

### **TECHNOLOGY & STANDARDS**

Promoting the use of the latest technology and standards to drive innovation and data exchange in healthcare.

YOUR HEALTH DATA WHEN YOU NEED IT MOST

# CMS INTEROPERABILITY & PATIENT ACCESS FINAL RULE

Providers are required to use

2015 Edition Certified EHR

**Promoting Interoperability** 

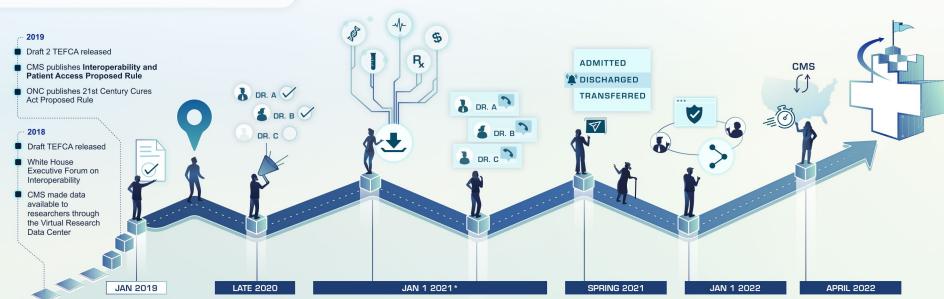

program requirements take

effect for all providers

Technology

March 2018

MyHealthEData and Blue Button 2.0 launched Public reporting of Patient Access API

clinician or hospital

data blocking and

providers without

digital contact info

in NPPES

Patient health care claims and clinical info made available through standards-based APIs for Medicare Advantage, Medicaid and CHIP FFS, Medicaid and CHIP managed care, and OHPs on the FFES

Provider Directory API Payer Provider Directories made available through standards-based APIs

★ both requirements will not be enforced until July 2021

Hospitals send event notifications regarding admission, discharge, and transfer to other providers Payer-to-Payer data exchange Payers required to exchange patient USCDI data upon request Improved benefits coordination for dually eligible individuals

2022
